  Action of Manganese Dioxide on Simple Carbohydrates, 1301
Foster, A S Origin and Dispersal of Flowering Plants (Certain Herbaceous Ranalean Forms might represent an early Angiospermous Type with Dichotomous Venation), 1200
Foster, A S , and Gifford, Jr , Ernest M Comparative Morphology of Vascular Plants, *review* by Dr S Williams, 84
Foster, J W (Leadbetter, E R , and) Incorporation of Molecular Oxygen in Bacterial Cells utilizing Hydrocarbons for Growth, 1428
Foster, K Awarded the Heinrich Hertz Premium of the British Institution of Radio Engineers 857
Fotino, M , and others Loss of Plasticity of Erythrocytes coated with Incomplete Antibodies, 1808
Foulkes, Paul (edited by) Wisdom of the West (Bertrand Russell), *review* by Gerd Buchdahl, 1829
Foundations of Set Theory (Prof Abraham A Fraenkel and Prof Yehoshua Bar-Hillel), *review* by Dr L S Goddard, 1178
Foundations (Conceptual), of Science, *review* by Gerd Buchdahl, 572
Fourier Series, *review* by Prof T A A Broadbent, 1176
Fowden, Dr L (Noe, Dr F F , and) α-Amino-β-(pyrazolyl-N) Propionic Acid a New Amino-Acid from *Citrullus vulgaris* (Water Melon), B A 69
Fowl Semi-Albino, a Third Sex-linked Allelomorph of Silver and Gold in the (W F Werret, A J Candy J O L King and Dr P M Sheppard), 480
Fowles, Dr G W A Title of senior lecturer in chemistry at the University of Southampton conferred on, 595
Fox, P G Supercooling of Water Droplets, 546
Foxon, Prof G E H Visual Illustration of University Lectures, 515
Fraction (Paraffin Wax), from Tobacco Leaf and Tobacco Smoke Composition of a (Dr W Carruthers and Dr R A W Johnstone), 1131
Fraction (Phosphatido-Peptide), of Pancreas Slices Effect of Acetylcholine on the Incorporation of Radiophosphorus into the (Prof C G Huggins), 1412
Fraction (Unsaponifiable), of Crude Vegetable Oils Chromatographic Identification of the Antilipaemic X Factor of the (Prof M C Nath, A Saikia and B I Uppin), 1635
Fractional Micro-sublimation Technique (W H Melhuish), 1933
Fractionation of the System bringing about Oxidative Phosphorylation in *Azotobacter vinelandii* (H G Hovenkamp), 471
Fractionation Phenomena in Nuclear Weapons Debris (K Edvarson, Kerstin Low and J Sisefsky), 1771
Fractionation (Chromatographic), of Rat Tail Tendon Collagen (Alexander Kessler, Hyman Rosen and Dr Stanley M Levenson), 1640
Fractionation (Dose) An Effect of, on the Incidence of Bone Tumours using Radioactive Phosphorus (Dr N M Blackett), 565
Fractionation (Routine) The Behaviour of Haptoglobin during (Marion Steinbach and L Pejaudier), 362
Fractions (Biologically Active), of Deoxyribonucleic Acid Immunization with and Subsequent Specific Infection of Mice (Dr M Kohoutova), 1965
Fractions (Promethium Plasma), in Rats Distribution of (Dr Bergene Kawin), 1722
Fractions (Subcellular) Distribution of Enzyme Systems responsible for Steroid Metabolism in Different Tissues and (Virendra B Mahesh and Frank Ulrich), 1147
Fracture Atomic Mechanisms of (United States National Academy of Sciences—National Research Council Conference on), 324
Fracture (Chain), and Cross-Linking of Rubber by High-Energy Radiation Estimation of (P Hayden), 1865
Fractures (Bone) Urinary β-Glucuronidase Activity in Patients with (F J W Lewis and Dr Constance H J Plaice), 1249
Fraenkel, Prof Abraham A , and Bar-Hillel, Prof Yehoshua Foundations of Set Theory, *review* by Dr L S Goddard, 1178
Fraenkel, Prof G (Yamamoto, Dr Robert T , and) Common Attractant for the Tobacco Hornworm, *Protoparce sexta* (Johan) and the Colorado Potato Beetle, *Leptinotarsa decemlineata* (Say), 206
Fraenkel-Conrat, H Specificity in Protein Biogenesis (Structure of Tobacco Mosaic Virus), 1198
Fragments (Cell) Paper Chromatography of (A T Wilson), 2016
Français, G (Barrere, M , and) Chemistry of Propellants (Air-Burning Fuels—Properties and Preparation of Ramjet Fuels), 779
France, W G (Bingold, A C , and) Biomechanics (Film on Late Results of Four Massive Internal Prosthesis), 513
France Faune de, Vol 62, Coléoptères Curculionides troisieme partie (Adolphe Hoffmann), *review* by R T Thompson, 573
  The Weevils of, *review* by R T Thompson, 573
Francis, Frank C Elected an Honorary Member of the American Academy of Arts and Sciences, 409

Francis, G Ionization Phenomena in Gases (Recent Identification of Alfven Waves in a High-Current Toroidal Discharge), 1356
Francis, Dr G H, and Charig, Dr A J Return from the British Museum (Natural History) Expedition to South Peru, 1687
Francis, Dr W W *Obituary* by Dr W R Bett, 316
Frani, Prof F C, and others Evidence for Distinct Sectors in Polymer Single Crystals, 810
Frank, Louis A (Van Allen, Prof James A, and) Radiation Measurements to 658,000 km with *Pioneer IV*, 219
Frankel, Fred R, and others Mechanism of Immunological Unresponsiveness, 873
Frankenburg, W G, and others (edited by) Advances in Catalysis and related Subjects, Vol 10, *review* by Dr F S Stone, 1974
Franklin, C A, and others Measurement of Cosmic Noise at Low Frequencies above the Ionosphere, 785
Franklin, Dr Richard M, and Wecker, Dr Eberhard Inactivation of some Animal Viruses by Hydroxylamine and the Structure of Ribonucleic Acid, 343
Franklin Institute John Price Wetherill Medals awarded to Dr A J P Martin, Dr R L M Synge and Dr A T James, 857
  Annual Report for 1958, 1279
Frans, Jobsis (Chance, Prof Britton, and) Changes in Fluorescence in a Frog Sartorius Muscle following a Twitch, 195
Fraser, Prof D A S Statistics, an Introduction, *review* by J Durbin, 1008
Fraser, Dr G P (Shivas, Dr A A, and) Lymphoid Necrosis Induced by Lipid Emulsions, 1813
Fraser, Dr J H Atlantic Hydromedusae, *review*, 300
  Polar Front Survey (Biology—Indicator Species in the Faroe–Iceland Ride Region), 1183
Fraser, R D B Structure and Chemistry of Proteins (Structural Organization of Keratin), 1276
Frater, R, and others Structure and Chemistry of Proteins (Rôle of Thiols in Disulphide Interchange Reactions), 1277
Frazer, Dr J F D British Mammals and some Others, 29
Fredericks, E M, and others Carrier Gas and Sensitivity in Gas Chromatography, B A 54
Free, Dr John B, and Butler, Dr Colin G Bumblebees, *review* by Dr M Delia Allen, 1178
Free Energy of Hydrolysis of Adenosine Triphosphate Equilibrium Constant of the Galactokinase Reaction and (Dr M R Atkinson, Eleanor Johnson and Prof R K Morton), 1925
Free-Floating Marine Red Alga (Dr H B S Womersley and Dr R E Norris), 828
Free Learning A Defence of (Lord Beveridge), *review* by R Brightman, 576
Free Radicals, an Introduction (A F Trotman-Dickenson), *review* by Dr T M Sugden, 1259
Free Radicals in Coal during Carbonization at Different Heating Rates Number of (J Smidt and Prof D W van Krevelen), 719
Free Radicals as Studied by Electron Spin Resonance (Dr D J E Ingram), *review* by Dr T M Sugden, 1259
Free Radicals in X-Rayed Seeds of High and Low Water Content, as Measured by Electron Spin Resonance (Dr W Klingmuller, Dr G R Lane, M C Saxena and Dr D J E Ingram), 464
Free Sulphydryl (Cystine-Cysteine, Glutathione and Total) Contents of, in Arsenic-resistant and Sensitive Strains of the Blue Tick, *Boophilus decoloratus* (Dr J S Harington), 1739
Free Trade in Land in the Victorian Period (O R McGregor), 1916
Freed, Prof V Plant Growth Regulation (Physical Chemical Aspects of Synthetic Auxins with respect to their Mode of Action), 600
Freeman, D E, and Ross, Dr I G At the Second Australian Spectroscopy Conference (Results of a Normal Co-ordinate Analysis of the 33 Planar Vibrations of Naphthalene), 1196
Freeman, Dr H C, and others Crystallographic Studies of the Biuret Reaction, 707
Freeman, Dr Thomas, and others Chronic Schizophrenia, *review* by Prof Martin Roth, 487
Freeze-dried Pork and Fish Absorption of Atmospheric Moisture by (Norman A Matheson), 1949
Freezing at an Extremely Low Temperature Prefreezing as a Method enabling Animals to survive (Eizo Asahina), 1003
French Blood Donors Frequencies of the Haptoblobin Groups in 406 (Dr J Moullec and Dr J M Fine), 196
French Journal of Science Teaching, 593
Frequencies of the Haptoglobin Groups in 406 French Blood Donors (Dr J Moullec and Dr J M Fine), 196
Frequencies (Low) Measurement of Cosmic Noise at, above the Ionosphere (J P I Tyas, C A Franklin and A R Molozzi), 785
Frequency of Caesium in Terms of U T $+\Delta T$ An Error in the Determination of ΔT from the Lunar Ephemeris and the (C A Murray), 441
Frequency of the New Blood Group Antigens Js^a among South American Indians (Dr Miguel Layrisse and Dr Zulay de Layrisse), 640
Frequency (Caesium), and Time Standard An Improved (Dr L Essen and J V L Parry), 1791
Frequency (Fusion), and Light Quantity (A Angel, D A Hems, W Rose, R C Woledge and Dr R A Weale), 1873
Frequency (Low-) (100 kc/s) Radio Noise from the Aurora (R L Dowden), 803
Frequency (Very High) Radio Signals at Ionospheric Heights Refraction of (S Weisbrod and L Colin), 119
Frequency (Very Low) Phenomena at Godhavn, Greenland Observations of 'Whistlers' and (Eigil Ungstrup), 806
Frequency (Very Low-) Spectra of Atmospherics propagated through the Ionosphere (Tatsuzo Obayashi), 34
Frequency Lines Auroral (Dr J M Stagg), 262, (Dr Bengt Hultqvist), 263
Frequency Range (Encephalographic) Subjective Light Pattern Spectroscopy in the (Prof M Knoll and J Kugler), 1823
Fresh Nerve Cells (Isolated), and Glial Cells from Control and Stimulated Animals Quantitative Assay of Compounds in (Prof Holger Hyden), 433
Freshwater Biological Association Twenty-seventh Annual Report (1958-59), 1845
Freshwater Phytoplankton Buoyancy in relation to the Ecology of the (Dr J W G Lund), 1534
Freud, Anna Elected an Honorary Member of the American Academy of Arts and Sciences, 409
Freundlich, Prof E F Retirement from the directorship of the University of St Andrews Observatory, 768, work of, 768
Frey-Wyssling, Prof A, and Buttrose, Dr M S Photosynthesis in the Ear of Barley, 2031
Frick, Dr M H, and others Release of Adenosine Triphosphate and Serotonin from Injured Cellular Blood Elements in Extracorporeal Circuits, 1127
Fricke (Sophie) Research Fellowship in the Rockefeller Institute awarded to Dr J S Gillespie, 595
Friction in Textiles (Dr H G Howell, K W Mieszkis and Dr D Tabor), *review*, 1765
Friction Coefficients (Rotational), of Models of Tobacco Mosaic Virus and the Size of the Virus Particle (Dr A J Haltner and Dr B H Zimm), 265
Fridrichsons, J, and Mathieson, A McL Structure and Chemistry of Proteins (Three-dimensional Structure of Toluene-*p*-sulphonyl-L-prolyl-L-hydroxyproline Monohydrate), 1276
Fried, Jojtech, and others Vapour–Liquid Equilibrium (translated by G Standart), *review* by Dr R Sargent, 837
Friend, J, and Nakayama, T O M Destruction of Carotenoids in Isolated Chloroplasts, B A 66
Friend, Dr J A, and Lyons, Dr L E At the Second Australian Spectroscopy Conference (Two Transitions in the Crystal Spectrum of Sodium Nitrate), 1196
Friends of the Lake District Annual Report, 1844
Fries, Dr Bengt Effect of Polyphloretin Phosphate on the Suspension Stability of Red Blood Corpuscles, 62
Fripiat, Prof J J Clay Minerals (Surface Structure in Clays), 780
Frog Hypophysial Extracts (Fish and) Chromatographic and Biological Characteristics of (Active Principles of the Neurohypophysis of Cold-blooded Vertebrates), (B T Pickering and Prof H Heller), 1463
Frog Nerve Cells Resting and Action Potentials of Reversed Polarity in (Dr I Tasaki), 1574
Frog Sartorius Muscle Changes in Fluorescence in a, following a Twitch (Prof Britton Chance and Frans Jobsis), 195
Frohlich, Prof H Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 157
Frommhold, L Ionization Phenomena in Gases (Measurement of the Drift Velocity and Mean Energy of Agitation of Electrons), 1354
Frondel, Prof Clifford Systematic Mineralogy of Uranium and Thorium, *review* by Prof C F Davidson, 576
Front (The Moving), of Carbohydrates, *review* by Dr Alfred Gottschalk, 662
Frontali, Laura, and Tecce, Giorgio Enzymic Conversion of L-Rhamnulose to L-Fuculose in *Escherichia coli*, 1315
Froome, Dr K D A New Microwave Harmonic Generator, 808
Froyd, G, and Round, M C Infection of Cattle with *Cysticercus bovis* by the Injection of Onchospheres, 1510
Frozen Fat Body Cells in an Insect Survival of (R W Salt), 1426
Fructifications (Presumed Glossopteridean) Occurrence of, in Rhodesia and Nyasaland (Dr William S Lacey), 1592
Fruit Production Tree (Dr James S Shoemaker and Dr Benjamin J E Teskey), *review* by Prof H W Miles, 487
Fruit Set in Sweet Potato Effect of Indole Acetic Acid and α-Naphthalene Acetic Acid on the Growth, Flowering and (G Satyanarayana and Dr G Rangaswami), B A 73
Fruitlets (Apple) A Kinin in (Dr P L Goldacre and Dr W Bottomley), 555
Fry, Dr R J M (Acheson, Fiona, and) Induced Tolerance to D-Tubocurarine Chloride in the Cat, 1409
Fry, W L Origin and Dispersal of Flowering Plants (Angiosperms in various Tertiary Floras of Canada), 1201
Frye, William Antibiotics in Tropical Disease, 1115
Fuchs, Sir Vivian Research in the Antarctic during 1960, 851
Fuchsia Female-sterile Flowers in (M Holdsworth), 1024
L-Fuculose Enzymic Conversion of L-Rhamnulose to, in *Escherichia coli* (Laura Frontali and Giorgio Tecce), 1315
Fuel Uranium as, 318
Fuel Treatment Nuclear, *review* by Dr J E Littlechild, 1346
Fuels (Nuclear) Chemical Processing of (Dr F S Martin and Dr G L Miles), *review* by Dr J E Littlechild, 1346
Fueter, Dr Ed At the 139th Annual Meeting of the Swiss Society for Natural Sciences (On the little-known Mathematician and Philosopher de Crousaz, of Lausanne, 1663-1750), 1455
Fuhrman, Frederick A, and Giese, Arthur C (edited by Victor E Hall, in association with) Annual Review of Physiology, Vol 21, *review* by Prof. D C Harrison, 838
Fujikawa, Yasuo (Naughton, Prof John J, and) Measurement of Intergranular Diffusion in a Silicate System—Iron in Forsterite, B A 54
Fujimoto, M Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
Fujino, Prof Yasuhiko, and Negishi, Takashi Presence of Behenic Acid in Sphingomyelin from Horse Spinal Cord, 817
Fujita, Toshio, and others Plant Growth Activities of 5- and 8-Halogeno-Dihydro- and Tetrahydro-1-naphthoic Acids, 1415
Fukai, R, and Meinke, Prof W W Some Activation Analyses of Six Trace Elements in Marine Biological Ashes, 815
Fukasawa, Toshio, and Nikaido, Hiroshi Galactose-sensitive Mutants of *Salmonella*, 1168
Fulbright Programme Travel Grants, 1273
Fuller, Dr R C (Bergeron, Dr J A, and) Influence of Carotenoids on the Infra-Red Spectrum of Bacteriochlorophyll in *Chromatium*, 1340
Fulton, Dr Forrest Title of professor of virology in the University of London (at the London School of Hygiene and Tropical Medicine) conferred on, 1108
Fulton, Dr J D *Obituary* of Dr Louise Pearce, 588
  Chagas's Disease, 1114
Funck, Major Bertil Oil Pollution of the Sea (Recurring Pollution of the Baltic), 950
Function of Carotenoid Pigments in Non-Photosynthetic Bacteria (Micheline M Mathews and W R Sistrom), 1892
Function of Carotenoids in Photosynthetic Bacteria (Prof M Dworkin), 1891

Function for the Extracellular Polysaccharide of *Azotobacter vinelandii* (Dr Michael H Proctor), 1934
Function of Spore Formation in *Bacillus licheniformis* Antibiotic Production as a (Robert W Bernlohr and G D Novelli), 1256
Function (Colloid-storing), of Histiocytes A Method for *in vitro* Investigation of the (Prof N Jancso, Aurelia Jancso-Gâbor and J Balassy), 1070
Function (Confusion) A Mathematical Model for Perception and a Theoretical (M Hammerton), 1668
Function (Enhanced Synaptic), due to Excess Use (Dr Rosamond M Eccles and Dr R A Westerman), 460
Functional Analysis Introduction to (Prof Angus E Taylor), *review* by Prof T A A Broadbent, 666
Functional Groups (Oxygen-containing), in the Organic Matter of a Podzol Soil (J R Wright and M Schnitzer), 1462
Functional Interpretation of the Electron-Microscopic Structure of the Sensory Hairs in the Cristae of the Elasmobranch *Raja clavata* in Terms of Directional Sensitivity (Prof O Lowenstein and J Wersäll), 1807
Functional Lateral Nasal Gland (Salt Gland) Captive Marine Birds possessing a (Prof Larry Z McFarland), 2030
Functional Organization of the Respiratory Chain in Liver Mitochondria (Dr Tokuji Kimura and Dr Thomas P Singer), 791
Functioning of the Lungs A New Method for Studying the (Helge Colldahl, T Alvager and J Uhler), 372
Fundamental Cancer Research Fourteenth Annual Symposium on (Cell Physiology of Neoplasia), (University of Texas Anderson Hospital and Tumour Institute), 1451
Fundamental Research in Britain, 1
Fundamentals of Gas Dynamics (edited by Howard W Emmons), *review* by Prof J H Horlock, 1173
Fundamentals of Papermaking Fibres—Transactions of the Symposium held at Cambridge, 1957 (edited by Francis Bolam), *review* by Dr Julius Grant, 1011
Fundamentals of Statistical Reasoning (M H Quenouille), *review* by Dr D J Finney, 217
Funds for Research and Development Performance in American Industry (United States National Science Foundation, Reviews of Data on Research Development No 14), 1022
Fungal Arbuscular Organs Production of, on Laboratory Media (G A Atkins), 1738
Fungal Physiology A Source Book of, *review* by Dr J L Harley, 85
Fungal Spore Morphology '*LO*-Analysis' as an Aid in the Study of (Dr M M Payak), 738
Fungi British Parasitic (W C Moore), *review* by Dr Lilian E Hawker, 1977
    Physiology of (Prof Vincent W Cochrane), *review* by Dr J L Harley, 85
Fungi in Agar and Soil Cultures Translocation of Cobalt-60 and Caesium-137 by (Dr Erna Grossbard and Dr D R Stranks), 310
Fungi (Pathogenic and Non-Pathogenic) Human Precipitins against Common (Dr J Pepys, Dr R W Riddell and Dr Y M Clayton), 1328
Fungi (Soil), in the Belgian Congo, 236
Fungi (Water), *Blastocladiella* and *Allomyces* *Gamma* Particles, Nadi-Positive Mitochondria, and Development in the (Prof Edward C Cantino and Gilbert Turian), 1889
Fungistatic Antibiotics Inhibitory Effect of, on the Production of Amylase by *Penicillium chrysogenum* (Dr I Horvath and A Szentirmai), 57
Fungitoxicity of Metal Ions (Dr E Somers), 475
Furka, A (Szell, Dr T, and) A New Method for Working up Processing Mixtures containing Anhydrous Aluminium Chloride, 117, *erratum*, 595
Furnaces for Glass Melting The Development of (Dr W M Hampton), 772
Furon, Raymond Causes de la Répartition des Etres Vivants, *review* by Prof Ronald Good, 390
Furst, Arthur, and others Phenazine Di-*N*-Oxide as a Carcinostatic Agent, 908
Furst, Dr M, and others Energy Transfer with special reference to Biological Systems (Electronic Energy Transfer in Solution), 689
Furth, Dr H P Thermonuclear Processes (Hydrodynamic Stability Studies using Plasma and Magnetic Field Configurations), 241
    Ionization Phenomena in Gases (Linear and Toroidal Hard-core or Inverse Pinch), 1357
Furth, Dr R Fluctuation Phenomena and Stochastic Processes (Fluctuations of Macroscopic Parameters), 509
Further Education, Yorkshire Council for, and others Symposium on Recent Developments in Textile Chemistry, 1845
Furukawa, Dr Kazuo A Structural Model for Monatomic Liquids including Metallic Liquids, 1209
Furusaka, Choseki (Hattori, Tsutomu, and) Chemical Activities of *E coli* adsorbed on a Resin, 'Dowex-I', 1566
Fusarium Production of Emetic Material by Species of (Neville Prentice, A D Dickson and Prof J G Dickson), 1319
Fusarium oxysporum f *cubense* A Rapid and Simple Pathogenicity Test for Detecting Virulent Clones of, using Seedlings of *Musa balbisiana* (Dr R H Stover), 1591
Fusarium oxysporum (Pathogenic) Production of a Perfect Stage in a Nutritionally Deficient Mutant of, after Ultra-violet Irradiation (E W Buxton), 1258
Fused and Crystalline Silica Structural Defects in (Dr W C Levengood), 1476
Fusion Frequency and Light Quantity (A Angel, D A Hems, W Rouse, R C Woledge and Dr R A Weale), 1873
Fussell, G E British Agricultural History Society—Winter Conference, 1916
Future of Broadcasting and Television, 1747
Future of Chemicals from Petroleum (L H Williams), 1915
Future of the Etruscans, *review* by Madeleine Smith, 1348

GABRIEL, A H Thermonuclear Research, 1016
Gage, Dr M Appointed Research Fellow in geology in the University of Birmingham, 1915

  Sensitivity of Catharometers in, and the Thermal Conductivity of Binary Gas Mixtures (A B Littlewood), 1631
  Use of Coated Tubing as Columns for (Prof Albert Zlatkis and H R Kaufman), 2010
Gas Chromatography Discussion Group (Hydrocarbon Research Group of the Institute of Petroleum and the) Symposium on Gas Chromatography, 327, 1199
Gas-cooled Reactors Advanced (United States Atomic Energy Commission and the United Kingdom Atomic Energy Authority to exchange Technical Information on), 1361
Gas Dynamics Fundamentals of (edited by Howard W Emmons), *review* by Prof J H Horlock, 1173
  Research in, *review* by Prof J H Horlock, 1173
Gas Engineers, Institution of, and the British Coke Research Association (Coke Oven Managers' Association, the) Joint Meeting, 1778
Gas Hydrates Some Stoicheiometric (Dr D N Glew), 545
Gas Jet (High-Temperature) Blunt-Nosed Bodies in a (F R Sedlund and Prof C C Chang), 812
Gas–Liquid Chromatography Columns Unexpected Formation of Volatile Compounds on (C Weurman and J Dhont), 1480
Gas–Liquid Systems Droplet Circulation and Interfacial Disturbances in (Dr C Ramshaw and Dr J D Thornton), 719
Gas Mixtures (Binary) Sensitivity of Catharometers in Gas Chromatography and the Thermal Conductivity of (A B Littlewood), 1631
Gas Solid Chromatography Separation of the *Meta*- and *Para*-Isomers of the Xylenes, Cresols and Toluidines by (M A Hughes, D White and Prof A L Roberts), 1796
Gases Ionization Phenomena in (J Dutton, D Harcombe and E Jones), 1353
Gases (Permanent) Analysis of, by Gas Chromatography using a Radioactive Ionization Type Detector (V Willis), 894
Gases (Relaxing) Velocity of Sound in (H J Wintle), 2007
Gasification (Carbon) A New Approach to (J D Blackwood and F K McTaggart), 447
Gaskin, A R J Appointed to a lectureship in the Department of Geology in the University of Leeds, 1108
Gasser, Dr Herbert S Honorary degree of D Sc of the Rockefeller Institute conferred on, 26
Gassner, F X (edited by, in association with Rue Jensen and H J Hill) Proceedings of the Third Symposium on Reproduction and Infertility, Colorado State University, *review* by Dr T Mann, 1434
Gasson, D B Electron Bombardment Floating-zone Melting and Allied Electron Bombardment Techniques (Silicon Crystal Pulling Furnace using Heating by Electron Bombardment), 692
Gastambide-Odier, Dr Mireille, and Lederer, Prof E Biosynthesis of Corynomycolic Acid from Two Molecules of Palmitic Acid, 1563
Gaster (Leon) Memorial Premium for 1959 of the Illuminating Engineering Society awarded to Dr R G Hopkinson and J Longmore, 1272
Gastric Juice (Human) Electrophoresis of (Dr Ragnhild Gullberg and Dr Borje Olhagen), 1848
Gastro-intestinal Tract of the Infant Rat Passage of Insulin through the Wall of the (Dr B Mosinger, Z Placer and O Koldovsky), 1245
Gastropods (Marine) Defensive Acid-Secretion in some (Dr T E Thompson), 1162
Gatehouse, Dr B M, and Walsh, A At the Second Australian Spectroscopy Conference (Direct Analysis of Metals and Alloys), 1197
Gatenby, Prof J Bronte International Cytology, *review*, 574
Gates, Prof R Ruggles Taxonomy and Genetics of *Oenothera*, *review* by Dr W B Turrill, 1974
Gattow, G Thermodynamics (Experimental Thermochemistry), 1607
Gause, G F, and others Rate of Appearance of Mutants with Respiration-deficiency in *Staphylococci*, 1821
Gavin, Prof M R, and Houldin, Dr J E Principles of Electronics, *review* by Prof D G Tucker, 751
Gaydon, Dr A G *Obituary* of Sir Alfred Egerton, 678
Gaydon, Dr A G (Hurle, Dr I R, and) Vibrational Relaxation and Dissociation of Carbon Dioxide behind Shock Waves, 1858
Gaylord, Dr Norman G Appointed editor of *Resins, Rubbers, Plastics*, 1108
Gaz dans les Métaux (Société Française de Métallurgie Journées Métallurgiques d'Automne), 95
Gaze, Dr R (Addingley, Dr C G, and) Measurement of Asbestos Dust Concentrations with the Long-Running Thermal Precipitator, 715
Geake, Dr J E Optics, Classical and Modern, *review*, 130
Gee E P The Great Indian Rhinoceros, 1986
Gel (Agar) Direct Spectroscopic Examination of Electrophoretic Zones in (Dr G H Beaven and W B Gratzer), 359
Gel (Silica) Colour Centres produced by Radiation in (Harold W Kohn), 630, *erratum*, 1026
Gel Filtration as a Method for Purification of Protein-bound Peptides as exemplified by Oxytocin and Vasopressin (E B Lindner, Dr A Elmqvist and Dr J Porath), 1565
Gel (Starch-) Electrophoresis Separation of Fast-Moving γ-Globulins by (Dr M D Poulik, Dr W W Zuelzer and Dr R Meyer), 1800
  Separation of Prealbumins by (Dr M D Poulik), 1067
Gel (Starch-) Electrophoresis of Seminal Plasma, Serum and Bile Visualization of Acid and Alkaline Phosphatase after (Dr Bengt Estborn), 1636
Gel (Starch) Electrophoretic Patterns Localization of Haemocyanin on (J R Whittaker), 193
Gelatine and Glue Research Association (British) Appointment of Dr D A Sutton as director of research, 318
  Seventeenth Meeting of the Research Panel (Alan G Ward), 862
  Discussion on Gelation, 863
Gelation (British Gelatine and Glue Research Association Discussion on), 863
Gell, P G H, and Benacerraf, B Delayed Hypersensitivity, 1030
Gemmology, *review* by Dr W Campbell Smith, 1008
Gemstones (Dr G F Herbert Smith), thirteenth edition revised by Dr F Coles Phillips, *review* by Dr W Campbell Smith, 1008
Gene Mutation Human Haemoglobin *E*—the Chemical Effect of (Abnormal Human Haemoglobins), (Dr J A Hunt and Dr V M Ingram), 870
General Education in a Modern Democracy, 1171
General Electric Company *Atomic Energy Review*, Vol 2, No 1, 407
  The Ophitron, 594
General Electric Company of America Experimental Production of a Transparent Sintered Alumina—'Lucalox', 1107
General Microbiology, Society for Eighth Symposium—The Strategy of Chemotherapy (edited by S T Cowan and E Rowatt), *review* by Prof H Berry, 133
  Ninth Symposium—Virus Growth and Variation (London, 1959), (edited by A Isaacs and B W Lacey), *review* by N W Pirie, 920
General Post Office Appointment of A H Mumford as engineer-in-chief, 1531
  Retirement of Sir Lionel Harris as engineer-in-chief, 1531
  Appointment of Capt C F Booth and D A Barron as deputy engineers-in-chief, 1531
General Register Office Studies on Medical and Population Subjects No 14, Morbidity Statistics from General Practice, Vol I (General), (Dr W P D Logan and A A Cushion), 154
Generation (Power) Nuclear Reactors for (edited by E Openshaw Taylor) *review* by R Vaux, 301
Generator A New Microwave Harmonic (Dr K D Froome), 808
Generators (The Tandem), of the United Kingdom Atomic Energy Authority (K W Allen and F A Julian, W D Allen and A E Pyrah, and J Blears), 303
Genetic Analysis, *review* by J Maynard Smith, 752
Genetic Analysis Trends in (Prof G Pontecorvo), *review* by J Maynard Smith, 752
Genetic Basis of the Thalassaemia Diseases (Prof V M Ingram and A O W Stretton), 1903
Genetic Control of a Cyclic Growth Pattern in *Neurospora* (Growth Patterns in *Neurospora*), (Dr D R Stadler), 170
Genetic Control of Tryptophan Peroxidase-Oxidase in *Drosophila melanogaster* (Corrado Baglioni), 1084
Genetic Interactions (Anomalous), observed in *Bacillus subtilis* (M Kohiyama and Y Ikeda), 208
Genetical Effects of Population Subdivision (P A P Moran), 505
Genetics at Cambridge, 1189
Genetics at Sheffield, 1189
Genetics of Complex Characters Heterosis and the (Watkin Williams), 527
Genetics of *Oenothera* Taxonomy and (Prof R Ruggles Gates), *review* by Dr W B Turrill, 1974
Genetics (Biometrical) Application of, to Behaviour in Rats (Dr P L Broadhurst), 1517
Genetics and the Origin of Species (British Association for the Advancement of Science, Sections D (Zoology) and K (Botany), Symposium on), 587
Gennaro, jun, Prof J F, and Ramsey, H W Distribution in the Mouse of Lethal and Sub-Lethal Doses of Cottonmouth Moccasin Venom labelled with Iodine-131, 1244
Gentisic Acid and *o*-Pyrocatechuic Acid Conversion of Salicylic Acid to, all Labelled with Carbon-14, in Plants (Dr Ragai K Ibrahim and Prof G H N Towers), 1803
Geochemical Research in the United States, *review* by Dr S R Nockolds, 1757
Geochemical Society, Japanese Position and Activities of the (Prof K Sugawara), 1193
Geochemical Work at the Vernadsky Institute, Moscow Current (Prof A P Vinogradov), 1193
Geochemistry Principles of (Prof Brian Mason), second edition, *review* by Dr S R Nockolds, 1601
  Researches in (edited by Philip H Abelson), *review* by Dr S R Nockolds, 1757
Geodesy and Geophysics, National Committee for Appointment of J Connor as chairman, 1192
Geodetic Marker at the South Pole (To be erected by the United States Coast and Geodetic Survey), 1612
Geography and Ecology (Plant), International Society for International Symposium on Mapping Vegetation, B A 23
Geological Congress Inter-University (Eighth), 1914
Geological Development of North America, *review* by Dr J W Cowie, 1600
Geological Documentation Service A New, 153

Geological Museum, London Exhibition of Aerial Photographs of Quarries and Mines, 855
Geological Society (Liverpool) Centenary of the, 1914
Geological Society of London Election of Foreign Members, 1360
Geological Survey (United States) Suggestions to Authors of the Reports of the, fifth edition, *review* by Prof C F Davidson, 390
  Bulletin 1064, Systematic Mineralogy of Uranium and Thorium (Prof Clifford Frondel), *review* by Prof C F Davidson, 576
Geological Time-Scale (Prof J Laurence Kulp, James C Cobb, Leon E Long and Donald S Miller), B A 62 , (Prof C F Davidson), 1310, 1473
Geology A New Introduction to, *review* by Dr J C M Taylor, 1175
  Panbiogeography, or an Introductory Synthesis of Zoogeography, Phytogeography and (Dr Léon Croizat), Vol I, The New World , Vol 2a, The Old World , Vol 2b, The Old World (continuation), *review* by Prof Ronald Good, 924
Geology of the Great Lakes (Prof Jack L Hough), *review* by Prof S E Hollingworth, 665
Geology of Ore Deposits (published in the Russian language by the Academy of Sciences of the U S S R), 410
Geology of Radioactive Raw Materials Mineralogy and (Prof E Wm Heinrich), *review* by Prof C F Davidson, 1262
Geology of Tanganyika Summary of the, Part I, Introduction and Stratigraphy (A M Quennell, A C M McKinlay and W G Aitken), 1688
Geology (Basic), for Science and Engineering (Prof E C Dapples), *review* by Dr J C M Taylor, 1175
Geology (Historical) Outline of (A K Wells), fourth edition, *review*, 1093
Geology (Precambrian), of South-western Australia (A F Wilson , 237
Geology and Multiple Sclerosis (Prof Harry V Warren), 561
Geomagnetic Activity at Halley Bay on Disturbed Days (J MacDowall), 1543
Geomagnetic Disturbrance Correlation between Earth-Current and (V P Hessler and E M Wescott), 627
  Diurnal Variation of Aurora and, at New Zealand Antarctic Stations (Dr T Hatherton and G G Midwinter), 889
Geomagnetic Disturbance and Velocity of Slow-Drift Solar Radio Bursts (M B Wood and C S Warwick), 1471
Geomagnetic Phenomena associated with Nuclear Explosions Some (Dr R G Mason and Dr M J Vitousek), B A 52
Geomagnetic Vertical Intensity around the Magnetic Equator Possible Asymmetry in the Daily Range of the (Dr C A Onwumechilli), 51
Geomagnetic and Ionospheric Phenomena associated with Nuclear Explosions (Dr S Matsushita), B A 33
Geophysical Effects of High-Altitude Nuclear Explosions (W A Feibelman), 442
Geophysical Journal, Vol 2, No I (Royal Astronomical Society), 504
Geophysical Observatory (New), in Belgium, 1022
Geophysical Year, International Annals of the, Vol 6, Manual on Rockets and Satellites (edited by L V Berkner, in association with John Hanessian, Jr , and Leonard Cormier), *review*, 213
  Photography in the (Scientific and Technical Group of the Royal Photographic Society Symposium on), 1032
  Some Achievements (Royal Society), 604
Geophysics, National Committee for Geodesy and Appointment of J Connor as chairman, 1192
George, Prof J C , and Eapen, J Lipase Activity in the Brown and Yellow Adipose Tissue of the Bat, 59
George, K A Plasma Heating by Current-Saturation, 1790
George, II , L A , and Vogt, G S Electron Microscopy of Autoradiographed Radioactive Particles, 1474
Gerard, V B and others Magnetic Effects resulting from Two High-Altitude Nuclear Explosions, B A 34
Gerber, Dr H -J Nuclear Forces and the Few-Nucleon Problem (Binding Energies and Elastic Scattering of Light Nuclei at Low Energies—Polarization Measurements in *n-d* and *p-d* Scattering at Low Energies), 1114
Gerhart, John C , and others Inhibition of Urease by Alloxan and Alloxanic Acid, 1936
Germ-free Vertebrates—Present Status (James A Reyniers and 30 other authors), 1541
Germain, J E , and Valadon, F Coal Science (Chemical Reactions of Coal—Chromatographic Separation of Oxidation Products of Coal), 413
German Plastics Convention Eighth (International Symposium on the Ageing of Plastics), 508
Germinating Uredospores of Wheat Stem Rust, Race 15B Biosynthesis of some Amino-Acids from Sucrose by (B Kasting, A J McGinnis and W C Broadfoot), 1943
Germinating Wheat Isolation and Purification of Nitrate Reductase from Embryos of (D Spencer), 682
Germination Joint Action of Gibberellic Acid and Coumarin in (A M Mayer), 826
  Seed (Educational Productions, Ltd , Filmstrip CX 6290), 1777
Germination of Spores of *Bacillus coagulans* var *thermoacidurans* Rôle of the Glycolytic Enzyme System in the (Prof Mikio Amaha and Tomoko Nakahara), 1255
Germination and Photoperiodic Reaction in the Genus *Chenopodium* (Tourn) L Extreme Sensitivity of (Dr Bruce G Cumming), 1044
Gervy, R , and others A Method of Increasing the Phosphorus Content of Forages, 76
Gessa, G L (Bezzi, G , and) Neuromuscular Blocking Action of some Antibiotics, 905
Gessa, G L , and others Increase by Chlorothiazide of the Paralysing Activity of *d*-Tubocurarine Chloride, 1235
Gettering Material Titanium as a (R L Stow), 542
Getz, G S , and Bartley, W A Cardiolipin-like Compound in Rat Liver Mitochondria, 1229
Gevarkov, - , and others Ionization Phenomena in Gases (The Interaction of a Beam of Charged Particles with a Plasma), 1356
Ghana New Pests of Cocoa (*Theobroma cacao* L) in, following Applications of Insecticides (P F Entwistle, C G Johnson and E Dunn), 2040
Ghizetti, Aldo Awarded a Silver Medal of the City of Paris, B A 16
Ghysdael, P , and others Production of an Agglutinating Auto-Antibody (Panagglutinin) Active upon Tanned Erythrocytes in the Rabbit, 1250
Giant Eggs of the Clover Cyst Nematode, *Heterodera trifolii* Goffart, 1932 (Roland H Mulvey), 1662
Giant Plesiosaur, 1914
Giant Travelling Disturbances and Sporadic E Ionization A Relation between (L H Heisler), 1788
Gibberellic Acid Effect of, on the Initiation of Flowers and Runners in the Strawberry (P A Thompson and C G Guttridge), B A 72
  Effect of the Potassium Salt of, on the Growth and Reproduction Rate of *Paramecium multimicro-nucleatum* (A A Oravec, N G Strovilas, J L Beal and Arthur Tye), 1405
  Effects of, on Juvenility in *Marsilea* and certain other Plants (Dr A Allsopp), 1575
  Effects of Auxin and, on Growth of *Ulothrix* (Dr Herbert Conrad, Dr Paul Saltman and Dr Richard Eppley), 556
  Extended Dormancy of Deciduous Woody Plants treated in Autumn with (Dr P W Brian, J H P Petty and P T Richmond), 69
  Induction of Parthenocarpy in *Rosa arvensis* Huds with (M V Prosser and G A D Jackson), 108
  Influence of Kinetin, β-Indoleacetic Acid and, on Nuclease Activity of Bean (*Phaseolus vulgaris*) Hypocotyls (Dr W Maciejewska-Potapczyk), 557
  Prevention of the Onset of Seed Dormancy by (Dr M Black and J M Naylor), 468, *erratum*, 857
Gibberellic Acid and the Chilling Requirements of Peach Seeds (the late Prof Margaretha G Mes), 2034
Gibberellic Acid and Coumarin Joint Action of, in Germination (A M Mayer), 826
Gibberellic Acid and Nodulation of Legumes (Dr Wm W Fletcher, J W S Alcorn and J C Raymond), 1576
Gibberellic Acid and Photoperiod Influence of, on the Growth, Flowering, Nodulation and Nitrogen Assimilation of *Vicia villosa* (the late Prof Margaretha G Mes), 2035
Gibberellin Effect of, on the Growth of Pollen Tubes (Nanda Bose), 1577
Gibbons, Dr I R An Embedding Resin Miscible with Water for Electron Microscopy, 375
Gibbons, Dr R A Molecular Shape and Physical Properties of Mucin, 610
Gibbons, Dr R A , and Glover, F A Flow Properties of Biological Systems (Measurements of Flow Birefringence), 1540
Gibson, Dr Alan F , and others (edited by) Progress in Semiconductors, Vol 3, *review* by Dr R A Hyman, 1754
Gibson, J B , and Thoday, Prof J M Recombinational Lethals in a Polymorphic Population, 1593
Gibson, Prof Q H Energy Transfer with special reference to Biological Systems (Haemoglobin formed from CO-Haemoglobin), 689
  Fast Chemical Reactions in Solution (Stopped-flow Method to Study the Combination of Haematin and Carboxy-haem with Globin), 1453
Giddings, J Calvin 'Eddy' Diffusion in Chromatography, 357
Giese, Arthur C (edited by Victor E Hall, in association with Frederick A Fuhrman and) Annual Review of Physiology, Vol 21, *review* by Prof D C Harrison, 838
Gifford, Jr , Ernest M (Foster, Adriance S and) Comparative Morphology of Vascular Plants, *review* by Dr S Williams, 84
Gifford, Prof George E (Blakey, Billy R , and) Discarded Blood Bank Blood as a Source of Protein for Cultivation as HeLa Cells, 1158
Gifkins, R C Atomic Mechanisms of Fracture (Creep Fracture), 325
Gilbert, K R A History of Western Technology, *review*, 1601
Gilbert, Dr Lawrence I , and Schneiderman, Dr Howard A Prothoracic Gland Stimulation by Juvenile Hormone Extracts of Insects, 171
Giles, C G Promoted to Senior Principal Scientific Officer in the Scientific Civil Service, 858 , work of, 858
Giles, jun , Lester A , and Mann, John W . Oil Pollution of the Sea (Recommendation that the United States accept the 1954 Convention), 950
Giletti, Dr Bruno J Rubidium-Strontium Ages of Lewisian Rocks from North-West Scotland, 1793
Gill, D A Retirement as chief of the Division of Animal Health and Production of the Commonwealth Scientific and Industrial Research Organization, 1532 , work of, 1532
Gill, D A (White, Dr F W G , and) *Obituary* of Sir Ian Clunies-Ross, 230
Gill, P J , and others Magnetic Effects resulting from Two High-Altitude Nuclear Explosions, B A 34
Gillbright, Dr M Polar Front Survey—Biology (Productivity), 1183 , (Distribution of Phytoplankton, Zooplankton and Organic Particles on a section between Newfoundland and the Azores), 1183
Gilles, A , et autres Recherches sur l'Autostérilite du Cafeier robusta (*Coffea canephora* Pierre), 518
Gillespie, I E Appointed lecturer in surgery in the University of Sheffield, 410
Gillespie, Dr J E O'N , and others A Haemoglobin with Unusual Alkaline-denaturation Properties in a Turkish-Cypriot Woman, 1876
Gillespie, J M , and others Structure and Chemistry of Proteins (Methods of Splitting Disulphide Bonds and their Application in the Extraction of Soluble Proteins from Wool), 1277
Gillespie, Dr J S Appointed the first Sophie Fricke Royal Society Research Fellow in the Rockefeller Institute, 595
Gillett, Dr J D Control of Hatching in the Prediapause Eggs of *Aedes* Mosquitoes, 1621
Gillis, Dr R G (compiled by) The Intensity of Infra-red Absorption Bands—a Bibliography, 682
Gilmore, J E , and others A Suspected Virus Disease of the Citrus Red Mite *Panonychus citri* (McG), 70
Gilpin-Brown, Dr J B (Denton, Dr E J , and) Buoyancy of the Cuttlefish, 1330
Gilson, P , et autres Carte des Sols et de la Vegetation du Congo Belge et du Ruanda-Urundi, 6, Yangambi, Planchette 3, Lilanda, A, Sols, B, Vegetation (Institut National pour l'Etude Agronomique du Congo Belge), 27
Gilzin, Karl Sputniks and After (translated from the Russian by Pauline Rose), *review* by D G King-Hele, 836
Gimeno, A , and others Histological Localization of Fluorescent Thyroid-stimulating Hormone in Rat Tissues, 1733
Gimeno, Alvaro L , and others The C_{17}-OH Group of Œstradiol—Relationships between its Anti-Atherogenic and Endocrine Actions, 1720
Ginkgo biloba Vein Anastomoses in the Leaves of Long Shoots of (Dr Howard J Arnott), 1336
Ginzburg, Dr B Maintenance of Semi-permeability of Plant Cell Membranes in the Absence of Metabolic Energy Supply, 1073
Ginzel, Dr K H Are Mucosal Nerve Fibres Essential for the Peristaltic Reflex?, 1235

Giovanella, B , and others Degradation of Thiotaurine by Ionizing Radiations, B A 61
Giraldi, Dr P N , and others Sulphonamides with Diuretic Activity, 1711
Girardet, Prof A La science, le savant et le pharmacien (Presidential Address to the Swiss Society for Natural Sciences), 1454
Girdler, Dr R W Possible Reversals of the Earth's Magnetic Field in the Jurassic Period, 540
Giustina, A , and others Rôle of Stroma in Haemoglobin Synthesis—Experiments on Duck Red Cells *in vitro*, 1878
  Pathway of Carbon-^{14} Incorporation from NAH^{14}CO$_3$ to Haem in Duck Blood incubated *in vitro*, 1879
Given, Dr P H Coal Science (Chemical Reactions of Coal), 413
  Structure of Bituminous Coals—Evidence from Distribution of Hydrogen, 980
Given, Dr P H , and Peover, Dr M E Hydrogenolysis of Carbon-Oxygen Bonds in some Aromatic Compounds by Electrolysis, 1064
Glacial (Irish Late-) *Lepidurus arcticus* in the (Dr M E S Morrison), 739
Glacier Ice (Antarctic) Creep Tests on (Malcolm Mellor), 717
Glacierization Indications of, in the Siwalik System in India (R C Mehridatta), 833
Glanber, Prof R J Nuclear Forces and the Few-Nucleon Problem (Scattering of Nucleons by Light Nuclei at High Energy), 1113
Gland (Anterior Pituitary) A Dense Laminar Structure found in Conjunction with Cell Membranes in the (Barbara G Barnes), 651
Gland (Ferret Pituitary) A Nucleus of Nerve Cells in the (Dr R L Holmes), 1819
Gland (Human Pituitary) Structure of a Melanocyte-stimulating Hormone from the (Dr J Ieuan Harris), 167
Gland (Nasal) (Salt Gland) Captive Marine Birds possessing a Functional Lateral (Prof Larry Z McFarland), 2030
Gland Stimulation (Prothoracic), by Juvenile Hormone Extracts of Insects (Dr Lawrence I Gilbert and Dr Howard A Schneiderman), 171
Glands (Cholinergically Innervated Sweat) Response of, to Adrenaline and Noradrenaline (Dr David P C Lloyd), 277
Glands (Salivary), of the Brown Ear Tick, *Rhipicephalus appendiculatus* Neumann New Cell Types in the (Dr W M Till), 1078
Glands (Thyroid) Accumulation of Radioactive Iodine in, subsequent to Nuclear Weapon Tests and the Accident at Windscale (Dr Hamish A Robertson and Ian R Falconer), 1699
Glands (Total Mammary), of the Mouse Organ Cultures of (Dr F J A Prop), 379
Glaser, Dr D A Development of Bubble Chambers and some recent Bubble Chamber Results in Elementary Particle Physics (Charles Vernon Boys Prize Address to the Physical Society), 954
Glass, Prof H Bentley (edited by) A History of Nutrition (Prof Elmer Verner McCollum), *review* by Dr Leslie J Harris, 484
Glass, Prof H Bentley, and others Statement on Biological and Chemical Warfare, 1018
Glass The Structure of—Proceedings of a Conference held at Leningrad, 1953 (translated from the Russian by E B Uvaroc), *review* by Prof R W Douglas, 134
Glass in Aqueous Systems Strength Impairment Mechanism of (Frederick J Radd and Donald H Oertle), 976
Glass Electrodes Alkali Ion Determinations by means of (Research Symposium at the University of Sheffield), 1616
Glass Fibres Strength of (J G Morley), 1560
Glass Industry Research Association, British New Laboratories of the, 775
Glass Melting The Development of Furnaces for (Dr W M Hampton), 772
Glass Micro-Electrodes for Measuring Intracellular Activities of Sodium and Potassium (Dr J A M Hinke), 1257
Glass-Paper Chromatography Specific and Sensitive Assay Method for Vasopressin and Oxytocin using (Akira Arimura and Prof Joseph F Dingman) 1874
Glass Technology at Sheffield, 1271
Glass Technology (Society of Glass Technology), 855
Glass Technology, Society of The *Journal* to be published in two parts—*Glass Technology* and *Physics and Chemistry of Glasses*, 855
Glasscock, Dr H H *Obituary* of Prof E S Salmon, 1188
Glasses Non-Oxide (Bell Telephone Laboratories), 594
Glasses, Physics and Chemistry of (Society of Glass Technology), 855
Glasshouse Crops Research Institute Annual Report for 1957, 161
  Open Day (F W Toovey), 1033
Glaucoma Species in the Central Nervous System of the Carp (Prof A Stolk), 1737
Glaz, E T , and others A New Trichothecin-like Antifungal Antibiotic, 908
Glazenburg, S Oil Pollution of the Sea (Disposal of Oil Waste and Facilities in Ports), 950
Gledhill, Dr A W Germ-free Vertebrates—Present Status, 1541
Glentworth, R Conservation in the Scottish Highlands (Soil Conditions in the Highland Areas), 1529
Glew, Dr D N Some Stoicheiometric Gas Hydrates, 545
Glial Cells (Isolated, Fresh Nerve Cells and), from Control and Stimulated Animals Quantitative Assay of Compounds in (Prof Holger Hyden), 433
Glinski, Dr G Self-Regulation in Living Systems (Stability and Adaptability of Multi-loop Feedback Control Systems), 240
Glioblastoma (Human Multiform) Electron Microscopical Structure of the Wall of Small Blood Vessels in (Dr S H M Nystrom), 65
Glišin, Vladimir R , and others Fate of the Highly Polymerized Spleen Deoxyribonucleic Acid labelled with Pnosphorus-32 Injected Intraperitoneally into Rats, 1818
Globular Clusters A Search for Neutral Atomic Hydrogen in (Dr Morton S Roberts), 1555
Globulin (Antibody) *In vitro* Labelling of, by Tritium Exchange (Dr P C Rajam and Anne-Louise Jackson), 375
γ-Globulin (Human) Staphylocoagulase Inhibition by Pooled (Prof Murray M Streitfeld, Prof Bennett Sallman and Seymour M Shoelson), 1665
γ-Globulin (Rabbit) *Iso*-Antigens of (S Dubiski, Danuta Skalba, Anna Dubiska and Dr A Kelus), 1811
β-Globulin Alleles in some Zebu Cattle (G C Ashton), 1135
Globulins Production of Serum Albumin and of, by Chick Mesenchymal Tissue and by HeLa Tumour Tissue in Culture (Y Abdel-Samie, Prof E Broda, G Kellner and W Zischka), 361, *erratum*, 943
γ-Globulins (Fast-Moving) Separation of, by Starch-Gel Electrophoresis (Dr M D Poulik, Dr W W Zuelzer and Dr R Meyer), 1800
γ- and α-Globulins Production of, by the Isolated and Perfused Rat Spleen (Dr E Espinosa), 1801
Glockler, G Thermodynamics (Experimental Thermochemistry), 1608
Gloeosporium in Apple Stem Wounds (R O Sharples), 243 , (A T K Cooke), 244
Glossopteridean Fructifications (Presumed) Occurrence of, in Rhodesia and Nyasaland (Dr William S Lacey), 1592
Glove Boxes and Shielded Cells for Handling Radioactive Materials—a Record of the Proceedings of the Symposium on Glove Box Design and Operation held in the Cockcroft Hall, A E R E , Harwell, 1957 (edited by G N Walton), *review*, 1599
Glover, F A (Gibbons, Dr R A , and) Flow Properties of Biological Systems (Measurements of Flow Birefringence), 1540
Glover, Peggy, and others Fluorescent Schiff-Type Reagents for Cytochemical Detection of Polyaldehyde Moieties in Sections and Smears, 1797
Glucosamine Synthesis Interfering Substances in the Determination of (Dr Fiorenzo Paronetto), 1317
Glucose Changes in Adenosine Di- and Tri-phosphate Concentrations in the Early Stages of the Action of Yeast on (Dr J O Laws and Dr L H Stickland), 1246
Glucose-6-phosphate Dehydrogenase Characteristics of, from Normal and Primaquine-sensitive Erythrocytes (Glucose-6-phosphate Dehydrogerase and Human Erythrocytes), (Dr Henry N Kirkman), 1291
Glucose-6-phosphate Dehydrogenase and Human Erythrocytes—Characteristics of Glucose-6-phosphate Dehydrogenase from Normal and Primaquine-sensitive Erythrocytes (Dr Henry N Kirkman), 1291 , Mechanism of Inactivation of Glucose-6-phosphate Dehydrogenase in Human Erythrocytes (Dr Paul E Carson, Stanley L Schrier and Robert W Kellermeyer), 1292
Glucose-6-phosphate Dehydrogenase in Human Erythrocytes Mechanism of Inactivation of (Glucose-6-phosphate Dehydrogenase and Human Erythrocytes), (Dr Paul E Carson, Stanley L Schrier and Robert W Kellermeyer), 1292
Glucosyl Oligosaccharides (Liver), and Glycogen—Carbon-14 Dioxide Experiments with Hydrocortisone (Dr Hsien-Gieh Sie, Prof James Ashmore, Dr Robert Mahler and Prof William H Fishman), 1380
Glucuronic Acid (4-0-Methyl), in *Rhizobium* Gums Occurrence of (Beverley A Humphrey), 1802
β-Glucuronidase Localization of, in Normal and Cancer Cells (J Conchie and Dr G A Levvy), 1709
β-Glucuronidase Activity (Urinary), in Patients with Bone Fractures (F J W Lewis and Dr Constance H J Plaice), 1249
Glutamic Dehydrogenase of Mung Bean Mitochondria (Dr D H Bone), 990
Glutamic-Pyruvic Transaminase in Rabbit's Long Bones (L Tessari and L Parrini), 904
Glutamo-Transferase A Non-Dialysable Inhibitor of, present in Excised Tomato Roots (C S Vaidyanathan and Prof H E Street), 347
Glutathione Stability of the Erythrocytes in Iranians (Dr D G Walker and Dr J E Bowman), 1325
Glutathione (Rat Brain), and Pyridoxine Deficiency (M J Ashwood-Smith and A D Smith), 2028
Glutathione and Total Free Sulphydryl (Cystine-Cysteine,) , Contents of, in Arsenic-resistant and Sensitive Strains of the Blue Tick, *Boophilus decoloratus* (Dr J S Harington), 1739
Glyceraldehyde-3-phosphate Dehydrogenase Rôle of the Co-enzyme in the Stabilization of (P Elodi and G Szabolcsi), 56
Glyceric Acid in Broad Bean (*Vicia faba* L), (R I Morrison and Dr P C. Dekock), 819
Glycerol Possible Rôle of in the Winter-Hardiness of Insects (P Dubach, D Pratt, Prof F Smith and C M Stewart), 288
Glycerol-extracted Muscle Fibres Oxygen Uptake of (James A Wilson, Paul R Elliott, Prof Karl F Guthe and David G Shappirio), 1947
I-Glyceryl-2-*myo*-inositol Phosphate Synthesis and Properties of (Dr T Malkin), 789 , Synthesis of I-Glyceryl-2-*myo*-inositol Phosphate (J H Davies and Dr T Malkin), 789 , I-Glyceryl-2-*myo*-inositol Phosphate—Alternative Synthesis and Behaviour on Hydrolysis (R B Ellis and J N Hawthorne), 790
Glycogen Liver Glucosyl Oligosaccharides and—Carbon-14 Dioxide Experiments with Hydrocortisone (Dr Hsien-Gieh Sie, Prof James Ashmore, Dr Robert Mahler and Prof William H Fishman) 1380
Glycogen Level (Liver), of Normal and Adrenalectomized Mice Effect of Diet on the Blood Sugar and (B P Block and Dr G S Cox), 721
Glycolaldehyde Trapped from Aerobic Oxidation of D-Xylose by *Torulopsis utilis* (V Bolcato and G Leggiero), 1318
Glycolytic Enzyme System Rôle of the, in the Germination of Spores of *Bacillus coagulans* var *thermoacidurans* (Prof Mikio Amaha and Tomoko Nakahara), 1255
Glycoproteins of Human Cerebrospinal Fluid (Dr Samuel Bogoch), 1628
Glycosidases in the Mammalian Alimentary Tract (J Conchie and D C Macdonald), 1233
Glycoside of the Root of *Marsdenia erecta* R Br Sugars of the (Dr T Baytop Dr M Tanker, Dr N Öner and Dr S Tekman), 1319
(α- and β-) Glycosides A Method for Distinguishing between, by the use of Plant Haemagglutinins (Lectins), (Dr A Makelã), 111
Glycosides (Sterol), in Oilseed Phospholipids (Dr Francis Aylward and B W Nichols), 1319
Glyptotendipes (Phytotendipes) paripes Edwards Copulation of (Dr Eric T Nielsen), 1252
Gneiss (Pre-Cambrian) of Ongul Islands in the Antarctic Natural Remanent Magnetization of (T Nagata and Y Shimizu), 1472
Goddard, Dr C K , and others Force-Feeding Fish under Experimental Conditions, 1660
Goddard, J , and others A Theory of the Abrasion of Solids such as Metals, 333
Goddard, Dr L S Foundations of Set Theory, *review*, 1178

Growth Pattern (Cyclic), in *Neurospora* Genetic Control of a (Growth Patterns in *Neurospora*), (Dr D R Stadler), 170
Growth Patterns in *Neurospora*—A Biological Clock in *Neurospora* (C S Pittendrigh, Dr V G Bruce, N S Rosensweig and M L Rubin), 169 , Genetic Control of a Cyclic Growth Pattern in *Neurospora* (Dr D R Stadler), 170
Growth-Promoting Factor and a Tumour-Susceptibility Factor in Eggs Differentiation between a (Charles H Hill and Henry W Garren), 824
Growth Responses to Selenium in Lambs (Dr J W McLean, G G Thomson and J H Claxton), 251
Growth-Stage Floral Initiation and its Relationship to, in Red Clover (*Trifolium pratense* L), (J L Stoddart), 559
Growth and Reproduction Rate of *Paramecium multimicro-nucleatum* Effect of the Potassium Salt of Gibberellic Acid on the (A A Oravec, N G Strovilas, J L Beal and Arthur Tye), 1405
Growth and Variation Virus—Ninth Symposium of the Society for General Microbiology, London, 1959 (edited by A Isaacs and B W Lacey), *review* by N W Pirie, 920
Growth and Vitamin A Storage in the White Rat Effect of 'Amino-Acid Imbalance' on (M Rechcigl, jun , S Berger, J K Loosli and H H Williams), 1404
Grutzov, Dr L N (Pawstiks, Dr E A , and) Polar Front Survey (Biology —Distribution of Plankton in the Norwegian Sea), 1183
Guatemala Flora of (Paul C Standley and Julian A Steyermark), 771
Guérin, H , and Bastick, M Coal Science (Microporosity during Gasification of Coke between 800° and 1,000°C), 414
Guerritore, Prof Dino, and Bellelli, Luciano Interaction between Nucleic Acid and a Cationic Detergent, 1638
Guha, Dr Bhagawati Charan Temperature Variation of the Principal Magnetic Moments of Co^{++} Ions and the Asymmetry of the Crystalline Electric Field in Cobalt Acetate Tetrahydrate, 50
Guide (A Biochemist's), to the Nervous System, *review* by Dr G B Ansell, 1261
Guinea Pig Renewal Times of some Squamous Epithelia in the (H Platt), 1654
Guinea Pig Bone Marrow Cells which Synthesize Deoxyribonucleic Acid in, during Recovery from Whole-Body γ-Irradiation (P F Harris and J H Kugler), 1883
Guinea Pig Heart Sarcosomes Reversal by Acetylcholine of the Inhibition by Thyroxine of Oxidative Phosphorylation in (Heitor Medina and Metry Bacila), 1066
Guinea Pig Liver Agar Electrophoresis of Normal Soluble Proteins in (Prof Iv Goranov, Y Todorov, X Skatshokova, M Hlebarova and P Kuzmanova), B A 64
  Cytoplasmic Nucleopeptides in (P Szafranksi, S Sulkowski and T Golaszewski), 1940
Gulbenkian Foundation Help for the Arts, 699
Gullberg, Dr Ragnhild, and Olhagen, Dr Borge Electrophoresis of Human Gastric Juice, 1848
Gumbel, Prof E J Statistics of Extremes, *review* by R N Curnow 754
Gums (*Rhizobium*) Occurrence of 4-O-Methyl Glucuronic Acid in (Beverley A Humphrey), 1802
Gun Tunnel (Hypersonic) Measurement of the Effects of Piston Mass and Bursting Pressure on the Motion of a Piston in a (B J Belcher), 1207
Gunmetal A New Alloy for (Mond Nickel Co , Ltd), 1025
Gunn, Dr D L Retirement from the directorship of the International Red Locust Control Service, 589 , work of, 589
Gunn, Dr D L , and Symmons, P M Forecasting Locust Outbreaks, 1425
Gunne, Dr Lars-M Noradrenaline and Adrenaline in the Rat Brain during Acute and Chronic Morphine Administration and during Withdrawal, 1950
Gunstone, Dr F D Appointed senior lecturer in chemistry at St Salvator's College, St Andrews, 684
Gupta, Arati (Sharma, Dr Arun Kumar, and) Chromosome Breakage with Plant Pigments, 1821
Gurevitch, Dr B Possible Role of Higher Proprioceptive Centres in the Perception of Visual Space and in the Control of Motor Behaviour, 1219
Gutenberg, Prof B The Earth as Viewed in 1959, *review*, 1007
Gutfreund, Dr H Steric Aspects of the Chemistry and Biochemistry of Natural Products (Specificity of α-Chymotrypsin), 949
Guthe, Prof Karl F , and others Oxygen Uptake of Glycerol-extracted Muscle Fibres, 1947
Guthrie, Dr Douglas Egypt and Greece in Medical History, *review*, 662
Guthrie, Dr Mary J Tumourigenesis in Ovaries of Mice Transplanted to the Liver, Kidney and Adjacent Tissues, 916
Guthrie Lecture of the Physical Society (Prof W E Lamb), 954
Guttman, Dr P H (Kohn, Dr H I , and) Latent Period of X-Ray Induced Ageing—a Study based on Mortality Rate and Tumour Incidence, 735
Guttridge, C G (Thompson, P A , and) Effect of Gibberellic Acid on the Initiation of Flowers and Runners in the Strawberry, B A 72
Guy, R G , and others Structure of α-Hydroxyacetylene Complexes of Platinum (II), 526
Guy's Hospital Medical School, London Title of reader in therapeutics in the University of London conferred on Dr J H Trounce, 322
  Appointment of Dr D J Anderson to the University of London readership in physiology in relation to dentistry, 595
Gwynne, M D A Quick Method for Extracting Plant Embryos from certain Types of Seed, 1588
Gyimesi, J , and others A New Trichothecin-like Antifungal Antibiotic, 908
Gypsum Plaster Effect of Temperature on the Rate of Setting of (M J Ridge), 47

HAAS, F L (Doudney, C O , and) Effect of Purine and Pyrimidine Analogues on Reversion of a Tryptophan-requiring Strain of *Escherichia coli*, 114
Habenular, Interpeduncular and Dorsal Tegmental Nuclei A Heat-Loss Mechanism involving the (B G Cragg), 1724
Habit of Ice Crystals grown in Hydrogen, Carbon Dioxide and Air at Reduced Pressure (A P van den Heuvel and Dr B J Mason), 519
Habit (New), among Greenfinches Diffusion of a (Dr Max Pettersson), 649
Habitat (An Unusual Breeding), of the Linnet (N W Orford), 650
Habits (Blood-feeding), of Adult Noctuidae (Lepidoptera) in Cambodia (W Buttiker), 1167
Hackett, Dr D P (Niederpruem, Dr D J , and) Cytochrome System of *Streptomyces*, 1954
Hackman, R H Structure and Chemistry of Proteins (Properties of Protein Complexes of the Insect Cuticle), 1276
Haddow, Dr A J Animal Clocks (Influence of the Environment on the Cyclical Biting-Behaviour of Mosquitoes), 763
Haem Binding of, to Protein in Haemoglobin and Myoglobin (Dr J E Falk, Dr J N Phillips and Dr D D Perrin), 1651 , (Dr J E O'Hagan), 1652
  Decrease in Acid Strength of Propionate Side-chains of Haematin on Reduction to (Dr J E O'Hagan), 1808
  Pathway of Carbon-^{14} Incorporation from $NaH^{14}CO_3$ to, in Duck Blood incubated *in vitro* (A Breccia, A L Fantola, E Lazzarini and A Giustina), 1879
  Synthesis of, by Circulating Blood Cells (Peggy Clark and Dr R J Walsh), 1730
Haem and Porphyrin Biosynthesis Effect of Oxygen Tension on (J E Falk R J Porra and Ann Brown, and F Moss and Helen E Larminie), 1217
Haemagglutinin of Vaccinia Virus Effect of Concentrated Urea Solutions on the Infectivity and (Prof J F McCrea and Jean O'Loughlin), 1497
Haemagglutinins (Anti-A), from a Non-Leguminous Plant, *Hyptis suaveolens* Poit (Dr G W G Bird), 109
Haemagglutinins (Plant), (Lectins) A Method for Distinguishing between α- and β-Glycosides by the use of (Dr O Mäkela), 111
Haematin Decrease in Acid Strength of Propionate Side-Chains of, on Reduction to Haem (Dr J E O'Hagan), 1808
Haematin Systems in Cheese Fat Oxidation and (Tallowy Discoloration in Cheddar Cheese), (C G Rammell), 1296
Haematology (University of Cambridge Post-Graduate Medical School Symposium on), 1192
Haematopota insidiatrix Austen (Diptera, Tabanidae) in Southern Rhodesia (Dr Robert Barrass), 739
Haemocyanin on Starch Gel Electrophoretic Patterns Localization of (J R Whittaker), 193
Haemodynamics in Essential Hypertension (Dr J Brod, V Fencl, Z Hejl and J Jirka), 1643
Haemoglobin Nonhaem Iron in Erythrocytes as a Precursor for (Dr M Faber and Dr I Falbe-Hansen), 1043
  Properties and Inheritance of, by Asymmetric Recombination (Dr Harvey A Itano and Elizabeth Robinson), 1468
Haemoglobin with Unusual Alkaline-denaturation Properties in a Turkish-Cypriot Woman (Dr J E O'N Gillespie, Dr J C White, M J Ellis, Dr G H Beaven, W B Gratzer, Dr E M Shooter and R M E Parkhouse), 1876
Haemoglobin 'Bart's', a Foetal Haemoglobin without α-Chains (Abnormal Human Haemoglobins), (Dr J A Hunt and Dr H Lehmann), 872
Haemoglobin *E* Human—the Chemical Effect of Gene Mutation (Abnormal Human Haemoglobins), (Dr J A Hunt and Dr V M Ingram), 870
Haemoglobin *G* A Chemical Abnormality in (Dr Robert L Hill and Dr Herbert C Schwartz), 641
Haemoglobin *P* in a Family in the Belgian Congo (Dr Paulette Dherte, Dr H Lehmann and Dr J Vandepitte), 1133
Haemoglobin Pattern of the Cyclostome *Pertromyzon planeri* during the Course of Development (M Adinolfi, G Chieffi and M Siniscalco), 1325
Haemoglobin Synthesis Role of Stroma in—Experiments on Red Duck Cells *in vitro* (A Breccia, A L Fantola, E Lazzarini and A Giustina), 1878
Haemoglobin (Adult and Foetal Human) Serological Distinction of (G R E Naylor and M E Adair), 1854
Haemoglobin (Foetal) Estimation of Small Percentages of (Prof K Betke, H R Marti and I Schlicht), 1877
Haemoglobin (Foetal), in the Monkey (Dr G H Beaven and W B Gratzer), 1730
Haemoglobin (Foetal), without α-Chains Haemoglobin 'Bart's', a (Abnormal Human Haemoglobins), (Dr J A Hunt and Dr H Lehmann), 872
Haemoglobin ('Heated') Hydrolysis of (S Baar), 986
Haemoglobin (Hippopotamus) Paper Electrophoresis of (D H L Rollinson and G D Lomax), 1653

Haemoglobin (Human) The Heterogeneity of, *review* by Dr J A M Ager, 840
  A Terminal Peptide Sequence of (Dr J A Hunt and Dr V M Ingram), 640
Haemoglobin (Human Foetal) Heterogeneity of—Incidence of Foetal Variants in Singapore (Dr F Vella), 272
Haemoglobin (New Fast Abnormal), in Newborn Nigerians (Dr A E Boyo and R G Hendrickse), 997
Haemoglobin Synthesis in De-embryonated Chick Blastoderm 8-Azaguanine Inhibition of (B R A O'Brien), 376
Haemoglobin and Myoglobin Binding of Haem to Protein in (Dr J E Falk, Dr J N Phillips and Dr D D Perrin), 1651 , (Dr J E O'Hagan), 1652
Haemoglobin and Sensory Mechanisms, *review* by P A Merton, 1092
Haemoglobins Abnormal—a Symposium organized by the Council for International Organizations of Medical Sciences (edited by J H P Jonxis and J F Delafresnaye), *review* by Dr J A M Ager, 840
  Abnormal Human—Human Haemoglobin *E*—the Chemical Effect of Gene Mutation (Dr J A Hunt and Dr V M Ingram), 870 , Haemoglobin 'Bart's', a Foetal Haemoglobin without α-Chains (Dr J A Hunt and Dr H Lehmann), 872
Haemoglobins in Chum Salmon Two (K Hashimoto and Prof F Matsuura), 1418
Haemoglobins (Multiple), in Fish (Dr N Chandrasekhar), 1652
Haemolymph of *Petrobius maritimus* Leach Composition of the (Dr A P M Lockwood and Dr P C Croghan), 370
Haemolysis Accumulation of Dextran in Human Red Cells after (N V B Marsden and S G Östling), 723
Haemolytic Resistance Influence of X-Rays on the Activity of Carbonic Anhydrase in Erythrocytes and on their (A Lauwers, J Van Bavinchove and W Dierick), 111
Hagen, Prof P (Ono, S , and) Pyridoxal Phosphate, a Coenzyme for Histidine Decarboxylase, 1143
Hagene, Dr Philippe Distribution of Ascorbic Acid in the Leaves of some Plants, 284
Hagihara, Bunji, and others Oxidative and Phosphorylative Activities of Cytoplasmic Particles from Plant Tissue Cultures, 1491
Hagins, Dr W A , and Jennings, W H Energy Transfer with special reference to Biological Systems (Localization as Opposed to Migration of the Excitation in the Retinal Rods), 690
Hahn, G T , and others Atomic Mechanisms of Fracture (Tensile Fracture of Mild Steels), 325
Haida Carvers in Argillite (Prof Marius Barbeau), 409
Hailsham, Rt Hon Viscount The First Minister for Science, 1263
  Elected Rector of the University of Glasgow, 1915
Haines, M G Thermonuclear Research, 1017
Hair Sheep Light Regulation of Coat-Shedding in a Tropical Breed of (R B Symington), 1076
Hairs (Root) Cell-Wall Formation in (A B Wardrop), 996
Hairs (Sensory), in the Cristae of the Elasmobranch *Raja clavata* A Functional Interpretation of the Electron-Microscopic Structure of the, in Terms of Directional Sensitivity (Prof O Lowenstein and J Wersäll), 1807
Hais, Dr I M , und Macek, Dr K (herausgegeben von) Handbuch der Papierchromatographie, Band I, Grundlagen und Technik, *review* by Dr R Consden, 1436
Hajdukovic, S Biological Effects of Low Doses of Ionizing Radiations (Effects of X-Irradiation on the Blood Picture of Mammals), 1112
Hake, C L , and others Post-Exposure Analysis of Organic Compounds in the Blood by a Rapid Infra-red Technique, 192
Hakkinen, Dr H -M and Kulonen, E Increase in the γ-Aminobutyric Acid Content of Rat Brain after Ingestion of Ethanol, 726
Hala, Eduard, and others Vapour–Liquid Equilibrium (translated by G Standart), *review* by Dr R Sargent, 837
Halbwachs, Maurice The Psychology of Social Class (translated by Claire Delavenay), *review* by Prof T S Simey, 754
Halden (Norway) Reactor, 516
Hale, D K (Salmon, Dr J E , and) Ion Exchange, a Laboratory Manual, *review* by D Reichenberg, 1757
Hale, Dr L J Biological Laboratory Data, *review* by Prof R C McLean, 577
Haley, K B Appointed lecturer in engineering production at the University of Birmingham, 1026, 1362
Haley, Dr Thomas J , and others Prophylactic Effects of Amine Oxides in Radiation Injury in Mice, 198
Half-Life (Biological), of Radioiron in Man (R Oliver and Dr L G Lajtha), 1882
Halifax, Rt Hon the Earl of New Laboratories of the British Glass Industry Research Association opened by, 775
Hall, Dr A R From Axes to Atoms, *review*, 921
  Renaissance Anatomy, *review*, 1761
Hall, Dr A R , and others (edited by) A History of Technology, Vol 5, The Late Nineteenth Century, *review* by Dr Leonard Carmichael, B A 5
Hall, Prof E Raymond, and Kelson, Dr Keith R The Mammals of North America, *review* by Peter Crowcroft, 1524
Hall, Dr E T Awarded a supplementary grant of £600 by the Paul Instrument Fund Committee of the Royal Society, 507
Hall, Dr G G (Shull, Prof H , and) Atomic Units, 1559
Hall, Dr H T , and others Preparation of Diamond, 1094
Hall, Jr , Marshall, and others Some Aspects of Analysis and Probability, *review* by D G Kendall, 214
Hall, R S Appointed Research Fellow in physics in the University of Birmingham, 684
Hall, Victor E (edited by, in association with Frederick A Fuhrman and Arthur C Giese) Annual Review of Physiology, Vol 21, *review* by Prof D C Harrison, 838
Hallas, D G (Hewitt, Dr E J , and) Measurement of Inhibition by Azide in Biochemical Assay Systems involving Nitrite Estimation by Diazotization, 1485
Halleux, A , and others Coal Science (Chemical Reactions of Coal—Acetylation), 412
Halley Bay Geomagnetic Activity at, on Disturbed Days (J MacDowall), 1543
Hallimond, Dr A F Clay Minerals, 779
Halloysite Salt Desorption from (Prof G W Thomas), 1746
Halogen Atom Influence of the Size of the, on the Difference between Lattice Constants of Copper dipyridine dichloride and dibromide (Vladimir Kupcik and Slavomil Durovic), 1060
5- and 8- Halogeno- Dihydro- and Tetra-hydro-1-naphthoic Acids Plant Growth Activities of (Toshio Fujita, Sadao Imai, Koichi Koshimizu, Tetsuo Mitsui and Jiro Kato), 1415
Halogenoplatinates A Radiochemical Tracer Study of the Relative Stability of the (A J Poe and M S Vaidya), 1139
Halpern, —, and others Nuclear Forces and the Few-Nucleon Problem (Scattering of Nucleons by Light Nuclei at High Energy), 1113
Halpern, Dr B N , and others Promoting Effect of Urea on the *in vitro* Passive Sensitization of Isolated Plain Muscles with Precipitating Antibody, 1805
Haltner, Dr A J , and Zimm, Dr B H Rotational Friction Coefficients of Models of Tobacco Mosaic Virus and the Size of the Virus Particle, 265
Ham, Dr N S Second Australian Spectroscopy Conference, 1195
Ham, Dr N S , and Willis, Dr J B At the Second Australian Spectroscopy Conference (Infra-red and Raman Spectra of some Isothiocyanates), 1196
Hambly, Prof A N At the Second Australian Spectroscopy Conference (Infra-red, Raman and Microwave Work of 1958), 1196
Hambly, Prof A N , and Allpress, J G At the Second Australian Spectroscopy Conference (Infra-red Spectra can be used to follow some Solid State Reactions), 1196
Hambly, Prof A N , and Laby, R H At the Second Australian Spectroscopy Conference (Criteria for Allocating Displacements of *X*—H Bond Stretching Frequencies to the Formation of Hydrogen Bonds), 1196
Hamilton, Dr A G The Infra-Red Gas Analyser as a Means of Measuring the Carbon Dioxide Output of Individual Insects, 367
Hamilton, L D G , and others Disorganization of the Secondary Structure in Proteins exposed to Ionizing Radiations in the Solid State, 226
Hammack, E S , and others Coal Science (Chemical Reactions of Coal—Phenolic Hydroxyl in Vitrains), 412
Hammersley J M Fluctuation Phenomena and Stochastic Processes (Percolation Processes), 510
Hammerton, M A Mathematical Model for Perception and a Theoretical Confusion Function, 1668
Hammes, G G (Alberty, R A , and) Fast Chemical Reactions in Solution (Application of the Relaxation Method to Enzymatic Reactions), 1453
Hampden, John Distribution of Scientific Publications in Under-developed Countries, B A 22
Hampton, Dr W M The Development of Furnaces for Glass Melting (Fifth Chance Memorial Lecture of the Society of Chemical Industry), 772
Hanafusa, Hidesaburô, and others Transformations of Myxoma into Vaccinia or Ectromelia Virus in Tissue Culture, 1152
Hanafusa, Teruko, and others Transformations of Myxoma into Vaccinia or Ectromelia Virus in Tissue Culture, 1152
Hanaki, Akira, and others Incorporation of N-Methyl Carbon of Monoethylaminoazobenzene into Polar Dyes, 1460
Handicapped Children in Britain—their Problems and Education (compiled by W A Axford), (Library Association), 1777
Handling Radioactive Materials Glove Boxes and Shielded Cells for—a Record of the Proceedings of the Symposium on Glove Box Design and Operation held in the Cockcroft Hall, A E R E , Harwell, 1957 (edited by G N Walton), *review*, 1599
Hanessian, Jr , John, and Cormier, Leonard (edited by L V Berkner, in association with) Manual on Rockets and Satellites, *review*, 213
Hannah, Dr Margaret Awarded the Warner Medal of the Textile Institute, 26
Hanngren, Å , and others Fate of Injected Dextran Labelled with Tritium in Mice, 373
Hansel, C M Experimental Evidence for Extra-Sensory-Perception, 1515
Hansen, Dr Max Constitution of Binary Alloys, second edition, prepared with the co-operation of Dr Kurt Anderko, *review* by Dr F C Thompson, 1765
Hansen, Vagn Polar Front Survey (Biology—Carbon-14 Measurements and Chlorophyll Measurements in the North Atlantic and in the Greenland Sea), 1183
Hanson, A A , and Juska, F V A 'Progressive' Mutation induced in *Poa pratensis* L by Ionizing Radiation, 1000
Hanson, Dr J , and Lowy, Dr J Evidence for a Sliding Filament Contractile Mechanism in Tonic Smooth Muscles of Lamellibranch Molluscs, 286
Hanson, Dr J , and others Comparative Studies in Ultrastructure (Comparative Studies in the Contractile Structures of Striated and Smooth Muscles), 1446
Hanson, Prof Norwood Russell Patterns of Discovery, *review* by Gerd Buchdahl, 572
Hansson, E , and others Fate of Injected Dextran Labelled with Tritium in Mice, 373
Hanstrom, Bertil, and others (edited by) South African Animal Life—Results of the Lund University Expedition in 1950-1951, Vol 5, *review* 133
Hanuš, Dr V Isomerization to the Tropylium Ion induced by Electron Impact and its Significance, 1796
Haptoglobin The Behaviour of, during Routine Fractionation (Marion Steinbach and L Pejaudier), 362
Haptoglobin Groups in 406 French Blood Donors Frequencies of the (Dr J Moullec and Dr J M Fine), 196
Haptoglobin and Transferrin Variants in Bushmen and some other South African Peoples (Dr N A Barnicot, J P Garlick, Ronald Singer and Dr J S Weiner), 2042
Harada, Minoru, and others Change of Absorption Spectrum of Flavin Adenine Dinucleotide by its Binding with both D-Amino Acid Oxidase Apo-Protein and Benzoate, 1938
Harbourn, C L A Gas Chromatography (Quantitative Determinations), 1199
Harcombe, D , and others Ionization Phenomena in Gases, 1353
Hardened (Surface-) by Carbo-Nitriding Identification of the High-Temperature Constituent in Mild Steel (M A H Howes, G T F Jay, K Sachs and D Wilkinson), 1312

Hardiness (Winter-), of Insects Possible Rôle of Glycerol in the (P Dubach, D Pratt, Prof F Smith and C M Stewart), 288
Hardy, Sir Alister The Open Sea—its Natural History, Part 2, Fish and Fisheries, with Chapters on Whales, Turtles and Animals of the Sea Floor, *review* by S M Marshall, 666
Hargreaves, Dr W A *Obituary* by Dr Harold J Rodda, 92
Harington, Dr J S Contents of Cystine-Cysteine, Glutathione and Total Free Sulphydryl in Arsenic-resistant and Sensitive Strains of the Blue Tick, *Boophilus decoloratus*, 1739
Harker, H J, and others A Theory of the Abrasion of Solids such as Metals, 333
Harker, Dr Janet Animal Clocks (Complexity of Natural Internal Timing Mechanisms), 764
Harker, — Photography in the International Geophysical Year, 1032
Harkness, Dr M L R and Dr D R Flow Properties of Biological Systems (Changes in the Lower End of the Uterus and in the Cervix to allow of the Passage of the Foetus at Parturition), 1540
Harkness Fellowships of the Commonwealth Fund, 857
Harland, W B, and Bidgood, D E T Palaeomagnetism in some Norwegian Sparagmites and the Late Pre-Cambrian Ice Age, 1860
Harley, Dr J L A Source Book of Fungal Physiology, *review*, 85
Harling, J At the first Conference of the British Computer Society (Use of Computers for Operations Research), 946
Harlow, Harry F Origins of Love in Baby Rhesus Monkeys, 1203
Harmonic Generator A New Microwave (Dr K D Froome), 808
Harpaz, Dr I Needle Transmission of a New Maize Virus, B A 77
Harper, Dr F C Biomechanics (Forces exerted by the Human Foot in Walking), 513
Harper, Dr J L Appointed to the chair of agricultural botany in the University College of North Wales, Bangor, 503, work of, 503
Harrap, B S, and others Structure and Chemistry of Proteins (Soluble Wool Proteins), 1277
Harris, Bryan Appointed to a Tube Investments Research Fellowship for work in the physics and chemistry of solids, at the Cavendish Laboratory, Cambridge, 1535
Harris, Colin C Sedimentation Rates, Fluidization and Flow through Porous Media, 716
Harris, Prof E E Appointed acting head of the Department of Philosophy in the University of Edinburgh, 156
Harris, Dr F T C (Bearn, Dr J G, and) Relative Rates of Exchange of Potassium-42 by the Foetal Metanephros and Foetal Liver, 1959
Harris, G, and Davies, J W Nucleotide–Peptide Compounds of *Saccharomyces cerevisiae*, 788
Harris, G S Appointed a lecturer in chemistry at the University of Glasgow, 1915
Harris, Prof G W Distribution of Scientific Publications in Underdeveloped Countries, B A 23
Harris, Dr H (Cummins, Dr C S, and) Taxonomic Position of *Arthrobacter*, 831
Harris, Dr J Ieuan Structure of a Melanocyte-stimulating Hormone from the Human Pituitary Gland, 167
Harris, Sir Lionel Retirement as engineer-in-chief in the General Post Office, 1531, work of, 1531
Harris, Dr Leslie J Classics of Nutrition, *review*, 484
Harris, P F, and Kugler, J H Cells which Synthesize Deoxyribonucleic Acid in Guinea Pig Bone Marrow during Recovery from Whole-Body γ-Irradiation, 1883
Harrison, A (Winteringham, F P W, and) Mechanisms of Resistance of Adult Houseflies to the Insecticide Dieldrin, 608
Harrison, Dr B D, and Cadman, Dr C H Rôle of a Dagger Nematode (*Xiphinema* sp) in Outbreaks of Plant Diseases caused by Arabis Mosaic Virus, 1624
Harrison, Prof D C Progress in Physiology, *review*, 838
Harrison, E R Emission of Relatively High-Energy Ions from Low Voltage Arcs, 245
Harrison, Prof J Heslop Appointed to the chair of botany in the University of Birmingham, 684
Harrison, M J Awarded a Research Fellowship in physics in the University of Birmingham, 1688
Harrison, Prof R G (edited by) Studies on Fertility, including papers read at the Conference of the Society for the Study of Fertility, London, 1958, *review* by Dr T Mann, 1434
Harrison, Dr V G W New Techniques in Packaging, *review*, 1437
Harrod, Sir Roy The Prof—a Personal Memoir of Lord Cherwell *review* by Prof R V Jones, 1752
Hart, Julian Awarded a junior postgraduate agricultural research scholarship by An Foras Taluntais (the Agricultural Institute of Ireland), 1612
Hart, L I, and Andrews, E D Effect of Cobaltic Oxide Pellets on the Vitamin B_{12} Content of Ewes' Milk, 1242
Hartert, Dr H Flow Properties of Biological Systems (Rheology of the Hartert Technique for following the Process of Blood Coagulation by Measuring the Progressive Increase in Shear Modulus), 1540
Hartley, Brian S (Richmond, Virginia, and) A Two-Dimensional System for the Separation of Amino-Acids and Peptides on Paper, 1869
Hartley, Janet W, and others Antibody Status of Mice and Response of their Litters to Parotid Tumour Virus (Polyoma Virus), 1420
Hartley, R D Appointed Research Fellow in mining in the University of Birmingham, 684
Hartman, L, and Shorland, Dr F B Trans-Unsaturated Acids in the Depot Fats of Ruminants and Non-Ruminants, 2024
Hartman, Dr P Twinning of Crystals (Twin of Atacamite), 1911
Hartmann, Prof Max Elected a foreign associate of the United States National Academy of Sciences, 95
Hartshorne, Dr N H A Special Case of the Superposition of Crystal Plates between Crossed Polars and its Bearing on the Microscopy of Cellulosic Fibres, 179
Hartzell, jun, R, and others Effects of Deuterium Oxide on the Synthesis of *T5* and *T7* Bacteriophages, 1167
Harvard University (Staff of the Biological Laboratories of) Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures —Photochemical Behaviour of Retinene (Dr Lawrence Jurkowitz), 614, *Cis-trans* Isomerism and Steric Hindrance (John N Loeb, Paul K Brown and Prof George Wald), 617, Discussion (Prof George Wald), 620
Harwell Reactor School Courses (Atomic Energy Research Establishment), 942
Haselden, Dr G G Appointed to the new chair of chemical engineering in the University of Leeds, 1106, work of, 1106
Low-Temperature Engineering, *review*, 1174
Haselgrove, C B, and Hoyle, F Structure and Age of the Stars, 1986
Haselgrove, D C Oil Pollution of the Sea (The Working of the Oil In Navigable Waters Act, 1955), 950
Hashimoto, K, and Matsuura, Prof F Two Haemoglobins in Chum Salmon, 1418
Haskell, Dr P T Appointed deputy director of the Anti-Locust Research Centre, London, 410, work of, 410
Annual Review of Entomology, *review*, 489
Haslewood, Prof G A D *Obituary* of Prof A O R Windaus, 150
Hassall, Prof C H, and Magnus, K E Monamycin, a New Antibiotic, 1223
Hasted, Dr J B Appointed reader in physics at University College, London, 1613
Hastings, Sir Charles The Life and Times of—Founder of the British Medical Association (Dr William H McMenemey), *review* by Dr W R Bett, 923
Hastrup, Dr J Awarded a scholarship by the Lady Tata Memorial Trust, for research on Leukaemia and allied Diseases, 507
Hat and Allied Feltmakers Research Association, British Annual Report (1957-58), 320
Hatch, M D and others Oxidation of Krebs Cycle Acids by Apple Tissue, 506

Hausser, K H Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
Havranek, M, and others Influence of DL-beta-Phenylserine on the Synthesis of Proteins in *Escherichia coli*, 1895
Hawarth, C W Appointed a lecturer in metallurgy at the University of Sheffield, 684
Hawker, Dr Lilian E British Parasitic Fungi, *review*, 1977
Hawker Siddeley Nuclear Power Co To supply a Neutron Source Thermal Reactor (*Nestor*) to the United Kingdom Atomic Energy Authority, 1533
Hawkins, A E (Jewell, P A, and) At the Conference of the Mammal Society of the British Isles (Normal Diet of the Water Shrew), 29
Hawkins, T H The Sea-Horse and its Relatives, *review*, 390
Anting, *review*, 665
Labour Turnover, 1110
Hawthorne, J N (Ellis, R B, and) 1-Glyceryl-2-*myo*-inositol Phosphate—Alternative Synthesis and Behaviour on Hydrolysis (Synthesis and Properties of 1-Glyceryl-2-*myo*-inositol Phosphate) 790
Hawtrey, A O (Silk, Dr M H, and) Possible Simplified Structure of Deoxyribonucleic Acid, 1484
Haxo, Dr F T, and Fork, D C Photoreactive Pigments in Flagellates—Photosynthetically Active Accessory Pigments of Cryptomonads, 1051
Hay (Douglas) Medal of the Institution of Mining Engineers awarded to A E Crook, 1845
Hayashi, T Plant Growth Regulation (Recent Work with the Gibberellins), 600
Hayden, P Estimation of Chain Fracture and Cross-Linking of Rubber by High-Energy Radiation, 1865
Hayes, M H B Appointed I C I Fellow in chemistry in the University of Birmingham, 1915
Hayward, D O Awarded a Senior Studentship by the Royal Commission for the Exhibition of 1851, 409
Hazards from Ionizing Radiations Advice concerning (Ministry of Housing and Local Government, Circular No 57/59), 1450
Hazards (Radiological), to Patients—Interim Report of the Committee (Ministry of Health and the Department of Health for Scotland), 162
Head of a Chick A Chimaeric Duck with the (Tamikazu Seno and Saburo Saito), B A 78
Heading, Dr J The Value of π and the Old Testament, 78
Appointed lecturer in applied mathematics at the University of Southampton, 595
Heads-Tails Statistics for Two Partially Distinguishable Coins (Gabriel Weinreich), 1825
Healing (Wound), and Tissue Repair (edited by W Bradford Patterson), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Health in Britain Industry and, 1456
Health of the School Child—Fifty Years of the School Health Service (Report of the Chief Medical Officer of the Ministry of Education for 1956 and 1957), 98
Health, Ministry of, and the Department of Health for Scotland Radiological Hazards to Patients—Interim Report of the Committee, 162
Health for Scotland, Department of (Ministry of Health and the) Radiological Hazards to Patients–Interim Report of the Committee, 162
Health, United States National Institutes of Ninth Annual Instrument Symposium and Research Equipment Exhibit, 26
Health, United States National Institutes of (Endocrinology Study Section) Free distribution of Pituitary Hormones, 1272
Health (Industrial), in the Potteries, 420
Health (Mental) Problems in Old Age (World Health Organization of the United Nations, Technical Report Series No 171), 1844
Health and Industry, 1023
Health Physics Radiation Safety and (J W Lucas), 329

Health Service, National Hospitals and the State—Hospital Organization and Administration under the, Sixth and Final Research Report (Creative Leadership in a State Service—a General Survey by Sir George Schuster), 1087, 1201
Health Service (School) The Health of the School Child—Fifty Years of the (Report of the Chief Medical Officer of the Ministry of Education for 1956 and 1957), 98
Healy, A J Introduction of Foreign Weeds into New Zealand, 1361
Hearing Effect of Jet Aircraft Noise on (Surg Lieut R R A Coles and J J Knight), 1803
Heart (Human) Histochemical Localization of Oxidase Activity in the Mitochondria of the (Dr M S Burstone), 476
Heart Sarcosomes Corticosterone Inhibition of Pyridine Nucleotide Oxidase from (P K Jensen), 451
Heart Sarcosomes (Guinea Pig) Reversal by Acetylcholine of the Inhibition by Thyroxine of Oxidative Phosphorylation in (Heitor Medina and Metry Bacila), 1066
Heastie, R Thermodynamics (Phase Changes in Condensed Systems), 1609
Heat Comparative Effects of, on Chromatography and Ultra-violet Absorption of Deoxyribo- or Ribo-Nucleic Acids (Dr Saul Kit), 36
Heat Inactivation of Rinderpest-infected Bovine Tissues (Dr G A Scott), 1948
Heat-Loss Mechanism involving the Habenular, Interpeduncular and Dorsal Tegmental Nuclei (B G Cragg), 1724
Heat Production (Thermoregulatory), in the Brain (Prof Sz Donhoffer, Gy Szegvari, I Jarai and M Farkas), 993
Heat Tolerance Exhibited by *Bos taurus* and *Bos indicus* Beef Cattle A Possible Explanation for Part of the Difference in (H P Ledger), 1405
Heat Treatment Electrical Resistivity Changes observed in a Semiconducting Diamond after (R E Mutch and Dr F A Raal), 1857
Heat and Moisture Probing Behaviour of *Aedes aegypti* (L) in Response to (L Burgess), 1968
'Heated' Haemoglobin Hydrolysis of (S Baar), 986
Heath, Prof O V S (Clark, Dr J E, and) Auxin and the Bulbing of Onions, 345
Heath, W G Structural Effects of Kinetic Heating (Some Factors affecting the Choice of Materials), 30
Heating Effects of, on X-Ray Diffraction by Carbons (Eitaro Matuyama), 544
Heating by Electron Bombardment (A Calverley), 690
Heating (Hydromagnetic) Upper Atmosphere Density Variations due to (Dr A J Dessler), 261
Heating (Kinetic) Structural Effects of (Royal Aeronautical Society Discussion on), 30
Heating (Plasma), by Current-Saturation (K A George), 1791
Heating Rates (Different) Number of Free Radicals in Coal during Carbonization at (J Smidt and Prof D W van Krevelen), 719
Heating and Ventilation (British Occupational Hygiene Society Conference on), 1987
Heavier Elements, *review* by Dr J K Dawson, 922
Heavily Sclerotized Whole Insects Sectioning Large (Prof W E Beckel), 1584
Heavy Water Growth of *Bacterium coli* and *Staphyloccus albus* in (Elizabeth van Horn and Dr G C Ware), 833
  Saliva-Serum Ratios of Deuterium Oxide after Administration of (Nan Taggart and Dr F E Hytten), 457
Hedberg, K O Origin and Dispersal of Flowering Plants (Modern Montane Distributions), 1200
Height-Frequency Curves Conversion of Ionospheric Virtual, to Electron Density-Height Profiles (Dr J O Thomas and M D Vickers), (Radio Research Board, Special Report No 28), 1024
Heilbron, Sir Ian *Obituary* by Dr A H Cook, 767 , *obituary* by Sir Robert Robinson, 768
Heilbronn, Prof H Elected president of the London Mathematical Society, 1533
Heilbrunn, Prof L V Flow Properties of Biological Systems (Methods for Measuring the Rheological Properties of Protoplasm), 1540
Heim, Prof Roger Opening Discourse at the Muséum National d'Histoire Naturelle's celebration of the anniversaries of the 'Precurseurs et Fondateurs de l'Évolutionnisme—Buffon, Lamarck, Darwin', 859
Henrich, Prof E Wm Mineralogy and Geology of Radioactive Raw Materials, *review* by Prof C F Davidson, 1262
Heinroth, Oskar and Katharina The Birds (English edition prepared by Michael Cullen), *review*, 1439
Heiser, P (Sandford, B P, and) Colour Photography of the Aurora, 540

High-Altitude Nuclear Explosions Geophysical Effects of (W A Feibelman), 442
  Magnetic Effects resulting from Two (J A Lawrie, V B Gerard and P J Gill), B A 34
High-Altitude Research British Contribution to, 1776
High Commissioner in New Delhi (United Kingdom) Appointment of Dr H R Ambler as scientific adviser to the, 1448
High-Energy Ions (Relatively) Emission of, from Low-Voltage Arcs (E R Harrison), 245
High-Energy Radiation Estimation of Chain Fracture and Cross-Linking of Rubber by (P Hayden), 1865
High Frequency (Very) Radio Signals at Ionospheric Heights Refraction of (S Weisbrod and L Colin), 119
High Ganglion-blocking Activity Congeners of Pempidine with (L Bretherick, G E Lee, E Lunt, W R Wragg and N D Edge), 1707
High-Level β-Amino-*iso*butyric Acid Excretors in Micronesians High Prevalence of (Dr B S Blumberg and Dr S M Gartler), 1990
High Levels of Phosphorus and Die-Back in Yellow Lupins (R G Warren and B Benzian), 1588
High Levels of Survival Mutation of Bacteria at, by Ethyl Methane Sulphonate (Anthony Loveless and Sheila Howarth), 1780
High Molecular Compounds (published in the Russian language by the Academy of Sciences of the U S S R), 410
High Molecular Weight Ribonucleic Acids from the Nuclei of Calf Thymus (Dr Ping-yao Cheng), 190
High Polymer Chemistry New Techniques in (Bradford Institute of Technology Course in), 1845
High-Pressure Oxygen and Radiotherapy, 94
High Prevalence of High-Level β-Amino-*iso*butyric Acid Excretors in Micronesians (Dr B S Blumberg and Dr S M Gartler), 1990
High-Purity Aluminium Analysis for Magnesium in (C A Youngdahl and F E DeBoer), 54
High-Resolution Fibre Optics using Sub-Micron Multiple Fibres (Dr N S Kapany), 881
High Reynolds Number (Very) A Spectrum of Turbulence at (H L Grant, A Moilliet and Prof R W Stewart), 808
High Speed Computing (Dr S H Hollingdale), *review* by E M Deeley, 1832
High-Temperature Constituent in Mild Steel Surface-Hardened by Carbo-Nitriding Identification of the (M A H Howes, G T F Jay, K Sachs and D Wilkinson), 1312
High-Temperature Gas Jet Blunt-Nosed Bodies in a (F R Sedlund and Prof C C Chang), 812
High-Temperature (Low- and), Strains of *Chlorella* Tabular Comparative Data for the (Dr Constantine Sorokin), 613
High Temperatures Extremely (Electronics Research Directorate of the United States Air Force Cambridge Research Center Conference on, Boston, 1958), (edited by Dr Heinz Fischer and Lawrence C Mansur), *review* by Dr T E Allibone, 83
High-Voltage Paper Electrophoresis of Aliphatic Amines and related Compounds (Dr D Gross), 1633
High-Voltage Paper Electrophoresis (Two-Dimensional), of Amino- and other Organic Acids (Dr D Gross), 1298
High and Low Water Content Free Radicals in X-Rayed Seeds of, as Measured by Electron Spin Resonance (Dr W Klingmuller, Dr G R Lane, M C Saxena and Dr D J E Ingram), 464
Higher Education in East Africa Report of the Working Party on (1958), 243
  White Paper on, 243
  Work on the New Technical Institute, 1611
Higher Education in Nigeria, International Commission on Inaugural Meeting, 152
Higher Education in the U S S R , 504
Higher Education (Secondary and), in Britain, 1671
Higher Hydrogen Peroxide, H_2O_4? A (Dr J G Marshall and Dr P V Rutledge), 2012
Higher Plants A New Technique for Isolating and Cloning Cells of (Ludwig Bergmann), 648
Higher Proprioceptive Centres Possible Role of, in the Perception of Visual Space and in the Control of Motor Behaviour (Dr B Gurevitch), 1219
Higher Terpenoids (P de Mayo), (The Chemistry of Natural Products, Vol 3), *review* by Prof A J Birch, 754
Highlands (Scottish) Conservation in the (Scottish Branch of the Institute of Biology Symposium on), 1529
Highly Polymerized Spleen Deoxyribonucleic Acid labelled with Phosphorus-32 Injected Intraperitoneally into Rats Fate of the (Tamara A Hudnik-Plevnik, Vladimir R Glišin and Marta M Simić), 1818
Highly Purified Carbohydrate-free Johnin Protein Preparation of a (E Annau), 1642
Highly Purified Sample of the Urinary Gonadotrophin Preparation of a (Roland Bourrillon, René Got and René Marcy), 983
Highway and Traffic Engineering at Birmingham, 939
Higuchi Masataka, and Uemura, Prof Teijiro Release of Nucleotides from Yeast Cells, 1381

Hinton, Dr H E Plastron Respiration in the Eggs of *Drosophila* and other Flies, 280
Hippocampus of the Rabbit A Specific Response in the, to Olfactory Stimulation (B G Cragg), 1697
Hippopotamus Haemoglobin Paper Electrophoresis of (D H L Rollinson and G D Lomax), 1653
Hips (Rose) The Organic Acids in (Dr G A D Jackson and S E Y Barakat), 1953
  Presence in, of Substances Inhibiting the Oxidation of Ascorbic Acid (Dr G A D Jackson and R B Wood), 902
Hird, F J R and others Structure and Chemistry of Proteins (Rôle of Thiols in Disulphide Interchange Reactions), 1277
Hirst, Prof E L Elected president for 1959-60 of the Royal Society of Edinburgh, 1192
Histamine Release of, from Rat Mast Cells by Blood treated with Dextran (Dr G T Archer), 1151
Histamine (Urinary), in Adrenalectomized Rats Sodium Chloride Intake and (Dr T Bjuro and Dr H Westling), 1241
Histamine Sensitizing Factor Formation of the Toxoid of, in *Bordetella pertussis* (Prof Toshitaka Matsui and Yoshio Kuwajima), 199
Histidine Analogue of Hypertensin II Synthesis of a Protected Heptapeptide related to the (Dr Dimitrios Theodoropoulos), 1634
Histidine–Copper (II) Complexes (Dr D D Perrin), 1868
Histidine Decarboxylase Pyridoxal Phosphate, a Coenzyme for (S Ono and Prof P Hagen), 1143
Histiocytes A Method for *in vitro* Investigation of the Colloid-storing Function of (Prof N Jancso, Aurelia Jancso-Gabor and J Balassy), 1070

Histochemical Localization of Oxidase Activity in the Mitochondria of the Human Heart (Dr M S Burstone), 476
Histochemical Study of Monoamine Oxidase in the Developing Rat Brain (Nobuo Shimizu and Nogaaki Morikawa), 650
Histochemical Technique (Dr W G Bruce Casselman), *review* by Dr T Kerr, 752
Histochemical Use of the Cyanocarbon Organic Compounds (Prof John F Lhotka), 1153
Histological Localization of Fluorescent Thyroid-stimulating Hormone in Rat Tissues (Dr E E Mancini, O Vilar, J M Dellacha, A Gimeno and A Castro), 1733
Histological Localization of Peroxidase (D S Van Fleet), 506
Histology (Comparative) Textbook of (Dr Warren Andrews), *review* by Dr T Kerr, 752
Historical Geology Outline of (A K Wells), fourth edition, *review*, 1093
History of Chemistry Chymia—Annual Studies in the, Vol 5 (edited by Henry M Leicester), *review* by Prof J R Partington, 1900
History of Cosmology, *review* by Prof E J Dijksterhuis, 836
History of Embryology (Dr Joseph Needham), second edition, *review* by Sir Julian Huxley, 1176
History of the Gramophone From Tinfoil to Tape—the (John Cain), 1535
History of Iron and Steel in China, *review* by Prof F C Thompson, 1830
History of Magic and Experimental Science (Prof Lynn Thorndike), Vols 7 and 8, The Seventeenth Century, *review* by Dr V A Eyles, 1899
History of Nutrition (Prof Elmer Verner McCollum), edited by H Bentley Glass, *review* by Dr Leslie J Harris, 484
History of Technology (edited by Dr Charles Singer, Dr E J Holmyard, A R Hall and Trevor I Williams), Vol 5, The Late Nineteenth Century, *review* by Dr Leonard Carmichael, B A 5
History of Technology and Engineering Man the Maker—a (Prof R J Forbes), *review* by Dr A R Hall, 921
History of Western Technology (Friedrich Klemm), translated from the German by Dorothea Waley Singer, *review* by K R Gilbert, 1601
History of Western Thought, *review* by Gerd Buchdahl 1829
History (Medical) Egypt and Greece in, *review* by Dr Douglas Guthrie, 662
History and Methods of the Sciences Studies in the (Prof Arthur David Ritchie), *review* by Prof A V Hill, 4
History and Philosophy of Science (L W H Hull), *review* by Dr H D Anthony, 131
Hlebarova, M, and others Agar Electrophoresis of Normal Soluble Proteins in Guinea Pig Liver, B A 64
Ho Prof Robert Appointed to the chair of geography in the University of Malaya in Kuala Lumpur, 307, work of, 307
Hoar, Prof W S (Ali, Dr M A, and) Retinal Responses of Pink Salmon associated with its Downstream Migration, 106
Hobbiger, Dr F Appointed to the University of London readership in pharmacology at Middlesex Hospital Medical School, 595
Hobday, Dr G I Boots' New Biological Research Laboratories, 1274
Hobhouse, Sir John Museums and Finance, 598
Hochstrasser, G Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
Hockenhull, Dr D J D (edited by) Progress in Industrial Microbiology, Vol 1, *review* by Dr N Blakebrough, 1598
Hodge, Sir William Elected a foreign associate of the United States National Academy of Sciences, 95
  Presented with the De Morgan Medal of the London Mathematical Society, 1533
Hodgkin, Prof A L Appointed a member of the Medical Research Council, 772
Hoffman, J D Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 157
Hoffmann, Adolphe Faune de France, Vol 62, Coleoptères Curculionides, triosième partie, *review* by R T Thompson, 573
Hofstee, Dr B H J Non-Inverted versus Inverted Plots in Enzyme Kinetics, 1296
Hogben, Prof Lancelot At the Annual Conference of the Library Association (Past, Present and Future of the Printed Page), 1455
Hogberg, L, and others Ionization Phenomena in Gases (Apparatus for the Electrode-less Generation and Acceleration of Plasma Rings), 1357
Hogg, W R Appointed a lecturer in experimental and theoretical physics at the University of Glasgow, 1915
Hohn, Prof E O Prolactin in the Cowbird's Pituitary in relation to Avian Brood Parasitism, 2030
Hohnck, Dr W Polar Front Survey (Biology—Quantity and Types of Fungi in the Sea and on the Sea Bed), 1184
Hokin, Dr Lowell E, and Hokin, Mable R Evidence for Phosphatidic Acid as the Sodium Carrier, 1068
Hokin, Mabel R (Hokin, Dr Lowell E, and) Evidence for Phosphatidic Acid as the Sodium Carrier, 1068
Holden, H W (Robb, J C, and) Coal Science (Spectroscopy of Coals—Volatile Products either Volatilized or Liberated by Pyrolysis when Coal was Heated in the Ion Source), 413
Holdridge, D A Clay Minerals (Use of Thermal Expansion Measurements in Indicating the Mineralogy of Clays), 780, (Thermal Expansion Measurements for Studying Phase Changes on Firing), 780
Holdsworth, M Female-sterile Flowers in *Fuchsia*, 1024
Holland, C H, and others A Revised Classification of the Ludlovian Succession at Ludlow, 1037
Holland, L Electron Bombardment Floating-zone Melting and Allied Electron Bombardment Techniques (Rate of Evaporation from Pendant Drops Bombarded with Electrons—Application to 'Evaporion' Pumps), 692
Holliday, Dr A K Appointed to a senior lectureship in inorganic and physical chemistry in the University of Liverpool, 410
Hollingdale, Dr S H High Speed Computing, *review* by E M Deeley, 1832
Hollingsworth, Dr M A Appointed lecturer in mechanical engineering at the University of Bristol, 1613
Hollingworth, Prof S E The Great Lakes, *review*, 665
Holloway, Dr B W, and Monk, Marilyn Transduction in *seudomonas aeruginosa*, 1426
Holmes, Dr R L A Nucleus of Nerve Cells in the Ferret Pituitary Gland, 1819
Holmyard, Dr E J *Obituary* by Prof J R Partington, 1360
Holmyard, Dr E J, and others (edited by) A History of Technology, Vol 5, The Late Nineteenth Century *review* by Dr Leonard Carmichael, B A 5
Holser, Dr W T Twinning of Crystals (Relations of Symmetry and Structure at the Boundary Plane of a Twin), 1911
Holt, O, and others The *D* Region of the Ionosphere, 973
Holweck Lecture of the Physical Society (Prof A Abragam), 954
Home Counties (London and) Regional Advisory Council for Technological Education Tenth Annual Report, 94
Home Universities Conference 1959, 1613
Homer, R F, and Tomlinson, T E Redox Properties of some Dipyridyl Quaternary Salts, 2012
Homograft Reaction Dietary Factors in the (Dr A S Parkes), 699
Homografts (Cartilage), in Papain-injected Rabbits (M B L Craigmyle), 1243
Homografts (Skin) Tolerance to, of Adult Mice after Parabiosis (Dr B A Rubin), 205
Homografts (Skin), in Parabiotic Mice (Anna Skowron-Cendrzak and Barbara Konieczna-Marczynska), 1590
Honegger Dr Conrad G, and Honegger, Ruth Occurrence and Quantitative Determination of 2-Dimethylaminoethanol in Animal Tissue Extracts, 550, *erratum*, 1986
Honegger, Ruth (Honegger, Dr Conrad G, and) Occurrence and Quantitative Determination of 2-Dimethylaminoethanol in Animal Tissue Extracts, 550, *erratum*, 1986
Honey Bees (*Apis mellifica* L) Isolation of 24-Methylene-cholesterol from (Dr M Barbier, Prof T Reichstein, Dr O Schindler and Prof E Lederer), 732
Honeycombe, R W K, and Beevers, C J Atomic Mechanisms of Fracture (Suppression of Necking, even in Single Crystals of a Face-centred Cubic Material), 325
Hook, O, and Southern, H N At the Conference of the Mammal Society of the British Isles (Erosion caused by Hippopatami in Uganda), 30
Hooke (Robert), and Boyle's Air Pump (Dr H D Turner), 395
Hopkins, B J, and others Ionization Phenomena in Gases (State of the Cathode on Growth Times and Sparking Potentials in Hydrogen), 1354
Hopkins, Dr H G Promoted to Deputy Chief Scientific Officer in the Scientific Civil Service, 858, work of, 858
Hopkinson, B E, and Carroll, K G Chromium Distribution around Grain Boundary Carbides found in Austenitic Stainless Steel, 1479
Hopkinson, Dr R G, and Longmore, J Awarded the Leon Gaster Memorial Premium for 1959 of the Illuminating Engineering Society, 1272
Hops (Seedless) Production of, by Interspecific Pollination (Prof Edward L Davis), 1336
Horden, F W A (Burley, R W, and) Experiments on Wool from Copper-deficient Sheep, 1725
Horigan, Thomas J (Scheuer, Prof Paul J, and) A New Carbonyl Compound from *Piper methysticum* Forst, 979
Horiguchi, Masaaki, and Kandatsu, Makoto Isolation of 2-Aminoethane Phosphonic Acid from Rumen Protozoa, 901
Horikawa, Dr Masakatsu, and Kuroda, Dr Yukiaki *In vitro* Cultivation of Blood Cells of *Drosophila melanogaster* In a Synthetic Medium, 2017
Horlock, Prof J H Research in Gas Dynamics, *review*, 1173
Hormonal Control of Selective Feeding in Female *Calliphora erythrocephala* Meig (J Strangways-Dixon), 2040
Hormonal Principle Natriferin, a New, in the Neurohypophysis of certain Vertebrates (J Maetz, F Morel and B Lahlouh), 1236
Hormone (Fluorescent Thyroid-stimulating), in Rat Tissues Histological Localization of (Dr E E Mancini, O Vilar, J M Dellacha, A Gimeno and A Castro), 1733
Hormone (Melanocyte-stimulating), from the Human Pituitary Gland Structure of a (Dr J Ieuan Harris), 167
Hormone Action Mechanism of (Prof Aaron B Lerner), 674
Hormone Content of the Thymus in the Rat Effect of Adrenalectomy on the (Dr J Comsa), 279
Hormone Effects of Early Distribution and Disappearance from the Blood of Promethium-147 in Rats (Dr Bergene Kawin), 1816
Hormone Extracts (Juvenile), of Insects Prothoracic Gland Stimulation by (Dr Lawrence I Gilbert and Dr Howard A Schneiderman), 171
Hormones in Crustaceans, *review* by Prof J H Welsh, 1761
Hormones (Pituitary) Free Distribution of (Endocrinology Study Section of the United States National Institutes of Health), 1272
Horn, Gabriel, and Blundell, John Evoked Potentials in Visual Cortex of the Unanaesthetized Cat, 173
Horne, Dr J British Universities Film Council, 330
Hornstein, Irwin and others Gas Chromatographic Separation of Long-chain Fatty Acid Methyl Esters on Polyvinyl Acetate, 1710
Hornworm (Tobacco) *Protoparce sexta* (Johan) and the Colorado Potato Beetle, *Leptinotarsa decemlineata* (Say) Common Attractant for the (Dr Robert T Yamamoto and Prof G Fraenkel), 206
Horowitz, Dr Jack, and Chargaff, Prof Erwin Massive Incorporation of 5-Fluorouracil into a Bacterial Ribonucleic Acid, 1213
Horse The Mongolian Wild (*Equus przewalskii*), (A G Bannikov), 1024, (E Dagva), 1024, (D Tzevegmid), 1024, (I S Sles), 1024
Horse Spinal Cord Presence of Behinic Acid in Sphingomyelin from (Prof Yasuhiko Fujino and Takashi Negishi), 817
Horses Cardiac Output in (E W Fisher and R G Dalton), 2020
Horticultural Crops (Agricultural and) The Control of Pests and Diseases in (G L Hey and K Marshall), *review* by F C Bawden, 1258
Horvath, Dr I, and Szentirmai, A Inhibitory Effect of Fungistatic Antibiotics on the Production of Amylase by *Penicillium chrysogenum*, 57
Horvath, Dr I, and others A New Trichothecin-like Antifungal Antibiotic, 908
Hoskin, Dr M A Newtonian Documents, *review*, 1750
Hosking, J S, and Hueber, H V Permanent Moisture Expansion of Clay Products on Natural Exposure, 1373
Hoskins, Dr J M Appointed lecturer in bacteriology and virology at the University of Sheffield, 684
Hospitals and the State—Hospital Organization and Administration under the National Health Service, Sixth and Final Research Report (Creative Leadership in a State Service—a General Survey by Sir George Schuster), 1087, 1201
Host–Parasite Relationships Evolution of (British Association for the Advancement of Science, Section D (Zoology), Symposium on), 760
Hoste, J Radioactivation Analysis (Uses of Activation Analysis in Metallurgy), 951

Hot Laboratory Equipment (United States Atomic Energy Commission), new edition, 155
Hough, Prof Jack L Geology of the Great Lakes, *review* by Prof S E Hollingworth, 665
Houghton, E W (Edwards, J , and) Radar Echoing Area Polar Diagrams of Birds, 1059
Houldin, Dr J E (Gavin, Prof M R , and) Principles of Electronics, *review* by Prof D G Tucker, 751
House (The Country), and the Museum (Museums Association Discussion on), 598
House of Commons Third reading of the Nuclear Installations (Licensing and Insurance) Bill, 680
Houseflies Mechanisms of Resistance of Adult, to the Insecticide Dieldrin (F P W Winteringham and A Harrison), 608
  Pentachloro*cyclo*hexene as a Possible Intermediate Metabolite of Benzene Hexachloride in (R G Bridges), 1337
  Resistance of, to γ-Benzene Hexachloride and Dieldrin (R G Bridges and J T Cox), 1740
House-Fly Esterase Inhibition and Organophosphorus Poisoning in the (Dr D Stegwee), 1253
House-Fly Reproduction Role of Cholesterol in (Ronald E Monroe), 1513
Householder, Dr A S At the first Conference of the British Computer Society (Pitfalls in the Techniques commonly used on Computers), 946
Housing and Local Government, Ministry of Circular No 57/59, Advice concerning Hazards from Ionizing Radiations, 1450

Hudnik-Plevnik, Tamara A , and others Fate of the Highly Polymerized Spleen Deoxyribonucleic Acid labelled with Phosphorus-32 Injected Intraperitoneally into Rats, 1818
Hudson, Dr J C (compiled by) Sixth Report of the Corrosion Committee of the Iron and Steel Institute, 1023
Hueber, H V (Hosking, J S , and) Permanent Moisture Expansion of Clay Products on Natural Exposure, 1373
Huelin, Dr F E , and Kennett, B H Nature of the Olefines produced by Apples, 996, *errata*, 1535
Huffadine, J B Special Ceramics (Very Low Electrical Resistivity of the Silicide MoSi$_2$), 1116
Huffman (Hugh M) Memorial Lecture of Yale University (Prof George S Parks), 1194
Hufton, P A Promoted to Chief Scientific Officer and appointed head of the Aerodynamics Department at the Royal Aircraft Establishment, 233 , work of, 233
Hug, O Biological Effects of Low Doses of Ionizing Radiations (Types of Immediate Response to Irradiation), 1112
Huggins, Prof C G Effect of Acetylcholine on the Incorporation of Radiophosphorus into the Phosphatido-Peptide Fraction of Pancreas Slices, 1412
Hughes, A C Fluctuation Phenomena and Stochastic Processes (Statistics of Radioactive Decay), 510
Hughes, Dr D E R Constitutional Diagrams of Uranium and Thorium Alloys, *review*, 925
Hughes, Dr D L Loss of Wool in Sheep caused by 1-*p*-Aminophenoxy-5-phthalimidopentane, 1644
Hughes, Prof E D Gas Chromatography, 328
Hughes, Gwilym Tribute paid to Jacob Bell, founder of the Pharmaceutical Society of Great Britain, on the hundredth anniversary of his death, 23
  Appointed president of the Pharmaceutical Society of Great Britain, 95
Hughes, M A , and others Separation of the *Meta*- and *Para*-Isomers of the Zylenes, Cresols and Toluidines by Gas Solid Chromatography, 1796
Hughes, N H Origin and Dispersal of Flowering Plants (Difficulties in the Discovery of Palaeobotanical Evidence of Angiospermous Origins), 1200
Hughes, T E Title of reader of zoology in the University of London (at Birkbeck College), conferred on, 322
  Mites, or the Acari, *review* by G O Evans, 1677
Hughes Medal for 1959 of the Royal Society awarded to Dr A B Pippard, 1189, 1834 , work of, 1834
Hull, L W H History and Philosophy of Science, *review* by Dr H D Anthony, 131
Hulme, Dr A C Promoted to Senior Principal Scientific Officer in the Scientific Civil Service, 858 , work of, 858
Hulten, E Origin and Dispersal of Flowering Plants (Alpigenous and Arctogenous Plants), 1200
Hultin, R Specificity in Protein Biogenesis (Observations on Animal Tissues which indicate that another pathway of Amino-acid Incorporation might exist beside that passing through Soluble Ribonucleic Acid), 1199
Hultqvist, Dr Bengt Auroral Frequency Lines, 263
Human The Importance of Being (Dr E L Mascall), *review* by the Very Rev W R Matthews, B A 2
Human Arterial Mucopolysaccharides Anticoagulant Activity of (Prof John E Kirk), 369
Human Blood Group Antigen, Sw$_a$ A 'New' (T Ê Cleghorn), 1324
Human Brain James Arthur Lecture on the Evolution of the—The Discrete and the Diffuse in Nervous Action (Prof D P C Lloyd), 1777
Human Carcinomas Aneuploid Deoxyribonucleic Acid Content of (H F Stich and H E Emson), 290
Human Cerebrospinal Fluid Glycoproteins of (Dr Samuel Bogoch), 1628
Human Diet Strontium-90 in, in the United Kingdom (Agricultural Research Council), 1111
Human Erythrocyte Membrane Active Transport of Uric Acid through the (Dr Kay Overgaard-Hansen and Dr Ulrik V Lassen), 553
Human Erythrocytes Glucose-6-phosphate Dehydrogenase and—Characteristics of Glucose-6-phosphate Dehydrogenase from Normal and Primaquine-sensitive Erythrocytes (Dr Henry N Kirkman), 1291 , Mechanism of Inactivation of Glucose-6-phosphate Dehydrogenase in Human Erythrocytes (Dr Paul E Carson, Stanley L Schrier and Robert W Kellermeyer), 1292
  Mechanism of Inactivation of Glucose-6-phosphate Dehydrogenase in (Glucose-6-phosphate Dehydrogenase and Human Erythrocytes), (Dr Paul E Carson, Stanley L Schrier and Robert W Kellermeyer), 1292
Human Erythroid Cells *in vitro* Lack of Direct Effect of Erythropoietin on (Edward L Alpen, L G Lajtha and Donald C Van Dyke), 1228
Human Foetal Haemoglobin Heterogeneity of—Incidence of Foetal Variants in Singapore (Dr F Vella) 272
Human Gamma-Globulin Staphylocoagulase Inhibition by Pooled (Prof Murray M Streitfeld, Prof Bennett Sallman and Seymour M Schoelson), 1665
Human Gastric Juice Electrophoresis of (Dr Ragnhild Gullberg and Dr Borge Olhagen), 1848
Human Haemoglobin The Heterogeneity of, *review* by Dr J A M Ager, 840
  A Terminal Peptide Sequence of (Dr J A Hunt and Dr V M Ingram), 640
Human Haemoglobin *E*—the Chemical Effect of Gene Mutation (Abnormal Human Haemoglobins), (Dr J A Hunt and Dr V M Ingram), 870
Human Haemoglobin (Adult and Foetal) Serological Distinction of (G R E Naylor and M E Adair), 1854
Human Haemoglobins Abnormal—Human Haemoglobin *E*, the Chemical Effect of Gene Mutation (Dr J A Hunt and Dr V M Ingram), 870 , Haemoglobin 'Bart's', a Foetal Haemoglobin without α-Chains (Dr J A Hunt and Dr H Lehmann), 872
Human Heart Histochemical Localization of Oxidase Activity in the Mitochondria of the (Dr M S Burstone), 476
Human Multiform Glioblastoma Electron Microscopical Structure of the Wall of Small Blood Vessels in (Dr S H M Nystrom), 65
Human Pituitary Gland Structure of a Melanocyte-stimulating Hormone from the (Dr J Ieuan Harris), 167
Human Placenta Phospholipid Phosphoric Esters in the (G Porcellati, B Curti and S Luciani), 1870
Human Precipitins against Common Pathogenic and Non-Pathogenic Fungi (Dr J Pepys, Dr R W Riddell and Dr Y M Clayton), 1328
Human Prothrombin (Purified) Activation of Staphylococcal-free Coagulase by (G Haughton and E S Duthie), 116
Human Red Cells Accumulation of Dextran in, after Haemolysis (N V B Marsden and S G Ostling), 723
  Calcium Ions and the Permeability of (Prof M Maizels), 366
Human Reproduction Essentials of (edited by Prof Joseph Thomas Velardo), *review* by Dr T Mann, 1434
Human Serum Activation and Inhibition of the Arylesterase of (Prof E G Erdos, C R Debay and M P Westerman), 430
Human Serum in Cell Culture Growth-Controlling Action of (Dr Kari Penttinen and Dr Erkki Saxén), 1570
Human Serum Denatured with Tannin Effect of Ultrasound on the Protein of (Dr Wizold Mizgalski and Irena Zygmunt), 1486
Human Serum (Normal) Influence of Coagulase on the Growth of Staphylococci in (Dr K Wlodarczek and Dr J Jeljaszewicz) 1514
Human Serum Proteins (Substituted) Modifications in immunological Behaviour, Electrophoretic Mobility and Colourability of (M Steinbuch, Dr J M Fine and A Battistini), 1571
Human Skeletal Muscle Mitochondria Enzymic Activities of—a Tool in Clinical Metabolic Research (Dr L Ernster, Dr D Ikkos and Dr R Luft), 1851
Human Standard Clots Urokinase-Induced Fibrinolysis of (Dr Kuro N von Kaulla), 1320
Human Subjects Assay of Plasma Insulin in, by Immunological Methods (Dr Rosalyn S Yalow and Dr Solomon A Berson), 1648
Human Thrombocytes Extraction of an Actomyosin-like Protein from (M Bettex-Galland and Dr E F Luscher), 276
Human Tissue Culture Cells Cellular Uptake of Deoxyribonucleic Acid by (Dr Stanley M Gartler), 1505
Human Tissues (Cultured) Sex Chromatin in (Dr Charles P Miles), 477

Human Understanding Concerning (Prof Nikunja Vihari Banerjee), *review* by Dr D J McCracken, 1571

Humane Experimental Technique The Principles of (Dr W M S Russell and R L Burch), *review* by Prof M Weatherall, 1675

Humane Experiments, *review* by Prof M Weatherall, 1675

Humanism Impact of Science and Technology on, 1595

Humanities Science and the, *review* by Dr H D Anthony, 131

Humans Sterol-Balance Experiments in (Dr Harald Schon), 1872

Humans (Non-diabetic), of Varying Ages Actual Distribution of the Number and Volume of the Islets of Langerhans in Different Size Classes in (Bo Hellman), 1498

Hume, David The manuscripts of, to be micro-filmed by the Royal Society of Edinburgh, 95

Hume-Rothery, Prof W Spectrographically Pure Metals, 1794

Humid Central Congo Basin Nitrogen Content of Rain Water collected in the (J Meyer and E Pampfer), 717

Humorally Co-ordinated Chromatic Responses Significance of the Time Relations of (Dr A K Kent), 2027

Humphrey, Beverley A Occurrence of 4-O-Methyl Glucuronic Acid in *Rhizobium* Gums, 1802

Humphrey, Dr J H A New Approach to Immunity, *review*, 753

Humphries, Dr E C Glasshouse Crops Research Institute, 161

Hundred Years of the University of Calcutta—Supplement, *review* by Dr R S Aitken, 218

Hungry Feeding the (Gerard Piel), 162

Hunt, D U British Iron and Steel Research Association—London Group Laboratories Open Days, 1536

Hunt, Dr G R, and Ross, Dr I G At the Second Australian Spectroscopy Conference (Spectra of Aromatic Hydrocarbons—Vibrational Analysis of the 7000 A and 3500 A Absorption Systems of Azulene), 1195

Hunt, J Specificity in Protein Biogenesis (Structure of Abnormal Haemoglobins), 1198

Hunt, J A Awarded a Stothert Research Fellowship by the Royal Society, 595

  Awarded a Carlsberg–Wellcome Travelling Research Fellowship, 683

Hunt, Dr J A, and Ingram, Dr V M A Terminal Peptide Sequence of Human Haemoglobin?, 640

  Human Haemoglobin *E*—the Chemical Effect of Gene Mutation (Abnormal Human Haemoglobins), 870

Hunt, Dr J A, and Lehmann, Dr H Haemoglobin 'Bart's', a Foetal Haemoglobin without α-Chains (Abnormal Human Haemoglobins), 872

Hunt, Dr R W G The Reproduction of Colour, *review* by Dr W S Stiles, 1092

Hunter, R F Conservation in the Scottish Highlands (Conservation of Sheep Grazing), 1529

Huntjens, F J, and others Coal Science (Carbonization—Strength of Coke in relation to Particle Size of Coal Carbonized), 413

Hunwicks, S A Promoted to Deputy Chief Scientific Officer and appointed director of Atomic Weapons (Development), Ministry of Aviation, 1775, work of, 1775

Hurle, Dr I R, and Gaydon, Dr A G Vibrational Relaxation and Dissociation of Carbon Dioxide behind Shock Waves, 1858

Hurley, Richard B Junction Transistor Electronics, *review* by J W R Griffiths, 838

Hurych, J (Chvapil Dr M, and) Hydroxylation of Proline *in vitro*, 1145

Huseman, E Macromolecules (Starch and Cellulosic Chemistry), 1690

Husserl, Edmund Erste Philosophie (1923-24), Teil 2, Theorie der Phänomenologischen Reduktion (herausgegeben von Rudolf Boehm), (Husserliana, Band 8), *review* by F I G Rawlins, 1571

Husserliana Completed, *review* by F I G Rawlins, 1571

Hutchinson, E M Museums and Finance, 598

Hutchinson, Dr J The Families of Flowering Plants, second edition, Vol 1, Dicotyledons, Vol 2, Monocotyledons, *review* by Prof T G Tutin, 1759

Hutchinson, Sir Joseph *Obituary* of John Cecil May, 589

Hutchinson, P Awarded the Maskell Peace Scholarship for 1959 of the Institution of Mining Engineers, 1845

Hutchinson, Dr R C Food for Survival after a Disaster, *review* by M W Grant, 841

Hutt, Dr M S R, and others Detection of Thyroid Antibodies using Bentonite Particles, 478

Hutten, Dr E M Biology and Physics, 1193

Huxley, H E Comparative Studies in Ultrastructure (Comparative Study of the Activation of Contraction in Muscle), 1447

Huxley, H E, and others Comparative Studies in Ultrastructure (Comparative Studies in the Contractile Structures of Striated and Smooth Muscles), 1446

Huxley, Sir Julian Embryology, *review*, 1176

Huxley, Prof L G H Appointed a member of the Executive of the Australian Commonwealth Scientific and Industrial Research Organization, 1984, work of, 1984

Huxley, T H—Scientist, Humanist and Educator (Dr Cyril Bibby), *review* by Lord James of Rusholme, B A 2

Huxtable, Dr G Nuclear Forces and the Few-Nucleon Problem (Scattering of Nucleons by Light Nuclei at High Energy), 1113

Hvidberg, Eigill, and Schou, Jens Subcutaneous Absorption of Urethane in Dehydrated and Fasted Mice, 646

Hyacinth (Water), *Eichornia crassipes* Effects of the, in the Nile Valley (H R J Davies), 1085

Hybrid Population (*Baptisia*) Applications of Paper Chromatography to Systematics—Recombination of Parental Biochemical Components in a (Dr R E Alston and Dr B L Turner), 285

Hybridization Changes Effect of, on the Bond Energies of Carbon–Carbon Single Bonds (J E Bloor and S Gartside), 1313

Hybrids of *Tilapia nilotica* x *T galilea* (A Yashouv and J Chervinsky), 1739

Hybrids (Interspecific), of *Lycopersicum* (Helgi Nirk), 1819

Hybrids (Killifish) Effect of Thiouracil and Thyroxine on Development and Growth of Cutaneous Melanoma in (Prof A Stolk), 562

Hydén, Prof Holger Quantitative Assay of Compounds in Isolated, Fresh Nerve Cells and Glial Cells from Control and Stimulated Animals, 433

Hydractinia echinata Effect of Acetylcholine and Eserine on the Spawning of (M Yoshida), 1151

Hydrate of Cellulose Evidence for a, from Studies of its Surface Properties (Dr J M Joubert, Dr G J R Krige and Dr K Borgin), 1561

Hydrated Portland Cement Carbonate Minerals in (W F Cole and B Kroone), B A 57

Hydrates (Gas) Some Stoicheiometric (Dr D N Glew), 545

Hydrazinium Solution (Sodium-free) Excitability and Phosphorylation of Muscle and Nerve in (L G Abood and K Koketsu), 725

Hydrazones (Keto-Acid) Thermal Decarboxylation of some (Ambrose M Tokushige and Prof Elton S Cook) 267

Hydrocarbons Use of Tritium to Study the Solubility of Water in (B D Caddock and P L Davies), 2011

Hydrocarbons for Growth Incorporation of Molecular Oxygen in Bacterial Cells utilizing (E R Leadbetter and J W Foster), 1428

Hydrocarbons (Light) Analysis of (G R Primavesi), 2010

Hydrocarbons (Polycyclic Aromatic) Effect of, on the Polarographic Maximum of Copper (C E Searle), 1716

Hydrocarbons and other Organic Compounds Nitration of (A V Topchiev), translated from the Russian by Catherine Matthews, *review* by Prof M J S Dewar, 577

Hydrocortisone Liver Glucosyl Oligosaccharides and Glycogen—Carbon-14 Dioxide Experiments with (Dr Hsien-Gieh Sie, Prof James Ashmore, Dr Robert Mahler and Prof William H Fishman), 1380

  Mechanism of the Atherogenic Action of Excess (Dr Henry Grossfeld), 38

Hydrogen Structure of Bituminous Coals—Evidence from Distribution of (Dr P H Given), 980

Hydrogen (Neutral Atomic), in Globular Clusters A Search for (Dr Morton S Roberts), 1555

Hydrogen, Carbon Dioxide and Air Habit of Ice Crystals grown in, at Reduced Pressure (A P van den Heuvel and Dr B J Mason), 519

Hydrogen Peroxide Lowered Bactericidal Efficiency of, on Milk from Cows treated with Penicillin (J Babad, D L Boros and F Baier), 292

Hydrogen Peroxide, H_2O_4? A Higher (Dr J G Marshall and Dr P V Rutledge), 2013

Hydrogen Peroxide and Ferric Salts Oxidation of Ethyl Alcohol by a Mixture of (Dr Mordechai L Kremer), 720

Hydrogen Transport by Phenolic Œstrogens Two Enzymic Mechanisms for (Dr H G Williams-Ashman, M Cassman and Margaret Klavins), 427

Hydrogenation of Lipids by Rumen Protozoa (Dr D E Wright), 875

Hydrogenolysis of Carbon-Oxygen Bonds in some Aromatic Compounds by Electrolysis (Dr P H Given and Dr M E Peover), 1064

Hydrological Networks Design of (Max A Kohler), (World Meteorological Organization, Technical Note No 25), 96, *erratum*, 684

Hydrology (Scientific), International Association of Symposium on the Effects of Forest Areas on Water Resources, 1184

  Symposium on the Technique of Lysimetry, 1184

Hydrolysis 1-Glyceryl-2-*myo*-inositol Phosphate—Alternative Synthesis and Behaviour on (Synthesis and Properties of 1-Glyceryl-2-*myo*-inositol Phosphate), (R B Ellis and J N Hawthorne), 790

Hydrolysis of Adenosine Triphosphate Equilibrium Constant of the Galactokinase Reaction and Free Energy of (Dr M R Atkinson Eleanor Johnson and Prof R K Morton), 1925

Hydrolysis *in vitro* of Derivatives of 2-Aminofluorene Possible Relation between Carcinogenicity and Ease of (Prof Mary F Argus and Francis E Ray), 2018

Hydrolysis of 'Heated' Haemoglobin (S Baar), 986

Hydrolysis of *p*-Nitrophenyl Acetate Catalysed by Chymotrypsin Reactivity and Interrelationship of Intermediates in the (Mario A Marini and Prof George P Hess), 113

Hydromagnetic Heating Upper Atmosphere Density Variations due to (Dr A J Dessler), 261

Hydromedusa A Rare (Surg Comdr D C Howe), 1963

Hydromedusae Atlantic, *review* by J H Fraser, 300

Hydromedusae of the Atlantic Ocean and adjacent Waters (P L Kramp), (*Dana* Report No 46), *review* by J H Fraser, 300

Hydroperoxide (*trans-trans* Methyl Linoleate) Preparation of Crystalline (A Banks, S Fazakerley, J N Keay and J G M Smith), 816

Hydroperoxide (Thymine), produced by X-Irradiation Structure of (B Ekert and R Monier), B A 58

α-Hydroxyacetylene Complexes of Platinum (II) Structure of (Dr J Chatt, L A Duncanson and R G Guy), 526

Hydroxy-Cinnamic Acids Metabolism of Cinnamic Acid and, by *Lactobacillus pastorianus* var *quinicus* (Dr G C Whiting and Dr J G Carr), 1427

10-Hydroxy-Δ^2-decenoic Acid Biological Origin and Configuration of (Dr S A Barker, Dr A B Foster, D C Lamb and Dr L M Jackman), 634

Hydroxylamine Inactivation of some Animal Viruses by, and the Structure of Ribonucleic Acid (Dr Richard M Franklin and Dr Eberhard Wecker), 343

Hydroxylation of Proline *in vitro* (Dr M Chvapil and J Hurych), 1145

Hydroxylysine in Wool (Helga Kersten and L Zurn), 1490

4-Hydroxypipecolic Acid in *Acacia* Species Occurrence of (Dr J W Clark-Lewis and P I Mortimer), 1234

8-Hydroxyquinaldic Acid, the Red Fluorescent Substance in the Urine of Pyridoxine-deficient Rats (Dr J K Roy, Dr R R Brown and Prof J M Price), 1573

3-Hydroxytetrahydrothiophene-1,1-dioxide *in vivo* Metabolic and Chemical Studies of 'Myleran'—Formation of, and Reactions with Thiols *in vitro* (Dr J J Roberts and Dr G P Warwick), 1288

Hyman, Dr Libbie Henrietta The Invertebrates, Vol 5, Smaller Coelomate Groups—Chaetognatha, Hemichordata, Pogonophora, Phoronida, Ectoprocta, Brachipoda, Sipunculida, the Coelomate Bilateria, *review* by Dr N B Eales, 573

Hyman, Dr R A Semiconductors, *review*, 1754

Hynes, R D (Burge, Dr R E, and) The Optical Rotatory Power of Collagen, 1562

Hyoscyamus niger Complex Reaction in, upon Night Interruption with Red Light (P J A L de Lint), 731

Hyperplasia (Cellular) Viral Multiplication and (Prof Councilman Morgan), 435

Hypersensitivity Delayed (British Society for Immunology Symposium on), 1029

  Insulin and (R K Sanyal, P S J Spencer and Dr G B West), 2020

Hypersonic Gun Tunnel Measurement of the Effects of Piston Mass and Bursting Pressure on the Motion of a Piston in a (B J Belcher), 1207
Hypertensin II Synthesis of a Protected Heptapeptide related to the Histidine Analogue of (Dr Dimitrios Theodoropoulos), 1634
Hypertension (Essential) Haemodynamics in (Dr J Brod, V Fencl, Z Hejl and J Jirka), 1643
Hypervitaminosis A Carbohydrate Metabolism in (Amal Ray and Prof D P Sadhu), 1323
Hypocotyls (Bean, *Phaseolus vulgaris*) Influence of Kinetin, β-Indoleacetic Acid and Gibberellic Acid on Nuclease Activity of (Dr W Maciejewska-Potapczyk), 557
Hypophysial Extracts (Fish and Frog) Chromatographic and Biological Characteristics of (Active Principles of the Neurohypophysis of Cold-blooded Vertebrates), (B T Pickering and Prof H Heller), 1463
Hypothalamic Extract (Whole) Effects of Methylthiouracil or Thyroidectomy on Activation of Pituitary Acid Phosphatases *in vitro* by (Dr V Schreiber and Dr V Kmentova), 728
Hypothesis The Aurora, the Radiation Belt and the Solar Wind—a Unifying (M H Rees and G C Reid), 539
Hypoxia Decrease in Radiosensitivity of the Intact Mouse Spleen produced by (Dr L Weiss), 1156
Hyptis suaveolens Poit Anti-A Haemagglutinins from a Non-Leguminous Plant (Dr G W G Bird), 109
Hytten, Dr F E (Taggart, Nan, and) Saliva-Serum Ratios of Deuterium Oxide after Administration of Heavy Water, 457

IACHAN, A , and others Electrophoretic Heterogeneity of Trypsin, 1225
Ibrahim, Dr Ragai K , and Towers, Prof G H N Conversion of Salicylic Acid to Gentisic Acid and *o*-Pyrocatechuic Acid, all Labelled with Carbon-14, in Plants, 1803
Ice (Antarctic Glacier) Creep Tests on (Malcolm Mellor), 717
Ice Age (Late Pre-Cambrian) Palaeomagnetism in some Norwegian Sparagmites and the (W B Harland and D E T Bidgood), 1860
Ice Caps (Polar) Temperatures in (Dr Uwe Radok), 1056
Ice Crystals grown in Hydrogen, Carbon Dioxide and Air at Reduced Pressure Habit of (A P van den Heuvel and Dr B J Mason), 519
Ice Sheet (Antarctic) Surface Topography of the (Dr J F Nye), 786
I C S U Review, No 1 (International Council of Scientific Unions), 319
Ideas for Industry New, *review* by Prof A J Brown, 1348
Identification of the High-Temperature Constituent in Mild Steel Surface-Hardened by Carbo-Nitriding (M A H Howes, G T F Jay, K Sachs and D Wilkinson), 1312
Identification of Phenazocine, a Potent New Analgesic (Dr E G C Clarke), 451
Identification of the Polyphenoloxidase Substrate of the Banana Detection and (Dr L A Griffiths), 58
Identification of Sugar Phosphates Periodate Technique for the (Eugene A Davidson), 1395
Identification (Chromatographic), of the Antilipaemic *X* Factor of the Unsaponifiable Fraction of Crude Vegetable Oils (Prof M C Nath, A Saikia and B I Uppin), 1635
Identification (Cytological), of Proliferating Donor Cells in Chick Embryos injected with Adult Chicken Blood (P M Biggs and L N Payne), 1594
Identification (Partial), of Lysins and Agglutinins in Lymphomatous Mouse Tissue (Dr Eric Ponder and Ruth V Ponder), 819
Identification (Spectroscopic), of Alpha-Emitting Nuclides in Biological Material (Prof W V Mayneord and C R Hill), 667
Iggo, Dr Ainsley Appointed to a Locke Research Fellowship by the Royal Society, 772
Iijima, Dr Teiji, and others Induction of Phage Formation in the Lysogenic *Escherichia coli K*-12 by Mitomycin *C*, 1079
Ikeda, Y (Kohiyama, M , and) Anomalous Genetic Interactions observed in *Bacillus subtilis*, 208
Ikkos, Dr D , and others Enzymic Activities of Human Skeletal Muscle Mitochondria—a Tool in Clinical Metabolic Research, 1851
Illness Darwin's (Prof S Adler), 1102
Illuminating Engineering Society H R H The Duke of Edinburgh to become the first Honorary Fellow, 237
  First Award of the Gold Medal made to Dr J W T Walsh, 1106
  Installation of H G Campbell as president for 1959-60, 1272
  Leon Gaster Memorial Premium for 1959 awarded to Dr R G Hopkinson and J Longmore, 1272
Illumination (Increased) Reduction in the Anoestrus Period of Laboratory Cats by (Dr Patricia P Scott and Marny A Lloyd-Jacob), 2022
Illustrated London News Series of astronomical articles in the (Prof H Bondi), 1913
Illustration (Visual), of University Lectures (British Universities Film Council Discussion on), 515
Image-Splitting Microscope for Accurate Measurement (J Dyson), 1561
Image (Colour-) Synthesis with Two Unorthodox Primaries (Arthur Karp), 710
Imai, A (Kanazawa, Dr K , and) Pure Culture of the Pathogenic Agent of Tyzzer's Disease of Mice, 1810
Imai, Sadao, and others Plant Growth Activities of 5- and 8-Halogeno-Dihydro- and Tetrahydro-1-naphthoic Acids, 1415
Imbalance' ('Amino-Acid) Effect of, on Growth and Vitamin A Storage in the White Rat (M Rechcigl, jun , S Berger, J K Loosli and H H Williams), 1404
Immediate and Low-level Effects of Ionizing Radiations (Dr Tikvah Alper), 1111
Immunity A New Approach to, *review* by Dr J H Humphrey, 753
  Transplantation—Separation of Antigenic Components from Isolated Nuclei (André Castermans and André Oth), 1224
Immunity (Acquired) The Clonal Selection Theory of (Sir Macfarlane Burnet), *review* by Dr J H Humphrey, 753
Immunity (Passive), in an Insectivore Transmission of (B Morris), 1151
Immunization with Biologically Active Fractions of Deoxyribonucleic Acid and Subsequent Specific Infection of Mice (Dr M Kohoutova), 1965
Immunochemical Studies of Polypeptidyl Proteins and Synthetic Polypeptides (Prof M A Stahmann, D J Buchanan-Davidson, Dr C Lapresel and Dr P Grabar), 549
Immunological Behaviour, Electrophoretic Mobility and Colourability of Substituted Human Serum Proteins Modifications in (M Steinbuch, Dr J M Fine and A Battistini), 1571
Immunological Distances among some Gallinaceous Birds (Danilo Mainardi) 913
Immunological Methods Assay of Plasma Insulin in Human Subjects by (Dr Rosalyn S Yalow and Dr Solomon A Berson), 1648
Immunological Paralysis and Unresponsiveness Specific Inhibition of Antibody Formation during (Dr E Sercarz and Dr A H Coons), 1080
Immunological Suppression Tumour Specificity and (Elaine Levi, A M Schechtman, Richard S Sherins and Stanley Tobias), 563
Immunological Unresponsiveness Mechanism of (Prof Charles F Crampton, Fred R Frankel and J L Rodeheaver), 873
Immunology Delayed Hypersensitivity in, 1029
Immunology, British Society for Symposium on Delayed Hypersensitivity, 1029
Immunology and Development (edited by M V Edds, Jr), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Impact Ductile Molybdenum (J A Belk), 897
Impact of Science and Technology on Humanism, 1595
Impact (Electron) Isomerization to the Tropylium Ion Induced by, and its Significance (Dr W Hanuš), 1796
Impairment Mechanism (Strength), of Glass in Aqueous Systems (Frederick J Radd and Donald H Oertle), 976
Impedance Methods (Mechanical), for Mechanical Vibrations—Colloquium presented at the Annual Meeting of the American Society of Mechanical Engineers, 1958 (edited by R Plunkett), *review* by Prof R E D Bishop, 1764
Imperial Cancer Research Fund Fifty-sixth Annual Report (1957-58), 783
Imperial Chemical Industries, Ltd 'Procinyl' Dyes, 152
Imperial College of Science and Technology, London Postgraduate Courses (1959-60), 235
  Appointment of Dr P J Grant as reader in engineering science, 322
  Appointment of Dr B W Martin as reader in applied thermodynamics, 322
  Appointment of Dr P Grootenhuis to the University of London readership in mechanical engineering, 508
  Appointment of Dr A P Millman to the University of London readership in mining geology, 595
  Title of professor of physics in the University of London conferred on Dr M Blackman, 1273
  Title of professor of physical chemistry in the University of London conferred on Dr F C Tompkins, 1273
  Appointment of A V Bradshaw to the University of London readership in extraction metallurgy, 1535
Implement (A Bone), from Sterkfontein (Dr J T Robinson), 583
Implements (Stone), from Western Nigeria (E L Kostick, C N Williams and S A Williams), 124
Implications of Restricting Cows to a Clover-free Diet in order to Reduce the Strontium Content of Milk (Dr David Purves), 1408
Importance of Being Human (Dr E L Mascall), *review* by the Very Rev W R Matthews, B A 2
Importance of New Detectors, *review*, 1260
Importance of the Type of Metabolism for the Radiosensitivity of Mice (Dr M Pospisil and Dr L Novak), 1814
Importance (The Critical), of Transport and Communications (Sir Ewart Smith), B A 44
Improved Caesium Frequency and Time Standard (Dr L Essen and J V L Parry), 1791
Improved Technique for Intravenous Injection of Newborn Rats and Mice (N F Anderson, E J Delorme, Prof M F A Woodruff and D C Simpson), 1952
Improvement and Management of Salt-affected Soils Diagnosis, (Unesco Middle East Science Co-operation Office Regional Training Course on), 1778
Improvements in Colorimetric Determination of Elastin Some (Dr V Scarselli), 1563
Imsheneysky, Prof Alexandre A , and others Statement on Biological and Chemical Warfare, 1018
Inactivated by Mercury Reactivation of Vaccinia Virus (Colin Kaplan), 1074
Inactivation of some Animal Viruses by Hydroxylamine and the Structure of Ribonucleic Acid (Dr Richard M Franklin and Dr Eberhard Wecker), 343
Inactivation of Glucose-6-phosphate Dehydrogenase in Human Erythrocytes Mechanism of (Glucose-6-phosphate Dehydrogenase and Human Erythrocytes), (Dr Paul E Carson, Stanley L Schrier and Robert W Kellermeyer), 1292
Inactivation (Heat), of Rinderpest-infected Bovine Tissues (Dr G R Scott) 1948
Inadequacy of Scatter Mechanisms in Tropospheric Radio Propagation (P C M de Belatini), 1558
Inauguration of *Merlin* by H R H the Duke of Edinburgh, 1191
Incentives in the Building Industry (Alison Entwistle and W J Reiners), (National Building Studies Special Report No 28), 98
Incidence of Bone Tumours An Effect of Dose Fractionation on the, using Radioactive Phosphorus (Dr N M Blackett), 565
Incidence (Tumour) Latent Period of X-Ray Induced Ageing—a Study based on Mortality Rate and (Dr H I Kohn and Dr P H Guttman), 735
Incisor Teeth of Rats deficient in Vitamin E Curative Effect of Selenium upon the (Prof J T Irving), 645
Incomplete Antibodies Loss of Plasticity of Erythrocytes coated with (Prof C T Nicolau, P Teitel and M Fotino), 1808
Incorporation of 5-Bromouracil into Transforming Principal of *Bacillus subtilis* and its Biological Effects (Dr Erela Ephrati-Elizur and Prof Stephen Zamenhof), 472
Incorporation of Metabolites by Isolated Thymus Nuclei Monovalent Cations and the (Dr Theodore R Breitman and Dr George C Webster), 637
Incorporation of N-Methyl Carbon of Monoethylaminoazobenzene into Polar Dyes (Prof Hiroshi Terayama, Prof Morizo Ishidate and Akira Hanaki), 1460

Incorporation of DL-[2-^{14}C] Mevalonic Acid Lactone into Polyisoprene (R G O Kekwick, B L Archer, D Barnard, G M C Higgins, G P McSweeney and C G Moore), 268, *erratum*, 772
Incorporation of Molecular Oxygen in Bacterial Cells utilizing Hydrocarbons for Growth (E R Leadbetter and J W Foster), 1428
Incorporation of Radiophosphorus into the Phosphatido-Peptide Fraction of Pancreas Slices Effect of Acetylcholine on the (Prof C G Huggins), 1412
Incorporation of Uridine labelled with Tritium Chromosomal Synthesis of Ribonucleic Acid as shown by (G Pelling), 655
Incorporation (Massive), of 5-Fluorouracil into a Bacterial Ribonucleic Acid (Dr Jack Horowitz and Prof Erwin Chargaff), 1213
Increase in the γ-Aminobutyric Acid Content of Rat Brain after Ingestion of Ethanol (Dr H -M Häkkinen and E Kulonen), 726
Increase by Chlorothiazide of the Paralysing Activity of *d*-Tubocurarine Chloride (Prof W Ferrari, G L Gessa and G Sangiorgi), 1235
Increase in the Tension in a Ligament Does an, elicit Reflex Muscular Responses ? (Dr Bertil Sténer), 1495
Increase (Anticipatory), of Intensity associated with the Cosmic-Ray Storm of February 11, 1958 North–South Anisotropy and (Dr V Sarabhai and R Palmeria), 1204
Increase (Effective), in Nematode Populations by the Addition of Aureomycin (C O R Everard and William A Feder), 1887
Increased Capillary Permeability Pharmacological Suppression of, following Irradiation of the Intestine of Rats (Dr D A Willoughby), 1156
Increased Circulating Insulin-like Activity in Obese-Hyperglycaemic Mice (Jean Christophe, Yves Dagenais and Jean Mayer), 61
Increased Illumination Reduction in the Anoestrus Period of Laboratory Cats by (Dr Patricia P Scott and Marny A Lloyd-Jacob), 2022
Increased Oxygen Consumption in Rats during Irradiation (Dr A Vacek), 197
Increasing the Phosphorus Content of Forages A Method of (Prof R Ferrando, S Metivier and R Gervy), 76
Incubated at 22°-30° C Appearance of Crystalline Needles in Monkey Kidney Cell Cultures infected with Poliomyelitis Virus and (Dr Esther Tenenbaum), 1657
Index of Chemistry Films (Royal Institute of Chemistry), *review*, 1902
Index Kewensis Supplementum Duodecimum, 1951-1955 (edited by Dr George Taylor), *review* by Prof T G Tutin, 129
India Biochemical Research in—Golden Jubilee Symposium (Prof P S Sarma), 1367
  Bovine Stars of (Indian Council of Agricultural Research, Misc Bulletin No 82), 941
  Indications of Glacierization in the Siwalik System in (R. C Mehridatta), 833
  Management in, 1913
Indian Botanical Society Birbal Sahni Medal for 1958 awarded to Prof P Maheshwari, 95
Indian Council of Agricultural Research Misc Bulletin No 82, Bovine Stars of India, 941
Indian Council of Agricultural Research and Unesco International Symposium on Algology, 595
Indian Culture The Pre-historic Background of (Colonel D H Gordon), *review* by M C Burkitt, 131
Indian Institute of Science Symposia on Biology and Biochemistry of Micro-organisms, Enzymes, and Vitamins, 1367
Indian Ocean (eastern) Oceanographic and Geophysical Investigation of the western Pacific Ocean and (Scripps Institution of Oceanography), 24
Indian Prehistory, *review* by M C Burkitt, 131
Indian Rhinoceros The Great (E P Gee), 1986
Indian Society of Soil Science Presidential Address (Dr N R Dhar), 942
Indian Society of Theoretical and Applied Mechanics Fifth Congress on Theoretical and Applied Mechanics, 1192
Indian Termite Fauna New Neotropical Element (*Anoplotermes*) in (Dr M L Roonwal and O B Chhotani), 1967
Indians (South American) Frequency of the New Blood Group Antigen Js^a among (Dr Miguel Layrisse and Dr Zulay de Layrisse), 640
Indications of Glacierization in the Siwalik System in India (R C Mehridatta), 833
Indicator (Metal Ion) Determination of the Interaction of Deoxyribonucleate and Magnesium Ions by means of a (Joseph Shack and Barbara S Bynum), 635
Individual Insects The Infra-Red Gas Analyser as a Means of Measuring the Carbon Dioxide Output of (Dr A G Hamilton), 367
3-Indole Acetic Acid in *Avena* Electrical Determination of Transport of (I A Newman), 1728
Indole Acetic Acid and α-Naphthalene Acetic Acid Effect of, on the Growth, Flowering and Fruit Set in Sweet Potato (G Satyanarayana and Dr G Rangaswami), B A 73
β-Indoleacetic Acid and Gibberellic Acid (Kinetin,) Influence of, on Nuclease Activity of Bean (*Phaseolus vulgaris*) Hypocotyls (Dr W Maciejewska-Potapczyk), 557
Indoleacetic Acid Oxidase A Possible Role of, in Crown Gall Tumour Induction (Dr Jacques Lipetz), 1076
Indoleacetonitrile α-Oxidation of (H F Taylor and Prof R L Wain), 1142
3-Indolecarboxylic Acids Occurrence of 3-Indolylacetic and, in Tomato Crown-Gall Tissue Extracts (G Clarke, M H Dye and Prof R L Wain), 825
3-Indolylacetic and 3-Indolecarboxylic Acids Occurrence of, in Tomato Crown-Gall Tissue Extracts (G Clarke, M H Dye and Prof R L Wain), 825
Induced Ageing (X-Ray) Latent Period of—a Study based on Mortality Rate and Tumour Incidence (Dr H I Kohn and Dr P H Guttman), 735
Induced Inhibition (X-Ray), of Deoxyribonucleic Acid Synthesis in *Escherichia coli* 15$_T$ Influence of Unbalanced Growth on subsequent (Daniel Billen), 174
Induced Mutations of X-Ray Irradiations in *Culex fatigans* Wied (1828), (R Pal and B S Krishnamurthy), 658
Induced Tolerance of D-Tubocurarine Chloride in the Cat (Fiona Acheson and Dr R J M Fry), 1409
Induction of Parthenocarpy in *Rosa arvensis* Huds with Giberellic Acid (M V Prosser and G A D Jackson), 108
Induction of Phage Formation in the Lysogenic *Escherichia coli K*-12 by Mitomycin C (Dr Nozomu Otsuji, Dr Mutsuo Sekiguchi, Dr Teiji Iijima and Dr Yasuyuki Takagi), 1079
Induction (Crown Gall Tumour) A Possible Role of Indoleacetic Acid Oxidase in (Dr Jacques Lipetz), 1076
Induction (Early), of Flowering in Birch Seedlings (Dr K A Longman and Prof P F Wareing), 2037
Induction (Enzyme) X-Ray Sensitivity and Volume Target of (Dr Helmut Pauly), 1570
Industrial Bacteria, National Collection of Transferred from the National Chemical Laboratory to the Torry Research Station, 1192
Industrial Conference Board, Inc (National), Cleveland Seventh Annual Conference on Atomic Energy in Industry (Radiation, a Tool for Industry), 506
Industrial Health in the Potteries, 420
Industrial Microbiology Progress in (edited by Dr D J D Hockenhull), Vol 1, *review* by Dr N Blakebrough, 1598
Industrial Psychology, National Institute of Grant of £6,000 a year for five years from the Department of Scientific and Industrial Research, 940
  Vernon Prize for 1960, 1450
Industrial Research Associations in the Government Scheme Research for Industry 1958, a Report on Work done by the (Department of Scientific and Industrial Research), 211, 238
Industrial Research Reactor *Merlin*, an (Dr T E Allibone), B A 11
Industrial Technical Organization (Institute of the Rubber Industry Conference on), 322
Industry Application of Science in, 1827
  Atomic Energy in (National Industrial Conference Board, Inc , seventh Annual Conference on), 506
  British, *review* by Prof A J Brown, 1089
  Efficient Use of Man-Power in (Report of an inquiry by the National Joint Advisory Council), 25
  Fitting the Job to the Worker—a Survey of American and European Working Conditions in (European Productivity Agency of the Organization for European Economic Co-operation, Project 335), 422
  Health and, 1023
  New Ideas for, *review* by Prof A J Brown, 1348
  Radiation, a Tool for (National Industrial Conference Board, Inc , seventh Annual Conference on Atomic Energy in Industry), 506
  Relationships in—some Changing Concepts of Management (British Institute of Management and the Ministry of Labour Conference on), 156
  Research for, 1958—a Report on Work done by the Industrial Research Associations in the Government Scheme (Department of Scientific and Industrial Research), 211, 238
  Science in—Policy for Progress (Prof C F Carter and Prof B R. Williams), 1827
Industry (American) Funds for Research and Development Performance in (United States National Science Foundation, Reviews of Data on Research and Development No 14), 1022
Industry (British) The Structure of, a Symposium (edited by Duncan Burn), *review* by Prof A J Brown, 1089
Industry (Building) Incentives in the (Alison Entwistle and W J Reiners), (National Building Studies Special Report No 28), 98
Industry (Food) Enzymes in the (Food Group of the Society of Chemical Industry Symposium on), 1366
Industry (Petroleum) Centenary of the, 1611
  Handbook of the (edited by G Sell and H A Dossett), *review*, 1832
Industry and Commerce Staff in—Management of Workers whose Skills are mainly Mental or Social rather than Manual (E M Barling), 319
Industry and Commerce Tynside Association of Libraries for, 25
Industry and Health in Britain, 1456
Industry and Technical Colleges Relationship between (Liverpool District of the Federation of British Industries Conference on), 1690
Infant Rat Passage of Insulin through the Wall of the Gastro-intestinal Tract of the (Dr B Mosinger, Z Placer and O Koldovsky), 1245
Infection of Cattle with *Cysticercus bovis* by the Injection of Onchospheres (G Froyd and M C Round), 1510
Infection of Mice Immunization with Biologically Active Fractions of Deoxyribonucleic Acid and Subsequent Specific (Dr M Kohoutova), 1965
Infection with West Nile Virus Duration of Protective Action of Interferon against (Dr Alick Isaacs and Marguerite A Westwood), 1232
Infection (Bacillus Calmette-Guérin) Effect of, on Transplanted Tumours in the Mouse (Dr Lloyd J Old, Dr Donald A Clarke and Dr Baruj Benacerraf), 291
Infections (Intraperitoneal), of Mice Opsonins as Determinants of Survival in (Dr C R Jenkin and Prof D Rowley), 474
Infectious Nucleic Acid Recovery of, from Tobacco Mosaic Virus Inactivated by Antibody (Dr Irving Rappaport), 1732
Infectious Ribonucleic Acid from Mouse Brains infected with Tick-borne Encephalitis Virus (F Sokol, H Libikova and J Zemla), 1581
Infective 'Ribonucleic Acid' Failure to Recover, from Myxovirus Preparations (G L Ada, Patricia E Lind, Lois Larkin and Sir Macfarlane Burnet), 360
Infective Ribonucleic Acid in Pig Kidney Tissue Culture Monolayers Effect of Proflavine on the Formation of the Virus of Foot-and-Mouth Disease and its (F Brown and Doreen L Stewart), B A 74
Infective Stage in Tsetse Fly Tissue Culture Development of *Trypanosoma vivax* to the (Dr William Trager), B A 30
Infectivity of Polio Virus Ribonucleic Acid for Embryonated Eggs and Unsusceptible Cell Lines (P De Somer, Dr A Prinzie and E Schonne), 652
Infectivity and Haemagglutinin of Vaccinia Virus Effect of Concentrated Urea Solutions on the (Prof J F McCrea and Jean O'Loughlin), 1497
Infertility Proceedings of the Third Symposium on Reproduction and, Colorado State University (edited by F X Gassner, in association with Rue Jensen and H J Hill), *review* by Dr T Mann, 1434
Infestation of Rabbits with the Nematode *Trichostrongylus retortaeformis* (Zeder, 1800) A Seasonal Sex Difference in the (P C Bull), 281
Infestation Control, a Service to Agriculture and Food Storage (Ministry of Agriculture, Fisheries and Food), 941
Inflorescence Inception and Leaf Size in Gramineae (M Borrill), 321
Inflorescences, Flowers and Ovaries of an Apomict, *Aerva tomentosa* Forsk *In vitro* Culture of the (Prem Murgai), 72
Influence of Adult Lymphoid Tissues on Polyoma-induced Tumours (Dr V Defendi and Dr H Koprowski), 1579

Influence of Carotenoids on the Infra-Red Spectrum of Bacteriochlorophyll In *Chromatium* (Dr J A Bergeron and Dr R C Fuller) 1340
Influence of Coagulase on the Growth of Staphylococci in Normal Human Serum (Dr K Wlodarczek and Dr J Jeljaszewicz), 1514
Influence of Counterion Association on the Configurational Stability of Deoxyribonucleic Acid in Solution (F Ascoli, C Botre, V Crescenzi, A Mele and Prof A M Liquori), 1482
Influence of Crystal Defects on the Szilard-Chalmers Process in Solids (Dr A G Maddock and J I Vargas), 1931
Influence of Dietary Protein Percentage on Growth of Wool (K A Ferguson), 907
Influence of Gibberellic Acid and Photoperiod on the Growth, Flowering, Nodulation and Nitrogen Assimilation of *Vicia villosa* (the late Prof Margaretha G Mes), 2035
Influence of Gold in a Mercury Electrode on certain Electrode Processes (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus), B A 56
Influence of Kinetin, β-Indoleacetic Acid and Gibberellic Acid on Nuclease Activity of Bean (*Phaseolus vulgaris*) Hypocotyls (Dr W Maciejewska-Potapczyk), 557
Influence of DL-beta-Phenylserine on the Synthesis of Proteins in *Escherichia coli* (J Janeček, J Chaloupka, K Vereš and M Havranek), 1895
Influence of Platinum in Mercury on the Mechanism of Electrode Reactions at the Mercury Electrode (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus), 1795
Influence of Sexual Stimulation on the Metabolic Activity of Deoxyribonucleic Acid in the Seminal Vesicle (Dr S R Pelc), 1414
Influence of Site and Season on Agricultural Variety Trials (A Sandison), 834
Influence of the Size of the Halogen Atom on the Difference between Lattice Constants of Copper dipyridine dichloride and dibromide (Vladimir Kupcik and Slavomil Durovic), 1060
Influence of Streptomycin Solutions on the Interaction between the Agglutinating Sera and the Corresponding Red Blood Cell Receptors (Dr M Kout and Dr Z Kubickova), 639
Influence of Sulphur Dioxide Inhalation on the Phagocytic Activity of the Macrophage System (Prof D L J Bilbey and Dr H Salem), 722
Influence of Temperature on the Symbiotic Nitrogen Fixation of Legumes (the late Prof Margaretha G Mes), 2032
Influence of the Thomson Effect on the θ-φ Relationship for a Constrictive Resistance in Thermal Equilibrium (Dr W Davies), 975
Influence of the Thymus upon the Egg-White Allergy in the Rat (J Comsa), 1726
Influence of Unbalanced Growth on Subsequent X-Ray Induced Inhibition of Deoxyribonucleic Acid Synthesis in *Escherichia coli* 15_T (Daniel Billen), 174
Influence of White and Colored Lights and Darkness Behaviour and Reactions of the Pacific Sardine, *Sardinops caerulea* (Girard), under the (Dr A S Loukashkin and Dr N Grant), 865
Influence of X-Rays on the Activity of Carbonic Anhydrase in Erythrocytes and on their Haemolytic Resistance (A Lauwers, J Van Bavinchove and W Dierick), 111
Influences (Environmental), on Prenatal Development (edited by Beatrice Mintz), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Influenza Virus Serum Inhibitors of Asian Strains of (Suzanne M James and Paul Fiset), 1656
Information Loss of, brought about by Loss of Data (S C Pearce), 1826
Information on Water Resources Report of the Subcommittee on (Central Advisory Water Committee), B A 18
Information (Soviet Scientific) Providing United States Scientists with (United States National Science Foundation), revised edition, 1611
Information Services British Overseas, 1692
Infra-Red Absorption Bands The Intensity of—a Bibliography (compiled by Dr R G Gillis), 682
Infra-Red Development Co, Ltd Amalgamation with Hilger and Watts, Ltd, 1273
Infra-Red Gas Analyser as a Means of Measuring the Carbon Dioxide Output of Individual Insects (Dr A G Hamilton), 367
Infra-Red Spectra of Carbohydrate Sulphate Esters (Dr A G Lloyd and K S Dodgson), 548
Infra-Red Spectrophotometry Polyethylene Absorption Cells for (Trevor Robinson), 448
Infra-Red Spectrum of Bacteriochlorophyll in *Chromatium* Influence of Carotenoids on the (Dr J A Bergeron and Dr R C Fuller), 1340
Infra-Red System (Near), of Nitrogen (Dr P K Carroll and Dr H E Rubalcava), 119
Infra-Red Technique (Rapid) Post-Exposure Analysis of Organic Compounds in the Blood by a (Dr R D Stewart, D S Erley, T R Torkelson and C L Hake), 192
Ingalls, Dr James W (Greenberg, Prof Leo, and) Effect of Tranquillizing Drugs on Survival from Experimental Diphtheric Intoxication, 1721
Ingestion of Ethanol Increase in the γ-Aminobutyric Acid Content of Rat Brain after (Dr H-M Hakkinen and E Kulonen), 726
Ingle, H D, and others Transport of Driftwood from South America to Tasmania and Macquarie Island, 203
Ingles, Dr T A, and Popper, P Special Ceramics (Preparation of Boron Nitride), 1116
Inglis, Dr W G Plant Nematodes, *review*, 1349
Ingold, Sir Christopher Substitution at Elements other than Carbon (Fifth Weizmann Memorial Lecture), *review* by Dr R I Reed, 1262
Ingram, Dr D J E Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
  Appointed to the chair of physics in the University College of North Staffordshire, 410, 590, work of, 590
  Free Radicals as Studied by Electron Spin Resonance, *review* by Dr T M Sugden, 1259
Ingram, Dr D J E, and others Free Radicals in X-Rayed Seeds of High and Low Water Content, as Measured by Electron Spin Resonance, 464
  Electron Spin Resonance Investigations of *Allium cepa* and *Calliphora vomitoria*, 1402
Ingram, M Biological Effects of Low Doses of Ionizing Radiations, 1112
Ingram, Dr V M (Hunt, Dr J A, and) A Terminal Peptide Sequence of Human Haemoglobin?, 640
  Human Haemoglobin *E*—the Chemical Effect of Gene Mutation (Abnormal Human Haemoglobins), 870
Ingram, Dr V M, and Stretton, A O W Genetic Basis of the Thalassaemia Diseases, 1903
Inhalation (Sulphur Dioxide) Influence of, on the Phagocytic Activity of the Macrophage System (Prof D L J Bilbey and Dr H Salem), 722
Inheritance Cytoplasmic (Prof D G Catcheside), 1012
Inheritance of Haemoglobin by Asymmetric Recombination Properties and (Dr Harvey A Itano and Elizabeth Robinson), 1468
Inhibiting the Oxidation of Ascorbic Acid Presence in Rose Hips of Substances (Dr G A D Jackson and R B Wood), 902
Inhibiting Effect of Iproniazid on the Depletion of Adrenal Catechol Amines induced by Reserpine Abolition by Chlorpromazine of the (F Camanni, Dr G M Molinatti and M Olivetti), B A 65
Inhibition of Actinomycin Synthesis by D-Valine (Prof Edward Katz), 1666
Inhibition of Adrenaline Metabolism Activation and (Dr Julius Axelrod and Dr Robert Tomchick), 2027
Inhibition of the Arylesterase of Human Serum Activation and (Prof E G Erdos, C R Debay and M P Westerman), 430
Inhibition by Azide Measurement of, in Biochemical Assay Systems involving Nitrite Estimation by Diazotization (Dr E J Hewitt and D G Hallas), 1483
Inhibition of Liver Hexokinase by Dehydroascorbic Acid and Alloxan (Dr S K Bhattacharya), 1638
Inhibition of Reduced Diphosphopyridine Nucleotide Oxidation by Ammonia (R T Wedding and H M Vines), 1226
Inhibition of Rous I Sarcoma Metastases by a Copper-Catalyst Blocking Agent (Dr B M Jones), 1963
Inhibition of Skeletal Formation in the Chick Embryo following Administration of Tetracycline (Gerrit Bevelander, Hiroshi Nakahara and Gloria K Rolle), 728
Inhibition by Thyroxine of Oxidative Phosphorylation in Guinea Pig Heart Sarcosomes Reversal by Acetylcholine of the (Heitor Medina and Metry Bacila), 1066
Inhibition of Tumour Growth with 2 5-Dicarbethoxy-3 4-Dihydroxy-Thiophene (Dr M B Sahasrabudhe, M V Narurkar, L B Kotnis, B D Tilak and M D Bhavsar), 201
Inhibition of Urease by Alloxan and Alloxanic Acid (Dr Clarke T Gray, Marcus S Brooke and John C Gerhart), 1936
Inhibition (8-Azaguanine), of Haemoglobin Synthesis in De-embryonated Chick Blastoderm (B R A O'Brien), 376
Inhibition (Corticosterone), of Pyridine Nucleotide Oxidase from Heart Sarcosomes (P K Jensen), 451
Inhibition (Enzyme) Prevention of Foetal Development by (Prof G Kahlson and Elsa Rosengren), 1238
Inhibition (Esterase), and Organophosphorus Poisoning in the House-Fly (Dr D Stegwee), 1253
Inhibition (Growth), of Mouse Ascites Tumour Cells by Powdered Tragacanth (Tragacanthae Pulvis, B P), (Dr E M F Roe), 1891
Inhibition (Reflex), of Intestinal Motility (Nils G Kock) 1069
Inhibition (Selective) of Ribonucleic Acid Synthesis in *Staphylococcus aureus* by Vancomycin (Prof D C Jordan and W E Inniss), 1894
Inhibition (Specific), of Antibody Formation during Immunological Paralysis and Unresponsiveness (Dr E Sercarz and Dr A H Coons), 1080
Inhibition (Specific), of Anti-Rh Serum by 'Unnatural' Sugars (Dr William C Boyd, Marjorie H McMaster and Eugenia Waszczenko-Zacharczenko), 989
Inhibition (Staphlocoagulase), by Pooled Human Gamma-Globulin (Prof Murray M Streitfeld, Prof Bennett Sallman and Seymour M Shoelson), 1665
Inhibition (X-Ray Induced), of Deoxyribonucleic Acid Synthesis in *Escherichia coli* 15_T Influence of Unbalanced Growth on subsequent (Daniel Billen), 174
Inhibitor of Cytochrome Oxidase Activity in the Sea Urchin Egg (Rachele Maggio and Alberto Monroy), 68
Inhibitor-β Action of, on the Growth of *Striga* Seedlings (C N Williams), 1577
Inhibitor (Arginase) Uraemia and its Treatment by (Dhruba K Sen), 459
Inhibitor (A New), of Serotonin Metabolism (Dr Alfred R Maass and Mary Jane Nimmo), 547
Inhibitor (A Non-Dialysable), of Glutamo-Transferase present in Excised Tomato Roots (C S Vaidyanathan and Prof H E Street), 347
Inhibitor (Plant-Virus), from Rice Chemical Nature of a (W A Jones, M Jacobson and R P Kahn), 1146
Inhibitors (Serum), of Asian Strains of Influenza Virus (Suzanne M James and Paul Fiset), 1656
Inhibitory Effect of Fungistatic Antibiotics on the Production of Amylase by *Penicillium chrysogenum* (Dr I Horvath and A Szentirmai), 57
Initiation of Flowers and Runners in the Strawberry Effect of Gibberellic Acid on the (P A Thompson and C G Guttridge), B A 72
Initiation (Floral), and its Relationship to Growth Stage in Red Clover (*Trifolium pratense* L), (J L Stoddart), 559
Injected Dextran Labelled with Tritium in Mice Fate of (Å Hanngren, E Hanson, S Ullberg and Prof B Åberg), 373
Injected Mouse Blood Abrogation by, of Protective Effect of Foreign Bone Marrow in Lethally X-Irradiated Mice (L J Cole and R M Garver), 1815
Injection of Onchospheres Infection of Cattle with *Cysticercus bovis* by the (G Froyd and M C Round), 1510
Injection (Intravenous), of Newborn Rats and Mice An Improved Technique for (N F Anderson, E J Delorme, Prof M F A Woodruff and D C Simpson), 1952
Injured Cellular Blood Elements in Extracorporeal Circuits Release of Adenosine Triphosphate and Serotonin from (Dr H S S Sarajas, Dr R Kristoffersson and Dr M H Frick), 1127
Injury (Radiation), in Mice Prophylactic Effects of Amine Oxides in (Dr Thomas J Haley, Dr Anna M Flesher and Dr Nathan Komesu), 198
Inland Telegraphy Service, Advisory Committee on the Report of the, 1191
Inland Waterways in Britain, 1687
Inner Auroral Zone Existence of an (Dr Knud Lassen), 1375
Inner Solar Corona during June 1959 (G A Newkirk, G W Curtis, D K Watson, R Manning and J Shelby), 1308
Innervated Sweat Glands (Cholinergically) Response of, to Adrenaline and Noradrenaline (Dr David P C Lloyd), 277

Innes (John) Horticultural Institution Forty-ninth Annual Report (1958), 1036
Inniss, W E (Jordan, Prof D C , and) Selective Inhibition of Ribonucleic Acid Synthesis in *Staphylococcua aureus* by Vancomycin, 1894
Innovation Investment in (C F Carter and B R Williams), *review* by Prof A J Brown, 1348
Inorganic Chemistry, Russian Journal of (A translation of the Russian *Zhurnal Neorganicheskoi Khimii*, published by the Chemical Society), 319
Inorganic Chemistry Modern, *review* by Dr D W A Sharp, 1756
Inorganic Chemistry and Radiochemistry Advances in (edited by H J Emeleus and A G Sharpe), Vol 1, *review* by Dr D W A Sharp, 1756
Inorganic Phosphate Need for, in Oxidations stimulated by Dinitrophenol (P Borst and Prof E C Slater), 1396
Inositol Concentration in the Cerebrospinal and Ocular Fluids and Tissues of the Foetal and Adult Sheep (D A Nixon), 906
Inotropic Activity (Positive), of Cytidine Triphosphate (Winifred G Nayler and Marian McCulloch), 67
Insect Survival of Frozen Fat Body Cells in an (R W Salt), 1426
Insect attacking *Striga* An (C N Williams and G H Caswell), 1668
Insect Pests of Cotton in Tropical Africa (E O Pearson, assisted by R C Maxwell Darling), *review* by Dr W E China, 1011
Insect Polyphenoloxidase Interaction between Thiourea and (Wanda Chmurzynska and Lech Wojtczak), 1941
Insecticidal Action of Ethylene *Bis*dithiocarbamates (R D McMullen), 1338
Insecticidal Effects of Activated Charcoal and Clays (S K Majumder, K S Narasimhan and V Subrahmanyan), 1165
Insecticide Dieldrin Mechanisms of Resistance of Adult Houseflies to the (F P W Winteringham and A Harrison), 608
Insecticide and Nematicide Formulations (Soil) Effect of Emulsifiers and Organic Diluents in (F T Phillips), 1512
Insecticides Effect of, on the Bodies of Nissl and Neurofibrillae of the Locust, *Schistocerca gregaria* (Dr Tohamy A Moussa and M Banhawy), 915
  New Pests of Cocoa (*Theobroma cacao* L) in Ghana following Applications of (P F Entwistle, C G Johnson and E Dunn), 2040
Insectivore Transmission of Passive Immunity in an (B Morris), 1151
Insects Possible Role of Glycerol in the Winter-Hardiness of (P Dubach, D Pratt, Prof F Smith and C M Stewart), 288
  Prothoracic Gland Stimulation by Juvenile Hormone Extracts of (Dr Lawrence I Gilbert and Dr Howard A Schneiderman), 171
  Secretion of Wax through the Cuticle of (Dr M Locke), 1967
  Sectioning Large Heavily Sclerotized Whole (Prof W E Beckel), 1584
Insects in the Garden (Educational Productions, Ltd , Filmstrip No 5260), 1777
Insects (Individual) The Infra-Red Gas Analyser as a Means of Measuring the Carbon Dioxide Output of (Dr A G Hamilton), 367
Insects (Lepidopterous) Relationship between Larval and Pupal Periods of some (Dr M A Zaher and Dr Moufied A Moussa), 288
Inside the Living Cell (Dr J A V Butler), *review* by Dr W L Sumner, 134
Inskeep, R R Khami Ruins, *review*, 1349
Insoluble Anhydrite Transition of Calcium Sulphate Hemihydrate to (Chikara Mitsuki and Masayoshi Kita), 1481
Insoluble Protein-Tannin Compounds Regeneration of Protein from (Dr W Mejbaum-Katzenellenbogen, W Dobryszycka, J Boguslawska-Jaworska and B Morawiecka), 1799
Institut pour la Recherche Scientifique en Afrique Centrale Dixième Rapport Annuel (1957), 407
Institut National pour l'Étude Agronomique du Congo Belge Carte des Sols et de la Vegetation du Congo Belge et du Ruanda-Urundi, 6, Yangambi, Planchette 3, Lilanda, A, Sols, B, Vegetation (Notice explicative par P Gilson, P Jongen, A Van Wambeke et L Liben), 27
  Publications, Série Scientifique No 75, Moisissures du Sol et des Litieres de la Region de Yangambi (L Meyer), 236
  Publications, Série scientifique No 77, Recherches sur les Affinités Chromosomiques dans le Genre *Coffea* (J Bouharmont), 518
  Publications, Série Scientifique No 78, Recherches sur l'Autostérilité du Caféier robusta (*Coffea canephora* Pierre), (M Devreux, G Vallaeys, P Pochet et A Gilles), 518
Institut Royal Meteorologique de Belgique Publications Serie A, No 7, Realisation du Centre de Physique du Globe à Dourbes (Prof E Lahaye), 1022
Institut Royal des Sciences Naturelles de Belgique Memoire 143, Foraminifera of the Oligocene of Belgium (D A J Batjes), 321
Instructional Film Research in Pennsylvania (C Denis Pegge), 866
Instrument Construction English translation of the Russian journal *Priborostroenie*, No 1 (British Scientific Instrument Research Association), 592
Instrument Symposium and Research Equipment Exhibit Ninth Annual (United States National Institutes of Health), 26
Instrumentation of Reactors Third Reactor School Course on the Control and (Atomic Energy Research Establishment), 1026
Instrumentation Engineers Differential Equations for, *review* by Prof T A A Broadbent, 6
Insulating Oil Gaps Luminous Spots on Electrodes in (T W Dakin and Daniel Berg), 120
Insulating Particles on Cathode Surfaces—their Effect upon Electrical Discharges (L B Griffiths and P C L Pfeil), 1475
Insulin Combined Effects of Cortisone and, on Developing Chicken Embryos (Dr Pietro de Franciscis and Prof Walter Landauer), 101
  Passage of, through the Wall of the Gastro-intestinal Tract of the Infant Rat (Dr B Mosinger, Z Placer and O Koldovsky), 1245
Insulin (Plasma), in Human Subjects Assay of, by Immunological Methods (Dr Rosalyn S Yalow and Dr Solomon A Bersen), 1648
Insulin Resistance of Fasted Rats Effect of Whole-body X-Irradiation on the (Dr V Stanković and N Sestan), 1816
Insulin-Sensitivity of the Rat Diaphragm *in vitro* Role of Magnesium in the (Dr Gangagobinda Bhattacharya), 1401
Insulin-like Activity (Increased Circulating), in Obese-Hyperglycaemic Mice (Jean Christophe, Yves Dagenais and Jean Mayer), 61
Insulin and Hypersensitivity (R K Sanyal, P S J Spencer and Dr G B West), 2020
Intact Ascites Tumour Cells Efficiency of the Mitochondrial Oxidative Phosphorylations in (Dr P Emmelot and C J Bos), 2024
Intact Mouse Spleen Decrease in Radiosensitivity of the, produced by Hypoxia (Dr L Weiss), 1156
Intake (Herbage), of Grazing Cattle A Relationship between Weight of Internal Fat, 'Fill', and the (J C Tayler), 2021
Intake (Sodium Chloride), and Urinary Histamine in Adrenalectomized Rats (Dr T Bjuro and Dr H Westling), 1241
Integral Modern Theory of the, *review*, 574
Integration An Introduction to the Theory of (Prof Adriaan C Zaanen), *review*, 574
Intensity associated with the Cosmic-Ray Storm of February 11, 1958 North–South Anisotropy and Anticipatory Increase of (Dr V Sarabhai and R Palmeira), 1204
Intensity of Infra-red Absorption Bands—a Bibliography (compiled by Dr R G Gillis), 682
Intensity of the (111) Reflexion for Diamond (Prof R Brill and H Barth), 264
Intensity of the Umbra of Sunspots and Enhanced Radiation on 200 Mc /s Correlation between the (Per Maltby), 1391
Intensity (Geomagnetic Vertical), around the Magnetic Equator Possible Asymmetry in the Daily Range of the (Dr C A Onqumechilli), 51
Interaction between the Agglutinating Sera and the Corresponding Red Blood Cell Receptors Influence of Streptomycin Solutions on the (Dr M Kout and Dr Z Kubickova), 639
Interaction of Anti-Staling Agents with Starch (Prof E J Bourne, A I Tiffin and Dr H Weigel), 547
Interaction of Deoxyribonucleate and Magnesium Ions Determination of the, by means of a Metal Ion Indicator (Joseph Shack and Barbara S Bynum), 635
Interaction of Erythrocytes and Endotoxins (V Bokkenheuser and H J Koornhof), 109
Interaction between Nucleic Acid and a Cationic Detergent (Prof Dino Guerritore and Luciano Bellelli), 1638
Interaction of Plant Growth Regulators in Regeneration Processes (H Schraudolf and Prof J Reinert), 465
Interaction of Streptomycin and Dihydrostreptomycin with Apo- and Co-dehydrogenases (Prof K Michalska), 987
Interaction of Sucrose Stearate with Starch (Prof E J Bourne, A I Tiffin and Dr H Weigel), 110
Interaction between Thiourea and Insect Polyphenoloxidase (Wanda Chmurzynska and Lech Wojtczak), 1941
Interaction (Electron–Phonon), in Solids (Physical Society Conference on), 1613
Interaction (Exchange), as a Cause of Reverse Thermo-Remanent Magnetism (T Nagata and S Uyeda), 890
Interactions between Behaviour Patterns in a Hemileucine Moth Central Control of (Dr A D Blest), 1164
Interactions (Anomalous Genetic), observed in *Bacillus subtilis* (M Kohiyama and Y Ikeda), 208
Interactions (Paraffin-Detergent), in Aqueous Systems Solid State Rheological Study of the Mechanism of (F J Radd and L H Crowder), 443
Interchange Energy for Binary Systems Estimation of the, from Mutual Solubility Data (Kiyoharu Ishida), 814
Interfacial Disturbances in Gas–Liquid Systems Droplet Circulation and (Dr C Ramshaw and Dr J D Thornton), 719
Interfacial Micro-Windows Wear Observations through (Robert H Savage), 45
Interference by Azide with Diazotization Procedures used in Biological Assay Systems (J R Villanueva), 549
Interference Distances (Differential and), of Chiasmata Simultaneous Change in both (Dr J Yanney Wilson), 207
Interfering Substances in the Determination of Glucosamine Synthesis (Dr Fiorenzo Paronetto), 1317
Interferometry (Beam) Substrate Damage in Film Thickness Measurement by (Prof G David Scott), 354
Interferon Duration of Protective Action of, against Infection with West Nile Virus (Dr Alick Isaacs and Marguerite A Westwood), 1232
Interferon produced by Cultures of Calf Kidney Cells (Dr D A J Tyrrell), 452
Intergranular Diffusion in a Silicate System Measurement of—Iron in Forsterite (Prof John J Naughton and Yasuo Fujikawa), B A 54
Interlamellar Films Phase Transitions in (Dr D M C MacEwan and Dr F Aragón de la Cruz), 1859
Intermediate Metabolite (Possible), of Benzene Hexachloride in Houseflies Pentachlorocyclohexene as a (R G Bridges), 1337
Intermediates in the Hydrolysis of *p* Nitrophenyl Acetate Catalysed by Chymotrypsin Reactivity and Interrelationship of (Mario A Marini and Prof George P Hess), 113
Intermolecular Distances and Diamagnetic Anisotropy in Crystals as Measures of the Polarity of Benzene and Borazole Substituents (Dame Kathleen Lonsdale), 1060
Internal Fat, 'Fill', and the Herbage Intake of Grazing Cattle A Relationship between Weight of (J C Tayler), 2021
Internal Reproductive Rhythm in a Xerophilous Equatorial Bird, *Quelea quelea* Duration of the Regeneration Period of the (H J de S Disney, B Lofts and Dr A J Marshall), 1659
Internal Rhythm of Reproduction in a Trans-Equatorial Migrant (the Short-tailed Shearwater *Puffinus tenuirostris*) Experimental Demonstration of an (Dr A J Marshall and Dr D L Serventy), 1704
Internal Vibrations (Rigid-Body and), of Organic Molecules An X-Ray Study of (Dame Kathleen Lonsdale and Dr H Judith Milledge), 1545
Internal and the External Worlds (Sir Cyril Hinshelwood), 1834
International Association of Scientific Hydrology Symposium on the Effects of Forest Areas on Water Resources, 1184
  Symposium on the Technique of Lysimetry, 1184
International Atomic Energy Agency Directory of Nuclear Reactors, Vol 1, Power Reactors, *review* by Dr A J Salmon, 1438
International Atomic Energy Agency and the International Council of Scientific Unions Symposium on Radioactivation Analysis, 951
International Atomic Energy Agency (Unesco and the) Appeal for help to reconstruct the Library of the Brazilian Centre for Physics Research, 769
International Atomic Energy Agency, and others Symposium on the Biological Effects of Low Doses of Ionizing Radiations, 1111
  Course on the Use of Radioisotopes in Agricultural Research, 1451
International Botanical Congress Montreal Ninth, 1200
International Business Machines Corporation Appointment of Dr Carl F Kossack as manager of the newly formed Statistics and Operations Research Department at the Lamb Estate Research Center, Cortlandt, N Y , 410

International Centre for the Study of the Preservation and Restoration of Cultural Property Inauguration of the, 504
  Appointment of Dr H J Plenderleith as first director, 504
International Commission on Higher Education in Nigeria Inaugural Meeting, 152
International Commission on Zoological Nomenclature Given accommodation in the British Museum (Natural History), 156
International Conference on Coal Science Third Biennial, 412
International Conference on Ionization Phenomena in Gases Fourth, 1353
International Conference on Medical Electronics Third (Electronics and Communications Section of the Institution of Electrical Engineers and the International Federation for Medical Electronics), 1535
International Conference on Non-Destructive Testing, 1107
International Conference on Nuclear Forces and the Few-Nucleon Problem, 1113
International Conference on Plant Growth Regulation Fourth (Boyce Thompson Institute for Plant Research, the New York Botanical Garden and the Brooklyn Botanic Garden), 599
International Conference of Radio Astronomers, *review* by Dr H P Palmer, 1755
International Conference of Scientists Pugwash—Statement on Biological and Chemical Warfare, 1018
International Conference on Semi-Conductors Proceedings of the Third, Rochester, 1958 (Advances in Semi-Conductor Science, edited by H Brooks), *review* by Dr J R Tillman, 1674
International Conference on the Use of Solar Energy Transactions of the —The Scientific Basis (Tucson, 1955) , Vol 1, The Available Energy, Measurement of Radiation , Vol 2, Thermal Processes, Part 1, Section A, Flat Plate Collectors , Vol 2, Thermal Processes, Part 1, Section B High-Temperature Solar Furnaces, Solar Power , Vol 3, Thermal Processes, Part 2, Solar House Heating, Solar Water Heating, Solar Stoves, Solar Distillation , Vol 4, Photochemical Processes , Vol 5, Electrical Processes, *review* by Dr H Heywood, 217
International Congress on Acoustics (Prof E G Richardson), 1031
International Congress on Chagas's Disease (Dr J D Fulton), 1114
International Congress of Refrigeration Tenth (International Institute of Refrigeration), 946
International Convention on Transistors and Associated Semiconductor Devices (Electronics and Communications Section of the Institution of Electrical Engineers), 693
International Council for the Exploration of the Sea Special International Geophysical Year Meeting (A J Lee and Dr D H Cushing), 1180
International Council of Museums Fifth General Conference (Museums as Mirrors—their Potentialities and Limitations), 504
  Inauguration of an International Centre for the Study of the Preservation and Restoration of Cultural Property, 504
International Council of Scientific Unions Yearbook 1959, 408
  International Council of Scientific Unions Review, No 1, 319 , No 2, 408
  Financial Statement for November 1957 to December 1958, 939
International Council of Scientific Unions (International Atomic Energy Agency and the) Symposium on Radioactivation Analysis, 951
International Cytology, *review* by Prof J Bronte Gatenby, 574
International Federation of Automatic Control Members of the Executive Council, 1450
International Federation for Medical Electronics (Electronics and Communications Section of the Institution of Electrical Engineers and the) Third International Conference on Medical Electronics, 1535
International Geophysical Year Annals of the, Vol 6, Manual on Rockets and Satellites (edited by L V Berkner, in association with John Hanessian, Jr , and Leonard Cormier), *review*, 213
  Photography in the (Scientific and Technical Group of the Royal Photographic Society Symposium on), 1032
  Some Achievements (Royal Society), 604
International Institute of Refrigeration Tenth International Congress of Refrigeration, 946
International Mineralogical Association First General Meeting (Prof Robert L Parker), 1909
  Symposium on Alpine Mineral Fissures, 1909
  Symposium on Twinning of Crystals, 1910
International Nickel Company of Canada Ltd Establishment of a Fellowship to honour the visit of H M the Queen and H R H the Duke of Edinburgh, 772
International Oceanographic Congress (Dr G E R Deacon), 1605
International Organizations of Medical Sciences Abnormal Haemoglobins —a Symposium organized by the Council for (edited by J H P Jonxis and J F Delafresnaye), *review* by Dr J A M Ager, 840
International Potash Institute Sixteen Papers read at the Fourth Congress of the (Vienna, 1957), *review*, 1976
International Red Locust Control Service Work of the, 589
  Retirement of Dr D L Gunn from the directorship, 589
  Appointment of C du Plessis as director, 590
International Review of Cytology (edited by Prof G H Bourne and Prof J F Danielli), Vol 7, *review* by Prof J Bronte Gatenby, 574
International Scientific Relationships, Society for Promoting Special Medal awarded to Dr Detlev W Bronk, 1685
International Society for Plant Geography and Ecology International Symposium on Mapping Vegetation, B A 23
International Standards Organization First Meeting of Technical Committee No 93, 514
International Symposium on the Ageing of Plastics (Eighth German Plastics Convention), 508
International Symposium on Algology (Indian Council of Agricultural Research and Unesco), 595
International Symposium on Combustion Report of the Seventh, 770
International Symposium on Enzyme Chemistry Proceedings of the (Tokyo and Kyoto, 1957), (Science Council of Japan, under the auspices of the International Union of Biochemistry), *review* by Dr J B Chappell, 388
International Symposium on Macromolecules (Commission on Macromolecules of the International Union of Pure and Applied Chemistry), 1689
International Symposium on X-Ray Microscopy and X-Ray Microanalysis, 860
International Technical Co-operation Partnership for Progress—(Annals of the American Academy of Political and Social Science, May, 1959), *review* by R Brightman, 1673
International Union of Biochemistry (organized by the Science Council of Japan under the auspices of the) Proceedings of the International Symposium on Enzyme Chemistry (Tokyo and Kyoto, 1957), *review* by Dr J B Chappell, 388
International Union of Pure and Applied Chemistry Meeting of the Commission on Geochemistry, 1193
  Election of members of the Commission on Geochemistry, 1193
  Election of Prof C W Correns as president for 1960 of the Commission on Geochemistry, 1193
International Union of Pure and Applied Chemistry (Committee of the Analytical Chemistry Section) Nomenclature in Titrimetric Analysis, 1686
International Union of Pure and Applied Chemistry (Commission on Macromolecules) International Symposium on Macromolecules, 1689
International Union of Pure and Applied Chemistry (Deutsche Bunsengesellschaft fur Physikalische Chemie and the) Symposium on Thermodynamics, 1606
International Veterinary Congress (Dr M A Soltys), 598
Interocular Transfer Some New Subjective Phenomena apparently due to (Ian P Howard), 1516
Interpeduncular and Dorsal Tegmental Nuclei A Heat-Loss Mechanism involving the Habenular, (B G Cragg), 1724
Interpretation (A Functional), of the Electron-Microscopic Structure of the Sensory Hairs in the Cristae of the Elasmobranch *Raja clavata* in Terms of Directional Sensitivity (Prof O Lowenstein and J Wersäll), 1807
Interrelations between the Blood Coagulating System and the Physiological Anticoagulating System (Prof P A Kudrjashov), 454
Interrelations (Carbohydrate—Amino-Acid), in Brain Cortex *in vitro* (M M Kini and Prof J H Quastel), 252
Interrelationship of Intermediates in the Hydrolysis of p-Nitrophenyl Acetate Catalysed by Chymotrypsin Reactivity and (Mario A Marini and Prof George P Hess), 113
Interruption (Night), with Red Light Complex Reaction in *Hyoscyamus niger* upon (P J A L de Lint), 731
Interspecific Hybrids of *Lycopersicum* (Helgi Nirk), 1819
Interspecific Pollination Production of Seedless Hops by (Prof Edward L Davis), 1336
Interstellar Communications Searching for (Giuseppe Cocconi and Philip Morrison), 844
Interstrain Ovarian Transplantation in Lethally Irradiated Mice after Bone Marrow Therapy (Prof W St Amand and L H Smith), 1503
Inter-University Geological Congress Eighth, 1914
Intestinal Motility Reflex Inhibition of (Nils G Kock), 1069
Intestine of Rats Pharmacological Suppression of Increased Capillary Permeability following Irradiation of the (Dr D A Willoughby), 1156
Intestine (Large), of the Calf Absorption of Magnesium in the (Dr R H Smith), 821
Intoxication (Auto-) apres Brûlure (R Godfraind), *review* by Dr S Sevitt, 5
Intoxication (Experimental Diphtheric) Effect of Tranquillizing Drugs on Survival from (Prof Leo Greenberg and Dr James W Ingalls), 1721
Intracardiac Blood Velocity Patterns Intravascular and, recorded by means of *NTC* Resistors (Dr W G Zijlstra, J R Brunsting and L B v d Slikke), 991
Intracellular Activities of Sodium and Potassium Glass Micro-Electrodes for Measuring (Dr J A M Hinke), 1257
Intracellular Thioctic Acid and Coenzyme A following Vanadium Treatment (E Mascitelli-Coriandoli and Dr C Citterio), 1641
Intraperitoneal Infections of Mice Opsonins as Determinants of Survival in (Dr C R Jenkin and Prof D Rowley), 474
Intraspecific Polyploidy and Evolution of Diverse Morphological Forms in *Convulvulus pluricaulis* Chois (Dr S L Tandon and C P Mzalik), 481
Intravascular and Intracardiac Blood Velocity Patterns recorded by means of *NTC* Resistors (Dr W G Zijlstra, J R Brunsting and L B v d Slikke), 991
Intravenous Administration to Rats Presence of certain Onium Compounds in Brain Tissue following (Prof Ruth R Levine), 1412
Intravenous Injection of Newborn Rats and Mice An Improved Technique for (N F Anderson, E J Delorme, Prof M F A Woodruff and D C Simpson), 1952
Intravenously Administered Lactose Labelled with Carbon-14 Preliminary Observations on the Fate of (Dr Frederick J Carleton and Dr Henry R Roberts), 1650
Introduction (A New), to Geology, *review* by Dr J C M Taylor, 1175
Intrusions (Dolerite), from the Theron Mountains and Whichaway Nunataks, Antarctica Palaeomagnetism of some (D J Blundell and P J Stephenson) 1860
Invasive Capacity Relation of, to Passage of Lymphocytic Cells through Cellulose Membrane Filters (Dr Emma Shelton and Dr Mary E Rice), 479
Invertebrate Morphology Studies in—in honor of Dr Robert Evans Snodgrass on the occasion of his eighty-fourth Birthday (Smithsonian Institution, Miscellaneous Collections Vol 137), 591
Invertebrates The (Dr Libbie Henrietta Hyman), Vol 5, Smaller Coelomate Groups—Chaetognatha, Hemichordata, Pogonophora, Phoronida, Ectoprocta, Brachipoda, Sipunculida, the Coelomate Bilateria, *review* by Dr N B Eales, 573
Inverted Plots Non-Inverted versus, in Enzyme Kinetics (Dr B H J Hofstee), 1296 , (Dr Malcolm Dixon and Dr Edwin C Webb), 1298
Investigation (*in vitro*) of the Colloid-storing Function of Histiocytes A Method for (Prof N Jancsó, Aurelia Jancso-Gabor and J Balassy), 1070
Investigations (Electron Spin Resonance), of *Allium cepa* and *Calliphora vomitoria* (M Edwards, Dr G A Kerkut, K A Munday, Dr D. J Ingram, M C Saxena and K Leach), 1402
Investigations (Preliminary Archaeological), in the Sierra de Tamaulipas, Mexico (Dr Richard S MacNeish), 593
Investment in Innovation (C F Carter and B R Williams), *review* by Prof A J Brown, 1348
Iodine (Radioactive) Affinity of Lysozyme with Structural Elements of the Bacterial Cell as studied with Enzyme Labelled with (Prof C Weibull, B Zacharias and H Beckman), 1744

Iodine (Radioactive), in Thyroid Glands Accumulation of, subsequent to Nuclear Weapon Tests and the Accident at Windscale (Dr Hamish A Robertson and Ian R Falconer), 1699
Iodine-131 Distribution in the Mouse of Lethal and Sub-Lethal Doses of Cottonmouth Moccasin Venom labelled with (Prof J F Gennaro, jun , and H W Ramsey), 1244
  Labelling of Rose Bengal with, by Radioactive Exchange (J Liebster and O Andrysek), 913
  Paper Chromatographic Separation of Components of Rose Bengal Labelled with (Fausto W Lima and Rômulo R Pieroni), 1065
Ion (Alkali) Determinations by means of Glass Electrodes (Research Symposium at the University of Sheffield), 1616
Ion (Bromide) A Peripheral Effect of the, on the Contraction of Striated Muscle (Dr D K de Jongh and H A Linnewiel) 1240
Ion ($FeS_2O_3^+$) Reduction of the, at the Dropping Mercury Electrode (F M Page), 1481
Ion (Tropylium) Isomerization to the, induced by Electron Impact and its Significance (Dr W Hanuš), 1796
Ion Exchange, *review* by D Reichenberg, 1757
Ion Exchange, a Laboratory Manual (Dr J E Salmon and D K Hale), *review* by D Reichenberg, 1757
Ion Exchange Resins (Robert Kunin), second edition, *review* by D Reichenberg, 1757
Ion Flotation Concentration by (Prof F Sebba), 1062
Ion Indicator (Metal) Determination of the Interaction of Deoxyribonucleate and Magnesium Ions by means of a (Joseph Shack and Barbara S Bynum), 635
Ionic Current Effects of the Energy of Strong Pulses of, on Micro-organisms in Suspension (B S Gossling), 1881
Ionic Partition and Fine Structure in Muscle (Dr Shirley E Simon), 1978
Ionization (*E*) A Relation between Giant Travelling Disturbances and Sporadic (L H Heisler), 1788
Ionization Phenomena in Gases (J Dutton, D Harcombe and E Jones), 1353
Ionization Type Detector (Radioactive) Analysis of Permanent Gases by Gas Chromatography using a (V Willis), 894
Ionized Calcium in Biological Media (Prof J Ettori and Sybil M Scoggan), 1315
Ionizing Radiation Cross-linking of Cellulose Acetate by (Dr S H Pinner, T T Greenwood and D G Lloyd), 1303
  A 'Progressive' Mutation induced in *Poa pratensis* L by (A A Hanson and F V Juska), 1000
  A Sensitive Chemical Dosimeter for (Prof Gerald Oster and Dr Barret Broyde), 545
Ionizing Radiations Advice concerning Hazards from (Ministry of Housing and Local Government, Circular No 57/59), 1450
  Biological Effects of Low Doses of (Unesco, the International Atomic Energy Agency and the Comitato Nazionale per le Ricerche Nucleari Symposium on), 1111
  Cross-Linking of Deoxyribonucleic Acid in Sperm Heads by (Dr P Alexander and Dr K A Stacey), 958
  Degradation of Thiotaurine by (D Cavallini, B Mondovì, B Giovanella and C De Marco), B A 61
  Disorganization of the Secondary Structure in Proteins exposed to, in the Solid State (Dr Peter Alexander, L D G Hamilton and Dr K A Stacey), 226
  Immediate and Low-level Effects of (Dr Tikvah Alper), 1111
  Waterways and, 1450
Ionosphere The *D* Region of the (B Bjelland, O Holt, B Landmark and F Lied), 973
  Measurement of Cosmic Noise at Low Frequencies above the (J P I Tyas, C A Franklin and A R Molozzi), 785
  Recent Trends in the Theory of the (J A Ratcliffe), 419
  Two Anomalies in the Behaviour of the *F2* Layer of the (Sheila Croom, Audrey Robbins and J O Thomas), 2003
  Very Low-Frequency Spectra of Atmospherics propagated through the (Tatsuzo Obayashi), 34
Ionospheric *F*-Region Disturbance in the, following the Johnston Island Nuclear Explosion (C H Cummack and G A M King), B A 32
Ionospheric Layer (F_2) Tides in the (Dr P Herrinck), 1055
Ionospheric Heights Refraction of Very High Frequency Radio Signals at (S Weisbrod and L Colin), 119
Ionospheric Phenomena (Geomagnetic and), associated with Nuclear Explosions (Dr S Matsushita), B A 33
Ionospheric Virtual Height-Frequency Curves Conversion of, to Electron Density-Height Profiles (Dr J O Thomas and M D Vickers), (Radio Research Board, Special Report No 28), 1024
Ions (Calcium), and the Permeability of Human Red Cells (Prof M Maizels), 366
Ions (Co^{++}) Temperature Variation of the Principal Magnetic Moments of, and the Asymmetry of the Crystalline Electric Field in Cobalt Acetate Tetrahydrate (Dr Bhagawati Charan Guha), 50
Ions (Magnesium) Determination of the Interaction of Deoxyribonucleate and, by means of a Metal Ion Indicator (Joseph Shack and Barbara S Bynum), 635
Ions (Metal) Fungitoxicity of (Dr E Somers), 475
Ions (Relatively High-Energy) Emission of, from Low-Voltage Arcs (E R Harrison), 245
Iproniazid Abolition by Chlorpromazine of the Inhibiting Effect of, on the Depletion of Adrenal Catechol Amines induced by Reserpine (F Camanni Dr G M Molinatti and M Olivetti), B A 65
Iranians Glutathione Stability of the Erythrocytes in (Dr D G Walker and Dr J E Bowman), 1325
Ireland (Great Britain and) Handbook of the Rubi of (the late W C R Watson) *review* by R D Meikle, 489
Ireland (Northern) Statistics of Public (Rate Supported) Libraries in Great Britain and, 1957-1958 (Library Association), 592
Iris of the Eye Association between Colour of the, and Reaction to Dental Pain (Dr Philip R N Sutton), 122
Irish Late-Glacial *Lepidurus arcticus* in the (Dr M E S Morrison), 739
Iron in Culture Medium Estimation of μgm Quantities of, using Bathophenanthroline (P A Seamer), 636
Iron in the Forage A Lesion of the Follicle and of the Fibre of Wool and its Possible Relation with an Excess of (Prof G Gonzalez, J Garcia and E Fernandez), 559
Iron in Forsterite Measurement of Intergranular Diffusion in a Silicate System— (Prof John J Naughton and Yasuo Fujikawa), B A 54
Iron (Armco) Dynamic and Static Deformation of (H P Tardif and P Chollet), 1917
Iron-Binding Centre of Ferrichrome Compounds (Dr T Emery and Dr J B Neilands), 1632
Iron (III)–Cellulose Reaction-directing Properties of Non-enzymic Macromolecules—Pyrogallol Oxidation in the System (N S Goodman and S M Siegel), 53
Iron (Nonhaem), in Erythrocytes as a Precursor for Haemoglobin (Dr M Faber and Dr I Falbe-Hansen), 1043
Iron Meteorite Carbo' Calculation of a 'Cosmic Ray Age' for the (Dr Royal R Marshall), 117
Iron Transport Factors' An Absolute Requirement for, by *Microbacterium lacticum* 8181 (Dr D Hendlin and Dr A L Demain), 1894
Iron-Silicon Alloys A New Nitride Precipitate in (G R Booker and J Norbury), 1311
Iron-Silicon Alloys (Low-Carbon) X-Ray Diffraction Pattern of Carbide in (G Konoval, L Zwell, L A Gorman and W C Leslie), 1862
$FeS_2O_3^+$ Ion Reduction of the, at the Dropping Mercury Electrode (F M Page), 1481
Iron and Steel in China A History of, *review* by Prof F C Thompson, 1830
Iron and Steel Institute Meeting at the University of Birmingham and at Coalbrookdale, to celebrate the 250th anniversary of the successful use of coke in ironmaking, 322
  Sixth Report of the Corrosion Committee (compiled by Dr J C Hudson), 1023
  Autumn General Meeting 1192, 1451
Iron and Steel Research Association (British)—London Group Laboratories Open Days (D U Hunt), 1536
Iron and Steel Technology in China The Development of (Dr Joseph Needham), *review* by Prof F C Thompson, 1830
Iron and Zinc Effect of, on Nucleic Acid and Protein Synthesis in *Mycobacterium smegmatis* (Frank Winder and Joan M Denneny), 742
Ironmaking Successful Use of Coke in (Meeting of the Iron and Steel Institute at the University of Birmingham and at Coalbrookdale to celebrate the 250th anniversary of the), 322
Irradiated Lead Oxalate Thermal Decomposition of (P J Herley and E G Prout), 445
Irradiated Mice (Lethally) Interstrain Ovarian Transplantation in, after Bone Marrow Therapy (Prof W St Amand and L H Smith), 1503
Irradiated Solutions Aromatic Ring Opening in the Presence of Oxygen in (Israel Loeff and Gabriel Stein), 901
λ-Irradiated Polymethyl Methacrylate and Polymethacrylic Acid Electron Paramagnetic Resonance at 4 2° K of (Dr Derick W Ovenall), 181
γ-Irradiated Potato Starch Granules Physical and Chromatographical Observations of (Akira Mishina and Ziro Nikuni), 1867
Irradiation Increased Oxygen Consumption in Rats during (Dr A Vacek), 197
  Reorganization of Root Apices after (F A L Clowes), 1025
Irradiation of the Intestine of Rats Pharmacological Suppression of Increased Capillary Permeability following (Dr D A Willoughby), 1156
Irradiation of Nerve Effects of, on Muscular Response (A Portela, D Brandes, Prof G H Bourne, Marion Hines, P Stewart and B L. Redd, jun), 734
Irradiation (Ultra-Violet) Effect of, on Transduction in *Pseudomonas aeroginosa* (J S Loutit), 1960
  Photoautomerization of Cytosine Derivatives on (Shih Yi Wang), 184
  Production of a Perfect Stage in a Nutritionally Deficient Mutant of *Fusarium oxysporum* after (E W Buxton), 1258
Irradiation (Ultra-violet), of 1,3-Dimethylthymine (Shih Yi Wang), B A 59
γ-Irradiation Separation by, of Two Elements at the Vby Locus in *Trifolium repens* (Dr D Roy Davies and E T Wall), 1957
γ-Irradiation (Whole-Body) Cells which Synthesize Deoxyribonucleic Acid in Guinea Pig Bone Marrow during Recovery from (P F Harris and J H Kugler), 1883
Irradiations (X-Ray), in *Culex fatigans* Wied (1828) Induced Mutations of (R Pal and B S Krishnamurthy), 658
Irvine, Dr K J Appointed deputy research manager of the United Steel Companies, Ltd , 95
Irving, Prof J T Curative Effect of Selenium upon the Incisor Teeth of Rats deficient in Vitamin E, 645
Irving, Prof J T (Zar, L , and) Effect of Vitamin D on the Respiration of Rat Oral Tissue, 1410
Irzykiewicz, H (Powning, R F , and) A Reduced Triphosphopyridine Nucleotide-linked Cystine Reductase in the Clothes Moth, *Tineola bisselliella* (Humm), 1230
Is the Multimammate Rat a Natural Reservoir of *Borrelia duttoni* ? (Dr F Zumpt), 793
Isaacs, Dr A , and Lacey, B W (edited by) Virus Growth and Variation—Ninth Symposium of the Society for General Microbiology, London, 1959, *review* by N W Pirie, 920
Isaacs, Dr A , and Westwood, Marguerite A Duration of Protective Action of Interferon against Infection with West Nile Virus, 1232
Isaacson, E de St Q Rock Pressure in Mines, *review* by J K L Graham, 1349
Isaacson, Leonard M (Hiller, Jr , Prof L A , and) Experimental Music—Composition with an Electronic Computer, *review* by Prof E G Richardson, 1754
Isard, J O Alkali Ion Determinations by means of Glass Electrodes, 1616
Isatin β-thiosemicarbazone Antiviral Chemotherapeutic Activity of, in Mice infected with Rabbit-pox Virus (D J Bauer and F W Sheffield), 1496
Ishida, Kiyoharu Estimation of the Interchange Energy for Binary Systems from Mutual Solubility Data, 814
Ishidate, Prof Morizo, and others Incorporation of N-Methyl Carbon of Monoethylaminoazobenzene into Polar Dyes 1460
Isla de Pinos Variation in Lizards of the *Leiocephalus cubensis* Complex in Cuba and the (Albert Schwartz), 1107
Island (Johnston) Nuclear Explosion Disturbance in the Ionospheric *F*-Region following the (C H Cummack and G A M King), B A 32
Island (Macquarie) Transport of Driftwood from South America to Tasmania and (Prof H N Barber, Dr H E Dadswell and H D Ingle), 203

Island (Seymour), Antarctica Fossil Pollen from (Lucy M Cranwell), 1782
Islands (Ongul), in the Antarctic Natural Remanent Magnetization of Pre-Cambrian Gneiss of (T Nagata and Y Shimizu), 1472
Islets of Langerhans Actual Distribution of the Number and Volume of the, in Different Size Classes in Non-diabetic Humans of Varying Ages (Bo Hellman), 1498
Isoalleles (Different Wild-Type) Effect of, on Crossing-over in *Drosophila melanogaster* (M M Green), 294
Iso-Antigens of Rabbit γ-Globulin (S Dubiski, Danuta Skalba, Anna Dubiska and Dr A Kelus), 1811
Isolated *d*-Amino-Acid Oxidase Systems Effect of Chlorpromazine upon (Dr Andrew Lasslo and Anne L Meyer), 1922
Isolated Blastomeres of Mouse Eggs Experiments on the Development of (Dr Andrzej K Tarkowski), 1286
Isolated Chloroplasts Destruction of Carotenoids in (J Friend and T O M Nakayama), B A 66
Isolated, Fresh Nerve Cells and Glial Cells from Control and Stimulated Animals Quantitative Assay of Compounds in (Prof Holger Hydén), 433
Isolated Mitochondria Effect of Reduced Diphosphopyridine Nucleotide on the Swelling of (Dr G Di Sabato), *erratum*, 95
Isolated Nuclei Transplantation Immunity—Separation of Antigenic Components from (André Castermans and André Oth), 1224
Isolated Plain Muscles Promoting Effect of Urea on the *in vitro* Passive Sensitization of, with Precipitating Antibody (R Binaghi, Dr B N Halpern, P Liacopoulos and T Neveu), 1805
Isolated Rat Liver Mitochondria Protein Synthesis and Oxidative Phosphorylation in (P J Reis, J L Coote and T S Work), 165
Isolated Rat Uterus Some Pharmacological Effects of Staphylolysin on the (Dr R Wiegershausen), 2017
Isolated Rat Ventricle Preparation Potentiation of Contractions after Rest in the (Dr R L Speirs), 66
Isolated Thymus Nuclei Monovalent Cations and the Incorporation of Metabolites by (Dr Theodore R Breitman and Dr George C Webster), 637
Isolated and Perfused Rat Spleen Production of γ- and α-Globulins by the (Dr E Espinosa), 1801
Isolating and Cloning Cells of Higher Plants A New Technique for (Ludwig Bergmann), 648
Isolation of 2-Aminoethane Phosphonic Acid from Rumen Protozoa (Masaaki Horiguchi and Makoto Kandatsu), 901
Isolation of the Antifungal Substance, 6-Methoxybenzoxazolinone, from Field Corn (*Zea mays* L) in Canada (N J Whitney and C G Mortimore), 1320
Isolation of Basidiomycetes from the Soil (J H Warcup), 506
Isolation of Echinochrome A from the Spines of the Sea Urchin, *Diadema setosum* (Leske), (Kokichi Nishibori), 1234
Isolation of Fatty Alcohols with Plant-Growth Promoting Activity from Maryland Mammoth Tobacco (Dr A J Vlitos and Dr D G Crosby), 462
Isolation of 24-Methylene-cholesterol from Honey Bees (*Apis mellifica* L), (Dr M Barbier, Prof T Reichstein, Dr O Schindler and Prof E Lederer), 732
Isolation of Tobacco Leaf Cells capable of Supporting Virus Multiplication (Prof Milton Zaitlin), 1002
Isolation of Thrombins Rivanol, Resin and the (Dr Kent D Miller), 450
Isolation and Purification of Nitrate Reductase from Embryos of Germinating Wheat (D Spencer), 682
Isomeric O-Methyl Ethers of Ethyl di-(4-hydroxycoumarinyl-3)-Acetate (the Anti-coagulant Drug Pelentane or Thromexane), (Dr Eduard Knobloch), 1568
Isomerism (*Cis-trans*), and Steric Hindrance (Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures), (John N Loeb, Paul K Brown and Prof George Wald), 617
Isomerization to the Tropylium Ion induced by Electron Impact and its Significance (Dr W Hanuš), 1796
Isomers of Vitamin A in Fish Liver Oils (Patricia S Brown, William P Blum and Max H Stern), 1377
Isomers (*Meta*- and *Para*-), of the Xylenes, Cresols and Toluidines by Gas Solid Chromatography Separation of the (M A Hughes, D White and Prof A L Roberts), 1796
Isostatic Compensation and Mohorovičić Discontinuity, etc Depth of, in Continental and Oceanic Areas (J N Nanda), 629
Isotherm (Langmuir Adsorption) Kinetic Study of Dextransucrase based on the (W Brock Neely and C F Thompson), B A 64
Isotope Variations (Oxygen), in Antarctic Snow Samples (Dr R Gonfiantini and Prof E Picciotto), 1557
Isotopes Organic Syntheses with (Arthur Murray, III, and D Lloyd Williams), Part 2, Organic Compounds labelled with Isotopes of the Halogens, Hydrogen, Nitrogen, Oxygen, Phosphorus and Sulfur, *review* by Dr G Eglinton, 1830
Isotopes in Organic Syntheses, *review* by Dr G Eglinton, 1830
Isotopes (Oxygen) Ratio in Fossil Calcareous Organisms Determination of the Temperatures of Ancient Seas by the Measurement of the (Y A Birstein), 1025
Isotopic Composition of Boron (D C Newton, A C Tyrrell and J Sanders), 185
Isotopically Exchangeable Phosphate in Soil Effect of the Level of Microbial Population on (Dr P Newbould and Dr R L Lucas), 1155
Itano, Dr Harvey A , and Robinson, Elizabeth Properties and Inheritance of Haemoglobin by Asymmetric Recombination, 1468
Ito, Prof T Twinning of Crystals (Twinning as a Building Principle of Crystals), 1911
Itschner, D Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
Ives, W Appointed executive officer of the Australian Commonwealth Scientific and Industrial Research Organization, 1985 , work of, 1985
Iwadare, Dr J Nuclear Forces and the Few-Nucleon Problem (The Meson-Theoretical Two-Nucleon Interaction and its Comparison with Experimental Data), 1113 , (Photonuclear Reactions with Light Nuclei), 1114
Iwanow, Prof A W Elected a member of the Zoology Section of the Leopoldina Academy of Natural Sciences, 595
Iwinski, T Theory of Beams (translated from the Polish by E P Bernat), *review* by T M Charlton, 1976

JACCARD, C (Granicher, H , and) Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 157
Jackman, Dr L M , and others Biological Origin and Configuration of 10-Hydroxy-Δ^{2}-decenoic Acid, 634
Jackson, Anne-Louise (Rajam, Dr P C , and) *In vitro* Labelling of Antibody Globulin by Tritium Exchange, 375
Jackson, E F Appointed director of the Institute of Statistics in the University of Oxford, 943
Jackson, Dr G A D , and Barakat, S E Y The Organic Acids in Rose Hips, 1953
Jackson, Dr G A D , and Wood, R B Presence in Rose Hips of Substances inhibiting the Oxidation of Ascorbic Acid, 902
Jackson, Dr G A D (Prosser, M V , and) Induction of Parthenocarpy in *Rosa arvensis* Huds with Gibberellic Acid, 108
Jackson, Prof J D The Physics of Elementary Particles, *review* by P T Matthews, 1677
Jackson, Dr J S , and Palmer, P F Special Ceramics (Apparatus designed for Hot-pressing small specimens of Refractory Hard Materials to High Density), 1116
Jackson, Prof L C Measurement of the Thickness of the Helium Film (Duddell Medal Address to the Physical Society), 954
Jackson, Prof M L Soil Chemical Analysis, *review* by J M Bremner, 1093
Jackson, V R Personnel Management and Technological Change (Government Policy and Company Pension Schemes for Manual Workers), 1614
Jackson, Sir Willis Elected president of the Institution of Electrical Engineers, B A 16
Jacob, F , and Wollman, E Cytoplasmic Inheritance (Lysogeny and Zygotic Induction), 1012
Jacob, Dr L (Chisholm, Margaret, and) Current Fluctuations in the Oxide Cathode, 1058
Jacobs, Dr Morris B The Chemical Analysis of Foods and Food Products, third edition, *review* by Dr V H Booth, 1347
Jacobs, P W M (Hill, R J , and) Field Effects on Chemisorbed Films in Electron Emission Microscopy, 895
Jacobsen, Dr E H Ultrasonic Vibrations at 10,000 Megacycles, *erratum*, 27
Jacobson, Howard Boone, and Roucek, Joseph S (edited by) Automation and Society, *review* by R Brightman, 1438
Jacobson, M , and others Chemical Nature of a Plant-Virus Inhibitor from Rice, 1146
Jacobson, Robert A , and others Structure of Cellobiose, 1719
Jaffe, W P , and others Unidentified Growth Factors, 271
Jaffe, W P (Wakelam, J A , and) Unidentified Chick Growth Factors, 272
Jakubovic, Dr A O Anion Exchangers based on Cellulose, 1065
Jameel, M Awarded an Overseas Scholarship by the Royal Commission for the Exhibition of 1851, 409
James of Rusholme, Lord T H Huxley, *review*, B A 2
James, Dr A T Awarded a John Price Wetherill Medal of the Franklin Institute, 857
James, Prof E O Myth and Ritual in the Ancient Near East, *review* by Prof Norman W Porteous, 1972
James, Philip The Country House and the Museum, 598
James, Suzanne M , and Fiset, Paul Serum Inhibitors of Asian Strains of Influenza Virus, 1656
Janak, Dr J Gas Chromatography (Application of Gas Chromatography to the Identification of Structure of Involatile Substances by Pyrolysis, 1199
Jancso, Prof N , and others A Method for *in vitro* Investigation of the Colloid-storing Function of Histiocytes, 1070
Jancso-Gabor, Aurelia, and others A Method for *in vitro* Investigation of the Colloid-storing Function of Histiocytes, 1070
Janeček, J , and others Influence of DL-beta-Phenylserine on the Synthesis of Proteins in *Escherchia coli*, 1895
Janes, B S *Sporidesmium bakeri* recorded from Victoria, Australia, 1327
Jansen, Dr E G Opening Address at the Cape Town Science Exhibition (1959), 952
Jansonius, J N (Drenth, J , and) The Unit Cell of Mercuripapian Crystals, 1718
Janus, J W Gelation (The Formation and Structure of Gelatin Gels), 863
Japan Concentration of Caesium-137 in the Coastal Waters of, (1959), (Noboru Yamagata), 1813
  Mineralogical Study on Clays of (Dr Toshio Sudo), *review* by Dr D M C MacEwan, 1439
Japanese Geochemical Society Position and Activities of the (Prof K Sugawara), 1193
Japanese Nuclear Power Station, 407
Jarai, I , and others Thermoregulatory Heat Production in the Brain, 993
Jardine, W Graham Appointed lecturer in geology at the University of Glasgow, 1915
Jarman, Dr M Electrical Activity in the Muscle Cells of *Ascaris lumbricoides*, 1244
Jaw (Piltdown Skull and) Radiocarbon Dating of the (Prof H de Vries and Dr K P Oakley), 224
Jay, G T F , and others Identification of the High-Temperature Constituent in Mild Steel Surface-Hardened by Carbo-Nitriding, 1312
Jayawant, Dr B V Appointed lecturer in electrical engineering at Queen's University, Belfast, 322
Jeffares, Prof A Norman, and Davies, M Bryn The Scientific Background, *review* by Dr W L Sumner, 5
Jeffery, Dr P M (Compston, W , and) Anomalous 'Common Strontium' in Graphite, 1792
Jeffreys, Sir Harold The Earth—its Origin, History and Physical Constitution, fourth edition, *review* by Prof B Gutenberg, 1007
Jeljaszewicz, Dr J (Wlodarczek, Dr K , and) Influence of Coagulase on the Growth of Staphylococci in Normal Human Serum, 1514
Jelley, Dr J V Cerenkov Radiation and its Applications, *review*, 1260
Jellyfish A Viviparous Deep-Sea (Dr F S Russell), 1527
Jenkin, Dr C R , and Rowley, Prof D Opsonins as Determinants of Survival in Intraperitoneal Infections of Mice, 474
Jenkins, Dr G M New Techniques in the Analysis of Noise and Vibration (Statistical Implications of obtaining a Spectrum via an Autocorrelogram), 415
Jenkins, W Lloyd Appointed lecturer in the Department of Chemistry in the University College of Rhodesia and Nyasaland, with responsibility for teaching agricultural chemistry, 508

Jennings, W H (Hagins, Dr W A, and) Energy Transfer with special reference to Biological Systems (Localization as Opposed to Migration of the Excitation in the Retinal Rods), 690
Jennison, Dr R C (Davies, Dr R D, and) Red-Shift Absorption Spectrum of the Cygnus-A Radio Source, 803
Jensen, H L, and others A New Nitrogen-fixing Bacterium, 1743
Jensen, P K Corticosterone Inhibition of Pyridine Nucleotide Oxidase from Heart Sarcosomes, 451
Jensen, Rue, and Hill, H J (edited by F X Gassner, in association with) Proceedings of the Third Symposium on Reproduction and Infertility, Colorado State University, *review* by Dr T Mann, 1434
Jenson, Dr V G Appointed lecturer in chemical engineering at the University of Birmingham, 684, 1362
Jephcott, D F Ionization Phenomena in Gases (Measurements of the Velocity and Damping of Alfvén Waves), 1356
Jerrard, H G, and Simmons, B A W Dielectric Studies on Deoxyribonucleic Acid, 1715
Jet (Gas) Blunt-Nosed Bodies in a High-Temperature (F R Sedlund and Prof C C Chang), 812
Jet Aircraft Noise Effect of, on Hearing (Surg Lieut R R A Coles and J J Knight), 1803
Jet Propulsion, *review* by D G King-Hele, 1346
Jets and Rockets (A Barker, T R F Nonweiler and R Smelt), *review* by D G King-Hele, 1346
Jewell, P A, and Hawkins, A E At the Conference of the Mammal Society of the British Isles (Normal Diet of the Water Shrew), 29
Jewkes, Prof J How Much Science? (Presidential Address to Section F (Economics) of the British Association for the Advancement of Science), B A 44
Jha, Asharfi, and Posnette, Dr A F Transmission of a Virus to Strawberry Plants by a Nemotode (*Xiphinema* sp), 962, *erratum*, 1192
Jimbo, T Origin and Dispersal of Flowering Plants (Angiosperms in various Tertiary Floras of Japan), 1201
Jirka, J, and others Haemodynamics in Essential Hypertension, 1643
Job Fitting the, to the Worker—a Survey of American and European Working Conditions in Industry (European Productivity Agency of the Organization for European Economic Co-operation, Project 335), 422
Jobst, C, and others Effect of Sexual Maturation and Castration on the Sex Chromatin Pattern in the Male Rat, 1239
Johnin Protein Preparation of a Highly Purified Carbohydrate-free (E Annau), 1642
Johns Hopkins University Studies in Historical and Political Science, Series 76, No 1, Trends in Birth Rates in the United States since 1870 (Dr Bernard Okun), *review*, 134
Johnson, A A, and others Dislocation Arrangements in Molybdenum, 356
Johnson, Dr Bruce Ants and Form Reversal in Aphids, 740
Johnson, C G, and others New Pests of Cocoa (*Theobroma cacao* L) in Ghana following Applications of Insecticides, 2040
Johnson, Dr C H Promoted to Chief Scientific Officer and appointed director of the Explosives Research and Development Establishment of the Ministry of Aviation, Waltham Abbey, 1448, 1775, work of, 1775
Johnson, D H, and Morth, Dr H T Value of Contour Analysis in Equatorial Meteorology, 1372
Johnson, Eleanor, and others Equilibrium Constant of the Galactokinase Reaction and Free Energy of Hydrolysis of Adenosine Triphosphate, 1925
Johnson, Dr Francis S Telluric Origin of the Whistler Medium, 1787
Johnson, G A, and Neale, Dr S A Dielectric Absorption in Dispersed Systems, 898
Johnson, Dr Julian F (Porter, Dr Roger S, and) Volatile Liquid Partition Chromatography, 978
Johnson, Prof L P V Awarded a Research Fellowship in genetics in the University of Birmingham, 1688
Johnson, Dr T H, and others Carbonic Anhydrase in the Deciduoma of the Rat, 961
Johnson, Matthey and Co, Ltd Production of all the Rare Earth Metals, 683
Johnston, F B, and others Fine Structure in Cells of Pea and Wheat Embryos, 505
Johnston, Norah C, and others Extraction and Purification of 'Queen Substance' from Queen Bees, 1871
Johnston Island Nuclear Explosion Disturbance in the Ionospheric F-Region following the (C H Cummack and G A M King), B A 32
Johnstone, Dr R A W (Carruthers, Dr W, and) Composition of a Paraffin Wax Fraction from Tobacco Leaf and Tobacco Smoke, 1131
'Joining of Metals' Conference at the University of Birmingham Third (The Electric Arc in Welding), 1030
Joint Action of Gibberellic Acid and Coumarin in Germination (A M Mayer), 826
Joint Advisory Council, National Report of an inquiry into the Efficient Use of Man-power in Industry (Ministry of Labour and National Service), 25
Joint British Committee for Vacuum Science and Technology Formation of a, 1191

Learning in Two Towns After Work—Leisure and (R Ruddock and Dr A Wilson), 1034
Learning (Free) A Defence of (Lord Beveridge), *review* by R Brightman, 576
Least-Squares Solution for a Linear Relation between Two Observed Quantities (P A Wayman), 77, (B K Kelly), 1086
Leather Trades' Chemists Society of The Chemistry of Vegetable Tannins—Being the Papers presented at a Symposium held in the University, Cambridge, 1956, *review* by Dr A I Scott, 1832
Leaves of *Acer saccharinum* L Formation of Allantoin and Allantoic Acid from Adenine in (Robert L Barnes), 1944
Leaves of Long Shoots of *Ginkgo biloba* Vein Anastomoses in the (Dr Howard J Arnott), 1336
Lebedinsky, V I Liquation Differentiation in Magma, 1025
Leaves of some Plants Distribution of Ascorbic Acid in the (Dr Philippe Hagene), 284
Leck, Dr V H Appointed to a senior lectureship in electronic engineering in the University of Liverpool, 410
Lectures on the Land of Britain—is it Used to the Best Agricultural Advantage ? (Association of Agriculture and the Extra-Mural Department of the University of London Course of), 1845
Lectures on Newer Developments in the Chemistry of the Non-Metals (Kingston Technical College Course of), 1915
Lectures and Practical Work on Micro- and Semi-microchemical Methods (Norwood Technical College Course of), 1845
Lectures (University) Visual Illustration of (British Universities Film Council Discussion on), 515
Leddicotte, G W Radioactivation Analysis (Recent Developments in the United States), 951
Lederer, Prof E, and others Isolation of 24-Methylene-cholesterol from Honey Bees (*Apis mellifica* L), 732
Lederer, Prof E (Gastambide-Odier, Dr Mireille, and) Biosynthesis of Corynomycolic Acid from Two Molecules of Palmitic Acid, 1563
Lederer, Michael Chromatographic Reviews—Progress in Chromatography, Electrophoresis and related Methods, Vol 1, *review* by Dr R Consden, 1436
Ledger, H P A Possible Explanation for Part of the Difference in Heat Tolerance Exhibited by *Bos taurus* and *Bos indicus* Beef Cattle, 1405
Lee, A J, and Cushing, Dr D H International Council for the Exploration of the Sea—Special International Geophysical Year Meeting, 1180
Lee, Dr E W Appointed lecturer in physics at the University of Sheffield, 684
Lee, Prof Frank A A Chemical Effect of Ethylene during the Storage of Peas, 462
Lee, G E, and others Congeners of Pempidine with High Ganglion-blocking Activity, 1707
Lee, G W Work carried out at the Coke Research Centre, 1778
Leech, J Appointed lecturer in the computing laboratory in the University of Glasgow, 1915
Leeds Some Measurements of Background Gamma-Radiation in, during 1955-59 (Prof F W Spiers,, 1680
Leggiero, G (Bolcato, V, and) Glycolaldehyde Trapped from Aerobic Oxidation of D-Xylose by *Torulopsis utilis*, 1318
Legumes Gibberellic Acid and Nodulation of (Dr Wm W Fletcher, J W S Alcorn and J C Raymond), 1576
  Influence of Temperature on the Symbiotic Nitrogen Fixation of (the late Prof Margaretha G Mes), 2032
Lehman, L Appointed lecturer in dental mechanics and prosthetics at the University of Sheffield, 584
Lehmann, Dr H (Hunt, Dr J A, and) Haemoglobin 'Bart's', a Foetal Haemoglobin without α-Chains (Abnormal Human Haemoglobins), 872
Lehmann, Dr H, and others Haemoglobin P in a Family in the Belgian Congo, 1133
Lehmann, Dr M At the first Conference of the British Computer Society (Very Fast Computers), 945
Leibowitz, Prof Jeshaia (Shasha, Baruch, and) Oleuropeic Acid, a New Compound from *Olea europaea*, 2019
Leicester, Henry M (edited by) Chymia—Annual Studies in the History of Chemistry, Vol 5, *review* by Prof J R Partington, 1900
Leighton, Prof Robert B Principles of Modern Physics, *review* by Dr E Stanley, 1438
Leiocephalus cubensis Complex in Cuba and the Isla de Pinos Variation in Lizards of the (Albert Schwartz), 1107
Leisure and Learning in Two Towns After Work— (R Ruddock and Dr A Wilson), 1034
Lenihan, Dr J M A Radioactivation Analysis, 951
Lens of the Rat with 'Sugar' Cataract Formation of Polyols by the (Dr Ruth van Heyningen), 194
Lenses (Zone) Deviation of, produced by Polarization (Prof Jurgen R Meyer-Arendt), 811
Leopoldina Academy of Natural Sciences Halle Election of new Members, 595
Lepidopterous Insects Relationship between Larval and Pupal Periods of some (Dr M A Zaher and Dr Moufied A Moussa), 288
Lepidurus arcticus in the Irish Late-Glacial (Dr M E S Morrison), 739
Leptinotarsa decemlineata (Say) Common Attractant for the Tobacco Hornworm, *Protoparce sexta* (Johan) and the Colorado Potato Beetle (Dr Robert T Yamamoto and Prof G Fraenkel), 206
Leptomeria billardierii R Br Occurrence of Embryo Sac-like Structures in the Microsporangia of (Dr Manasi Ram), 914
Leray, Jean Elected an Honorary Member of the American Academy of Arts and Sciences, 409
Lerman, Dr Sidney Carbohydrate Metabolism in the Experimental Galactose Cataract, 1406
Lerner, Prof Aaron B Mechanism of Hormone Action, 674
Lesion of the Follicle and of the Fibre of Wool and its Possible Relation with an Excess of Iron in the Forage (Prof G Gonzelez, J Garcia and E Fernandez), 559
Lesion Formation in Virus-infected Plant Tissues Biochemical Mechanism of (Dr F Solymosy, Dr G L Farkas and Dr Z Kiraly), 706
Leslie, Dr I Cell and Organ Culture, 935
  The Culture of Cells, *review*, 1009
Leslie, W C, and others X-Ray Diffraction Pattern of Carbide in Low-Carbon Iron-Silicon Alloys, 1862
Leston, Dennis (Southwood Dr T R E, and) Land and Water Bugs of the British Isles, *review* by W J Le Quesne, 1977
L'Estrange, John Awarded a junior post-graduate agricultural research scholarship by An Foras Taluntais (the Agricultural Institute of Ireland), 1612

Lethal and Sub-Lethal Doses of Cottonmouth Moccasin Venom labelled with Iodine-131 Distribution in the Mouse of (Prof J F Gennaro, jun , and H W Ramsey), 1244

Lethally Irradiated Mice Interstrain Ovarian Transplantation in, after Bone Marrow Therapy (Prof W St Amand and L H Smith), 1503

Lethally X-Irradiated Mice Abrogation by Injected Mouse Blood of Protective Effect of Foreign Bone Marrow in (L J Cole and R M Garver), 1815

Lethals (Recombinational), in a Polymorphic Population (J B Gibson and Prof J M Thoday), 1593

Letort, M , and others Coal Science (Energy of Activation of the Combustion of Graphite), 414

Leuco-Anthocyanin in Sour and Sweet Cherries Occurrence of (Dr Kuang C Li), 1935

Leucrose Formation of, in Dextran-producing Cultures of *Streptococcus bovis* (R W Bailey and Prof E J Bourne), 904

Leukaemia (Radiation) Dose–Response Relationship in (Dr P Armitage, Dr W M Court Brown and Dr R Doll), 1669 , (Dr D J Mewissen), 1670

Leukaemia (Spontaneous), in *AKR* Mice Chromosome Complement of (H F Stich, R Wakonig and Dr A A Axelrad), 998

Leukaemia and allied Diseases Research on (Lady Tata Memorial Trust Awards for), 507

Leukaemic Filtrate Fate of Subcutaneous Thymus Grafts in Thymectomized Mice Inoculated with (J F A P Miller), 1809

Level of Microbial Population Effect of the, on Isotopically Exchangeable Phosphate in Soil (Dr P Newbould and Dr R L Lucas), 1155

Level of Plasma Cholesterol in the Rat Effect of Dietary Fat and Extent of Blood Sampling on the (I Coleman and J M R Beveridge), 1039

Level of Serum Protein during Treatment of Kwashiorkor Changes in the (Dr Olumbe Bassir), 2019

Level (High-) β-Amino-isobutyric Acid Excretors in Micronesians High Prevalence of (Dr B S Blumberg and Dr S M Gartler), 1990

Levels (High), of Phosphorus and Die-Back in Yellow Lupins (R G Warren and B Benzian), 1588

Levels (High), of Survival Mutation of Bacteria at, by Ethyl Methane Sulphonate (Anthony Loveless and Sheila Howarth), 1780

Levels (Ubiquinone), in Rat Liver Mitochondria Pantothenic Acid Deficiency and (A S Aiyar, G A Sulebele, D V Rege and A Sreenivasan) 1867

Levengood Dr W C Structural Defects in Fused and Crystalline Silica, 1476

Levenson, Dr Stanley M , and others Chromatographic Fractionation of Rat Tail Tendon Collagen, 1640

Leveque, P Radioactivation Analysis (Applications in Industry), 951

Levi, Elaine, and others Tumour Specificity and Immunological Suppression, 563

Levin, R Appointed development planning executive at Aspro-Nicholas, Ltd , 1192

Levine, Dr Norman D Elected president for 1959-60 of the United States Society of Protozoologists, 1273

Levine, Prof Ruth R Presence of certain Onium Compounds in Brain Tissue following Intravenous Administration to Rats, 1412

Levinstein Memorial Lecture of the Society of Chemical Industry (L H Williams), 1915

Levinthal, C Specificity in Protein Biogenesis (Relationship between Deoxyribonucleic Acid and Protein Structures), 1198

Levvy, Dr G A (Conchie, J , and) Localization of β-Glucuronidase in Normal and Cancer Cells, 1709

Levy, Dr H R Steric Aspects of the Chemistry and Biochemistry of Natural Products (Stereospecificity in the Reactions of Pyridine Nucleotides), 949

Levy, Dr Lester M , and others Enzymes and Radioactivity in Erythrocytes of Different Ages, 643

Lewis, D Cytoplasmic Inheritance (Lysis in the Fungus *Coprinus lagopus*), 1012

Lewis, D (Annison, E F , and) Metabolism in the Rumen, *review* by Dr D P Cuthbertson, 839

Lewis, F J W , and Plaice, Dr Constance H J Urinary β-Glucuronidase Activity in Patients with Bone Fractures, 1249

Lewis, P R , and McCutchen, Dr C W Mechanism of Animal Joints—Experimental Evidence for Weeping Lubrication in Mammalian Joints, 1285

Lewisian Rocks from North-West Scotland Rubidium-Strontium Ages of (Dr Bruno J Giletti), 1793

Leyton, Dr L Effects of Forest Areas on Water Resources, and the Technique of Lysimeters—Water and Woodlands, 1184

L'Heritier, Ph Cytoplasmic Inheritance (Carbon Dioxide Sensitivity in *Drosophila*) 1012

Lhotka, Prof John F Histochemical Use of the Cyanocarbon Organic Compounds, 1153

Lhotka, Prof John F , and others Effect of Prolonged Thyroid Administration on Aged Male Rats, 1149

Li, Dr Kuang C Occurrence of Leuco-Anthocyanin in Sour and Sweet Cherries 1935

Liacopoulos P and others Promoting Effect of Urea on the *in vitro* Passive Sensitization of Isolated Plain Muscles with Precipitating Antibody 1805

Liben, L , et autres Carte des Sols et de la Vegetation du Congo Belge et du Ruanda-Urundi, 6, Yangambi, Planchette 3, Lilanda, A, Sols , B, Vegetation (Institut National pour l'Etude Agronomique du Congo Belge) 27

Liberty in an Age of Science (Sir Solly Zuckerman), 135

Libikova H , and others Infectious Ribonucleic Acid from Mouse Brains infected with Tick-borne Encephalitis Virus, 1581

Libraries University (Home Universities Conference 1959), 1613

Libraries for Industry and Commerce, Tyneside Association of, 25

Libraries (Public, Rate Supported) in Great Britain and Northern Ireland Statistics of, 1957-1958 (Library Association), 592

Library of Sir Joseph Banks Some Eighteenth Century Bird Paintings in the (1743-1820) (Averil Lysaght), 941

Library (National Lending), for Science and Technology Appointment of a Consultative Committee, 1449

Library Association Statistics of Public (Rate Supported) Libraries in Great Britain and Northern Ireland, 1957-1958, 592

  Annual Conference, 1455

  Presidential Address (Earl Attlee), 1455

  Handicapped Children in Britain—their Problems and Education (compiled by W A Axford), 1777

Library Services in Britain Science and the, 1455

Lichtentaeler, Dr At the 139th Annual Meeting of the Swiss Society for Natural Sciences (Mathematical Aspect of the Hippocratic Logos), 1455

Liebster, J , and Andrysek, O Labelling of Rose Bengal with Iodine-131 by Radioactive Exchange, 913

Lied, F , and others The *D* Region of the Ionosphere, 973

Lietz, Prof J Alpine Mineral Fissures (Experiments on Cubes of Colourless Quartz to convert them into Smoky Quartz by Electrolysis), 1910

Life of Frederick Soddy, *review* by Prof Norman Feather, 298

Life of Steel (Aerobic Corrosion Fatigue) Relationship to *p*H to (Dr Frederick J Radd, L Hugh Crowder and Louis H Wolfe), 2008

Life and Times of Sir Charles Hastings, Founder of the British Medical Association (Dr William H McMenemey), *review* by Dr W R Bett, 923

Life (Animal) South African—Results of the Lund University Expedition in 1950-51, Vol 5 (edited by Bertil Hanstrom, Per Brinck and Gustaf Rudebeck), *review*, 133

Life (Native), in Angola, 226

Life-Cycle of *Cyathostoma lari*, Blanchard 1849 (Nematoda, Strongyloidea), (Dr R T Pemberton), 1423

Lifetimes (Kinetic Chain) A Modified Rotating-Sector Method of measuring (Dr W I Bengough, S A McIntosh and R A M Thomson), 266

Lifshitz, E M (Landau, L D , and) Statistical Physics (translated from the Russian by E Peierls and R F Peierls), *review* by Dr H Steeple, 664

Ligament Does an Increase in the Tension in a, elicit Reflex Muscular Responses? (Dr Beril Stener), 1495

Ligament in the Dorsal Aorta of certain Fishes (Dr L L de Kock and Dr S Symmons), 194

Light into Chemical Energy Conversion of, in Photosynthesis (Prof Daniel I Arnon), 10, *errata*, 1613

Light from the Corona Discharge (Dr R W E Cook), 1055

Light from Noctilucent Clouds Polarization of (Georg Witt), 1618

Light-induced Production of Carotenoid Pigments by *Cephalosporia* (R C Codner and B C Platt), 741, *erratum*, 1108

Light (Polarized) Orientation of Animals to (Dr H Kalmus), 228

  Response of a Single Retinula Cell to (M Kuwabara and K Naka), 455

Light (Red) Complex Reaction in *Hyoscyamus niger* upon Night Interruption with (P J A L de Lint), 731

Light (Ultra-Violet) Annealing of Recoil Damage by (F R C Claridge and Dr A G Maddock), 1932

  Macromolecular Synthesis in Bacterial Recovery from (C O Doudney), 189

Light Hydrocarbons Analysis of (G R Primavesi), 2010

Light Pattern Spectroscopy (Subjective), in the Encephalographic Frequency Range (Prof M Knoll and J Kugler), 1823

Light Quantity Fusion Frequency and (A Angel, D A Hems, W Rose, R C Woledge and Dr R A Weale), 1873

Light Regulation of Coat-Shedding in a Tropical Breed of Hair Sheep (R B Symington), 1076

Lighthill, Prof M J Appointed director of the Royal Aircraft Establishment, Farnborough, 151 , work of, 151

Lights (Ultra-Violet) Application of, to Underwater Research (Richard G Woodbridge III, and Dr Richard C Woodbridge), 259

Lights (White and Colored), and Darkness Behavior and Reactions of the Pacific Sardine, *Sardirops caerulea* (Girard), under the Influence of (Dr A S Loukashkin and Dr N Grant), 865

Lill, Gordon, and Bascom, Willard A Bore-Hole to the Earth's Mantle—AMSOC s Mohole, 140

Lima, Fausto W , and Pieroni, Rômulo R Paper Chromatographic Separation of Components of Rose Bengal Labelled with Iodine-131, 1065

Limb Development in the Absence of Ectodermal Ridge (Dr Eugene Bell, Dr John W Saunders, jun , and Dr Edgar Zwilling), 1736

Limber, Dr D Nelson (Anders, Edward, and) Origin of the Worzel Deep-Sea Ash, 44

Limestone (Tufaceous), near Udaipur Pollen of *Acacia* from (T Trivedi), 123

Limitations Imposed by some Water-borne Preservatives on the Soil Block Test Method for Timber (A J McQuire) 1430

Limnaea truncatula Penetration of the Liver-fluke, *Fasciola hepatica*, into the Snail (Dr Ben Dawes), 1334

Lind, Dr A R Heating and Ventilation (Work in Hot Environments), 1987

Lind, Patricia E , and others Failure to Recover Infective 'Ribonucleic Acid' from Myxovirus Preparations, 360

Lipson, Prof H, and Lipson, S G   Guide to Modern Physics, *review*, 298
Lipson, S G (Lipson, Prof H, and)   Guide to Modern Physics, *review*, 298
Lipton, A   Physiological Activity in Extracts of *Albizia* Species, 822
Liquation Differentiation in Magma (V I Lebedinsky), 1025
Liquid Crystal Systems from Fibr llar Polysaccharides (R H Marchessault, F F Morehead and N M Walter), 632
Liquid *n*-Hexane   Conduction Currents in, under Microsecond Pulse Conditions (A Harry Sharbaugh and P Keith Watson), 2006
Liquid Mixtures   Liquids and (Dr J S Rowlinson), *review* by Prof H C Longuet-Higgins, 1901
Liquid Partition Chromatography   Volatile (Dr Roger S Porter and Dr Julian F Johnson), 978
Liquids   Propagation of Ultrasonic Waves in (Prof A K Dutta, M Subudhi and K Samal), 352
Properties of, *review* by Prof H C Longuet-Higgins, 1901
Liquids (Metallic)   A Structural Model for Monatomic Liquids including (Dr Kazuo Furukawa), 1209
Liquids (Mobile)   Proton Resonance Relaxation Times in (Dr J G Powles and D Cutler), 1123
Liquids (Monatomic), including Metallic Liquids   A Structural Model for (Dr Kazuo Furukawa), 1209
Liquids and Liquid Mixtures (Dr J S Rowlinson), *review* by Prof H C Longuet-Higgins, 1901
Liquids and Solids   Molecular and Atomic Motions in, by Radiofrequency Methods (Colloque AMPERE and the Radiofrequency Spectroscopy Group Joint Discussion on), 157
Liquori, Prof A M, and others   Influence of Counterion Association on the Configurational Stability of Deoxyribonucleic Acid in Solution, 1482
Lister Institute of Preventive Medicine   Report of the Governing Body for 1959, 332
Literature   Science and, *review* by Dr W L Summer, 5
Lithium Permanganate   Szilard-Chalmers Reaction in (J R Bolton and Prof K J McCallum), 1717
Litières de la Région de Yangambi   Moississures du Sol et des (J Meyer), 236
Littauer, Dr U Z (Cox, Dr R A, and)   Secondary Structure of Ribonucleic Acid in Solution, 818
Litter Extracts (Forest-Tree)   Factors in, affecting the Growth of Soil Micro-Organisms (Dr Roger Knowles and Edward Laishley), 1169
Litters   Antibody Status of Mice and Response of their, to Parotid Tumour Virus (Polyoma Virus), (Lloyd W Law, Clyde J Dawe, Wallace P Rowe and Janet W Hartley), 1420
Little, Inc, Arthur D   Report on Radiation in Industry, 506
Little, Brian T   Awarded a junior post-graduate agricultural research scholarship by An Foras Taluntais (the Agricultural Institute of Ireland), 1612
Little, E C S   A Method for Determining Carbon-14 by Combustion using Calcium Carbonate, 900
Little Research Institute, Arthur D   First Annual Report, 235
Littlechild, Dr J E   Nuclear Fuel Treatment, *review*, 1346
Littler, Dr S, and Waters, Dr W A   Oxidation of Organic Compounds (Pentavalent Vanadium becomes an Oxidiser in Acid Solution), 327
Littler, Dr W B   Rocket Propulsion, 1264
Littlewood, A B   Sensitivity of Catharometers in Gas Chromatography and the Thermal Conductivity of Binary Gas Mixtures, 1631
Littlewood, K   Appointed lecturer in fuel technology and chemical engineering at the University of Sheffield, 684
Litton, E   Appointed lecturer in civil engineering at the University of Sheffield, 1451
Liver   Synthesis of Diphosphopyridine Nucleotide from Nicotinamide by Slices of (C J Threlfall), 60
Liver (Bovine)   Chromium Ribonucleoprotein from (Dr W E C Wacker and Dr B L Vallee), 1399
Liver (Foetal)   Relative Rates of Exchange of Potassium-42 by the Foetal Metanephros and (Dr J G Bearn and Dr F T C Harris), 1959
Liver (Guinea Pig)   Agar Electrophoresis of Normal Soluble Proteins in (Prof Iv Goranov, Y Todorov, X Skatshokova, M Hlebarova and P Kuzmanova), B A 64
Cytoplasmic Nucleopeptides in (P Szafranski, E Sulkowski and T Golaszewski), 1940
Liver Cells (Parenchymatous)   Some Enzymatic Properties of Suspensions of (Dr Keith S Henley, Ole Sorensen and H Marvin Pollard), 1400
Liver Function in the Sheep   Effects of Carbon Tetrachloride on Kidney and (Dr B P Setchell), 1242
Liver Glucosyl Oligosaccharides and Glycogen—Carbon-14 Dioxide Experiments with Hydrocortisone (Dr Hsien-Gieh Sie, Prof James Ashmore, Dr Robert Mahler and Prof William H Fishman), 1380
Liver Glycogen Level of Normal and Adrenalectomized Mice   Effect of Diet on the Blood Sugar and (B P Block and Dr G S Cox), 721
Liver Hexokinase   Inhibition of, by Dehydroascorbic Acid and Alloxan (Dr S K Bhattacharya), 1638
Liver Mitochondria   Functional Organization of the Respiratory Chain in (Dr Tokuji Kimura and Dr Thomas P Singer), 791
Liver Mitochondria (Isolated Rat)   Protein Biosynthesis and Oxidative Phosphorylation in (P J Reis, J L Coote and T S Work), 165
Liver Mitochondria (Rat)   A Cardiolipin-like Compound in (G S Getz and W Bartley), 1229
Formation of Noradrenaline from Adrenaline by (Dr Kunio Yagi and Dr Toshiharu Nagatsu), 1316
Pantothenic Acid Deficiency and Ubiquinone Levels in (A S Aiyar, G A Sulebele, D V Rege and A Sreenivasan), 1867
Liver Oils (Fish)   Isomers of Vitamin A in (Patricia S Brown, William P Blum and Max H Stern), 1377
Liver and Kidney Cells   Absorbancy Measurements on (Localization and Assay of Respiratory Enzymes in Single Living Cells), (Dr Bo Thorell and Prof Britton Chance), 934
Liver, Kidney and Adjacent Tissues   Tumourigenesis in Ovaries of Mice transplated to the (Dr Mary J Guthrie), 916
Liver-fluke, *Fasciola hepatica*   Penetration of the, into the Snail *Limnaea truncatula* (Dr Ben Dawes), 1334
Liverpool Geological Society   Centenary of the, 1914
Liverpool Public Museums   Exhibition of Working Models of Marine Engines, 1534
Lives (Working), of Men   Age and the (F Le Gros Clark), 318
Livesley, R K   Matrix Algebra in Structural Analysis, *review*, 1600
Livestock Farming (Lancashire), in the Great Depression (T W Fletcher), 1916
Living Cell   Inside the (Dr J A V Butler), *review* by Dr W L Sumner, 134
Living Cells (Single)   Localization and Assay of Respiratory Enzymes in—Absorbancy Measurements on the *Nebenkern* (Dr Robert P Perry Dr Bo Thorell, Dr Lennart Åkerman and Prof Britton Chance), 929 , Fluorescence Measurements of Mitochondrial Pyridine Nucleotide in Aerobiosis and Anaerobiosis (Prof Britton Chance and Dr Bo Thorell), 931 , Absorbancy Measurements on Liver and Kidney Cells (Dr Bo Thorell and Prof Britton Chance), 934
Living Resources of the Sea (Dr Lionel A Walford), *review* by Dr F S Russell, 129
Living Species   The Evolution of (Royal Society of Victoria Symposium on), 156
Living Systems   Self-Regulation in (Second Ottawa Symposium on), 239
Livingston, Prof R   Energy Transfer with special reference to Biological Systems (Properties of Isolated Chlorophyll), 690
Lizard *Trachysaurus rugosus* (Gray)   Effects of Elevated Plasma Sodium Concentration on Sodium and Potassium in the Erythrocyte of the (P J Bentley), 1403
Lizards of the *Leiocephalus cubensis* Complex in Cuba and the Isla de Pinos Variation in (Albert Schwartz), 1107
Ljunggren, H, and Fahraeus, G   Effect of *Rhizobium* Polysaccharide on the Formation of Polygalacturonase in Lucerne and Clover, 1578
Ljunggren, Prof Pontus   Biogeochemical Enrichment of Fission Products, 912
Lloyd, Dr A G, and Dodgson, K S   Infra-Red Spectra of Carbohydrate Sulphate Esters, 548
Lloyd, D G, and others   Cross-linking of Cellulose Acetate by Ionizing Radiation, 1303
Lloyd, Dr David P C   Response of Cholinergically Innervated Sweat Glands to Adrenaline and Noradrenaline, 277
The Discrete and the Diffuse in Nervous Action (James Arthur Lecture on the Evolution of the Human Brain), 1777
Lloyd-Jacob, Marny A (Scott, Dr Patricia P, and)   Reduction in the Anoestrus Period of Laboratory Cats by Increased Illumination, 2022
Lo, Arthur W, and others   Transistor Electronics, *review* by J W R Griffiths, 838
'*LO*-Analysis' as an Aid in the Study of Fungal Spore Morphology (Dr M M Payak), 738
Lobban, Dr Mary C   Animal Clocks, 765
Local Races in Lugworms, *Arenicola marina* (L), (Dr A Duncan), 71
Localization of β-Glucuronidase in Normal and Cancer Cells (J Conchie and Dr G A Levvy), 1709
Localization of Haemocyanin on Starch Gel Electrophoretic Patterns (J R Whittaker), 193
Localization (Histochemical), of Oxidase Activity in the Mitochondria of the Human Heart (Dr M S Burstone), 476
Localization (Histological), of Fluorescent Thyroid-stimulating Hormone in Rat Tissues (Dr E E Mancini, O Vilar, J M Dellacha, A Gimeno and A Castro), 1733
Localization (Histological), of Peroxidase (D S Van Fleet), 506
Localization and Assay of Respiratory Enzymes in Single Living Cells—Absorbancy Measurements on the *Nebenkern* (Dr Robert P Perry, Dr Bo Thorell, Dr Lennart Åkerman and Prof Britton Chance), 929 , Fluorescence Measurements of Mitochondrial Pyridine Nucleotide in Aerobiosis and Anaerobiosis (Prof Britton Chance and Dr Bo Thorell), 931 , Absorbancy Measurements on Liver and Kidney Cells (Dr Bo Thorell and Prof Britton Chance), 934
Localized Distension of the Oesophagus in Decerebrate Sheep   Responses to (Prof A F Sellers and Dr D A Titchen), 645
Location (Echo-) among *Collocalia* (Lord Medway), 1352
Lochte-Holtgreven, W   Ionization Phenomena in Gases (Results of Mass Spectrographic Analyses of Heavy Ions in Electro-magnetically Compressed Arcs), 1355

Lockard, Dr R G , and others Swellings on the Shoots of Cacao Plants Deficient in Copper, 75
Locke, Dr M Secretion of Wax through the Cuticle of Insects, 1967
Locke Research Fellowship of the Royal Society awarded to Dr B G Cragg, 595
Locke Research Fellowship of the Royal Society awarded to Dr Ainsley Iggo, 772
Lockwood, Dr A P M , and Croghan, Dr P C Composition of the Haemolymph of *Petrobius maritimus* Leach, 370
r-Locus of *Drosophila melanogaster* Complementation among the Sub-Genic Mutants in the (Dr O G Fahmy and Dr Myrtle J Fahmy), 1927
Locus (Vby), in *Trifolium repens* Separation by Gamma-Irradiation of Two Elements at the (Dr D Roy Davies and E T Wall), 1957
Locust, *Schistocerca gregaria* Effect of Insecticides on the Bodies of Nissl and Neurofibrillae of the (Dr Tohamy A Moussa and M Banhawy), 915
Locust (Migratory) Maternal Control of Ovariole Number in the Progeny of the (F O Albrecht, M Verdier and R E Blackith), 103
Locust Outbreaks Forecasting (Dr D L Gunn and P M Symmons), 1425
Locust (Red) Control Service, International Work of the, 589
  Retirement of Dr D L Gunn from the directorship, 589
  Appointment of C du Plessis as director, 590
Lodge, Dr A S Flow Properties of Biological Systems, 1539
Loeb, John N , and others Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures—*Cis-trans* Isomerism and Steric Hindrance, 617
Loeff, Israel, and Stein, Gabriel Aromatic Ring Opening in the Presence of Oxygen in Irradiated Solutions, 901

Logan, A Oil Pollution of the Sea (Methods of Cleaning Cargo Tanks) 950
Logan, Dr W P D , and Cushion, A A Morbidity Statistics from General Practice, Vol 1, General (Studies on Medical and Population Subjects, No 14), 154
Logemann, Dr W , and others Sulphonamides with Diuretic Activity, 1711
Lomax, G D (Rollinson, D H L , and) Paper Electrophoresis of Hippopotamus Haemoglobin, 1653
Lomer, W M Solid State Physics, 1117
London, Dr Heinz Awarded the first Simon Memorial Prize of the Low Temperature Group of the Physical Society, 1026
London Mathematical Society Annual General Meeting, 1533
  De Morgan Medal presented to Sir William Hodge, 1533
  Presidential Address, Some Recent Progress in the Analytic Theory of Numbers (Prof H Davenport), 1533
London School of Economics and Political Science Title of reader in sociology in the University of London conferred on T B Bottomore, 508
  Appointment of Dr G Morton to the University of London readership in operational research, 1451
London School of Hygiene and Tropical Medicine Title of professor of virology in the University of London conferred on Dr Forrest Fulton, 1108
  Title of professor of epidemiology in the University of London conferred on Dr D D Reid, 1108
London and Home Counties Regional Advisory Council for Technological Education Tenth Annual Report, 94
Long, Cornelius Awarded a junior post-graduate agricultural research scholarship by An Foras Taluntais (the Agricultural Institute of Ireland), 1612
Long, Leon E , and others The Geological Time-Scale, B A 62
Long, L H Thermodynamics (Experimental Thermochemistry), 1608
Long-chain Fatty Acid Methyl Esters Gas Chromatographic Separation of, on Polyvinyl Acetate (Irwin Hornstein, L E Elliott and P F Crowe), 1710
Long Island Biological Association Grant of 135 000 dollars from the United States National Science Foundation, 683
Long Platelets from Pulmonary Megakaryocytes A Possible Explanation of the Formation of (Dr J George Sharnoff), B A 75
Long-Running Thermal Precipitator Measurement of Asbestos Dust Concentrations with the (Dr C G Addingley and Dr R Gaze), 715
Long Shoots of *Ginkgo biloba* Vein Anastomoses in the Leaves of (Dr Howard J Arnott), 1336
Longfield, M D Appointed to a lectureship in the Department of Mechanical Engineering in the University of Leeds, 1108
Longhurst, Alan R Prediction of Selection Factors in a Tropical Trawl Fishery 1170
Longman, Dr K A , and Wareing, Prof P F Early Induction of Flowering in Birch Seedlings, 2037
Longmore, J (Hopkinson, Dr R G , and) Awarded the Leon Gaster Memorial Premium for 1959 of the Illuminating Engineering Society, 1272
Longmuir, Dr I S , and Bourke, Dr Ann Application of Warburg's Equation to Tissue Slices, 634
Longuet-Higgins, Prof H C Energy Transfer with special reference to Biological Systems, 689
  Scientific Research and the Philosophy of Science, 1193
  Properties of Liquids, *review*, 1901
Longuet-Higgins, Dr M S Fluctuation Phenomena and Stochastic Processes (Sea-Waves as a Stochastic Process), 512
Lonsdale Dame Kathleen Intermolecular Distances and Diamagnetic Anisotropy in Crystals as Measures of the Polarity of Benzene and Borazole Substituents, 1060
Lonsdale, Dame Kathleen, and Milledge, Dr H Judith An X-Ray Study of Rigid-Body and Internal Vibrations of Organic Molecules, 1545
Looking for Animals in East Africa (E H Tong), 1535
Looms, J S T Ionization Phenomena in Gases (Importance of Corona as a Source of Interference with Micro-wave Communication), 1355
Loosli, J K , and others Effect of 'Amino-Acid Imbalance' on Growth and Vitamin A Storage in the White Rat, 1404
Lord Privy Seal The Office of the, 1190
Losche, A Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
Loss of Data Loss of Information brought about by (S C Pearce), 1826
Loss of Information brought about by Loss of Data (S C Pearce), 1826
Loss of Plasticity of Erythrocytes coated with Incomplete Antibodies (Prof C T Nicolau, P Teitel and M Fotino), 1808
Loss of Wool in Sheep caused by 1-*p*-Aminophenoxy-5-phthalimidopentane (Dr D L Hughes), 1644
Loukashkin, Dr A S , and Grant, Dr N Behavior and Reactions of the Pacific Sardine, *Sardinops caerulea* (Girard), under the Influence of White and Colored Lights and Darkness, 865
Loutit, J F , and others (edited by) Medical Sciences, Vol 2 (Progress in Nuclear Energy, Series 7), *review* by Dr N M Blackett, 1766
  Biological Sciences, Vol 2 (Progress in Nuclear Energy, Series 6), *review* by Prof G Pontecorvo, 1902
Loutit, J S Effect of Ultra-Violet Irradiation on Transduction in *Pseudomonas aeruginosa*, 1960
Love The Origins of, 1203
Loveday, Robert A First Course in Statistics, *review* by J Durbin, 1008
Loveless, Anthony, and Howarth, Sheila Mutation of Bacteria at High Levels of Survival by Ethyl Methane Sulphonate, 1780
Lovell, Prof A C B (Davies, Dr J G , and) Observations of the Russian Moon Rocket *Lunik II*, 501
Low, J R Atomic Mechanisms of Fracture (Fractographic Studies), 325
Low, Kerstin, and others Fractionation Phenomena in Nuclear Weapons Debris, 1771
Low-Carbon Iron-Silicon Alloys X-Ray Diffraction Pattern of Carbide in (G Konoval, L Zwell, L A Gorman and W C Leslie), 1862
Low Concentration of certain Blood Constituents observed in Offspring of Alloxan-Diabetic Rabbits (Dr Otakar Sirek and Dr Anna Sirek), 456
Low Doses of Ionizing Radiations Biological Effects of (Unesco, the International Atomic Energy Agency and the Comitato Nazionale per le Ricerche Nucleari Symposium on), 1111
Low-Energy Particle Tracks Bubble Counting on (I R Birss), 1474
Low Frequencies Measurement of Cosmic Noise at, above the Ionosphere (J P I Tyas, C A Franklin and A R Molozzi), 785
Low-Frequency (100 kc /s) Radio Noise from the Aurora (R L Dowden), 803
Low Frequency (Very) Phenomena at Godhavn, Greenland Observations of 'Whistlers' and (Eigil Ungstrup), 806
Low-Frequency (Very) Spectra of Atmospherics propagated through the Ionosphere (Tatsuzo Obayashi), 34
Low-level Effects (Immediate and), of Ionizing Radiations (Dr Tikvah Alper), 1111
Low Soil Fertility Adaptation of a Lead-tolerant Population of *Agrostis tenuis* to (D Jowett), 43
Low Temperature in Rice Plants Quantitative Changes in γ-Aminobutyric Acid induced by (F Zsoldos), 280
Low Temperature (Extremely) Prefreezing as a Method enabling Animals to survive Freezing at an (Eizo Asahina), 1003
Low-Temperature Autoradiography for the Detection of Tritium in Tissue, with Removal of Luminescence induced by Tritium (P Pellerin, P Fallot, M Laine-Boszormenyi and F Serrel), 1385
Low-Temperature Chars Smoke Emission from Coal and (Studies of Coal), (D Finch), 426
Low-Temperature Engineering, *review* by Dr G G Haselden, 1174
Low-Temperature Physics Experimental Techniques in (Guy Kendall White), *review* by Prof J F Allen, 1260
Low- and High-Temperature Strains of *Chlorella* Tabular Comparative Data for the (Dr Constantine Sorokin), 613
Low Temperatures Photochemical and Stereochemical Properties of Carotenoids at (Staff of the Biological Laboratories of Harvard University)—Photochemical Behaviour of Retinene (Dr Lawrence Jurkowitz), 614, *Cis-trans* Isomerism and Steric Hindrance (John N Loeb, Paul K Brown and Prof George Wald), 617 , Discussion (Prof George Wald), 620
Low-Voltage Arcs Emission of Relatively High-Energy Ions from (E R Harrison), 245
Low Water Content (High and) Free Radicals in X-Rayed Seeds of, as Measured by Electron Spin Resonance (Dr W Klingmuller, Dr G R Lane, M C Saxena and Dr D J E Ingram), 464
Lowenstein, Prof O , and Wersäll, J A Functional Interpretation of the Electron-Microscopic Structure of the Sensory Hairs in the Cristae of the Elasmobranch *Raja clavata* in Terms of Directional Sensitivity, 1807
Lowered Bactericidal Efficiency of Hydrogen Peroxide on Milk from Cows treated with Penicillin (J Babad, D L Boros and F Baier), 292
Lowman, Doreen, and others Radioprotective Action of Methoxamine, 1729
Lowther, J S (Arnold, C A , and) Origin and Dispersal of Flowering Plants (Low Representation of Angiosperms in two American Cretaceous Floras), 1201
Lowy, Dr J Comparative Studies of Ultrastructure in Biology, 1445
Lowy, Dr J (Hanson, Dr Jean, and) Evidence for a Sliding Filament Contractile Mechanism in Tonic Smooth Muscles of Lamellibranch Molluscs, 286
Lowy, Dr J , and others Comparative Studies in Ultrastructure (Comparative Studies in the Contractile Structures of Striated and Smooth Muscles), 1446
Loxton, F R , and others Soil and Land-Use Surveys of the Regional Research Centre of the British Caribbean, No 2, The Rupununi Savannas of British Guiana, 27
Lubrication (Weeping), in Mammalian Joints Experimental Evidence for (Mechanism of Animal Joints), (P R Lewis and Dr C W McCutchen), 1285
'Lucalox'—Transparent Sintered Alumina (General Electric Company of America), 1107
Lucas, J W Radiation Safety and Health Physics, 329
Lucas, Dr R L (Newbould, Dr P , and) Effect of the Level of Microbial Population on Isotopically Exchangeable Phosphate in Soil, 1155
Lucas, Ltd , Joseph To finance a Fellowship in the field of metal joining in the Department of Industrial Metallurgy in the University of Birmingham, 1688

Luce, J S Ionization Phenomena in Gases (Trapping of High-Energy Ions within the Walls of a Hollow Vacuum Arc), 1356

Lucerne and Clover Effect of *Rhizobium* Polysaccharide on the Formation of Polygalacturonase in (H Ljunggren and G Fahraeus), 1578

Luciani, S, and others Phospholipid Phosphoric Esters in the Human Placenta, 1870

Ludlovian Succession at Ludlow A Revised Classification of the (C H Holland, J D Lawson and V G Walmsley), 1037

Ludlow A Revised Classification of the Ludlovian Succession at (C H Holland, J D Lawson and V G Walmsley), 1037

Ludovici, B (Kino, G S, and) Ionization Phenomena in Gases (Theoretical and Experimental Studies in Plasma Physics), 1357

Luft, Dr R, and others Enzymic Activities of Human Skeletal Muscle Mitochondria—a Tool in Clinical Metabolic Research, 1851

Lugeon, Prof J, and collaborators At the 139th Annual Meeting of the Swiss Society for Natural Sciences (Les Recoupements Radiogoniographiques des Grands Foyers Orageux de l'Hémisphere Nord depuis la Base Spitzberg-Suisse), 1455, (Comparaison des Regimes des Parasites Atmospheriques Polaires et Européens), 1455 , (Report on Measurements of Atmospheric Electricity and Radioactivity of the Air at Murchison Bay during the International Geophysical Year), 1455

Lugworms, *Arenicola marina* (L) Local Races in (Dr A Duncan), 71

Lumby, J R Polar Front Survey (Hydrography—North Atlantic Ocean), 1183

Luminescence of the Euphausiid *Thysanoessa raschii* Spectral Composition of the (Dr Brian P Boden and Dr Elizabeth M Kampa), 1321

Luminescence induced by Tritium Low-Temperature Autoradiography for the Detection of Tritium in Tissue, with Removal of (P Pellerin, P Fallot, M Laine-Boszormenyi and F Serrel), 1385

Luminous Spots on Electrodes in Insulating Oil Gaps (T W Dakin and Daniel Berg), 120

Lumry, Prof R Energy Transfer with special reference to Biological Systems (Simultaneous Measurements of Hill Reaction Velocity and Fluorescence Yield), 690

Lunar Ephemeris and the Frequency of Caesium in Terms of U T $+ \Delta T$ An Error in the Determination of ΔT from the (C A Murray), 441

Lund, Dr J W G Promoted to Senior Principal Scientific Officer in the Scientific Civil Service, 859, 1273 , work of, 859
  Buoyancy in relation to the Ecology of the Freshwater Phytoplankton, 1534

Lunda Flagrantes da Vida na (Introducao de Dr José Osorio de Oliveira), (Companhia de Diamantes de Angola, Museu fo Dundo, Publicacoes Culturais No 37), 236

Lung of the Guinea Pig and other Tissues Mast Cell Population of (Dr W G Smith), 1154

Lung Succinooxidase Effect of Cell-Free Extracts of *Mycobacterium tuberculosis* $H_{37}Rv$ on (Dr A Bekierkunst and M Artman) 458

Lungs A New Method for Studying the Functioning of the (Helge Colldahl, T Alväger and J Uhler), 372

Lunik II Observations of the Russian Moon Rocket (Dr J G Davies and Prof A C B Lovell), 501 , (Patrick Moore), 502 , (Dr H Percy Wilkins), 502

McTaggart-Cowan, Patrick D Appointed director of the Meteorological Branch of the Canadian Department of Transport, 1105, work of, 1105
Mactra stultorum Linne (Lamellibranchiata) Shell and Siphon Regeneration in (L Birkett and R J Wood), 1075
McTurk, G (Clarke, J W, and) Some Experiments on Rice's Blue Material, 2014
McVaugh, Rogers Flora of Peru, *review*, 666
McWilliam, Dr I G Gas Chromatography (Comparison of Detectors for Gas Chromatography), 328
Macy (Josiah), Jr Foundation Grants, 683
Madagascar A Zoological Survey of (Dr Renaud Paulian), 1387
Maddock, Dr A G, and Vargas, J I Influence of Crystal Defects on the Szilard-Chalmers Process in Solids, 1931
Maddock, Dr A G (Claridge, R F C, and) Annealing of Recoil Damage by Ultra-Violet Light, 1932
Maddy, Dr A H Detection of 2 4-Dinitrophenyl Amino-Acids on Paper Chromatograms, 1397
Maetz, J, and others Natriferin, a New Hormonal Principle in the Neurohypophysis of certain Vertebrates, 1236
Magasanik, B Specificity in Protein Biogenesis (Control of the Synthesis of Specific Proteins), 1198
Magat, M Macromolecules (Ionic Polymerization initiated by Ionizing Radiation), 1689
Maggio Rachele, and Monroy, Alberto An Inhibitor of Cytochrome Oxidase Activity in the Sea Urchin Egg, 68
Magic Science and (John Cain), 1535
Magic and Experimental Science A History of (Prof Lynn Thorndike), Vols 7 and 8, The Seventeenth Century, *review* by Dr V A Eyles, 1899
Magistrelli, F (Allen, J E, and) Ionization Phenomena in Gases (Experiments on the Plasma Sheath Transition in the presence of a Magnetic Field) 1357
Magistretti, M J, and others N-Substituted 7-Methoxy-8-Aminomethylchromones and Flavones—New Brain-Stem Stimulants, 362
Magma Liquation Differentiation in (V I Lebedinsky), 1025
Magma (Basic) Deposition of Trace Elements in (R J P Williams), 44
Magnesium Absorption of, in the Large Intestine of the Calf (Dr R H Smith), 821
  The Metallurgy of, *review* by Dr J W Martin, 486
Magnesium (Labelled) Excretion of, by the Sheep (D C Macdonald, A D Care and B Nolan), 736
Magnesium and its Alloys The Physical Metallurgy of (Prof G V Raynor), *review* by Dr J W Martin, 486
Magnesium in Blood Serum Determination of, by Atomic Absorption Spectroscopy (Dr J B Willis), 186
Magnesium in High-Purity Aluminium Analysis for (C A Youngdahl and F E DeBoer), 54
Magnesium in the Insulin-Sensitivity of the Rat Diaphragm *in vitro* Rôle of (Dr Gangagobinda Bhattacharya), 1401
Magnesium Deficiency in Lambs on a Diet containing Roughage Experimental Production of (Dr D M McAleese and Dr R M Forbes), 2025
Magnesium Ions Determination of the Interaction of Deoxyribonucleate and, by means of a Metal Ion Indicator (Joseph Shack and Barbara S Bynum), 635
Magnesium Uptake from Foliar Applications of its Salts on Apple Rôle of the Anion in (M Allen), 995
Magnesium (Potassium, Calcium and) Effect on the Groundnut of Variations in Supply of (Dr R Comber), 1003
Magnetic Effects resulting from Two High-altitude Nuclear Explosions (J A Lawrie, V B Gerard and P J Gill), B A 34
Magnetic Equator Possible Asymmetry in the Daily Range of the Geomagnetic Vertical Intensity around the (Dr C A Onwumechilli), 51
Magnetic Field associated with a Great Solar Flare (Dr Robert Howard, Dr Thomas Cragg and Dr Horace W Babcock), 351
Magnetic Field (Earth's) Possible Reversals of the, in the Jurassic Period (Dr R W Girdler), 540
Magnetic Moments (Principal), of Co^{++} Ions Temperature Variation of the, and the Asymmetry of the Crystalline Electric Field in Cobalt Acetate Tetrahydrate (Dr Bhagawati Charan Guha), 50
Magnetic Processes The Visualization of (Prof L F Bates), B A 41
Magnetism Some Aspects of (Institute of Physics Conference on), 322
Magnetism (Reverse Thermo-Remanent) Exchange Interaction as a Cause of (T Nagata and S Uyeda), 890
Magnetization (Natural Remanent), of Pre-Cambrian Gneiss of Ongul Islands in the Antarctic (T Nagata and Y Shimizu), 1472
Magnetohydrodynamics, *review* by Prof V C A Ferraro, 1672
Magni, G Cytoplasmic Inheritance (Sex Ratio in *Drosophila*), 1012
Magnus, K E (Hassall, Prof C H, and) Monamycin, a New Antibiotic, 1223
Mahesh, Virendra B, and Ulrich, Frank Distribution of Enzyme Systems responsible for Steroid Metabolism in Different Tissues and Sub-cellular Fractions, 1147
Maheshwari, Prof P Awarded the Birbal Sahni Medal for 1958 of the Indian Botanical Society, 95
  Elected a member of the Botany Section of the Leopoldina Academy of Natural Sciences, 595
Mahler, Dr Robert, and others Liver Glucosyl Oligosaccharides and Glycogen—Carbon-14 Dioxide Experiments with Hydrocortisone, 1380
Maier, Van W Fast Chemical Reactions in Solution (Use of the Ultrasonic Technique to Study Association Reactions), 1453
Main Stages of Social Evolution in Man (Dr Max Pettersson), 481
Mainardi Danilo Immunological Distances among some Gallinaceous Birds, 913
Maintenance of Parathyroid Tissue Fragments on Agar Substrates (Dr John H Wallace Dr George J Hill, Jean M McCarthy and Dr John R Brooks), 1734
Maintenance of Pregnancy in Ovariectomized Ewes by means of Progesterone (N W Moore and L E A Rowson), 1410

Maintenance of Semipermeability of Plant Cell Membranes in the Absence of Metabolic Energy Supply (Dr B Ginzburg) 1073
Maisin, J F H Biological Effects of Low Doses of Ionizing Radiations (Small Doses of Radiation could themselves Protect against the Damaging Effect of Larger Doses), 1112
Maize Coleoptile Cell Walls A Partial Chemical Characterization of, prepared with the Aid of a Continually Renewable Filter (Prof Aleksander Kivilaan, Teofila C Beaman and Robert S Bandurski), B A 81
Maize Virus (New) Needle Transmission of a (Dr I Harpaz), B A 77
Maizels, Prof M Calcium Ions and the Permeability of Human Red Cells, 366
Majewski, Dr A Polar Front Survey (Hydrography—Baltic and North Seas), 1183
Majumder, S K, and others Insecticidal Effects of Activated Charcoal and Clays, 1165
Makela, Dr O A Method for distinguishing between α- and β-Glycosides by the use of Plant Haemagglutinins (Lectins), 111
Maker Man the—a History of Technology and Engineering (Prof R J Forbes), *review* by Dr A R Hall, 921
Malacological Society, Netherlands Twenty-fifth Anniversary, 1612
Maladies of Hevea in Malaya (Roger N Hilton), *review* by R W G Dennis, 1976
Malaya Maladies of Hevea in (Roger N Hilton), *review* by R W G Dennis, 1976
Male Aged Rats Effect of Prolonged Thyroid Administration on (Prof John F Lhotka, Lloyd Glenn McArthur and Arthur A Hellbaum), 1149
Male Rat Effect of Sexual Maturation and Castration on the Sex Chromatin Pattern in the (St Zsifkovits, Ch Mehes and C Jobst), 1239
Maleic Acid Significance of Lactose in the Diet in Aminoaciduria caused by (Stefan Angielski and Jerzy Rogulski), 276
Malformation (Floral), in *Panicum antidotale* caused by a Species of *Eriophyses* (Dr V M Desai and Dr M J Thirumalachar), 1586
Malies, H M Applied Microscopy and Photomicrography, *review* by Dr S Bradbury, 117
Malignant Change with Deoxyribonucleic Acid from Rat Sarcoma and Hepatoma An Attempt to produce (Dr J G Bearn), 824
Malinow, Dr Manuel Rene, and others The C_{17}-OH Group of Œstradiol—Relationships between its Anti-Atherogenic and Endocrine Actions, 1720
Malkin, Dr T Synthesis and Properties of 1-Glyceryl-2-*myo*-inosityl Phosphate, 789
Malkin, Dr T (Davies, J H, and) Synthesis of 1-Glyceryl-2-*myo*-inosityl Phosphate (Synthesis and Properties of 1-Glyceryl-2-*myo*-inosityl Phosphate), 789
Mallows, C L (Barton, D E, and) Estimation of Linear and Non-Linear Structural Relations, 1086
Maltback, J C Appointed lecturer in mechanical engineering at the University of Birmingham, 1915
Maltby, Per Correlation between the Intensity of the Umbra of Sunspots and Enhanced Radiation on 200 Mc /s, 1391
Malurkar, S L Retirement from the directorship of the Colaba and Alibag Observatories, 1611, work of, 1611
Malvern Hills Preservation of the, 1272
Mammal Society of the British Isles Conference at Bristol, 29
Mammal Society, Australian Inaugural Meeting, B A 16
Mammalian Alimentary Tract Glycosidases in the (J Conchie and D C Macdonald), 1233
Mammalian Cells in Culture X-Ray Damage and Recovery in (M M Elkind and Harriet Sutton), 1293
Mammalian Erythrocytes Metabolic Changes Induced in, by Whole-Body X-Irradiation (Prof D A Rappoport and B W Sewell), 846
Mammalian Joints Experimental Evidence for Weeping Lubrication in (Mechanism of Animal Joints), (P R Lewis and Dr C W McCutchen), 1285
Mammalian Neuromuscular Junction Post-activation Changes at the (J I Hubbard), 1945
Mammals North American, *review* by Peter Crowcroft, 1524
  Sex Chromatin ('Chromoleme') in the Purkinje Nerve Cells of some (Nylceo Marques de Castro and Wilson da Silva Sasso), 293
Mammals of Banff National Park, Alberta (A W Banfield), 594
Mammals of the Belgian Congo, 155
Mammals of North America (Prof E Raymond Hall and Dr Keith R Kelson), *review* by Peter Crowcroft, 1524
Mammals (British), and some Others (Dr J F D Frazer), 29
Mammals (Eutherian) Chromosomal Evolution in (Prof Robert Matthey), 1329
Mammals (Laboratory) Visual Pigments of some Common (Dr C D B Bridges) 1727
Mammary Glands (Total), of the Mouse Organ Cultures of (Dr F J A Prop), 379
Mammiferes (Grands) Écologie et Biologie des (Primates, Carnivores, Ongulés), (Jacques Verschuren), (Exploration du Parc National de la Garamba, Mission H de Saeger, Fasc 9), 155
Mammoth Tobacco (Maryland) Isolation of Fatty Alcohols with Plant-Growth Promoting Activity from (Dr A J Vlitos and Dr D G Crosby), 462
Man Biological Half-Life of Radioiron in (R Oliver and Dr L G Lajtha), 1882
  Effect of Sorbitol on the Urinary Excretion of some B Vitamins in (J D Watson and Prof John Yudkin), 911, *errata*, 1362
  Extrahepatic Metabolism of Ethanol in (Dr J A Larsen), 1236
  Main Stages of Social Evolution in (Dr Max Pettersson), 481
  The Proper Study of Mankind is (Sir James Gray), B A 35
  A Religion of, *review* by Dr D J McCracken, 1571
  Rivers and (Dr Robert Brittain), *review* by Dr E H Brown, 1977
  A Seasonal Rhythm in the Presentation of Bone Sarcoma in (Dr C H G Price), B A 76
  The Study of, B A 1
Man the Maker—a History of Technology and Engineering (Prof R J Forbes), *review* by Dr A R Hall, 921
Man and the World's Fauna (Dr L Harrison Matthews), B A 43
Man-made Drugs, *review* by F R Batchelor, 1597
Man-power to Atomic Power From (Victor Wall), 1535
Man-power in Industry Efficient Use of (Report of an inquiry by the National Joint Advisory Council), 25
Man-power (Scientific and Engineering), in Great Britain, 1959 (Report of the Committee on Scientific Man-power of the Advisory Council on Scientific Policy), 1982
Man-power Problems (Scientific), in Britain, 1971
Man-powered Aircraft Prize of £5,000 offered by Henry Kremer for the first successful flight of a, 1534
Management in India, 1913
Management Grassland, *review* by Dr W Davies, 1675
  Relationships in Industry—some Changing Concepts in (British Institute of Management and the Ministry of Labour Conference on), 156
Management, British Institute of Cost of Labour Turnover, 1110
Management, British Institute of, and the Ministry of Labour Conference on Relationships in Industry—some Changing Concepts of Management, 156
Management of Salt-affected Soils Diagnosis, Improvement and (Unesco Middle-East Science Co-operation Office Regional Training Course on), 1778
Management Conference Proceedings of the Fifth (Ahmedabad Textile Industry's Research Association), 1913
Management Development, a Systematic Approach to the Provision of Supervisors and Managers (F I de la P Garforth), 319
Management Problems in Under-developed Countries, 483
Management and Underdeveloped Territories (Political and Economic Planning, Broadsheet No 434), 483
Managers Management Development, a Systematic Approach to the Provision of Supervisors and (F I de la P Garforth), 319
Mancini, Dr E E, and others Histological Localization of Fluorescent Thyroid-stimulating Hormone in Rat Tissues, 1733
Mandel, Dr L Fluctuation Phenomena and Stochastic Processes (Problem in which the Approach of the Quantum Theory produced a Substantial Simplification), 510
Mandel, Prof Paul, and Chambon, Pierre Biological Effects of Low Doses of Ionizing Radiations (Ribonucleic Acid Synthesis in Rat Spleen after Whole-body Irradiation), 1112
  A New Approach to the Mechanism of Mutations, 1501
Mandel, Prof Paul, and others Distribution of Nucleic Acids among Different Stable *L* Forms of *Proteus P* 18, 566
Manganese Dioxide Action of, on Simple Carbohydrates (Dr J L Bose, Dr A B Foster, Prof M Stacey and Dr J M Webber), 1301
Mangels and Swedes Fodder Beet, (National Institute of Agricultural Botany Leaflets on), 1777
Mani, Dr N At the 139th Annual Meeting of the Swiss Society for Natural Sciences (Baldasar Heseler's Eye-witness Account of Vesalius's first Public Anatomy Lecture), 1455
Mankind The Proper Study of, is Man (Sir James Gray), B A 35
Manley, Prof Gordon, and others Statement on Biological and Chemical Warfare, 1018
Manley, Prof Thomas R Polymerization of Phosphonitrilic Chlorides, 899
Manly, Dr Brenda Appointed a lecturer in zoology at the University of Birmingham, 684, 1362
Mann, D J O Awarded a Mond Nickel Fellowship for 1959, 1272
Mann, Dr F G Heterocyclic Chemistry, *review*, 216
  Chemistry of Phosphorus, *review*, 389
  Heterocyclic Chemistry, *review* 1758
Mann, John W (Giles, jun, Lester A, and) Oil Pollution of the Sea (Recommendation that the United States accept the 1954 Convention), 950

Mansi, W, and others Myxomatosis—Present Position and Future Prospects in Great Britain, 1179
Manson, L A, and others Effects of Deuterium Oxide on the Synthesis of *T5* and *T7* Bacteriophages, 1167
Manson, Dr W The N-Terminal Amino-Acids of α-Casein, 1393
Mansonioides Mosquitoes Age Determination in (R H Wharton), 830
Mansur, Lawrence C (edited by Dr Heinz Fischer, and) Conference on Extremely High Temperatures (Sponsored by the Electronics Research Directorate of the United States Air Force Cambridge Research Center, Boston, 1958), *review* by Dr T E Allibone, 83
Mantle (Earth's) A Bore-Hole to the—AMSOC's Mohole (Gordon Lill and Willard Bascom), 140
Manton, I Origin and Dispersal of Flowering Plants, 1200
Manuel, S (Chevallier, A, and) Biological Effects of Low Doses of Ionizing Radiations (Drop in the Ascorbic Acid Content of almost all Tissues, particularly the Spleen), 1112
Mapping Vegetation (International Society for Plant Geography and Ecology International Symposium on), B A 23
Maps Metallogenic (Prof S I Tomkeieff), 1693
Marchant Dr R H Specificity of the Tryptophan Peroxidase-Oxidase Enzyme System, 1711
Marchessault, R H, and others Liquid Crystal Systems from Fibrillar Polysaccharides, 632
Marconi Premium of the British Institution of Radio Engineers awarded to Dr Morton B Prince and M Wolf, 857
Marcou, D (Rizet, G, and) Cytoplasmic Inheritance (Barrage and Senescence in *Podospora*), 1012
Marcovich, — Biological Effects of Low Doses of Ionizing Radiations (Induction of Lysogenic Bacteria), 1113
Marcy, René, and others Preparation of a Highly Purified Sample of the Urinary Gonadotrophin, 983
Margenau, H Ionization Phenomena in Gases (Broadening of Spectral Lines by Stark Effects), 1357
Margolis, M A (Dole, S H, and) Chemistry of Propellants (Sources, Availability and Estimated Cost of Propellants), 778
Marine Biological Ashes Some Activation Analyses of Six Trace Elements in (R Fukai and Prof W W Meinke), 815
Marine Biological Association Grant of £1,422 to the University of Leeds, for research on the electron microscopy of marine flagellates, 1108
Marine Biological Research Future, *review* by Dr J A Allen, 215

Marine Biological Station on Heligoland New (Dr J N Carruthers), 400
Marine Biology Perspectives in—a Symposium held at Scripps Institution of Oceanography, 1956 (edited by A A Buzzati-Traverso), *review* by Dr J A Allen, 215
Marine Birds (Captive), possessing a Functional Lateral Nasal Gland (Salt Gland), (Prof Larry Z McFarland), 2030
Marine Engines Exhibition of Working Models of (Liverpool Public Museums), 1534
Marine Gastropods Defensive Acid-Secretion in some (Dr T E Thompson), 1162
Marine Red Alga A Free-Floating (Dr H B S Womersley and Dr R E Norris), 828
Marine Research The Need for, *review* by Dr F S Russell, 129
Marine Standing Crops Proximate Analysis of (Dr T R Parsons and Dr J D H Strickland), 2038
Marini, Mario A, and Hess, Prof George P Reactivity and Interrelationship of Intermediates in the Hydrolysis of *p*-Nitrophenyl Acetate Catalysed by Chymotrypsin, 113
Marini-Bettolo, G B, and others (edited by) Curare and Curare-like Agents, *review* by Dr Marthe Vogt, 1093
Marital Fertility in England and Wales (Prof E Grebenik), 1035
Mark, Prof H Recent Progress in Polymer Chemistry (Fourth Baekeland Memorial Lecture), 156
  Macromolecules (New Condensation Polymers), 1690
Markets (Foreign) British Books and, 605
Marlin (Black), in British East African Waters (F Williams), B A 78
Marples, Ernest Ergonomics, its Place in Industry, B A 20
Marr, A G M Structure and Chemistry of Proteins (Fractionation of Serum Proteins on 'DEAE-cellulose'), 1277
Marrable, A W Variations in Early Cleavage of the Zebra Fish, 1160
Marriage and Divorce Statistics (Demographic Yearbook 1958, Special Topic), (United Nations), *review*, 1525
Marrow (Bone) Therapy Interstrain Ovarian Transplantation in Lethally Irradiated Mice after (Prof W St Amand and L H Smith), 1503
Marrow (Foreign Bone), in Lethally X-irradiated Mice Abrogation by Injected Mouse Blood of Protective Effect of (L J Cole and R M Garver), 1815
Marrow (Guinea Pig Bone) Cells which Synthesize Deoxyribonucleic Acid in, during Recovery from Whole-Body γ-irradiation (P F Harris and J H Kugler), 1883
Mars Vegetation on (W, M Sinton), 1612
Marsden, N V B, and Östling, S G Accumulation of Dextran in Human Red Cells after Haemolysis, 723
Marsdenia erecta R Br Sugars of the Glycoside of the Root of (Dr T Baytop, Dr M Tanker, Dr N Oner and Dr S Tekman), 1319
Marsh, J D F (Griffith, Dr R H, and) Contact Catalysis, *review* by Dr E B Maxted, 1262
Marsh, Dr M C New Research Laboratories for the Cambridge Instrument Company, Ltd, 1364
Marshak, Prof R E Nuclear Forces and the Few-Nucleon Problem (The Primary Two-Nucleon Interaction), 1113
Marshall, Dr A J Animal Clocks (Possible Influence of the Internal Rhythm of Reproduction in the Control of Trans-equatorial Migration of Birds), 764
  The Birds of Sydney (County of Cumberland), New South Wales, *review*, 841
Marshall, Dr A J, and others Duration of the Regeneration Period of the Internal Reproductive Rhythm in a Xerophilous Equatorial Bird, *Quelea quelea*, 1659
Marshall, Dr A J, and Serventy, Dr D L Experimental Demonstration of an Internal Rhythm of Reproduction in a Trans-Equatorial Migrant (the Short-tailed Shearwater *Puffinus tenuirostris*), 1704
Marshall, Dr J G, and Rutledge, Dr P V A Higher Hydrogen Peroxide, H_2O_4?, 2013
Marshall, J K Awarded a Nature Conservancy Research Studentship for postgraduate training in ecology (botany), 156
Marshall, K (Hey, G L, and) The Control of Pests and Diseases in Agricultural and Horticultural Crops, *review* by F C Bawden, 1258
Marshall, Dr Royal R Calculation of a 'Cosmic Ray Age' for the Iron Meteorite 'Carbo', 117
Marshall, S M The Open Sea—its Natural History, *review*, 666
Marsilea and certain other Plants Effects of Gibberellic Acid on Juvenility in (Dr A Allsopp), 1575
Martensitic Transformations in Metals and Alloys (Academician G V Kurdjumov), 1450
Marti, H R, and others Estimation of Small Percentages of Foetal Haemoglobin, 1877
Martin, Dr A E Resolution of Wide-range Grating Spectrometers, 975
Martin, Dr A J P Honorary life membership of the Institute of Petroleum conferred on, 327
  Awarded a John Price Wetherill Medal of the Franklin Institute, 857
Martin, Dr B W Appointed reader in applied thermodynamics at the Imperial College of Science and Technology, 322
Martin, Douglas L (MacDonald, D K C, and) Self-Regulation in Living Systems, 239
Martin, Dr F S, and Miles, Dr G L Chemical Processing of Nuclear Fuels, *review* by Dr J E Littlewood, 1346
Martin, G F (Parr, N L, and) Special Ceramics (Measurement of Creep at High Temperature), 1116
Martin, G F, and others Special Ceramics (Silicon Nitride—its Preparation, its Properties as an Engineering Material and its Microstructure), 1116
Martin, Hubert The Scientific Principles of Crop Protection, fourth edition, *review* by F C Bawden, 1258
Martin, Dr J H, and others Strontium-90 in the Australian Environment, 1957-58, 755
Martin, J H A (Tait, Dr J B, and) Polar Front Survey (Hydrography—Volume Transport through the Faroe-Shetland Channel), 1181
Martin, Dr J T Appointed to a readership in chemistry of insecticides and fungicides in the University of Bristol, 410
Martin, Dr J W The Metallurgy of Magnesium, *review*, 486
Martin, R M Toward a Systematic Pragmatics, *review* by F I G Rawlins, 754
Martin, Dr T J Biological Problems arising from the Control of Pests and Diseases, 1101
Marton, L (edited by, assisted by Claire Marton) Advances in Electronics and Electron Physics, Vol 10, *review* by J R Tillman, 1601
Maruyama, Dr Yoshiharu, and others Formation of Streptolysin *S* by Streptococcal Protoplasts, 832
Maryland Mammoth Tobacco Isolation of Fatty Alcohols with Plant-Growth Promoting Activity from (Dr A J Vlitos and Dr D G Crosby), 462
Mascall, Dr E L The Importance of Being Human, *review* by the Very Rev W R Matthews, B A 2
Mascitelli-Coriandoli, E, and Citterio, Dr C Intracellular Thioctic Acid and Coenzyme A following Vanadium Treatment, 1641
Maskell Peace Scholarship for 1959 of the Institution of Mining Engineers awarded to P Hutchinson, 1845
Mason, Prof Brian Principles of Geochemistry, second edition, *review* by Dr S R Nockolds, 1601
Mason, Dr B J (van den Heuvel, A P, and) Habit of Ice Crystals grown in Hydrogen, Carbon Dioxide and Air at Reduced Pressure, 519
Mason, R Energy Transfer with special reference to Biological Systems (Some Possible Instances of Charge Transfer in Proteins), 689
Mason, Dr R G, and Vitousek, Dr M J Some Geomagnetic Phenomena associated with Nuclear Explosions, B A 52
Mason, Dr R J, and others Pleistocene Climatic Significance of Calcretes and Ferricretes, 568
Mass Media of Communication and Scientific Developments, 659
Mass Spectrometer Application of the, to Polysaccharide Chemistry (Dr F A Finan and Dr R I Reed), 1866
Mass (Electron) Ratio of Nucleon Mass and (Prof A J Rutgers), 894
Mass (Nucleon), and Electron Mass Ratio of (Prof A J Rutgers) 894
Mass (Piston), and Bursting Pressure Measurement of the Effects of, on the Motion of a Piston in a Hypersonic Gun Tunnel (B J Belcher), 1207
Massachusetts General Hospital Gift of 1,000,000 dollars from the Joseph P Kennedy, Jr Memorial Foundation, for the establishment of the Joseph P Kennedy, Jr Laboratories for research on Mental Retardation, 594
Massachusetts Institute of Technology Gift of 2,527,500 dollars from Mr and Mrs C H Green of Dallas, Texas, 507
Massey, Prof H S W Nuclear Forces and the Few-Nucleon Problem (Binding Energies and Elastic Scattering of Light Nuclei at Low Energies), 1114
Massive Incorporation of 5-Fluorouracil into a Bacterial Ribonucleic Acid (Dr Jack Horowitz and Prof Erwin Chargaff), 1213
Mast Cell Population of Lung of the Guinea Pig and other Tissues (Dr W G Smith), 1154
Mast Cells (Rat) Release of Histamine from, by Blood treated with Dextran (Dr G T Archer), 1151
Master Builders' Federation (New Zealand), and the New Zealand Institute of Architects Establishment of a Building Research Bureau, 235
Masterman, M Classification, Concept-formation and Language, 1194
Material (Biological) Spectroscopic Identification of Alpha-Emitting Nuclides in (Prof W V Mayneord and C R Hill), 667
Material (Emetic) Production of, by Species of *Fusarium* (Neville Prentice, A D Dickson and Prof J G Dickson), 1319
Material (Gettering) Titanium as a (R L Stow), 542
Material (Periodic Acid-Schiff-Positive), and Alkaline Phosphatase in the Uterine Wall of the Pig during the Sexual Cycle (Rolv Austad and Dr Otto Garm), 999
Materials Relationship between Structure and Physical Properties of (Non-Destructive Testing Group of the Institute of Physics and the Société Française de Métallurgie Discussion on), 1688
Materials (Porous) The Structure and Properties of—Proceedings of the Tenth Symposium of the Colston Research Society held in the University of Bristol, 1958 (edited by D H Everett and F S Stone), *review*, 1525
Materials (Radioactive) Glove Boxes and Shielded Cells for Handling—a Record of the Proceedings of the Symposium on Glove Box Design and Operation held in the Cockcroft Hall, A E R E, Harwell, 1957 (edited by G N Walton), *review*, 1599
Materials (Radioactive Raw) Mineralogy and Geology of (Prof E Wm Heinrich), *review* by Prof C F Davidson, 1262
Materials and Design (Engineering) Conference on New, 1362
Maternal Control of Ovariole Number in the Progeny of the Migratory Locust (F O Albrecht, M Verdier and R E Blackith), 103
Mateu, J Valls, and others Radiomimetic Action of Lipoxidase, 1506
Math Puzzle- (Prof George Gamow and Dr Marvin Stern), *review* by Prof T A A Broadbent, 217
Mathematical Association Annual General Meeting and Conference, 32
  Presidential Address What is Mathematics?—New Answers to an Old Question (Prof M H A Newman), 32
  Discussion on the Report on Mathematics in Secondary Modern Schools, 32
  Election of L D Adams as president, 33
Mathematical Games, 770
Mathematical Methods of Operations Research (Thomas L Saaty) *review* by Prof L S Goddard, 1763
Mathematical Model for Perception and a Theoretical Confusion Function (M Hammerton), 1668
Mathematical Physics at Birmingham, 679
Mathematical Physics at Birmingham The Graduate School in (Prof R E Peierls), 96
Mathematical Society (London) Annual General Meeting, 1533
  De Morgan Medal presented to Sir William Hodge, 1533
  Presidential Address, Some Recent Progress in the Analytic Theory of Numbers (Prof H Davenport), 1533
Mathematical Theory of Compressible Fluid Flow (Richard von Mises), (completed by Hilda Geiringer and G S S Ludford), *review* by Dr W P Jones, 485
Mathematician Reflections of a (Prof L J Mordell), 681
Mathematics Constructivity in—Proceedings of the Colloquium held at Amsterdam 1957 (edited by Prof A Heyting), *review* by Dr Hao Wang, 1435
  What is—New Answers to an Old Question (Prof M H A Newman), 32
Mathematics in Secondary Modern Schools (Mathematical Association Discussion on the Report on), 32

Mathematics (Applied) at Cardiff, 591
Mathematics ('Applied') Surveys in, *review* by D G Kendall, 214
Mathematics (Applied), and Theoretical Physics at Cambridge, 686
Mathematics and Operations Research, *review* by Prof L S Goddard, 1763

Mays, Dr W Chance and Probability (Chance and Uncertainty), 498
Mazurek, J H (Mutchmor, J A , and) Chemical Changes associated with Diapause in the European Corn Borer, *Ostrinia nubilalis* (Hbn) (Lepidoptera Pyralidae), 1077
Mead, Dr Margaret An Anthropologist at Work—Writings of Ruth Benedict, *review* by Prof E E Evans-Pritchard, 301
Meals (School) in Asia and the Far East, 420
Means of Measuring the Carbon Dioxide Output of Individual Insects The Infra-Red Gas Analyser as a (Dr A G Hamilton), 367
Measured by Electron Spin Resonance Free Radicals in X-Rayed Seeds of High and Low Water Content, as (Dr W Klingmuller, Dr G R Lane, M C Saxena and Dr D J E Ingram), 464
Measurement of Asbestos Dust Concentrations with the Long-Running Thermal Precipitator (Dr C G Addingley and Dr R Gaze), 715
Measurement of Cosmic Noise at Low Frequencies above the Ionosphere (J P I Tyas, C A Franklin and A R Molozzi), 785
Measurement of the Effects of Piston Mass and Bursting Pressure on the Motion of a Piston in a Hypersonic Gun Tunnel (B J Belcher), 1207
Measurement of Grassland Productivity (Sixth Easter School in Agricultural Science at the University of Nottingham School of Agriculture), 154
Measurement of Inhibition by Azide in Biochemical Assay Systems involving Nitrite Estimation by Diazotization (Dr E J Hewitt and D G Hallas), 1485
Measurement of Intergranular Diffusion in a Silicate System—Iron in Forsterite (Prof John J Naughton and Yasuo Fujikawa) B A 54
Measurement of the Oxygen Isotopes Ratio in Fossil Calcareous Organisms Determination of the Temperatures of Ancient Seas by the (Y A Birstein) 1025
Measurement of the Rate of Growth of Wool using Cystine labelled with Sulphur-35 (A M Downes and A G Lyne), 1884
Measurement by Spectrofluorimetry Photolysis of Thionine in Rigid Medium—(Dr C A Parker and W T Rees), 1223
Measurement of the Thickness of the Helium Film (Prof L C Jackson), 954
Measurement of Values (Prof L L Thurstone), *review* by Prof Ll Wynn Jones 1010
Measurement (Accurate) An Image-Splitting Microscope for (J Dyson), 1561
Measurement (Film Thickness), by Beam Interferometry Substrate Damage in (Prof G David Scott), 354
Measurement (Productivity), in Great Britain (T E Easterfield), 592
Measurements of Temporal Adaptation to Spatial Detail Vision (A J Seyler and Z L Budrikis), 1215
Measurements (Micropulsation), in California and Alaska (W H Campbell and B Nebel), 628
Measurements (Absorbancy), on Liver and Kidney Cells (Localization and Assay of Respiratory Enzymes in Single Living Cells), (Dr Bo Thorell and Prof Britton Chance), 934
Measurements (Absorbancy), on the *Neberkern* (Localization and Assay of Respiratory Enzymes in Single Living Cells), (Dr Robert P Perry, Dr Bo Thorell, Dr Lennart Åkerman and Prof Britton Chance), 929
Measurements (Fluorescence), of Mitochondrial Pyridine Nucleotide in Aerobiosis and Anaerobiosis (Localization and Assay of Respiratory Enzymes in Single Living Cells), (Prof Britton Chance and Dr Bo Thorell), 931
Measurements (Radiation), to 658,000 km with *Pioneer IV* (Prof James A Van Allen and Louis A Frank), 219
Measurements (Some), of Background Gamma-Radiation in Leeds during 1955-59 (Prof F W Spiers), 1680
Measures of the Polarity of Benzene and Borazole Substituents Intermolecular Distances and Diamagnetic Anisotropy in Crystals as (Dame Kathleen Lonsdale), 1060
Measuring the Carbon Dioxide Output of Individual Insects The Infra-Red Gas Analyser as a Means of (Dr A G Hamilton) 367
Measuring Intracellular Activities of Sodium and Potassium Glass Micro-Electrodes for (Dr J A M Hinke), 1257
Measuring Kinetic Chain Lifetimes A Modified Rotating-Sector Method of (Dr W I Bengough, S A McIntosh and R A M Thomson) 266
Mechanical Engineers, American Society of Colloquium on Mechanical Impedance Methods for Mechanical Vibrations, 1958 (edited by R Plunkett), *review* by Prof R E D Bishop, 1764
Mechanical Engineers, Institution of Symposium on Biomechanics, 512
  Discussion on the Computer in Production, 1613
Mechanical Impedance Methods for Mechanical Vibrations—Colloquium presented at the Annual Meeting of the American Society of Mechanical Engineers, 1958 (edited by R Plunkett), *review* by Prof R E D Bishop, 1764
Mechanical Vibrations Mechanical Impedance Methods for—Colloquium presented at the Annual Meeting of the American Society of Mechanical Engineers, 1958 (edited by R Plunkett), *review* by Prof R E D Bishop, 1764
Mechanics Theoretical and Applied (Indian Society of Theoretical and Applied Mechanics Fifth Congress on) 1192
Mechanics (Theoretical), at Southampton, 590
Mechanics (Theoretical and Applied), Indian Society of Fifth Congress on Theoretical and Applied Mechanics, 1192
Mechanism Behavior of Enzyme Systems, an Analysis of Kinetics and (Dr John M Reiner), *review* by Dr J B Chappell, 388
  Sympathetic Postganglionic (Prof J H Burn and M J Rand), 163
Mechanism of Animal Joints—Sponge-hydrostatic and Weeping Bearings (Dr C W McCutchen), 1284 , Experimental Evidence for Weeping Lubrication in Mammalian Joints (P R Lewis and Dr C W McCutchen), 1285
Mechanism of the Antidiuretic Effect of Vasopressin (Dr Tsutomu Kashiwagi) 991
Mechanism of Anti-Knock (Dr A B Callear and Prof R G W Norrish), 1794
Mechanism of the Atherogenic Action of Excess Hydrocortisone (Dr Henry Grossfeld) 38
Mechanism of Atom Recombination (Prof G Porter and Dr J A Smith), 446
Mechanism of Autoregulation of Renal Blood Flow (Dr Allen M Scher) 1322
Mechanism of Electrode Reactions at the Mercury Electrode Influence of Platinum in Mercury on the (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus) 1795
Mechanism of Hormone Action (Prof Aaron B Lerner), 674
Mechanism of Immunological Unresponsiveness (Prof Charles F Crampton, Fred R Frankel and J L Rodeheaver) 873
Mechanism of Inactivation of Glucose-6-phosphate Dehydrogenase in Human Erythrocytes (Glucose-6-phosphate Dehydrogenase and Human Erythrocytes), (Dr Paul E Carson, Stanley L Schrier and Robert W Kellermeyer), 1292
Mechanism of Mutations A New Approach to the (Prof Paul Mandel and Pierre Chambon), 1501
Mechanism of Paraffin-Detergent Interactions in Aqueous Systems Solid State Rheological Study of the (F J Radd and L H Crowder), 443
Mechanism (Biochemical), of Lesion Formation in Virus-infected Plant Tissues (Dr F Solymosy, Dr G L Farkas and Dr Z Kiraly), 706

Mechanism (Feeding), of *Tilapia nigra* (Peter J Whitehead), 1509
Mechanism (A Heat-Loss), involving the Habenular, Interpeduncular and Dorsal Tegmental Nuclei (B G Cragg), 1724
Mechanism (Possible), of Cysteine Protection against Radiation Cataract (A Pirie and L G Lajtha), 1125
Mechanism (Sliding Filament Contractile), in Tonic Smooth Muscles of Lamellibranch Molluscs Evidence for a (Dr Jean Hanson and Dr J Lowy), 286
Mechanism (Strength Impairment), of Glass in Aqueous Systems (Frederick J Radd and Donald H Oertle), 976
Mechanisms of Resistance of Adult Houseflies to the Insecticide Dieldrin (F P W Winteringham and A Harrison), 608
Mechanisms (Atomic), of Fracture (United States National Academy of Sciences—National Research Council Conference on), 324
Mechanisms (Scatter), in Tropospheric Radio Propagation Inadequacy of (P C M de Belatini), 1558
Mechanisms (Sensory) Haemoglobin and, *review* by P A Merton, 1092
Mechanisms (Transfer), of Electronic Excitation (Prof Th Forster), 688
Mechanisms (Two Enzymic), for Hydrogen Transport by Phenolic Œstrogens (Dr H G Williams-Ashman, M Cassman and Margaret Klavins), 427
Mechsner, Kl (Welte, Prof E, and) Biological Action of Potassium-40 in Naturally Occurring Potash Salts, 1958
Medal for Research Work of benefit to Agriculture (Royal Agricultural Society of England), 1450
Medawar, Prof P B Elected an Honorary Member of the American Academy of Arts and Sciences, 410
  The Structure of Science, B A 8
  Awarded a Royal Medal for 1959 of the Royal Society, 1360, 1833, work of, 1833
Media (Biological) Ionized Calcium in (Prof J Ettori and Sybil M Scoggan), 1315
Media (Laboratory) Production of Fungal Arbuscular Organs on (G A Atkins), 1738
Media (Mass), of Communication and Scientific Developments, 659
Media (Porous) Sedimentation Rates Fluidization and Flow through (Colin C Harris), 716
Median Sky Wave Field Strength in Tropical Regions The Calculation of the (W R Piggott), 605
Medical Aspects of Complex Carbohydrates (Prof M Stacey), B A 42
Medical Association (British) The Life and Times of Sir Charles Hastings, Founder of the (Dr William H McMenemey), *review* by Dr W R Bett, 923
Medical Biology and Etruscan Origins Ciba Foundation Symposium on (edited by G E W Wolstenholme and Cecilia M O'Connor), *review* by Madeleine Smith, 1348
Medical Electronics (Electronics and Communications Section of the Institution of Electrical Engineers and the International Federation for Medical Electronics Third International Conference on), 1535
  Bibliography of (prepared by the Medical Electronics Center of the Rockefeller Institute), 1026
Medical Electronics, International Federation for (Electronics and Communications Section of the Institution of Electrical Engineers and the) Third International Conference on Medical Electronics, 1535
Medical History Egypt and Greece in, *review* by Dr Douglas Guthrie, 662
Medical Physics (Biological and) Advances in, Vol 6 (edited by Cornelius A Tobias and John H Lawrence), *review* by Dr N M Blackett, 1766
Medical Research Council Appointment of Sir Hugh Linstead as a member, B A 16
  Appointment of Prof A L Hodgkin and Prof R Milnes Walker as members, 772
  Appointment of Sir Hugh Linstead as House of Commons member, 772
  Grant not exceeding £1,100 to the University of Oxford, for scientific assistance in a study by X-Ray analytical methods of Insulin and related structures, 943, 1273
Medical Research Council (Agricultural Research Council, the), and the Development Commission on Biological (Mon-Medical) Problems of Nuclear Physics Appointment of Sir James Dendy Roberts as chairman of the Joint Committee of the 237
Medical Sciences, Vol 2 (edited by J C Bugher, J Coursaget and J F Loutit), (Progress in Nuclear Energy, Series 7), *review* by Dr N M Blackett, 1766
Medical Sciences, International Organizations of Abnormal Haemoglobins—a Symposium organized by the Council for (edited by J H P Jonxis and J F Delafresnaye), *review* by Dr J A M Ager, 840
Medical-Surgical Building (New), of the Ontario Veterinary College, 695
Medicina Experimentalis, Vol 1, No 1, 1025
Medicine—Mother of the Sciences (Canon Charles E Raven), 1448
Medicine Ancient Egyptian and Cnidian (Robert O Steuer and J B de C M Saunders), *review* by Dr Douglas Guthrie, 662
  Nuclear Energy and, *review* by Dr N M Blackett, 1766
Medina, Heitor, and Bacila, Metry Reversal by Acetylcholine of the Inhibition by Thyroxine of Oxidative Phosphorylation in Guinea Pig Heart Sarcosomes, 1066
Medium (Rigid) Photolysis of Thionine in—Measurement by Spectrofluorimetry (Dr C A Parker and W T Rees), 1223
Medium (Synthetic) *In vitro* Cultivation of Blood Cells of *Drosophila melanogaster* in a (Dr Masakatsu Horikawa and Dr Yukiaki Kuroda), 2017
Medium (Whistler) Telluric Origin of the (Dr Francis S Johnson), 1787
Medulla (Denervated Adrenal) Effects of Reserpine on Secretion from the (L Stjärne and S Schapiro), 2023
Medullary Secretion (Adrenal), of Catechol Amines Effects of 1,4-Dihydrazinophthalazine on Organ Content and (M Bygdeman and L Stjärne), 1646
Medway, Lord Echo-Location among *Collocalia*, 1352
Meek, J M Ionization Phenomena in Gases (Ionization Coefficients), 1354
Meetham, A R Thermodynamics (Physical Constants), 1608
Megakaryocytes (Pulmonary) A Possible Explanation of the Formation of Long Platelets from (Dr J George Sharnoff), B A 75
Megaw, Dr Helen D Ferroelectricity in Crystals, *review* by Dr L E Cross, 6
Megson, Dr N J L Promoted to Deputy Chief Scientific Officer and appointed director of materials, research and development (air) at the Ministry of Supply Headquarters, 232, work of, 232
Mehes, Ch, and others Effect of Sexual Maturation and Castration on the Sex Chromatin Pattern in the Male Rat, 1239
Mehridatta, R C Indications of Glacierization in the Siwalik System in India, 833
Mehrtens, D H (Zakrzewski, J T, and) Use of the Silicon Resistor in the d c Stabilization of Transistor Circuits, 811
Mehta, D R (Amin, A H, and) A Bronchodilator Alkaloid (Vasicinone) from *Adhatoda vasica* Nees, 1317
Meier, Dr Hans A Sex Difference in White Blood Cells of Rats (*WR* Strain), 1082
Meigh, Dr D F Nature of the Olefines produced by Apples, 1072
Meijer, W *Rafflesia arnoldi* in Sumatra, 506
Meikle, R D Handbook of the Rubi of Great Britain and Ireland, *review*, 489
  A Flora of the Arctic, *review*, 1347
Meinertzhagen, Colonel R Pirates and Predators, the Piratical and Predatory Habits of Birds, *review* by Sir Landsborough Thomson, 1435
Meinke, Prof W W (Fukai, R, and) Some Activation Analyses of Six Trace Elements in Marine Biological Ashes, 815
Meites, Prof Louis, and Thomas, Prof Henry C Advanced Analytical Chemistry, *review* by W I Stephen, 1525
Mejbaum-Katzenellenbogen, Dr W, and others Regeneration of Protein from Insoluble Protein-Tannin Compounds, 1799
Melanocyte-stimulating Hormone from the Human Pituitary Gland Structure of a (Dr J Ieuan Harris), 167
Melanoma (Cutaneous), in Killifish Hybrids Effect of Thiouracil and Thyroxine on Development and Growth of (Prof A Stolk), 562
Meldola Medal for 1960 (Royal Institute of Chemistry), 1192
Mele, A, and others Influence of Counterion Association on the Configurational Stability of Deoxyribonucleic Acid in Solution, 1482
Meleka, A H, and Dunn, G B Fatigue-Induced After-Effect in Zinc Single Crystals, 896
Melhuish, W H A Fractional Microsublimation Technique, 1933
Mellada, R, and others Peptides with Oxytocic and Pressor Activity obtained from Acidified Rat Serum, 1496
Mellander, Prof O, and others Action of Trypsin on α-Carbethoxy-L-lysyl-L-serylglycine and its O-Phosphorylated Analogue, 187
  O-Phosphorylated and Unphosphorylated Peptide-Substrates suitable for Tryptic Action, 270
Mellon Institute Annual Report for 1958-59, 1109
Mellor, Malcolm Creep Tests on Antarctic Glacier Ice, 717
Mellor Library of the British Ceramic Research Association opened by Frank West, 153
Meloidogyne incognita incognita, the Southern Root Knot Nematode A Virus Disease of (J R Loewenberg, T Sullivan and M L Schuster), 1896
Melon (Water), *Citrullus vulgaris* α-Amino-β-(pyrazolyl-N) Propionic Acid, a New Amino-Acid from (Dr F F Noe and Dr L Fowden), B A 69
Melting (Electron Bombardment Floating-zone), and Allied Electron Bombardment Techniques (Services Electronics Research Laboratory Symposium on), 690
Melting (Glass) The Development of Furnaces for (Dr W M Hampton), 772
Membrane (Human Erythrocyte) Active Transport of Uric Acid through the (Dr Kay Overgaard-Hansen and Dr Ulrik V Lassen), 553
Membrane Filters (Cellulose) Relation of Invasive Capacity to Passage of Lymphocytic Cells through (Dr Emma Shelton and Dr Mary E Rice), 479
Membranes (Cell), in the Anterior Pituitary Gland A Dense Laminar Structure found in Conjunction with (Barbara G Barnes), 651
Membranes (Plant Cell) Maintenance of Semipermeability of, in the Absence of Metabolic Energy Supply (Dr B Ginzburg), 1073
Men Age and the Working Lives of (F Le Gros Clark), 318
  Of Stars and (Dr Harlow Shapley), *review* by Dr W L Sumner, B A 3
Menaker, Prof Michael Endogenous Rhythms of Body Temperature in Hibernating Bats, 1251
Mendeleieff, D I Periodic Law (edited by B M Kedrov), Russian Text, *review* by Prof S I Tomkeieff, 1598
Mendelssohn, Dr K Turning Points in Physics (Probability enters Physics), *review* by G R Noakes, 1090
Menendez, Prof N Polar Front Survey (Hydrography—Temperature and Salinity Conditions along the meridian of Tarifa), 1182
Menon, Dr K P V, and Pandalai, Dr K M The Coconut Palm, *review* by Prof C W Wardlaw, 1760
Menschen und der Wirbeltiere Die gesunden und die erkrankten Zahngewebe des, im Polarisationsmikroscop (Prof W J Schmidt und Dr A Keil), *review* by Prof A I Darling, 218
Mental Health Problems in Old Age (World Health Organization of the United Nations, Technical Report Series No 171), 1844
Menzies, Robert J *Priapulus abyssorum*, New Species, the first Abyssal Priapulid, 1585
Mercer, Derwent M A Current Research on Noise, 414
  Recent Studies of Noise Problems (Physical Acoustics—Accurate Measurements of Aircraft Noise), 415
  New Techniques in the Analysis of Noise and Vibration (Planning Stages of an Analysis), 415
Mercier, R P Fluctuation Phenomena and Stochastic Processes (Theoretical Aspects of Radio-wave Fading), 511
Mercuric Chloride Reaction of, with Plasmalogen (Dr William T Norton), 1144
Mercuripapain Crystals The Unit Cell of (J Drenth and J N Jansonius), 1718
Mercury Influence of Platinum in, on the Mechanism of Electrode Reactions at the Mercury Electrode (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus), 1795
  Reactivation of Vaccinia Virus Inactivated by (Colin Kaplan), 1074
Mercury Electrode Influence of Gold in a, on certain Electrode Processes (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus), B A 56
  Influence of Platinum in Mercury on the Mechanism of Electrode Reactions at the (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus), 1795
Mercury Electrode (Dropping) Reduction of the $FeS_2O_3^+$ Ion at the (F M Page), 1481

Merino Wool Routine Methods for Determining Quality in (P L le Roux) 917
Meristem of Onion Roots Nuclear Deoxyribonucleic Acid Content and Endopolyploidy in the (D Srinivasachar), B A 80
Merlin, an Industrial Research Reactor (Dr T E Allibone), B A 11
  Inauguration of, by H R H the Duke of Edinburgh, 1191
Merriman, Dr A D A Dictionary of Metallurgy, *review* by Dr F C Thompson, 1765
Merton, P A Haemoglobin and Sensory Mechanisms, *review*, 1092
Meryman, Dr Harold T, and Kafig, Emanuel Survival of Spermatozoa following Drying, 470
Mes, the late Prof Margaretha G Influence of Temperature on the Symbiotic Nitrogen Fixation of Legumes, 2032
  Gibberellic Acid and the Chilling Requirements of Peach Seeds, 2034
  Influence of Gibberellic Acid and Photoperiod on the Growth, Flowering, Nodulation and Nitrogen Assimilation of *Vicia villosa*, 2035
Mesenchymal Tissue (Chick) Production of Serum Albumin and of Globulins by, and by HeLa Tumour Tissue in Culture (Y Abdel-Samie Prof E Broda, G Kellner and W Zischka), 361, *erratum*, 943
Meshkov, Prof S Nuclear Forces and the Few-Nucleon Problem (Preliminary Calculations concerning the Structure of ^{6}Li and ^{12}C), 1114
Meson (Tau-) Decay of a, Underground (A M Short), 893
Meta- and *Para*-Isomers of the Xylenes, Cresols and Toluidines by Gas Solid Chromatography Separation of the (M A Hughes, D White and Prof A L Roberts), 1796
Metabolic Activity of Deoxyribonucleic Acid in the Seminal Vesicle Influence of Sexual Stimulation on the (Dr S R Pelc), 1414
Metabolic Changes induced in Mammalian Erythrocytes by Whole-Body X-Irradiation (Prof D A Rappoport and B W Sewell), 846
Metabolic Energy Supply Maintenance of Semipermeability of Plant Cell Membranes in the Absence of (Dr B Ginzburg), 1073
Metabolic Research (Clinical) Enzymic Activities of Human Skeletal Muscle Mitochondria—a Tool in (Dr L Ernster, Dr D Ikkos and Dr R Luft), 1851
Metabolic and Chemical Studies of 'Myleran'—Formation of 3-Hydroxytetrahydrothiophene-1,1-dioxide *in vivo*, and Reactions with Thiols *in vitro* (Dr J J Roberts and Dr G P Warwick), 1288
Metabolism Importance of the Type of, for the Radiosensitivity of Mice (Dr M Pospisil and Dr L Novak), 1814
  Pentose Phosphate (Dr D P Burma), 1368
Metabolism of Cinnamic Acid and Hydroxy-Cinnamic Acids by *Lactobacillus pastorianus* var *quinicus* (Dr G C Whiting and Dr J G Carr), 1427
Metabolism in the Rumen (E F Annison and D Lewis), *review* by Dr D P Cuthbertson, 839
Metabolism (Adrenaline) Activation and Inhibition of (Dr Julius Axelrod and Dr Robert Tomchick), 2027
Metabolism (Carbohydrate), in the Experimental Galactose Cataract (Dr Sidney Lerman), 1406
Metabolism (Carbohydrate), in Hypervitaminosis A (Amal Ray and Prof D P Sadhu), 1323
Metabolism (Endogenous), of a Respiratory-deficient Brewer's Yeast Effect of Oxygen on (V E Chester), 1956
Metabolism (Ethanol) Relation of, to Several Factors in the Rat (Dr F W Kinard, J C Aull, jun, and R E Ulmer), 1721
Metabolism (Extrahepatic), of Ethanol in Man (Dr J A Larsen), 1236
Metabolism (Normal), of Strontium-90 in Rats Attempts to Modify the (Dr V Volf), 1401
Metabolism (Serotonin) A New Inhibitor of (Dr Alfred R Maass and Mary Jane Nimmo), 547
Metabolism (Steroid), In Different Tissues and Subcellular Fractions Distribution of Enzyme Systems responsible for (Virandra B Mahesh and Frank Ulrich), 1147
Metabolism (Thiosulphate), in the Animal Organism (Prof Boleslaw Skarzynski, Tadeusz W Szczepkowski and Miroslawa Weber), 994
Metabolite (Possible Intermediate), of Benzene Hexachloride in Houseflies Pentachlorocyclohexene as a (R G Bridges), 1337
Metabolites Monovalent Cations and the Incorporation of, by Isolated Thymus Nuclei (Dr Theodore R Breitman and Dr George C Webster), 637
Metabolizing (Drug-) Enzymes Stimulatory Effect of Foreign Compounds on Ascorbic Acid Biosynthesis and on (Dr A H Conney and Dr J J Burns), 363
Metal Complexes of Oxine and its Sulphonic Acid Stability of (Prof Adrien Albert and Prof Reino Nasanen), 449
Metal Fatigue (edited by Dr J A Pope), *review* by Dr K M Entwistle, 1438
Metal Ion Indicator Determination of the Interaction of Deoxyribonucleate and Magnesium Ions by means of a (Joseph Shack and Barbara S Bynum), 635
Metal Ions Fungitoxicity of (Dr E Somers), 475
Metal Surfaces (Polished) The Nature of (L E Samuels), 1280
Metallic Liquids A Structural Model for Monatomic Liquids including (Dr Kazuo Furukawa), 1209
Metallogenic Maps (Prof S I Tomkeieff), 1693
Metallurgical Society of the American Institute of Mining, Metallurgical and Petroleum Engineers New series of books entitled Metallurgical Society Conferences, 1362
Metallurgical Thermochemistry (Dr O Kubaschewski and E Ll Evans), *review* by Dr F C Thompson, 1765
Metallurgical and Petroleum Engineers (Mining,) American Institute of (Metallurgical Society of the) New series of books entitled Metallurgical Society Conferences, 1362
Métallurgie, Société Française de Journées Métallurgiques d'Automne (Les Gaz dans les Métaux), 95
Métallurgie, Société Française de (Non-Destructive Testing Group of the Institute of Physics and the) Discussion on the Relationship between Structure and Physical Properties of Materials, 1688
Metallurgists, Institution of Presidential Address, The Education of Technologists (Prof A J Murphy), 514
Metallurgy Advancements in *review* by Dr F C Thompson, 1765
  A Dictionary of (Dr A D Merriman), *review* by Dr F C Thompson, 1765
  Vacuum—Lectures presented during the Course sponsored by the Department of Metallurgical Engineering in co-operation with the Office of Special Service to Business and Industry, New York University, 1957, *review* by Dr F C Thompson, 1765
Metallurgy of Magnesium, *review* by Dr J W Martin, 486
Metallurgy (The Physical), of Magnesium and its Alloys (Prof G V Raynor), *review* by Dr J W Martin, 486
Metals Spectrographically Pure (Prof W Hume-Rothery), 1794
  A Theory of the Abrasion of Solids such as (J Goddard, H J Harker and H Wilman), 333
Metals' 'Joining of (Third Conference at the University of Birmingham—The Electric Arc in Welding), 1030
Metals, Institute of Election of Officers, 1688
  Monograph and Report Series No 23, Vacancies and other Point Defects in Metals and Alloys—a Symposium held at the Atomic Energy Research Establishment, 1957, *review* by Dr F C Thompson, 1765
Metals (Coinage), Cu, Ag, Au Electron Spin Resonance and Divalency of some Dithiocarbamates of the (Tore Vanngard and Stig Åkerstrom), 183
Metals (Rare Earth) Production of all the (Johnson, Matthey and Co, Ltd), 683
Metals (Trace), in Cheese Fat Oxidation and (Tallowy Discoloration in Cheddar Cheese), (F Bishop), 1295
Metals and Alloys A Handbook of Lattice Spacings and Structures of (Dr W B Pearson), *review* by Dr J A Catterall, 841
  Martensitic Transformations in (Academician G V Kurdjumov), 1450
  Vacancies and other Point Defects in—a Symposium organized by the Institute of Metals, 1957 (Monograph and Report Series, No 23), *review* by Dr F C Thompson, 1765
Metanephros (Foetal), and Foetal Liver Relative Rates of Exchange of Potassium-42 by the (Dr J G Bearn and Dr F T C Harris), 1959
Metastases (Rous I Sarcoma) Inhibition of, by a Copper-Catalyst Blocking Agent (Dr B M Jones), 1963
Métaux Les Gaz dans les (Société Française de Métallurgie Journées Métallurgiques d'Automne), 95
Metcalf, W G (Worthington, L V, and) Polar Front Survey (Hydrography—Salinity/Potential Temperature Relationship in the North Atlantic Deep Water), 1182
Metcalfe, R L (edited by) Advances in Pest Control Research, Vol 2, *review* by F C Bawden, 1258
Meteorite ? A Fossil (A I Shulzhenko) 1026
Meteorite 'Carbo' (Iron) Calculation of a 'Cosmic Ray Age' for the (Dr Royal R Marshall), 117
Meteorological Data, 942
Meteorological Office (Air Ministry) Geophysical Memoirs No 100, World Distribution of Atmospheric Water Vapour Pressure (G A Tunnell), B A 15
Meteorological Organization, World Technical Note No 25, Design of Hydrological Networks (Max A Kohler), Technical Note No 26, Techniques for Surveying Surface-Water Resources (Prof Ray K Linsley), 96, *erratum*, 684
  Technical Note No 27, Use of Ground-Based Radar in Meteorology (excluding Upper-Wind Measurements), 942
Meteorological Society, Royal Election of Officers for 1959-60, 1108
Meteorology Use of Ground-Based Radar in (excluding Upper-Wind Measurements), (World Meteorological Organization, Technical Note No 27), 942
Meteorology (Equatorial) Value of Contour Analysis in (D H Johnson and Dr H T Morth), 1372
Methacrylate (γ-Irradiated Polymethyl), and Polymethacrylic Acid Electron Paramagnetic Resonance at 4 2° K of (Dr Derick W Ovenall), 181
Methaemoglobin Reduction through Cytochrome B_5 (Nicola Petragnani, Otilia C Nogueira and Isaias Raw), 1651
Methane Sulphonate (Ethyl) Mutation of Bacteria at High Levels of Survival by (Anthony Loveless and Sheila Howarth), 1780
Methanol Effect of Gamma-Radiation on the Synthesis of, over Zinc Oxide (T I Barry and R Roberts), 1061
Method Clinical Biochemical (Dr A L Tarnoky), *review* by Dr D S H W Nicol, 576
Method enabling Animals to survive Freezing at an Extremely Low Temperature Prefreezing as a (Eizo Asahina), 1003
Method for Determining Carbon-14 by Combustion using Calcium Carbonate (E C S Little), 900
Method for Distinguishing Bovine Type Tubercle Bacilli from other *Mycobacteria* Nicotinamidase in *Mycobacteria*—a (Dr Kiyoshi Konno, Dr Hideo Nagayama and Dr Sutemi Oka), 1743
Method for Distinguishing between α- and β-Glycosides by the use of Plant Haemagglutinins (Lectins), (Dr O Makela), 111
Method of Increasing the Phosphorus Content of Forages (Prof R Ferrando, S Metivier and R Gervy), 76
Method for *in vitro* Investigation of the Colloid-storing Function of Histiocytes (Prof N Jancso, Aurelia Jancso-Gabor and J Balassy), 1070
Method for Purification of Protein-bound Peptides as exemplified by Oxytocin and Vasopressin Gel Filtration as a (E B Lindner, Dr A Elmqvist and Dr J Porath), 1565
Method for the Quantitative Study of the Surface Precipitation Reaction (Francis T Ashton), 1735
Method (Calorimetric) Ultrasonic Absorption in Acetic Acid at 450 kc /s by the (S Parathasarathy and V N Bindal), 631
Method (Capacitance), for following Vinyl Polymerizations Initiated by γ-Rays (G J K Acres and F L Dalton), 335
Method (Micro-), for the Polarographic Determination of Serine (J Ladik and Dr I Szekacs), 188
Method (Modified Rotating-Sector), of Measuring Kinetic Chain Lifetimes (Dr W I Bengough, S A McIntosh and R A M Thomson), 266
Method (New), for Studying the Functioning of the Lungs (Helge Colldahl, T Alvager and J Uhler), 372
Method (New), for Working up Processing Mixtures containing Anhydrous Aluminium Chloride (Dr T Széll and A Furka), 117, *erratum*, 595
Method (New Two-Dimensional Paper Chromatographic), applied to the Separation of Amino-Acids (C S Knight), 1486
Method (Paper-Chromatographic), for the Determination of Suitable Buffer Systems for Countercurrent Distribution (Andrzej Waksmundzki and Edward Soczewinski), 977
Method (Powder), in X-Ray Crystallography (Prof Leonid V Azaroff and Prof Martin J Buerger) *review* by Prof H Lipson, 1599

Method (Quick), for Extracting Plant Embryos from certain Types of Seed (M D Gwynne), 1588
Method (Rapid), for Studying Tumour Blood Supply using Systemic Dyes (Dr R J Goldacre and Dr B Sylvén), 63
Method (Rapid and Sensitive), for the Determination of Xanthine Oxidase Activity using the Oxygen Electrode (Metry Bacila and Dr Gilberto G Villela), 1394
Method (Scientific) The Discipline of the, 295
Method (Simplified), for the Culture of *Blatella germanica* under Aseptic Conditions (R B Clayton), 1166
Method (Soil Block Test), for Timber Limitations Imposed by some Water-borne Preservatives on the (A J McQuire), 1430
Method (Specific and Sensitive Assay), for Vasopressin and Oxytocin using Glass-Paper Chromatography (Akira Arimura and Prof Joseph F Dingman), 1874
Methods Micro- and Semi-microchemical (Norwood Technical College Course of lectures and practical work on), 1845
  Statistical, *review* by W J Langford, 1523
  X-Ray Powder, *review* by Prof H Lipson, 1599
Methods of Oceanography Apparatus and (Dr H Barnes), Part I, Chemical, *review* by F A J Armstrong, 299
Methods of the Sciences Origins and, *review* by Prof A V Hill, 4
  Studies in the History and (Prof Arthur David Ritchie), *review* by Prof A V Hill, 4
Methods (Chromatographic) Separation of Polyvinyl Chloride and Polyvinyl Acetate by (W J Langford and D J Vaughan), 116
Methods (Colorimetric), of Analysis, including Photometric Methods (Dr Foster Dee Snell and Dr Cornelia T Snell, assisted by Dr Chester Arthur Snell), Vol 2A, *review* by J King, 1522
Methods (Immunological) Assay of Plasma Insulin in Human Subjects by (Dr Rosalyn S Yalow and Dr Solomon A Berson), 1648
Methods (Mathematical), of Operations Research (Thomas L Saaty), *review* by Prof L S Goddard, 1763
Methods (Mechanical Impedance), for Mechanical Vibrations—Colloquium presented at the Annual Meeting of the American Society of Mechanical Engineers, 1958 (edited by R Plunkett), *review* by Prof R E D Bishop, 1764
Methods (Photometric) Colorimetric Methods of Analysis, including (Dr Foster Dee Snell and Dr Cornelia T Snell, assisted by Dr Chester Arthur Snell), Vol 2A, *review* by J King, 1522
Methods (Radiofrequency) Molecular and Atomic Motions in Liquids and Solids by (Colloque AMPERE and the Radiofrequency Spectroscopy Group Joint Discussion on), 157
Methods (Routine), for Determining Quality in Merino Wool (P L le Roux), 917
Methods and Techniques . Blood Group, *review* by Dr R A Zeitlin, 130
Methoxamine Radioprotective Action of (A D Smith, Dr M J Ashwood-Smith and Doreen Lowman), 1729
Methoxides (Volatile), of Aluminium and Zirconium (Dr D C Bradley and Dr M M Faktor), 55
7-Methoxy-8-Aminomethylchromones and Flavones (N-Substituted)—New Brain-Stem Stimulants (P Da Re, B Verlicchi, Dr I Setnikar, W Murmann and M J Magistretti), 362
6-Methoxybenzoxazolinone (Antifungal Substance) Isolation of the, from Field Corn (*Zea mays* L) in Canada (N J Whitney and C G Mortimore), 1320
Methuen, Lord The Country House and the Museum, 598
Methyl 2-Acetamido-2-Deoxy-α-D-Glucopyranoside *N*-Methylation of (Dr S A Barker, Prof M Stacey and Dr D J Tipper), 1718
N-Methyl Carbon of Monoethylaminoazobenzene Incorporation of, into Polar Dyes (Prof Hiroshi Terayama, Prof Morizo Ishidate and Akira Hanaki), 1460
Methyl Esters (Long-chain Fatty Acid) Gas Chromatographic Separation of, on Polyvinyl Acetate (Irwin Hornstein, L E Elliott and P F Crowe), 1710
O-Methyl Ethers (Isomeric), of Ethyl di-(4-hydroxycoumarinyl-3)-Acetate (the Anti-coagulant Drug Pelentane or Thromexane), (Dr Eduard Knobloch), 1568
4-0-Methyl Glucoronic Acid in *Rhizobium* Gums Occurrence of (Beverley A Humphrey), 1802
Methyl Linoleate Hydroperoxide (*trans-trans*) Preparation of Crystalline (A Banks, S Fazakerley, J N Keay and J G M Smith), 816
N-Methylation of Methyl 2-Acetamido-2-Deoxy-α-D-Glucopyranoside (Dr S A Barker, Prof M Stacey and Dr D J Tipper), 1718
24-Methylene-cholesterol Isolation of, from Honey Bees (*Apis mellifica* L), (Dr M Barbier, Prof T Reichstein, Dr O Schindler and Prof E Lederer), 732
ε-N-Methyl-lysine in Bacterial Flagellar Protein (R P Ambler and M W Rees), 56
Methylthiouracil or Thyroidectomy Effects of, on Activation of Pituitary Acid Phosphatases *in vitro* by Whole Hypothalamic Extract (Dr V Schreiber and Dr V Kmentova), 728
Metivier, S , and others A Method of Increasing the Phosphorus Content of Forages, 76
Metropolitan-Vickers Electrical Co , Ltd Nuclear-Metals Laboratory, 234

Muscle (Rat Diaphragm) Monosaccharide Transport in (F C Battaglia and P J Randle), 1713
Muscle (Red Lateral), of Rainbow Trout Changes in Purine Nucleotides of (Tsuneyuki Saito, Ken-ichi Arai and Toshikatsu Yajima), 1415
Muscle (Striated) A Peripheral Effect of the Bromide Ion on the Contraction of (Dr D K de Jongh and H A Linnewiel), 1240
Muscle Cells of *Ascaris lumbricoides* Electrical Activity in the (Dr M Jarman), 1244
Muscle Contraction Permanent Set, Supercontraction and Urea-Bisulphite Solubility—the Proton-Transfer Nature of some Changes in Keratin and the Analogy with (Dr P T Speakman), 339
Muscle Fibres (Atrophic) Dissociation of the 'Surface Membrane Complex' in (Dr R Birks, Prof B Katz and Dr R Miledi), 1507
Muscle Fibres (Glycerol-extracted) Oxygen Uptake of (James A Wilson, Paul R Elliott, Prof Karl F Guthe and David G Shappirio), 1947
Muscle Mitochondria (Human Skeletal) Enzymic Activities of—a Tool in Clinical Metabolic Research (Dr L Ernster, Dr D Ikkos and Dr R Luft), 1851
Muscle Tissues Determination of Chlorine in, by Neutron Activation Analysis (Dr Jonas Bergstrom), 1504
Muscle and Nerve in Sodium-free Hydrazinium Solution Excitability and Phosphorylation of (L G Abood and K Koketsu), 725
Muscles (Isolated Plain) Promoting Effect of Urea on the *in vitro* Passive Sensitization of with Precipitating Antibody (R Binaghi, Dr B N Halpern, P Liacopoulos and T Neveu), 1805
Muscles (Tonic Smooth), of Lamellibranch Molluscs Evidence for a Sliding Filament Contractile Mechanism in (Dr Jean Hanson and Dr J Lowy), 286
Muscular Response Effects of Irradiation of Nerve on (A Portela, D Brandes, Prof G H Bourne, Marion Hines, P Stewart and B L Redd, jun), 734
Muscular Responses (Reflex) Does an Increase in the Tension in a Ligament elicit (Dr Bertil Stener), 1495
Museum The Country House and the (Museums Association Discussion on), 598
Museum of Applied Science, Victoria Report for 1957-58, 941
Museum of English Rural Life Report for 1958, 505
Museum of Science and Industry (Birmingham) Account of the Workshops reconstructed in the (Keith Dunham), 1534
Museum National d'Histoire Naturelle, Paris Celebration of the anniversaries of the 'Precurseurs et Fondateurs de l'Evolutionnisme—Buffon, Lamarck, Darwin', 859
Museum (Australian) Annual Report for 1957-58, 592
Museum (National), of Canada Bulletin No 139, Haida Carvers in Argillite (Prof Marius Barbeau), 409
  Bulletin 159 (Biological Series 57), Mammals of Banff National Park, Alberta (A W Banfield), 594
Museums (Bristol City) Retirement of Dr F S Wallis from the directorship, 1685
  Appointment of Alan Warhurst as director, 1686
Museums (Liverpool Public) Exhibition of Working Models of Marine Engines, 1534
Museums of Applied Arts and Sciences, Sydney Annual Report for 1957, 681
Museums as Mirrors—their Potentialities and Limitations (International Council of Museums Conference on), 504
Museums, International Council of Fifth General Conference (Museums as Mirrors—their Potentialities and Limitations), 504
  Inauguration of an International Centre for the Study of the Preservation and Restoration of Cultural Property, 504
Museums Association Sixty-fifth Annual Conference, 597
  Presidential Address (Dr W E Swinton), 597
  Discussion on Museums and Finance, 598
  Discussion on the Country House and the Museum, 598
  Re-election of Dr W E Swinton as president, 598
Museums and Finance (Museums Association Discussion on), 598
Music Experimental—Composition with an Electronic Computer (Prof L A Hiller, Jr, and Leonard M Isaacson), *review* by Prof E G Richardson, 1754
Music and Electronic Computers, *review* by Prof E G Richardson, 1754
Musicale Acoustique (Colloques Internationaux du Centre National de la Recherche Scientifique, No 84, Marseilles, 1959), *review* by Prof E G Richardson, 1902

Mutant (Nutritionally Deficient), of Pathogenic *Fusarium oxysporum* after Ultra-violet Irradiation Production of a Perfect Stage in a (E W Buxton), 1258
Mutants with Respiration-deficiency in *Staphylococci* Rate of Appearance of (G F Gause, G V Kochetkova and N A Sorbaeva), 1821
Mutants (Galactose-sensitive), of *Salmonella* (Toshio Fujasawa and Hiroshi Nikaido), 1168
Mutants (Sub-Genic), in the *r*-Locus of *Drosophila melanogaster* Complementation among the (Dr O G Fahmy and Dr Myrtle J Fahmy), 1927
Mutation of Bacteria at High Levels of Survival by Ethyl Methane Sulphonate (Anthony Loveless and Sheila Howarth), 1780
Mutation in the Type-determining Phages of *Salmonella typhi* (E S Anderson), 1822
Mutation (Gene) Human Haemoglobin *E*—the Chemical Effect of (Abnormal Human Haemoglobins), (Dr J A Hunt and Dr V M Ingram), 870
Mutation (A 'Progressive'), induced in *Poa pratensis* L by Ionizing Radiation (A A Hanson and F V Juska), 1000
Mutations A New Approach to the Mechanism of (Prof Paul Mandel and Pierre Chambon), 1501
Mutations (Induced), of X-Ray Irradiations in *Culex fatigans* Wied (1828), (R Pal and B S Krishnamurthy), 658
Mutch, R E, and Raal, Dr F A Electrical Resistivity Changes observed in a Semiconducting Diamond after Heat Treatment, 1857
Mutchmor, J A, and Mazurek, J H Chemical Changes associated with Diapause in the European Corn Borer, *Ostrinia nubilalis* (Hbn) (Lepidoptera Pyralidae), 1077
Mutual Solubility Data Estimation of the Interchange Energy for Binary Systems from (Kiyoharu Ishida) 814
Myasthenia Gravis Ultra-structure of the Myoneural Junction in (E R Bickerstaff, J V Evans and A L Woolf), 1500
Myatt, J, and others Ionization Phenomena in Gases (Influence of Gas Purity, Tube Geometry and Method of Calculation on the Determination of Ionization Coefficients in Hydrogen and the Inert Gases), 1354
Mycobacteria Nicotinamidase in—a Method for Distinguishing Bovine Type Tubercle Bacilli from other *Mycobacteria* (Dr Kiyoshi Konno, Dr Hideo Nagayama and Dr Sutemi Oka), 1743
Mycobacterium smegmatis Effect of Iron and Zinc on Nucleic Acid and Protein Synthesis in (Frank Winder and Joan M Denneny), 742
Mycobacterium tuberculosis $H_{37}Rv$ Effect of Cell-Free Extracts of, on Lung Succinooxidase (Dr A Bekierkunst and M Artman), 458
'Myleran' Metabolic and Chemical Studies of—Formation of 3-Hydroxytetrahydrothiophene-1,1-dioxide *in vivo*, and Reactions with Thiols *in vitro* (Dr J J Roberts and Dr G P Warwick), 1288
Myoglobin Binding of Haem to Protein in Haemoglobin and (Dr J E Falk, Dr J N Phillips and Dr D D Perrin), 1651 , (Dr J E O'Hagan), 1652
Myoneural Junction in Myasthenia Gravis Ultra-structure of the (E R Bickerstaff, J V Evans and A L Woolf), 1500
Myrbäck, Karl, and others (edited by) The Enzymes, Vol I, Kinetics, Thermodynamics, Mechanism, Basic Properties, second edition, *review* by Dr Edwin C Webb, 1759
Myth and Ritual in the Ancient Near East (Prof E O James), *review* by Prof Norman W Porteous, 1972
Myxoma Transformations of, into Vaccinia or Ectromelia Virus in Tissue Culture (Hidesaburô Hanafusa, Teruko Hanafusa and Juntarô Kamahora), 1152
Myxomatosis—Present Position and Future Prospects in Great Britain (Dr C H Andrewes, H V Thompson and W Mansi), 1179
Myxovirus Preparations Failure to Recover Infective 'Ribonucleic Acid' from (G L Ada, Patricia E Lind, Lois Larkin and Sir Macfarlane Burnet), 360
Mzalik, C P (Tandon, Dr S L, and) Intraspecific Polyploidy and Evolution of Diverse Morphological Forms in *Convolvulus pluricaulis* Chois , 481

NACHINGWEA Districts (Kongwa and), of Tanganyika A Survey of Soils in the (B Anderson), *review* by Dr R M S Perrin, 1901
Nadeau, Dr Guy (Joly, Dr Louis-P, and) Evidence of Side-Chain Cleavage during the Reaction of Epinephrine and Norepinephrine with Ethylene Diamine, 1483
Nadi-Positive Mitochondria, (*Gamma* Particles), and Development in the Water Fungi *Blastocladiella* and *Allomyces* (Prof Edward C Cantino and Gilbert Turian), 1889
Naets, Dr Jean-Pierre Disappearance of the Erythropoietic Factor from Plasma of Anaemic Dogs after Nephrectomy, 371
Näf, Dr Ulrich Control of Antheridium Formation in the Fern Species *Anemia phyllitides*, 798
Nagabhushanam, A K Feeding of a Ctenophore, *Bolinopsis infundibulum* (O F Muller), 829
Nagabhushanam, A K, and Colman, J S Carrion-Eating by Ophiuroids, 285
Nagata, T, and Shimizu, Y Natural Remanent Magnetization of Pre-Cambrian Gneiss of Ongul Islands in the Antarctic, 1472
Nagata, T, and Uyeda, S Exchange Interaction as a Cause of Reverse Thermo-Remanent Magnetism, 890
Nagatsu, Dr Ikuko, and others Effect of Flavins on Cramp caused by Phenol, 1648
Nagatsu, Dr Toshiharu (Yagi, Dr Kunio, and) Formation of Noradrenaline from Adrenaline by Rat Liver Mitochondria, 1316
Nagatsu, Dr Toshiharu, and others Complex Formation of Chlorpromazine with Flavins, 982
Nagayama, Dr Hideo, and others Nicotinamidase in *Mycobacteria*—a Method for Distinguishing Bovine Type Tubercle Bacilli from other *Mycobacteria*, 1743
Naka, K (Kuwabara, M, and) Response of a Single Retinula Cell to Polarized Light, 455
Nakahara, Hiroshi, and others Inhibition of Skeletal Formation in the Chick Embryo following Administration of Tetracycline, 728
Nakahara, Tomoko (Amaha, Prof Mikio, and) Rôle of the Glycolytic Enzyme System in the Germination of Spores of *Bacillus coagulans* var *thermoacidurans*, 1255
Nakahira, M Clay Minerals (Thermal Changes in Kaolinite), 780
Nakamura, Prof S, and others Proof of the Formation of Enzyme-Substrate Complex by 'Crossing-Paper Electrophoresis', 638
Nakayama, T O M (Friend, J, and) Destruction of Carotenoids in Isolated Chloroplasts, B A 66
Naked Protoplasts of Yeasts Nuclear Structure of Growing (Dr O Necas), 1664
Nakkash, Sanniyah (Keehn, Prof J D, and) Effect of a Signal Contingent upon an Avoidance Response, 566
Nalivkin, Academician D V Elected to foreign membership of the Geological Society of London, 1360
Nanda, J N Depth of Isostatic Compensation and Mohorovičic Discontinuity, etc , in Continental and Oceanic Areas, 629
Nanney, D L Cytoplasmic Inheritance (Mating Types in Protozoa), 1012
α-Naphthalene Acetic Acid Effect of Indole Acetic Acid and, on the Growth, Flowering and Fruit Set in Sweet Potato (G Satyanarayana and Dr G Rangaswami), B A 73
Napier, D H, and others Studies of Coal—Carbonization of Coals in the Presence of Activated Charcoal, 425
Narasimhan, K S, and others Insecticidal Effects of Activated Charcoal and Clays, 1165
Narrow-Band Spectrum Analyser Observations of the Fine Structure of Enhanced Solar Radio Radiation with a (Oystein Elgaroy), 887
Narrow Tubes The Flow of Blood through (Prof M Reiner and Dr G W Scott Blair), 354
Narurkar, M V, and others Inhibition of Tumour Growth with 2- 5-Dicarbethoxy-3 4-Dihydroxy-Thiophene, 201
Nasal Gland (Salt Gland) Captive Marine Birds possessing a Functional Lateral (Prof Larry Z McFarland), 2030
Nasanen, Prof Reino (Albert, Prof Adrien, and) Stability of Metal Complexes of Oxine and its Sulphonic Acid, 449
Nath, Prof M C, and others Chromatographic Identification of the Antilipaemic X Factor of the Unsaponifiable Fraction of Crude Vegetable Oils, 1635
National Academy of Sciences (United States) Election of foreign associates, 95
National Academy of Sciences (United States)—National Research Council Conference on the Atomic Mechanisms of Fracture, 324
  Report for 1957-58, 697
  Developmental Biology Conference Series, 1956—Cytodifferentiation (edited by Dorothea Rudnick) , Environmental Influences on Prenatal Development (edited by Beatrice Mintz) , Regeneration in Vertebrates (edited by Charles S Thornton) , Embryonic Nutrition (edited by Dorothea Rudnick) , Immunology and Development (edited by M V Edds, Jr) , Dynamics of Proliferating Tissues (edited by Dorothy Price) , Wound Healing and Tissue Repair (edited by W Bradford Patterson), *review* by Dr D R Newth 839
  Grants-in-aid for Research in Problems of Sex, 1107
National Academy of Sciences (United States)–National Research Council (Committee on Fire Research and the Fire Research Conference of the Division of Engineering and Industrial Research) Symposium on the Use of Models in Fire Research 772
National Academy of Sciences (United States), and the Academy of Sciences of the U S S R Exchange visits by research scientists of each country, 680
National Bureau of Standards (United States) *Journal of Research* to be published in four separate Sections, 320
  Handbook 69, Maximum Permissible Body Burdens and Maximum Permissible Concentrations of Radionuclides in Air and in Water for Occupational Exposure, 939
National Chemical Laboratory Retirement of Dr D D Pratt from the directorship, 1610
  Appointment of Prof J S Anderson as director, 1610
  Report for 1958, 1779
National Coal Board Grant of £4,310 to the University of Leeds, for six research projects in mining, 1534
  Grant of £1,150 to the Department of Physical and Inorganic Chemistry in the University of Bristol, for a study of carbon sufaces and surface complexes by infra-red spectroscopy, and £1,100 for a study of reactivity of carbon surfaces with oxygen, 1613
National Coal Board (North-Eastern Division) Grant of £3,000 to the University of Leeds, for research in mining, 1108
National Collection of Industrial Bacteria Transferred from the National Chemical Laboratory to the Torry Research Station, 1192
National Committee for Geodesy and Geophysics Appointment of J Connor as chairman, 1192
National Health Service Hospitals and the State—Hospital Organization and Administration under the, Sixth and Final Research Report (Creative Leadership in a State Service—a General Survey by Sir George Schuster), 1087, 1201
National Industrial Conference Board, Inc , Cleveland Seventh Annual Conference on Atomic Energy in Industry (Radiation, a Tool for Industry), 506
National Institute of Adult Education After Work—Leisure and Learning in Two Towns (R Ruddock and Dr A Wilson), 1034
National Institute of Agricultural Botany Leaflets on Fodder Beet, Mangels and Swedes, 1777
National Institute of Economic and Social Research The Structure of British Industry, a Symposium (edited by Duncan Burn), *review* by Prof A J Brown, 1089
National Institute of Industrial Psychology Grant of £6,000 a year for five years from the Department of Scientific and Industrial Research, 940
  Vernon Prize for 1960, 1450
National Institute for Research in Dairying Annual Report for 1958, 770
  Grant of 89,348 dollars from the Population Council, Inc , New York, in support of researches on cervical mucus, with particular reference to the control of fertility, 1362
National Institute for Research in Nuclear Science Contracts for work on the 7,000-MeV Proton Synchrotron *Nimrod*, B A 14
National Institutes of Health (United States) Ninth Annual Instrument Symposium and Research Equipment Exhibit, 26
  Grant of 1,482,480 dollars to the University of Texas, for basic research in genetics and cell biology, 1108
National Institutes of Health (United States) (Endocrinology Study Section) Free distribution of Pituitary Hormones, 1272

National Joint Advisory Council Report of an Inquiry into the Efficient Use of Man-power in Industry (Ministry of Labour and National Service), 25
National Lending Library for Science and Technology Appointment of a Consultative Committee, 1449
National Museum of Canada Bulletin No 139, Haida Carvers in Argillite (Prof Marius Barbeau), 409
  Bulletin 159 (Biological Series 57), Mammals of Banff National Park, Alberta (A W Banfield), 594
National Park (Banff), Alberta Mammals of (A W Banfield), 594
National Parks and Nuclear Power Stations in Britain, 1005
National Physical Laboratory Open Days, 773
  New Ship Hydrodynamics Laboratory at Feltham, 926
  Report for 1958, 954
  Appointment of Dr G Macfarlane as deputy director, 1844
National Radio Astronomy Observatory (United States) Appointment of Prof Otto Struve as first director, B A 14
National Research Council (United States National Academy of Sciences—) Conference on the Atomic Mechanisms of Fracture, 324
  Report for 1957-58, 697
  Developmental Biology Conference Series, 1956—Cytodifferentiation (edited by Dorothea Rudnick), Environmental Influences on Prenatal Development (edited by Beatrice Mintz), Regeneration in Vertebrates (edited by Charles S Thornton), Embryonic Nutrition (edited by Dorothea Rudnick), Immunology and Development (edited by M V Edds, Jr), Dynamics of Proliferating Tissues (edited by Dorothy Price), Wound Healing and Tissue Repair (edited by W Bradford Patterson), *review* by Dr D R Newth, 839
  Grants-in-aid for Research in Problems of Sex, 1107
National Research Council (United States) (Committee on Fire Research and the Fire Research Conference of the Division of Engineering and Industrial Research of the United States National Academy of Sciences—) Symposium on the Use of Models in Fire Research, 772
National Research Council of Canada Formation of an Associate Committee on Space Research, jointly with the Defence Research Board, 24
  Scholarships for 1959-60, 26
  Forty-second Annual Report (1958-59), including the Annual Report of Canadian Patents and Development, Ltd, 1916
National Science Foundation (United States) Grant of 250,000 dollars to the United States Naval Research Laboratory, for rocket observations of ultra-violet and X-ray emissions from solar flares, 406
  Reviews of Data on Research and Development No 13, Research and Development and Economic Growth (Dr A T Waterman), 591
  To establish and maintain a Programme of National Information on Scientific and Technical Personnel, 592
  Resignation of Dr David D Keck as acting director of the New York Botanical Garden in order to remain permanently as programme director for systematic biology at the Foundation's Division of Biological and Medical Sciences, 680
  Grant of 250,000 dollars to the Woods Hole Oceanographic Institute, 683
  Grant of 171,600 dollars to the Bernice P Bishop Museum, Hawaii, 683
  Grant of 162,000 dollars to the Marine Laboratory, University of Miami, 683
  Grant of 155,000 dollars to the California Institute of Technology, 683
  Grant of 150,000 dollars to the University of Chicago, 683
  Grant of 135,000 dollars to the Long Island Biological Association, 683
  Grant of 105,000 dollars to the Woods Hole Marine Biological Laboratory, 683
  Formation of an Advisory Panel on Atmospheric Sciences, 1022
  Reviews of Data on Research and Development, No 14, Funds for Research and Development Performance in American industry, 1022
  Reviews of Data on Research and Development, No 15, Grants for Private Philanthropic Foundations during 1957, 1272
  Postdoctoral Fellowships, 1534
  Providing United States Scientists with Soviet Scientific Information, revised edition, 1611
  Appointment of Dr Bowen C Dees as assistant director for scientific personnel and education, 1686
  Grant of 3,000,000 dollars to the Woods Hole Oceanographic Institution, for a new Research Vessel, 1686
National Service Graduates and, 406
National Symposium on Reliability and Quality Control in Electronics Sixth, 1362
National Trust Sixty-fourth Annual Report (1958-59), 1687
National Union of Students 1959 Grants Year Book, 770
National Vegetable Research Station New Laboratory Building (J A Nelder), 1368
Native Life in Angola, 236
Native Pinewoods of Scotland (Prof H M Steven and A Carlisle), *review* by Prof E W Jones, 133
Native and Denatured Deoxyribonucleates Aggregation of an Acridine Dye on (Dr D F Bradley and Dr G Felsenfeld), 1920
NATO Election of Ernest Turner Jones as deputy chairman of the Advisory Group for Aeronautical Research and Development, 1108
  British Aid for Scientific Courses, 406
Natriferin, a New Hormonal Principle in the Neurohypophysis of certain Vertebrates (J Maetz, F Morel and B Lahlouh), 1236
Natta, G Macromolecules (Stereospecific Polymerization), 1689
Natural Animal Populations Exploitation of (British Ecological Society Symposium on), 1451
Natural Exposure Permanent Moisture Expansion of Clay Products on (J S Hosking and H V Hueber), 1373
Natural History in the Midlands, 1024
Natural History, American Museum of Bulletin, Vol 117, Art 6, Studies on Social Groupings in Fishes (Dr C M Breder, Jr), 865
  Bulletin, Vol 117, Art 5, A Taxonomic Revision of the Spotted Skunks of the Genus *Spilogale* (R G van Gelder), 1024
  James Arthur Lecture on the Evolution of the Human Brain—The Discrete and the Diffuse in Nervous Action (Prof D P C Lloyd), 1777
Natural History and Philosophical Society (Birmingham) Records and Activities (K L Kenrick), 1024
Natural Philosophy and related Documents Papers and Letters on (Isaac Newton), edited with a General Introduction by I Bernard Cohen, assisted by Robert E Schofield, *review* by Dr M A Hoskin, 1570
Natural Products The Chemistry of, Vol I, The Alkaloids (K W Bentley), Vol, 2, Mono- and Sesquiterpenoids (P de Mayo), Vol 3, The Higher Terpenoids (P de Mayo), *review* by Prof A J Birch, 754
  Steric Effects of the Chemistry and Biochemistry of (Biochemical Society Symposium on), 947
Natural Remanent Magnetization of Pre-Cambrian Gneiss of Ongul Islands in the Antarctic (T Nagata and Y Shimizu), 1472
Natural Reservoir of *Borrelia duttoni* Is the Multimammate Rat a (Dr F Zumpt), 793
Natural Sciences, Swiss Society for 139th Annual Meeting (Dr R C H Tanner), 1454
  Presidential Address, La science, le savant et le pharmacien (Prof A Girardet), 1454
Natural and Historical Monuments and Relics, Southern Rhodesia (Commission for the Preservation of) Khami Ruins—Report on Excavations, 1947-1955 (K R Robinson), *review* by R R Inskeep, 1349
Natural and Synthetic Diamond Spiral and other Growth Forms of Synthetic Diamonds—a Distinction between (Prof S Tolansky and Dr I Sunagawa), 1526
Naturalists A New Service for (R S R Fitter), 1774
Naturally Occurring Potash Salts Biological Action of Potassium-40 in (Prof E Welte and Kl Mechsner), 1958
Nature and the Recent Printing Dispute, 919
Nature, Council for Resolutions passed at the Annual General Meeting, 769
  Work of the Intelligence Unit, 1774
Nature of Experience (Sir Russell Brain), *review* by F I G Rawlins, 218
Nature of the Olefines produced by Apples (Dr F E Huelin and B H Kennett), 996, *errata*, 1535 (Dr D F Meigh) 1072
Nature of Polished Metal Surfaces (L E Samuels), 1280
Nature and Agriculture (Dr E B Worthington), 1535
Nature (Chemical) of a Plant-Virus Inhibitor from Rice (W A Jones, M Jacobson and R P Kahn), 1146
Nature (Proton-Transfer), of some Changes in Keratin and the Analogy with Muscle Contraction Permanent Set, Supercontraction and Urea-Bisulphite Solubility—the (Dr P T Speakman), 339
Nature Conservancy Awards of research studentships for postgraduate training in ecology, 156
  Special Promotion, 859
  Grant of £4,900 to the Department of Geography in the University of Hull, for an investigation into the coastal geomorphology of Holderness and Spurn Head, 1273
  Dungeness and the, 1533
Nature Conservation and Youth Service in Britain (Brigadier E F E Armstrong), 685, (Edie J Green), 685
Naughton, Prof John J, and Fujikawa, Yasuo Measurement of Intergranular Diffusion in a Silicate System—Iron in Forsterite, B A 54
Naval Research, United States Office of Second Conference on Semiconductor Surfaces, 1192
Naval Research Laboratory (United States) Grant of 250,000 dollars from the United States National Science Foundation, for rocket observations of ultra-violet and X-ray emissions from solar flares, 406
Nave, E, and others Transformation of a Cubic Boron Nitride to a Graphitic Form of Hexagonal Boron Nitride, 715
Navigable Waters Oil in (P Barclay-Smith), 949
Nawa, Hayao, and others Microbiological Transformation of a Cardiac Aglycone, 469
Nayler, Winifred G, and McCulloch, Marian Positive Inotropic Activity of Cytidine Triphosphate, 67
Naylor, G R E, and Adair, M E Serological Distinction of Adult and Foetal Human Haemoglobin, 1854
Naylor, J M (Black, Dr M, and) Prevention of the Onset of Seed Dormancy by Gibberellic Acid, 468, *erratum*, 857
Neale, Dr S A (Johnson, G A, and) Dielectric Absorption in Dispersed Systems, 898
Near East (Ancient) Myth and Ritual in the (Prof E O James), *review* by Prof Norman W Porteous, 1972
Near Infra-Red System of Nitrogen (Dr P K Carroll and Dr H E Rubalcava), 119
Nebel, B (Campbell, W H, and) Micropulsation Measurements in California and Alaska, 628
Neberkern Absorbancy Measurements on the (Localization and Assay of Respiratory Enzymes in Single Living Cells), (Dr Robert P Perry, Dr Bo Thorell, Dr Lennart Åkerman and Prof Britton Chance), 929
Nečas, Dr O Nuclear Structure of Growing Naked Protoplasts of Yeasts, 1664
Necrosis (Lymphoid), Induced by Lipid Emulsions (Dr A A Shivas and Dr G P Fraser) 1813
Need for Inorganic Phosphate in Oxidations stimulated by Dinitrophenol (P Borst and Prof E C Slater), 1396
Need for Marine Research, *review* by Dr F S Russell, 129
Needham, George Herbert The Practical Use of the Microscope, *review* by Dr S Bradbury, 1174
Needham, Dr Joseph A History of Embryology, second edition, *review* by Sir Julian Huxley, 1176
  The Development of Iron and Steel Technology in China (Second Biennial Dickinson Memorial Lecture to the Newcomen Society 1956), *review* by Prof F C Thompson, 1830
Needham, J C The Electric Arc in Welding, 1031
Needham, R M Classification, Concept-formation and Language, 1194
Needle Transmission of a New Maize Virus (Dr I Harpaz), B A 77
Needles (Crystalline) Appearance of, in Monkey Kidney Cell Cultures infected with Poliomyelitis Virus and Incubated at 22-30°C (Dr Esther Tenenbaum), 1657
Neef, Prof Ernst Elected a member of the Geography Section of the Leopoldina Academy of Natural Sciences, 595
Neely, W Brock, and Thompson, C F Kinetic Study of Dextransucrase based on the Langmuir Adsorption Isotherm, B A 64
Negishi, Takashi (Fujino, Prof Yasuhiko, and) Presence of Behinic Acid in Sphingomyelin from Horse Spinal Cord, 817
Neher, Prof H V Change of Cosmic Rays in Space, 423

Neher, R , and others 3,4,ω-Trihydroxyacetophenone 3-methyl Ether in Adrenal Extracts, 268
Neilands, Dr J B , and Stumpf, Dr Paul K Outlines of Enzyme Chemistry, second edition, *review* by Dr Edwin C Webb, 1759
Neilands, Dr J B (Emery, Dr T , and) The Iron-Binding Centre of Ferrichrome Compounds, 1632
Nelder, J A National Vegetable Research Station—New Laboratory Building, 1368
Nelson, C D , and Gorham, P R Translocation of Carbon-14-labelled Amino-Acids and Amides in the Stems of young Soya Bean Plants, 855
Nelson, J B Awarded a Nature Conservancy Research Studentship for post-graduate training in ecology (zoology), 156
Nematicide Formulations (Soil Insecticide and) Effect of Emulsifiers and Organic Diluents in (F T Phillips), 1512
Nematode *Trichostrongylus retortaeformis* (Zeder, 1800) A Seasonal Sex Difference in the Infestation of Rabbits with the (P C Bull), 281
Nematode (*Xiphinema* sp) Transmission of a Virus to Strawberry Plants by a (Asharfi Jha and Dr A F Posnette), 962, *erratum*, 1192
Nematode (Clover Cyst), *Heterodera trifolii* Goffart, 1932 Giant Eggs of the (Roland H Mulvey), 1662
Nematode (Dagger), *Xiphinema* sp Rôle of a, in Outbreaks of Plant Diseases caused by Arabis Mosaic Virus (Dr B D Harrison and Dr C H Cadman), 1624
Nematode (Southern Root Knot) A Virus Disease of *Meloidogyne incognita incognita*, the (J R Loewenberg, T Sullivan and M L Schuster), 1896
Nematode Populations Effective Increase in, by the Addition of Aureomycin (C O R Everard and William A Feder), 1887
Nematodes Plant (Dr Jesse R Christie), *review* by Dr W G Inglis, 1349
Nematodes (Dagger), associated with a Clover Sickness (F C Peacock), 123
Nematology Plant (Ministry of Agriculture, Fisheries and Food, Technical Bulletin No 7), 855
Neomenia carinata Tullberg Development of the Aplacophorous Mollusc (Dr T E Thompson), 122
Neoplasia Cell Physiology of (University of Texas Anderson Hospital and Tumour Institute fourteenth Annual Symposium on Fundamental Cancer Research), 1451
Neoplasm (Transplantable Mouse Plasma-Cell) Bence Jones Proteinuria associated with a (John L Fahey and Michael Potter), 654, *erratum*, 1108
Neoteny in the Genus *Artemia* Occurrence of (Inder Chand Baid), 73
Neotropical Element (*Anoplotermes*) in Indian Termite Fauna New (Dr M L Roonwal and O B Chhotani), 1967
Neotropischen Fauna Beitrage zur (herausgegeben von Prof Dr Erich Titschack und Dr Hans-Wilhelm Koepcke), Band 1, Heft 3, Zur Kenntnis der Pseudoscorpioniden-Fauna des Andengebietes (Max Beier), Kritische Untersuchungen der Newportia-Arten (Wolfgang Bucherl) , Ein neuer *Asthenes* (Aves, Furnariidae) von der Kuste und dem westlichen Andenabhang Sudperus (Maria Koepcke) , Beitrage zur Kenntnis der Fische Perus, II (Hans-Wilhelm Koepcke), *review* by Dr F A Turk, 1177
Nephrectomy Disappearance of the Erythropoietic Factor from Plasma of Anaemic Dogs after (Dr Jean-Pierre Naets), 371
Nerve Effects of Irradiation of, on Muscular Response (A Portela, D Brandes, Prof G H Bourne, Marion Hines, P Stewart and B L Redd, jun), 734
Nerve Action Potentials Amplitude-Modulation Radio-Telemetry of (Roger M Morrell), 1129
Nerve Axoplasm Action of Ribonuclease on, as Demonstrated by Silver Staining (R K Winkelmann and Robert W Schmit), 553
Nerve Cells in the Ferret Pituitary Gland A Nucleus of (Dr R L Holmes), 1819
Nerve Cells (Frog) Resting and Action Potentials of Reversed Polarity in (Dr I Tasaki), 1574
Nerve Cells (Isolated, Fresh), and Glial Cells from Control and Stimulated Animals Quantitative Assay of Compounds in (Prof Holger Hydén), 433
Nerve Cells (Purkinje), of some Mammals Sex Chromatin ('Chromoleme') in the (Nylceo Marques de Castro and Wilson da Silva Sasso), 293
Nerve Fibres (Mucosal) Are, Essential for the Peristaltic Reflex? (Dr K H Ginzel), 1235
Nerve (Muscle and), in Sodium-free Hydrazinium Solution Excitability and Phosphorylation of (L G Abood and K Koketsu), 725
Nervous Action The Discrete and the Diffuse in (James Arthur Lecture on the Evolution of the Human Brain), (Prof D P C Lloyd), 1777
Nervous System A Biochemist's Guide to the, *review* by Dr G B Ansell, 1261
Nervous System (Central) Biochemistry and the (Prof Henry McIlwain), second edition, *review* by Dr G B Ansell, 1261
Nervous System (Central), of the Carp *Glaucoma* Species in the (Prof A Stolk), 1737
Nestor (Neutron Source Thermal Reactor) to be purchased by the United Kingdom Atomic Energy Authority from the Hawker Siddeley Nuclear Power Co 1533
Netherlands Molluscan Fauna of the, 1612
Netherlands Malacological Society Twenty-fifth Anniversary, 1612
Netherlands New Guinea The Animal World of (Dr L D Brongersma), *review* by J E Hill, 1261
  Fauna of, *review* by J E Hill, 1261
Netherlands–Norwegian Joint Establishment for Nuclear Energy Research Seventh Annual Report (1957-58), 1278
Netherthorpe Lord Appointed a member of the Agricultural Research Council, 508
Network Theory (Modern), in Electrical Engineering (University of Birmingham Conference on), 1691
Networks Synthesis of Linear Communication (Wilhelm Cauer), second edition edited by Wilhelm Klein and Franz M Pelz (translated from the German by G E Knausenberger), *review*, 1525
Networks (Hydrological) Design of (Max A Kohler), (World Meteorological Organization, Technical Note No 25), 96, *erratum*, 684
Neuberger, Prof A , and Klyne, Dr W Steric Aspects of the Chemistry and Biochemistry of Natural Products, 947
Neuhaus, Prof A Twinning of Crystals (Twinning of Diamond), 1911
Neuhaus, F C , and others Teichoic Acids from Bacterial Walls—Composition of Teichoic Acids from a Number of Bacterial Walls, 247
Neuraminic Acid Some Observations on certain Mucoproteins containing (Dr S A Barker, Prof M Stacey, D J Tipper and J H Kirkham), B A 68
Neurofibrillae of the Locust, *Schistocerca gregaria* Effect of Insecticides on the Bodies of Nissl and (Dr Tohamy A Moussa and M Banhawy), 915
Neurohypophysial Extracts from Cold-blooded Vertebrates Pharmacological Evidence for the Presence of Arginine Vasotocin and Oxytocin in (Active Principles for the Neurohypophysis of Cold-blooded Vertebrates), (Wilbur H Sawyer, Robert A Munsick and Prof H B. van Dyke), 1464
Neurohypophysis of Cold-blooded Vertebrates Active Principles of the—Chromatographic and Biological Characteristics of Fish and Frog Neurohypophysial Extracts (B T Pickering and Prof H Heller), 1463 ; Pharmacological Evidence for the Presence of Arginine Vasotocin and Oxytocin in Neurohypophysial Extracts from Cold-blooded Vertebrates (Wilbur H Sawyer, Robert A Munsick and Prof H B van Dyke), 1464 , Arginine Vasotocin (Panayotis G Katsoyannis and Prof Vincent du Vigneaud), 1465
Neurohypophysis of certain Vertebrates Natriferin, a New Hormonal Principle in the (J Maetz, F Morel and B Lahlouh), 1236
Neuromuscular Blocking Action of some Antibiotics (G Bezzi and G L Gessa), 905
Neuromuscular Blocking Agents Effect of some, on Mitochondrial Enzyme Systems (Dr J H Koch and Dr C H Gallagher), 1039
Neuromuscular Junction (Mammalian) Post-activation Changes at the (J I Hubbard), 1945
Neurospora A Biological Clock in (Growth Patterns in *Neurospora*), (C S Pittendrigh, Dr V G Bruce, N S Rosenweig and M L Rubin), 169
  Genetic Control of a Cyclic Growth Pattern in (Growth Patterns in *Neurospora*), (Dr D R Stadler), 170
  Growth Patterns in—A Biological Clock in *Neurospora* (C S Pittendrigh, Dr V G Bruce, N S Rosensweig and M L Rubin), 169 , Genetic Control of a Cyclic Growth Pattern in *Neurospora* (Dr D R Stadler), 170
Neurosurgery, Vol 1 (Surgery in World War II), (Colonel John Boyd Coates, editor-in-chief), *review* by J E A O'Connell, 1676
Neurosurgery (U S Army), in the Second World War, *review* by J E A O'Connell, 1676
Neutral Atomic Hydrogen in Globular Clusters A Search for (Dr Morton S Roberts), 1555
Neutral Citrate-Dithionite Reagent Aluminium extracted by (W M H Saunders), 2037
Neutralization of Bridge Blood Anticoagulant (Dr F Nour-Eldin), 1419
Neutron (Electron, Proton and) A Comparison of the Charges of the (A M Hillas and T E Cranshaw), 892
  A Comparison of the Charges on the (Prof H Bondi and Dr R A Lyttelton), 974
Neutron-activated Sections Distribution of Sodium in Compact Bone, as revealed by Autoradiography of (Prof J Vincent), 1332
Neutron Activation Analysis Determination of Chlorine in Muscle Tissues by (Dr Jonas Bergstrom), 1504
Neutron Chain Reactors The Physical Theory of (Alvin M Weinberg and Eugene P Wigner), *review* by Dr J Walker, 1973
Neutron Source Thermal Reactor (*Nestor*) to be purchased by the United Kingdom Atomic Energy Authority from the Hawker Siddeley Nuclear Power Co , 1533
Neveu, T , and others Promoting Effect of Urea on the *in vitro* Passive Sensitization of Isolated Plain Muscles with Precipitating Antibody, 1805
New to Norway *Patella aspera* Lamarck (Knut Kolstad), 1886
New Alloy for Gunmetal (Mond Nickel Co , Ltd), 1025
New Amino-Acid from *Citrullus vulgaris* (Water Melon) α-Amino-β-(pyrazolyl-N) Propionic Acid, a (Dr F F Noe and Dr L Fowden), B A 69
New Analgesic Identification of Phenazocine, a Potent (Dr E G C Clarke), 451
New Antiadrenergic Compounds (A L A Boura, F C Copp and A F Green), B A 70
New Antibiotic Monamycin, a (Prof C H Hassall and K E Magnus), 1223
New Antimetabolites from Vitamin B_{12} (G M Timmis and Dr S S Epstein), 1383
New Approach to Carbon Gasification (J D Blackwood and F K McTaggart), 447
New Approach to the Dating of the Dead Sea Scrolls (Prof D Burton, J B Poole and Dr R Reed), 533
New Approach to Immunity, *review* by Dr J H Humphrey, 753
New Approach to the Mechanism of Mutations (Prof Paul Mandel and Pierre Chambon), 1501
New Approach to Schizophrenia (Dr Julius I Steinfeld), *review* by Prof Martin Roth, 487
New Australian Botanical Laboratory, 1776
New Blood Group Antigen Js^a among South American Indians Frequency of the (Dr Miguel Layrisse and Dr Zulay de Layrisse), 640
New Brain-Stem Stimulants N-Substituted 7-Methoxy-8-Aminomethylchromones and Flavones— (P Da Re, L Verlicchi, Dr I Setnikar, W Murmann and M J Magistretti), 362
New Carbonyl Compound from *Piper methysticum* Forst (Prof Paul J Scheuer and Thomas J Horigan), 979
New Cell Types in the Salivary Glands of the Brown Ear Tick, *Rhipicephalus appendiculatus* Neumann (Dr W M Till), 1078
New Compound from *Olea europaea* Oleuropeic Acid, a (Baruch Shasha and Prof Jeshaia Leibowitz), 2019
New Crystalline Salt of Oxytocin (Dr Miklos Bodanszky and Prof Vincent du Vigneaud), 981, *erratum*, 1777
New Detectors The Importance of, *review*, 1260
New Developments in Training—Five Studies in the Efficient Communication of Skills (edited by Frank A Heller), 421
New Engineering Materials and Design Conference on, 1362
New Enzyme System in the Tamarind (D Mukherjee and N A Khan), 1140
New Experimental Test of Special Relativity (J P Cedarholm and Prof C H Townes), 1350
New Fast Abnormal Haemoglobin in Newborn Nigerians (Dr A E Boyo and R G Hendrickse), 997
New Floristic Studies, 409

New Forensic Science Society, 1271
New Fossil Penguin from Australia (G G Simpson), 1613
New Fossil Skull from Olduvai (Dr L S B Leakey), 491
New Geological Documentation Service, 153
New Geophysical Observatory in Belgium, 1022
New Group of Bacteria *Fasciculus limpidus* nov gen , nov spec , a Representative of a (Prof E G Pringsheim), 1098
New Guinea (Netherlands) The Animal World of (Dr L D Brongersma), *review* by J E Hill, 1261
  Fauna of, *review* by J E Hill, 1261
New Habit among Greenfinches Diffusion of a (Dr Max Pettersson), 649
New Hormonal Principle in the Neurohypophysis of certain Vertebrates Natriferin, a (J Maetz, F Morel and B Lahlouh), 1236
'New' Human Blood Group Antigen, Sw$_a$ (T E Cleghorn), 1324
New Ideas for Industry, *review* by Prof A J Brown, 1348
New Inhibitor of Serotonin Metabolism (Dr Alfred R Maass and Mary Jane Nimmo), 547
New Introduction to Geology, *review* by Dr J C M Taylor, 1175
New Journal of Glass Technology, 855
New Journal of Psychopharmacology, 940
New Maize Virus Needle Transmission of a (Dr I Harpaz), B A 77
New Marine Biological Station on Heligoland (Dr J N Carruthers), 400
New Medical-Surgical Building of the Ontario Veterinary College, 695
New Method for Studying the Functioning of the Lungs (Helge Colldahl, T Alväger and J Uhler), 372
New Method for Working up Processing Mixtures containing Anhydrous Aluminium Chloride (Dr T Széll and A Furka), 117, *erratum*, 595
New Microwave Harmonic Generator (Dr K D Froome), 808
New Multi-range Voltmeter, 'Taylormeter Model 100A', (Taylor Electrical Instruments, Ltd), 1026
New Neotropical Element (*Anoplotermes*) in Indian Termite Fauna (Dr M L Roonwal and O B Chhotani), 1967
New Nitride Precipitate in Iron-Silicon Alloys (G R Booker and J Norbury), 1311
New Nitrogen-fixing Bacterium (H L Jensen, P K De and Roma Bhattacharya), 1743
New Pests of Cocoa (*Theobroma cacao* L) in Ghana following Applications of Insecticides (P F Entwistle, C G Johnson and E Dunn), 2040
New Radioisotope Training Programme (United States Atomic Energy Commission), 771
New Research and Production Facilities of Ciba (A R L) Ltd (R F Webb), 601
New Research Laboratories for the Cambridge Instrument Company, Ltd (Dr M C Marsh), 1364
New Scientific Term Retentate, a (E G Turner and J G Feinberg), 1139
New Service for Naturalists (R S R Fitter), 1774
New Specific Bacteriophages for Plant Pathogenic *Xanthomonas* spp Some (Z Klement), 1248
New Subjective Phenomena apparently due to Interocular Transfer Some (Ian P Howard), 1516
New Technique for Isolating and Cloning Cells of Higher Plants (Ludwig Bergmann), 648
New Techniques in the Analysis of Noise and Vibration (Acoustics Group of the Physical Society and the Institute of Physics Symposium on), 415
New Techniques in High Polymer Chemistry (Bradford Institute of Technology Course in), 1845
New Techniques in Packaging, *review* by Dr V G W Harrison, 1437
New Trichothecin-like Antifungal Antibiotic (E T Glaz, Eszter Scheiber, J Gyimesi, I Horvath, Katalin Steczek, A Szentirmai and G Bohus), 908
New Two-Dimensional Paper Chromatographic Method applied to the Separation of Amino-Acids (C S Knight), 1486
New University (Prof Jack Simmons), *review* by Sir John Wolfenden, 1975
New World Education in the, 81
New York Academy of Sciences Annals, Vol 78, Art 2, The Biology of the Amoeba (Henry I Hirshfield and 22 other authors), 1371
  Annuals, Vol 78, Art 1, Germfree Vertebrates—Present Status (James A Reyniers and 30 other authors), 1541
New York Botanical Garden Resignation of Dr David D Keck as acting director, 680
New York Botanical Garden, and others Fourth International Conference on Plant Growth Regulation, 599
New York University Vacuum Metallurgy—Lectures presented during the Course sponsored by the Department of Metallurgical Engineering in co-operation with the Office of Special Service to Business and Industry, 1957, *review* by Dr F C Thompson, 1765
New Zealand Bionomics of the Brushtailed Opossum *Trichosurus vulpecula* in (R I Kean), 1388
  Forestry in (Sir Harry Champion), 606
  Introduction of Foreign Weeds into (A J Healy), 1361
  Palaeomagnetic Studies of Cenozoic Volcanic Rocks in (Dr D S Coombs and Dr T Hatherton), 883
  Scientific Staff in, 854
New Zealand Antarctic Stations Diurnal Variation of Aurora and Geomagnetic Disturbance at (Dr T Hatherton and G G Midwinter), 889
New Zealand Institute of Architects (New Zealand Master Builders' Federation and the) Establishment of a Building Research Bureau, 235
New Zealand Master Builders' Federation and the New Zealand Institute of Architects Establishment of a Building Research Bureau, 235
New Zealand Research on Weed Transportation 1361
New Zealand Sheep Composition of some Fat-free Carcasses and Bodies of (A H Kirton, M J Ulyatt and R A Barton), 1724
Newborn Nigerians New Fast Abnormal Haemoglobin in (Dr A E Boyo and R G Hendrickse), 997
Newborn Rats and Mice An Improved Technique for Intravenous Injection of (N F Anderson, E J Delorme, Prof M F A Woodruff and D C Simpson), 1952
Newbould, Dr P Availability of Plant Nutrients (Experiments with Calcium-45), 159
Newbould, Dr P , and Lucas, Dr R L Effect of the Level of Microbial Population on Isotopically Exchangeable Phosphate in Soil, 1155
Newcomen Society The Development of Iron and Steel Technology in China (Dr Joseph Needham), (Second Biennial Dickinson Memorial Lecture, 1956), *review* by Prof F C Thompson, 1830
Newell, Prof Norman D Elected to foreign membership of the Geological Society of London, 1360
Newer Developments in the Chemistry of the Non-Metals (Kingston Technical College Course of Lectures on), 1915
Newfoundland Palaeomagnetism and Rotation of (Dr P M Du Bois), B A 63
Newitt, Prof D M Thermodynamics (Phase Changes in Condensed Systems), 1608
Newkirk, G A , and others The Inner Solar Corona during June 1959, 1308
Newman, I A Electrical Determination of Transport of 3-Indole Acetic Acid in *Avena*, 1728
Newman, Prof M H A What is Mathematics ?—New Answers to an Old Question (Presidential Address to the Mathematical Association), 32
Newmark, Philip, and others Macromolecular Components of *Chlorella pyrenoidosa*, 963
Newportia-Arten Kritische Untersuchungen der (Wolfgang Bucherl), (Beiträge zur Neotropischen Fauna), *review* by Dr F A Turk, 1177
Newsom, R M At the Conference of the Mammal Society of the British Isles (Population Fluctuations in the Bank Vole, Field Vole and Wood Mouse), 30
Newspaper Trusts The Work of (Political and Economic Planning, Broadsheet No 435), 1687
Newth, Dr D R Developmental Biology, *review*, 839
Newton, A A , and others Deoxyribonucleic Acid Formation in Multiplying HeLa Cells, 107
Newton, D C , and others Isotopic Composition of Boron, 185
Newton, Isaac Papers and Letters on Natural Philosophy and related Documents (edited with a General Introduction by I Bernard Cohen, assisted by Robert E Schofield), *review* by Dr M A Hoskin, 1750
Newton, L S Relationship between Industry and Technical Colleges, 1690
Newtonian Documents, *review* by Dr M A Hoskin, 1750
Ney, Prof Edward P Photography in the International Geophysical Year (High-altitude Balloon Flights with Nuclear Emulsions), 1032
Ney, Prof Edward P , and Kellogg, Prof Paul J Kellogg and Ney's Model of the Solar Corona, 1122
Ney's (Kellogg and) Model of the Solar Corona (Dr D E Blackwell and Dr D W Dewhirst), 1120 , (Prof Edward P Ney and Prof Paul J Kellogg), 1122
Niblett, G B F Thermonuclear Processes (Rapid Compression of Plasma), 240
  Thermonuclear Research, 1015
  Ionization Phenomena in Gases (Attempts to produce Very Large Rates of Current Growth, by the Design of Very Low Inductance Systems), 1356
Niblett, Prof W R Appointed dean of the University of London Institute of Education with the title of professor of education in the University, 595
Nicholas, D P Awarded a Nature Conservancy Research Studentship for post-graduate training in ecology (botany), 156
Nicholls, C E C Elected president of the Royal Australian Chemical Institute, 1106 , work of, 1106
Nichols, B W (Aylward, Dr Francis, and) Sterol Glycosides in Oilseed Phospholipids, 1319
Nicholson, Dr D C , and others Optical Activity of Stercobilin and *d*-Urobilin, 41
Nickel Company of Canada, Ltd , International Establishment of a Fellowship to honour the visit of H M the Queen and H R H the Duke of Edinburgh, 772
Nickel–Oxygen System 'Thermal Regeneration' in the (Prof J S Anderson and D F Klemperer), 899
Nickell, L G , and others Plant Growth Regulation (Isolation of a New Acid from Coconut Milk), 600
Nicol, Dr D S H W Clinical Biochemical Method, *review*, 576
Nicol, L W (Creeth, J M , and) Structure and Chemistry of Proteins (Urease), 1277
Nicol, Prof T , and Sewell, I A Effect of Sulphonamides on the Phagocytic Activity of the Reticulo-Endothelial System, 1241
Nicolau, Prof C T , and others Loss of Plasticity of Erythrocytes coated with Incomplete Antibodies, 1808
Nicotinamidase in *Mycobacteria*—a Method for Distinguishing Bovine Type Tubercle Bacilli from other *Mycobacteria* (Dr Kiyoshi Konno, Dr Hideo Nagayama and Dr Sutemi Oka), 1743
Nicotinamide Synthesis of Diphosphopyridine Nucleotide from, by Slices of Liver (C J Threlfall), 60
Nicotinamide Analogues and Precursors Reversal of Effects of 2-Substituted Thiadiazoles by (Dr Irwin H Krakoff, Corrine R Lacon and Dr David A Karnofsky), 1805
Niederpruem, Dr D J , and Hackett, Dr D P Cytochrome System of *Streptomyces*, 1954
Nielsen, Prof E Steemann Polar Front Survey (Biology—Carbon-14 Measurements and Chlorophyll Measurements in the North Atlantic and in the Greenland Sea), 1183
Nielsen, Dr Eric T Copulation of *Glyptotendipes* (*Phytotendipes*) *paripes* Edwards, 1252
Niesters, H Ionization Phenomena in Gases (Breakdown Potential Measurements below the Paschen Minimum), 1354
Nigeria, International Commission on Higher Education in Inaugural Meeting, 152
Nigeria (Western) Stone Implements from (E L Kostick, C N Williams and S A Williams), 124
Nigerian College of Arts, Science and Technology Grants to the, 1985
Nigerian Rain-Forest Zone Non-Symbiotic Nitrogen Fixation in a Soil of the (Dr A W Moore and J N Abaelu), 75
Nigerians (Newborn) New Fast Abnormal Haemoglobin in (Dr A E Boyo and R G Hendrickse), 997
Night Interruption with Red Light Complex Reaction in *Hyoscyamus niger* upon (P J A L de Lint), 731
Night Sky in October, 508 , in November, 772 , in December, 1451 in January, 1915
Nikaido, Hiroshi (Fukasawa, Toshio, and) Galactose-sensitive Mutants *Salmonella*, 1168
Nikuni, Ziro (Mishina, Akira, and) Physical and Chromatograph Observations of γ-Irradiated Potato Starch Granules, 1867

Nile Valley Effects of the Water Hyacinth (*Eichornia crassipes*), in the (H R J Davies), 1085
Nile (West) Virus Duration of Protective Action of Interferon against Infection with (Dr Alick Isaacs and Marguerite A Westwood), 1232
Nimmo, Mary Jane (Maass, Dr Alfred R , and) A New Inhibitor of Serotonin Metabolism, 547
Nimrod (7,000-MeV Proton Synchrotron) Contracts for work on the (National Institute for Research in Nuclear Science), B A 14
Nirk, Helgi Interspecific Hybrids of *Lycopersicum*, 1819
Nishibori, Kokichi Isolation of Echinochrome A from the Spines of the Sea Urchin, *Diadema setosum* (Leske), 1234
Nissan, Prof Alfred H , and Higgins, H G A Molecular Approach to the Problem of Viscoelasticity, 1477
Nitrate Reductase Isolation and Purification of, from Embryos of Germinating Wheat (D Spencer), 682
Nitrate Reduction by Aqueous Extracts of Excised Tomato Roots (C S Vaidyanathan and Prof H E Street), 531
Nitration of Hydrocarbons and other Organic Compounds (A V Topchiev) translated from the Russian by Catherine Matthews, *review* by Prof M J S Dewar, 577
Nitride (Boron Phosphide and) Synthesis of (Dr R C Vickery), 268
Nitride (Cubic Boron) Transformation of a, to a Graphitic Form of Hexagonal Boron Nitride (H Judith Milledge, E Nave and F H Weller), 715
Nitride (Hexagonal Boron) Transformation of a Cubic Boron Nitride to a Graphitic Form of (H Judith Milledge, E Nave and F H Weller), 715
Nitride Precipitate (A New), in Iron-Silicon Alloys (G R Booker and J Norbury), 1311
Nitriding (Carbo-) Identification of the High-Temperature Constituent in Mild Steel Surface-Hardened by (M A H Howes, G T F Jay, K Sachs and D Wilkinson), 1312
Nitrite Estimation by Diazotization Measurement of Inhibition by Azide in Biochemical Assay Systems involving (Dr E J Hewitt and D G Hallas), 1485
Nitro Groups Quantitative Paper Chromatography based on the Sub-Micro Titration of Derivatives containing (L Blom and J Caris) 1313
Nitrogen Fixation of, by the Rice Plant (S P Chakraborty and S P Sen Gupta), 2033
  Near Infra-Red System of (Dr P K Carroll and Dr H E Rubalcava), 119
Nitrogen Assimilation of *Vicia villosa* Influence of Gibberellic Acid and Photoperiod on the Growth, Flowering, Nodulation and (the late Prof Margaretha G Mes), 2035
Nitrogen Compounds Six-Membered Heterocyclic, with Three Condensed Rings (C F H Allen, in collaboration with G M Badger, Brice Graham, G A Reynolds, James H Richmond John R Thirtle, J A Van Allen and C V Wilson), *review* by Dr F G Mann, 216
Nitrogen Content of Rain Water collected in the Humid Central Congo Basin (J Meyer and E Pampfer), 717
Nitrogen Fixation in a Uganda Swamp Soil (E A Calder), 746
Nitrogen Fixation (Non-Symbiotic), in a Soil of the Nigerian Rain-Forest Zone (Dr A W Moore and J N Abaelu), 75
Nitrogen Fixation (Symbiotic), of Legumes Influence of Temperature on the (the late Prof Margaretha G Mes), 2032
Nitrogen-fixing Bacterium A New (H L Jensen, P K De and Roma Bhattacharya), 1743
Nitrogen Replenishment in the Soil (Dr N R Dhar), 942
Nitrogenous Material (Air-borne), and other Plant Nutrients Surface of the Ocean as a Source of (Dr A T Wilson), 99
p-Nitrophenyl Acetate Catalysed by Chymotrypsin Reactivity and Interrelationship of Intermediates in the Hydrolysis of (Mario A Marini and Prof George P Hess), 113
Nitrous Acid Effect of, on Tobacco Mosaic Virus—Mutation or Selection? (F C Bawden), B A 27
Nitzsche, S Macromolecules (Inorganic and Organic/Inorganic Polymers), 1690
Nixon, D A Inositol Concentration in the Cerebrospinal and Ocular Fluids and Tissues of the Foetal and Adult Sheep, 906
Njoku, Dr E Appointed professor of botany at University College, Ibadan, 26
Noakes, G R Basic Electricity, *review*, 133
  Microcosm to Macrocosm, *review*, 214
  Turning Points in Physics, *review*, 1090
Nobbs, J M At the Second Australian Spectroscopy Conference (Emission Spectroscopy—Some Effects of Pulse Shape on the Spectral Characteristics of Pulsed Discharges), 1197
Nobel Prize for Chemistry for 1959 awarded to Prof Jaroslav Heyrovsky, 1271
Nobel Prize for Medicine for 1959 divided between Prof S Ochoa and Prof A Kornberg, 1021
Nobel Prize for Physics for 1959 awarded to Dr Emilio Segre and Dr Owen Chamberlain, 1189
Nobelium Research on (P R Fields *et al*), 507
Nockolds, Dr S R Principles of Geochemistry, *review*, 1601
  Geochemical Research in the United States, *review*, 1757
Noctilucent Clouds Polarization of Light from (Georg Witt), 1618
Noctuidae (Adult) (Lepidoptera), in Cambodia Blood-feeding Habits of (W Buttiker), 1167
Nocturnal Conditions (Diurnal and) Changes in the Lacunal Parenchyma of *Mimosa pudica* in (Hideo Toriyama), 737
Nodes (Single), of Ranvier in Potassium-rich Solutions Action Potentials from (Dr Hans-Christoph Luttgau), 1494
Nodulation of Legumes Gibberellic Acid and (Dr Wm W Fletcher, J W S Alcorn and J C Raymond), 1576
Nodulation and Nitrogen Assimilation of *Vicia villosa* Influence of Gibberellic Acid and Photoperiod on the Growth, Flowering, (the late Prof Margaretha G Mes), 2035
Nodules formed by the Grain Boundary Reaction in Aluminium–Zinc Alloys Reversion of (Ryoji Watanabe and Shigeyasu Koda), 977
Nodules (Soybean), during the Vegetative Period Redox Potentials in (Dr Helene Ebertova), 1046
Noe, Dr F F and Fowden, Dr L α-Amino-β-(pyrazolyl-N) Propionic Acid, a New Amino-Acid from *Citrullus vulgaris* (Water Melon), B A 69
Noguchi, I (Hattori, Dr S , and) Microbial Degradation of Rutin, 1145
Nogueira, Otilia C , and others Methaemoglobin Reduction through Cytochrome B_5, 1651
Noise Current Research on (Derwent M A Mercer), 414
  Distribution of Flares on the Solar Disk Associated with (L R McNarry), 806
Noise (Jet Aircraft) Effect of, on Hearing (Surg Lieut R R A Coles and J J Knight), 1803
Noise (Low-Frequency (100 kc /s) Radio), from the Aurora (R L Dowden), 803
Noise (Radio), from the Outer Atmosphere Directional Observations of (G R A Ellis and D G Cartwright), 1307
  Spaced Observations of (G R A Ellis, D G Cartwright and J R V Groves), 1391
Noise Problems Recent Studies of (Acoustics Group of the Physical Society Symposium on), 414
Noise and Vibration New Techniques in the Analysis of (Acoustics Group of the Physical Society and the Institute of Physics Symposium on) 415
Noise (Cosmic), at Low Frequencies above the Ionosphere Measurement of (J P I Tyas, C A Franklin and A R Molozzi), 785
Noise (Radio) Effect of Atomic Tests on (C A Samson), 538
Nolan, B , and others Excretion of Labelled Magnesium by the Sheep, 736
Nomenclature in Titrimetric Analysis (Committee of the Analytical Chemistry Section of the International Union of Pure and Applied Chemistry), 1686
Nomenclature (Zoological), International Commission on Given accommodation in the British Museum (Natural History), 156
Non-Cartridge Type Demineralized Water Units, 25
Non-Destructive Testing International Conference on, 1107
Non-Diabetic Humans of Varying Ages Actual Distribution of the Number and Volume of the Islets of Langerhans in Different Size Classes in (Bo Hellman), 1498
Non-Dialysable Inhibitor of Glutamo-Transferase present in Excised Tomato Roots (C S Vaidyanathan and Prof H E Street), 347
Non-Enzymic Macromolecules Reaction-directing Properties of—Pyrogallol Oxidation in the System Iron (III)–Cellulose (N S Goodman and S M Siegel), 53
Non-Esterified Fatty Acids Release of, from Adipose Tissue in Normal and Diabetic Rats (Dr J Wendeová and Dr J Pav), 1147
Non-Ferrous Metals Research Association (British) New Research Laboratories, 234, 242
  Election of F C Braby as chairman of the Council 1273
Non-Gummy Chromogenic Strain of *Azotobacter vinelandii* (J A Bush and Prof P W Wilson), 381
Nonhaem Iron in Erythrocytes as a Precursor for Haemoglobin (Dr M Faber and Dr I Falbe-Hansen), 1043
Non-Inverted versus Inverted Plots in Enzyme Kinetics (Dr B H J Hofstee), 1296 , (Dr Malcolm Dixon and Dr Edwin C Webb), 1298
Non-Leguminous Plant, *Hyptis suaveolens* Poit Anti-A Haemagglutinins from a (Dr G W G Bird), 109
Non-linear Clocks Stochastic Rectification of (David G Kendall), 1476
Non-Linear (Linear and), Structural Relations Estimation of (D E Barton and C L Mallows), 1086
Non-Metals Newer Developments in the Chemistry of the (Kingston Technical College Course of Lectures on), 1915
Non-Oxide Glasses (Bell Telephone Laboratories), 594
Non-Pathogenic Fungi (Pathogenic and) Human Precipitins against Common (Dr J Pepys, Dr R W Riddell and Dr Y M Clayton), 1328
Non-Photosynthetic Bacteria Function of Carotenoid Pigments in (Micheline M Mathews and W R Sistrom), 1892
Non-Ruminants Trans-Unsaturated Acids in the Depot Fats of Ruminants and (L Hartman and Dr F B. Shorland), 2024
Non-Symbiotic Nitrogen Fixation in a Soil of the Nigerian Rain-Forest Zone (Dr A W Moore and J N Abaelu), 75
Nonweiler, T R F , and others Jets and Rockets, *review* by D G King-Hele, 1346
Noradrenaline Response of Cholinergically Innervated Sweat Glands to Adrenaline and (Dr David P C Lloyd), 277
Noradrenaline from Adrenaline Formation of, by Rat Liver Mitochondria (Dr Kunio Yagi and Dr Toshiharu Nagatsu), 1316
Noradrenaline and Adrenaline in the Rat Brain during Acute and Chronic Morphine Administration and during Withdrawal (Dr Lars-M Gunne), 1950
Norbury, J (Booker, G R , and) A New Nitride Precipitate in Iron-Silicon Alloys, 1311
Norepinephrine Evidence of Side-Chain Cleavage during the Reaction of Epinephrine and, with Ethylene Diamine (Dr Louis-P Joly and Dr Guy Nadeau), 1483
Norinder, H Ionization Phenomena in Gases (Relation between Lightning Discharges and Whistlers), 1355
Normal American Population An Association between Abo Blood Groups and Fertility in a (Dr T Edward Reed and Dr J H Ahronheim), 611
Normal Human Serum Influence of Coagulase on the Growth of Staphylococci in (Dr K Wlodarczek and Dr J Jeljaszewicz), 1514
Normal Metabolism of Strontium-90 in Rats Attempts to Modify the (Dr V Volf), 1401
Normal Soluble Proteins in Guinea Pig Liver Agar Electrophoresis of (Prof Iv Goranov, Y Todorov, X Skatshokova, M Hlebarova and P Kuzmanova), B A 64
Normal and Adrenalectomized Mice Effect of Diet on the Blood Sugar and Liver Glycogen Level of (B P Block and Dr G S Cox), 721
Normal and Cancer Cells Localization of β-Glucuronidase in (J Conchie and Dr G A Levvy), 1709
Normal and Diabetic Rats Release of Non-Esterified Fatty Acids from Adipose Tissue in (Dr E Wendeova and Dr J Pav), 1147
Normal and Primaquine-sensitive Erythrocytes Characteristics of Glucose-6-phosphate Dehydrogenase from (Glucose-6-phosphate Dehydrogenase and Human Erythrocytes), (Dr Henry N Kirkman), 1291
Norris, Dr R E (Womersley, Dr H B S , and) A Free-Floating Marine Red Alga, 828
Norrish, Prof R G W (Callear, Dr A B , and) Mechanism of Anti-Knock, 1794

North–South Anisotropy and Anticipatory Increase of Intensity associated with the Cosmic-Ray Storm of February 11, 1958 (Dr V Sarabhai and R Palmeira), 1204
North America The Evolution of (Dr Philip B King), *review* by Dr J W Cowie, 1600
  The Geological Development of, *review* by Dr J W Cowie, 1600
  The Mammals of (Prof E Raymond Hall and Dr Keith R Kelson), *review* by Peter Crowcroft, 1524
North America (Arctic) The Benthos of Soft Sea-bottom in (Dr D V Ellis), B A 79
North American Mammals, *review* by Peter Crowcroft, 1524
North Atlantic Ocean Polar Front Survey in the, 1180
North Kenya Banks (Dr J F C Morgans), 259
North-West Scotland Rubidium-Strontium Ages of Lewisian Rocks from (Dr Bruno J Giletti), 1793
Northern Ireland (Great Britain and) Statistics of Public (Rate Supported) Libraries in, 1957-58 (Library Association), 592

  Election of Officers, 1844
Nuclear Research Foundation (Australian) Third Summer School for Science Teachers, 1108
Nuclear Science, National Institute for Research in Contracts for work on the 7,000-MeV Proton Synchrotron *Nimrod*, B A 14
Nuclear Structure of Growing Naked Protoplasts of Yeasts (Dr O Nečas) 1664
Nuclear Studies (Science Department of the British Council third list of), 235
Nuclear Technology and the Scholarly Tradition, *review* by Dr J Walker 1973
Nuclear Weapon Tests and the Accident at Windscale Accumulation of Radioactive Iodine in Thyroid Glands subsequent to (Dr Hamish A Robertson and Ian R Falconer), 1699
Nuclear Weapons Debris Fractionation Phenomena in (K Edvarson, Kerstin Low and J Sisefsky), 1771
Nuclease Activity of Bean (*Phaseolus vulgaris*) Hypocotyls Influence of Kinetin, β-Indoleacetic Acid and Gibberellic Acid on (Dr W Maciejewska-Potapczyk), 557
Nuclei of Calf Thymus High Molecular Weight Ribonucleic Acids from the (Dr Ping-yao Cheng), 190
Nuclei (Isolated) Transplantation Immunity—Separation of Antigenic Components from (André Castermans and André Oth), 1224
Nuclei (Isolated Thymus) Monovalent Cations and the Incorporation of Metabolites by (Dr Theodore R Breitman and Dr George C Webster), 637
Nuclei (Tegmental) A Heat-Loss Mechanism involving the Habenular, Interpeduncular and Dorsal (B G Cragg), 1724
Nucleic Acid and a Cationic Detergent Interaction between (Prof Dino Guerritore and Luciano Bellelli), 1638
Nucleic Acid (Infectious) Recovery of, from Tobacco Mosaic Virus inactivated by Antibody (Dr Irving Rappaport), 1732
Nucleic Acid and Protein Synthesis in *Mycobacterium smegmatis* Effect of Iron and Zinc on (Frank Winder and Joan M Denneny), 742
Nucleic Acids Distribution of, among Different Stable *L* Forms of *Proteus P 18* (Prof P Mandel, A Sensenbrenner, P De Gregario and A M Bader), 566
Nucleon Mass and Electron Mass Ratio of (Prof A J Rutgers), 894
Nucleopeptides (Cytoplasmic), in Guinea Pig Liver (P Szafranski, E Sulkowski and T Golaszewski), 1940
Nucleoprotein Particles (Turnip Yellow Mosaic Virus), with Differing Biological and Physical Properties (R E F Matthews), 530
Nucleotide (Diphosphopyridine) Effect of Reduced on the Swelling of Isolated Mitochondria (Dr G Di Sabato), *erratum*, 95
Nucleotide (Diphosphopyridine), from Nicotinamide Synthesis of, by Slices of Liver (C J Threlfall), 60
Nucleotide (Pyridine) Fluoresence Measurements of Mitochondrial, in Aerobiosis and Anaerobiosis (Localization and Assay of Respiratory Enzymes in Single Living Cells), (Prof Britton Chance and Dr Bo Thorell), 931
Nucleotide-linked Cystine Reductase (Triphosphopyridine) A Reduced, in the Clothes Moth, *Tineola bisselliella* (Humm), (R F Powning and H Irzykiewicz), 1230
Nucleotide Oxidase (Pyridine), from Heart Sarcosomes Corticosterone Inhibition of (P K Jensen), 451
Nucleotide Oxidation (Diphosphopyridine) Inhibition of Reduced, by Ammonia (R T Wedding and H M Vines), 1226
Nucleotide–Peptide Compounds of *Saccharomyces cerevisiae* (G Harris and J W Davies), 788
Nucleotides from Yeast Cells Release of (Masataka Higuchi and Prof Teijiro Uemura), 1381
Nucleotides (Purine), of Red Lateral Muscle of Rainbow Trout Changes in (Tsuneyuki Saito, Ken-ichi Arai and Toshikatsu Yajima) 1415
Nucleus of Nerve Cells in the Ferret Pituitary Gland (Dr R L Holmes), 1819
Nucleus (Yolk), in the Oocytes of some Fishes Development of the (Prof A Stolk), 1746
Nuclides (Alpha-Emitting), in Biological Material Spectroscopic Identification of (Prof W V Mayneord and C R Hill), 667
Nuffield Foundation Age and the Working Lives of Men (F Le Gros Clark), 318
  Grant of £8,000 to the University of Oxford, for the continuation of research being carried out by H B Parry at the Nuffield Institute for Medical Research, 1986
Number of Free Radicals in Coal during Carbonization at Different Heating Rates (J Smidt and Prof D W van Krevelen), 719
Number and Volume of the Islets of Langerhans in Different Size Classes in Non-diabetic Humans of Varying Ages Actual Distribution of the (Bo Hellman), 1498
Numbers Some Recent Progress in the Analytic Theory of (Prof H Davenport), 1533
Numbers of People, *review* by Dr B Benjamin, 1521
Numerical Analysis and Partial Differential Equations (George E Forsythe and Paul C Rosenbloom), *review* by Prof T A A Broadbent, 576
Nunn, J F, and others 'Supercarbia' in the Anaesthetized Dog, 1071
Nurse, Dr R W Clay Minerals (Relationship between the Mineralogical Constitution and the Firing Properties of Clays), 779
Nutrients (Plant) Availability of (British Society of Soil Science Discussion on), 159
  Surface of the Ocean as a Source of Air-borne Nitrogenous Material and other (Dr A T Wilson), 99
Nutrition Classics of, *review* by Dr Leslie J Harris, 484
  Embryonic (edited by Dorothea Rudnick), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
  A History of (Prof Elmer Verner McCollum), edited by H Bentley Glass, *review* by Dr Leslie J Harris, 484
Nutrition Meeting in Europe, Rome, 1958 (Food and Agriculture Organization of the United Nations, Report Series No 21), 407
Nutrition Society of Canada Borden Award, 507

Nutrition, Journal of Appointment of Dr Richard H Barnes as editor, 156
Appointment of Dr Cyril L Comar as associate editor, 156
Nutritionally Deficient Mutant of Pathogenic *Fusarium oxysporum* after Ultra-violet Irradiation Production of a Perfect Stage in a (E W Buxton), 1258
Nyasaland Occurrence of Presumed Glossopteridean Fructifications in Rhodesia and (Dr William S Lacey), 1592
Nye, Dr J F Surface Topography of the Antarctic Ice Sheet, 786
Nyns, Ed Jacques (Ålbertsson, Per-Åke, and) Counter-Current Distribution of Proteins in Aqueous Polymer Phase Systems, 1465, *erratum*, 1688
Nystrom, Dr S H M Electron Microscopical Structure of the Wall of Small Blood Vessels in Human Multiform Glioblastoma, 65

OAKLEY, Dr K P (de Vries, Prof H, and) Radiocarbon Dating of the Piltdown Skull and Jaw, 224
Obayashi, Tatsuzo Very Low-Frequency Spectra of Atmospherics propagated through the Ionosphere, 34
Obese-Hyperglycaemic Mice Increased Circulating Insulin-like Activity in (Jean Christophe, Yves Dagenais and Jean Mayer), 61
Objects (Microscopical) Recording the Positions of (Dr J R Baker), 34
O'Brien, B R A 8-Azaguanine Inhibition of Haemoglobin Synthesis in De-embryonated Chick Blastoderm, 376
O'Brien, Dr J R Some Properties of Damaged Endothelial Cells, 1580
Observation Phylogeny of the Genus *Aniba* Aubl —a Comparative Morphological and Chemical (Walter B Mors, Otto Richard Gottlieb and Ida de Vattimo), 1589
Observation (Apparent), of Solar Corpuscular Clouds by Direct Continuous-Wave Reflexion (Dr John D Klaus and W Reed Crone), 965
Observational Technique (Simple) Value of a, for Determining the Fat Content of Algal Cells (Dr J H Evans), 1737
Observations of the Fine Structure of Enhanced Solar Radio Radiation with a Narrow-Band Spectrum Analyser (Oystein Elgaroy), 887
Observations on certain Mucoproteins containing Neuraminic Acid Some (Dr S A Barker, Prof M Stacey, D J Tipper and J H Kirkham), B A 68
Observations of the Russian Moon Rocket *Lunik II* (Dr J G Davies and Prof A C B Lovell), 501, (Patrick Moore), 502, (Dr H Percy Wilkins), 502
Observations of 'Whistlers' and Very Low Frequency Phenomena at Godhavn, Greenland (Eigil Ungstrup), 806
Observations (Directional), of Radio Noise from the Outer Atmosphere (G R A Ellis and D G Cartwright), 1307
Observations (Physical and Chromatographical), of γ-Irradiated Potato Starch Granules (Akira Mishina and Ziro Nikuni), 1867
Observations (Preliminary), on the Fate of Intravenously Administered Lactose Labelled with Carbon-14 (Dr Frederick J Carleton and Dr Henry R Roberts), 1650
Observations (Radiation), with Satellite 1958δ over Australia (Dr A J Herz, Dr K W Ogilvie, J Olley and R B White), 391
Observations (Radio Echo), of Venus (J V Evans and G N Taylor), 1358
Observations (Satellite), of Solar Cosmic Rays (Pamela Rothwell and Carl McIlwain), 138
Observations (Satellite Orbit) Air Density in the Upper Atmosphere from (Dr G V Groves), 178
Observations (Spaced), of Radio Noise from the Outer Atmosphere (G R A Ellis, D G Cartwright and J R V Groves), 1391
Observations (Wear), through Interfacial Micro-Windows (Robert H Savage), 45
Observatories (Colaba and Alibag) Retirement of S L Malurkar from the directorship, 1611
Observatory, United States National Radio Astronomy Appointment of Prof Otto Struve as first director, B A 14
Observatory (New Geophysical), in Belgium, 1022
Observed Quantities A Least-Squares Solution for a Linear Relation between Two (P A Wayman), 77, (B K Kelly), 1086
Occupational Exposure Maximum Permissible Body Burdens and Maximum Permissible Concentrations of Radionuclides in Air and Water for (United States National Bureau of Standards, Handbook 69), 939
Occupational Hygiene Society (British) Eleventh Conference (Heating and Ventilation), 1987
Occurrence of Astaxanthin in the Flower Petals of *Adonis annua* L (A Seybold and Prof T W Goodwin), 1714
Occurrence of Embryo Sac-like Structures in the Microsporangia of *Leptomeria billardierii* R Br (Dr Manasi Ram), 914
Occurrence of 4-Hydroxypipecolic Acid in *Acacia* Species (Dr J W Clark-Lewis and P I Mortimer), 1234
Occurrence of 3-Indolylacetic and 3-Indolecarboxylic Acids in Tomato Crown-Gall Tissue Extracts (G Clarke, M H Dye and Prof R L Wain), 825
Occurrence of Leuco-Anthocyanin in Sour and Sweet Cherries (Dr Kuang C Li), 1935
Occurrence of 4-0-Methyl Glucoronic Acid in *Rhizobium* Gums (Beverley A Humphrey), 1802
Occurrence of Microbiological Filaments in Soils (Roy D Bond), 744
Occurrence of Neoteny in the Genus *Artemia* (Inder Chand Baid), 73
Occurrence of Polynucleotide Phosphorylase in Atypical Epithelioma of Rat (Dr Kunio Yagi, Takayuki Ozawa and Hiroshi Konogi), 1939
Occurrence of Presumed Glossopteridean Fructifications in Rhodesia and Nyasaland (Dr William S Lacey), 1592
Occurrence of *Schoenus nigricans* L on Ombrogenous Peats (D J Bellamy), 1590
Occurrence and Quantitative Determination of 2-Dimethylaminoethanol in Animal Tissue Extracts (Dr Conrad G Honegger and Ruth Honegger), 550, *erratum*, 1986
Ocean Surface of the, as a Source of Air-borne Nitrogenous Material and other Plant Nutrients (Dr A T Wilson), 99
Ocean (Atlantic), and adjacent Waters The Hydromedusae of the (P L Kram[illegible]), (*Dana* Report No 46), *review* by J H Fraser, 300
Ocean (North Atlantic) Polar Front Survey in the, 1180
Ocean (Pacific) Evidence of a South Equatorial Countercurrent in the (Joseph L Reid, jun), 209
Ocean (western Pacific Ocean and eastern Indian) Oceanographic and Geophysical Investigation of the (Scripps Institution of Oceanography), 24
Oceanic Areas (Continental and) Depth of Isostatic Compensation and Mohorovičić Discontinuity, etc, in (J N Nanda), 629
Oceanographic Congress International (Dr G E R Deacon), 1605
Oceanographic Survey of the Ross Sea (J S Bullivant), 422
Oceanography Apparatus and Methods of (Dr H Barnes), Part I, Chemical, *review* by F A J Armstrong, 299
Bedford Institute of 769
Canadian Institute of, 769
Chemical, *review* by F A J Armstrong, 299
Oceanography, Scripps Institution of Oceanographic and Geophysical Investigation of the western Pacific Ocean and the eastern Indian Ocean, 24
Oceans Plants on Land and in the (Dr W R G Atkins), B A 46
Ochoa, Prof S Nobel Prize for Medicine for 1959 divided between Prof A Kornberg and, 1021 work of, 1021
O'Connell J E A U S Army Neurosurgery in the Second World War, *review*, 1676
O'Connor Cecilia M (edited by G E W Wolstenholme and) Ciba Foundation Symposium on Medical Biology and Etruscan Origins, *review* by Madeleine Smith, 1348
Octopus Kingdom of the (Frank W Lane), *review* by Anna M Bidder, 218
Ocular Fluids (Cerebrospinal and), and Tissues of the Foetal and Adult Sheep Inositol Concentration in the (D A Nixon), 906
Odaka, Prof Takeshi, and Watanabe, Tadashi Transformation Reaction of Pneumococci in the Absence of Serum Factor, 471
Odd-Numbered Carbon Fatty Acids from Propionate Production of, by Mice (Prof S B Tove), 1647

Olympic Games (1964)—Prof Ryotaro Azuma B A 14
Ombrogenous Peats Occurrence of *Schoenus nigricans* L on (D J Bellamy), 1590
O'Moore, Dr L B Appointed chief of the Animal Production Division of An Foras Taluntais (The Agricultural Institute), Dublin, 29, work of, 29
'On' and 'Off'-Responses of the Olfactory Epithelium (Dr S F Takagi and Dr T Shibuya), 60
Onchospheres Infection of Cattle with *Cysticercus bovis* by the Injection of (G Froyd and M C Round), 1510
Oner, Dr N, and others Sugars of the Glycoside of the Root of *Marsdenia erecta* R Br, 1319
Ongul Islands in the Antarctic Natural Remanent Magnetization of Pre-Cambrian Gneiss of (T Nagata and Y Shimizu), 1472
Onion Roots Nuclear Deoxyribonucleic Acid Content and Endopolyploidy in the Meristem of (D Srinivasachar), B A 80
Onions Auxin and the Bulbing of (Dr J E Clark and Prof O V S Heath), 345
Onium Compounds in Brain Tissue Presence of certain, following Intravenous Administration to Rats (Prof Ruth R Levine), 1412
Ono, S, and Hagen, Prof P Pyridoxal Phosphate, a Coenzyme for Histidine Decarboxylase, 1143
Onsager, Prof Lars Co-operative Phenomena, 1195
Onset of Seed Dormancy Prevention of the, by Gibberellic Acid (Dr M Black and J M Naylor), 468, *erratum*, 857
Ontario Research Foundation Annual Report for 1958, 865
Ontario Veterinary College New Medical-Surgical Building of the, 695
Onwumechilli, Dr C A Possible Asymmetry in the Daily Range of the Geomagnetic Vertical Intensity around the Magnetic Equator, 51
Oocytes of some Fishes Development of the Yolk Nucleus in the (Prof A Stolk), 1746
Open Sea The—its Natural History (Sir Alister Hardy), Part 2, Fish and Fisheries, with Chapters on Whales, Turtles and Animals of the Sea Floor, *review* by S M Marshall, 666
Operations (Linear), and Classical Analysis, *review* by Prof L S Goddard, 1763
Operations Research Mathematical Methods of (Thomas L Saaty), *review* by Prof L S Goddard, 1763
  Mathematics and, *review* by Prof L S Goddard, 1763
Operators Linear (Nelson Dunford and Jacob T Schwartz), Part I, General Theory, *review* by Prof L S Goddard, 1762
Ophitron The (General Electric Co Ltd), 594
Ophiuroids Carrion-Eating by (A K Nagabhushanam and J S Colman), 285
Opossum (Brush-tailed), *Trichosurus vulpecula* in New Zealand Bionomics of the (R I Kean), 1388
Opsonins as Determinants of Survival in Intraperitoneal Infections of Mice (Dr C R Jenkin and Prof D Rowley), 474
Optical Activity of Stercobilin and *d*-Urobilin (Prof C H Gray, P M Jones, Dr W Klyne and Dr D C Nicholson), 41
Optical Properties of Semi-Conductors (Dr T S Moss), *review* by Dr R A Hyman, 1754
Optical Rotatory Power of Collagen (Dr R E Burge and R D Hynes), 1562
Optics, Classical and Modern, *review* by Dr J E Geake, 130
Optics (Classical) Concepts of (Dr John Strong), *review* by Dr J E Geake, 130
Optics (High-Resolution Fibre), using Sub-Micron Multiple Fibres (Dr N S Kapany), 881
Oral Tissue (Rat) Effect of Vitamin D on the Respiration of (L Zar and Prof J T Irving), 1410
Oravec, A A, and others Effect of the Potassium Salt of Gibberellic Acid on the Growth and Reproduction Rate of *Paramecium multimicronucleatum*, 1405
Orbit Observations (Satellite) Air Density in the Upper Atmosphere from (Dr G V Groves), 178
Orbits (Satellite) Density of the Upper Atmosphere from Analysis of—Further Results (D G King-Hele), 1267
Orchard Science, *review* by Prof H W Miles, 487
Orchids of Peru (C Scheinfurth), 409
Ordinary Differential Equations (Dr Wilfred Kaplan), *review* by Prof T A A Broadbent, 6
Oreopithecus A Contribution to the Odontology of (P M Butler and J R E Mills), 682
Orford, N W An Unusual Breeding Habitat of the Linnet, 650
Organ, R M Chemistry in the Preservation of Antiquities, 586
Organ Content and Adrenal Medullary Secretion of Catechol Amines Effects of 1,4-Dihydrazinophthalazine on (M Bygdeman and L Stjärne), 1646
Organ Culture Cell and (British Association for the Advancement of Science, Section I (Physiology and Biochemistry), Discussion on), 935
Organ Cultures of Total Mammary Glands of the Mouse (Dr F J A Prop), 379
Organic Acids Two-Dimensional High-Voltage Paper Electrophoresis of Amino- and other (Dr D Gross), 1298
Organic Acids in Rose Hips (Dr G A D Jackson and S E Y Barakat), 1953
Organic Chemistry Progress in (edited by Dr J W Cook), Vol 4, *review* by Dr K H Overton, 1439
Organic Compounds Nitration of Hydrocarbons and other (A V Topchiev), translated from the Russian by Catherine Matthews, *review* by Prof M J S Dewar, 577
  Oxidation of (Symposium on, at Queen Mary College, London), 326
  Some Remarks on the Thermodynamic Properties of (Prof George S Parks), 1194
Organic Compounds in the Blood Post-Exposure Analysis of, by a Rapid Infra-red Technique (Dr R D Stewart, D S Erley, T R Torkelson and C L Hake), 192
Organic Compounds labelled with Isotopes of the Halogens, Hydrogen, Nitrogen, Oxygen, Phosphorus and Sulfur (Arthur Murray, III, and D Lloyd Williams), (Organic Syntheses with Isotopes, Part 2), *review* by Dr G Eglinton, 1830
Organic Compounds (Cyanocarbon) Histochemical Use of the (Prof John F Lhotka), 1153
Organic Diluents Effect of Emulsifiers and, in Soil Insecticide and Nematicide Formulations (F T Phillips), 1512
Organic Matter of a Podzol Soil Oxygen-containing Functional Groups in the (J R Wright and M Schnitzer), 1462
Organic Matter (Soil) Titration Curves of (R S Beckwith), 745
Organic Molecules Steric Effects in, *review* by Dr G Eglinton, 1522
  An X-Ray Study of Rigid-Body and Internal Vibrations of (Dame Kathleen Lonsdale and Dr H Judith Milledge), 1545
Organic-Phosphorus Compounds (Bradford Institute of Technology Symposium on), 1688
Organic Reactions Tracer Applications for the Study of (John G Burr, Jr), *review* by Dr A I Scott, 1902
Organic Syntheses Use of Isotopes in, *review* by Dr G Eglinton, 1830
Organic Syntheses with Isotopes (Arthur Murray, III, and D Lloyd Williams), Part 2, Organic Compounds labelled with Isotopes of the Halogens, Hydrogen, Nitrogen, Oxygen, Phosphorus and Sulfur, *review* by Dr G Eglinton, 1830
Organic Synthesis, Vol 37, 1957 (edited by James Cason), Vol 38, 1958 (edited by John C Sheehan), *review* by Prof John Read, 134
Organism (Animal) Thiosulphate Metabolism in the (Prof Boleslaw Skarzynski, Tadeusz W Szczepkowski and Miroslawa Weber), 994
Organisms (*Brucella*) Bacteriophage Typing applied to Strains of (Prof G C van Drimmelen) 1079
Organisms (Fossil Calcareous) Determination of the Temperatures of Ancient Seas by the Measurement of the Oxygen Isotopes Ratio in (Y A Birstein), 1025
Organization Industrial Technical (Institute of the Rubber Industry Conference on), 322
Organization for European Economic Co-operation First Meeting of the International Board of Management of the *Dragon* Project, 24
  Dragon Project of the, 24, 942
Organization for European Economic Co-operation (European Nuclear Energy Agency) Second Fuel Charge for the Boiling Heavy Water Reactor Project at Halden, Norway, 1844
Organization for European Economic Co-operation (European Productivity Agency) Project 335, Fitting the Job to the Worker, a Survey of American and European Working Conditions in Industry, 422
Organization of Scientific and Technological Research in Britain, 1255
Organization (Functional), of the Respiratory Chain in Liver Mitochondria (Dr Tokuji Kimura and Dr Thomas P Singer), 791
Organophosphorus Poisoning in the House-Fly Esterase Inhibition and (Dr D Stegwee), 1253
Organs Artificial—Biological Applications (Prof A Hemingway), B A 45
Organs (Fungal Arbuscular) Production of, on Laboratory Media (G A Atkins), 1738
Orientation of Animals to Polarized Light (Dr H Kalmus), 228
'Origami', the Ancient Japanese Art of Paper-folding, 770
Origin of the Deep Sea Fauna Palaeo-temperatures and the, 1025
Origin of Species Genetics and the (British Association for the Advancement of Science, Sections D (Zoology) and K (Botany), Symposium on), 587
  The Young Darwin and the (Prof C F A Pantin), 1533
Origin of the Worzel Deep-Sea Ash (Edward Anders and Dr D Nelson Limber), 44
Origin and Dispersal of Flowering Plants (Prof A S Boughey), 1200
Origin (Biological), and Configuration of 10-Hydroxy-Δ^2-decenoic Acid (Dr S A Barker, Dr A B Foster, D C Lamb and Dr L M Jackman), 634
Origin (Telluric), of the Whistler Medium (Dr Francis S Johnson), 1787
Origins of Love, 1203

Origins (Etruscan) Ciba Foundation Symposium on Medical Biology and (edited by G E W Wolstenholme and Cecilia M O'Connor), *review* by Madeleine Smith, 1348
Origins and Methods of the Sciences, *review* by Prof A V Hill, 4
O'Rourke, Prof Fergus J (Barry, J M, and) Species Specificity of Fish Mucus, 2039
Osmond, D G Appointed lecturer in anatomy at the University of Bristol, 322
Oster, Prof Gerald, and Broyde, Dr Barret A Sensitive Chemical Dosimeter for Ionizing Radiation, 545
Ostling, S G (Marsden, N V B, and) Accumulation of Dextran in Human Red Cells after Haemolysis, 723
Ostrinia nubilalis (Hbn) (Lepidoptera Pyralidae) Chemical Changes associated with Diapause in the European Corn Borer (J A Mutchmor and J H Maruzek), 1077
Oth, Andre (Castermans, Andre, and) Transplantation Immunity—Separation of Antigenic Components from Isolated Nuclei, 1224
Otsuji, Dr Nozomu, and others Induction of Phage Formation in the Lysogenic *Escherichia coli* K-12 by Mitomycin C, 1079
Outbreaks Forecasting Locust (Dr D L Gunn and P M Symmons), 1425
Outbreaks of Plant Diseases caused by Arabis Mosaic Virus Rôle of a Dagger Nematode (*Xiphinema* sp) in (Dr B D Harrison and Dr C H Cadman), 1624
Outbursts (Radio) Association of, with Solar Flares (L D de Feiter, A D Fokker and J Roosen), 805
Outer Atmosphere Directional Observations of Radio Noise from the (G R A Ellis and D G Cartwright), 1307
  Spaced Observations of Radio Noise from the (G R A Ellis, D G Cartwright and J R V Groves), 1391
Output (Carbon Dioxide), of Individual Insects The Infra-Red Gas Analyser as a Means of Measuring the (Dr A G Hamilton), 367
Output (Cardiac), in Horses (E W Fisher and R G Dalton), 2020
Ova (Rabbit) Fertilization of, *in vitro* (Dr M C Chang), 466
Ovarian Transplantation (Interstrain), in Lethally Irradiated Mice after Bone Marrow Therapy (Prof W St Amand and L H Smith), 1503
Ovariectomized Ewe Seasonal Changes in the Œstrous Response by the, to Progesterone and Œstrogen (Prof J I Raeside and M F McDonald), 458
Ovariectomized Ewes Maintenance of Pregnancy in, by means of Progesterone (N W Moore and L E A Rowson), 1410
Ovaries of Mice translated to the Liver, Kidney and Adjacent Tissues Tumourigenesis in (Dr Mary J Guthrie), 916
Ovaries (Inflorescences, Flowers and), of an Apomict, *Aerva tomentosa* Forsk *In vitro* Culture of the (Prem Murgai), 72
Ovariole Number in the Progeny of the Migratory Locust Maternal Control of (F O Albrecht, M Verdier and R E Blackith), 103
Ovary of the Rat Site of Production of Œstrogen in the (Dr Bengt Falck), 1082
Ovenall, Dr Derick W Electron Paramagnetic Resonance at 4 2°K of γ-Irradiated Polymethyl Methacrylate and Polymethacrylic Acid, 181
Overgaard-Hansen, Dr Kay, and Lassen, Dr Ulrik V Active Transport of Uric Acid through the Human Erythrocyte Membrane, 553
Overseas Distribution of British Books and Films, 1448
Overseas Information Services British, 1692
Overseas Research Council Establishment of the, B A 14
Overton, Dr K H Progress in Organic Chemistry, *review*, 1439
Ovine Abortion due to Toxoplasmosis (Dr J K A Beverley and W A Watson), 2041
Owen, W S, and others Atomic Mechanisms of Fracture (Tensile Fracture of Mild Steels), 325
Oxalate (Lead) Thermal Decomposition of Irradiated (P J Herley and E G Prout), 445
Oxidase (Indoleacetic Acid) A Possible Rôle of, in Crown Gall Tumour Induction (Dr Jacques Lipetz), 1076
Oxidase (Monoamine), in the Developing Rat Brain Histochemical Study of (Nobuo Shimizu and Nogaaki Morikawa), 650
Oxidase (Pyridine Nucleotide), from Heart Sarcosomes Corticosterone Inhibition of (P K Jensen), 451
Oxidase (Tryptophan Peroxidase-), in *Drosophila melanogaster* Genetic Control of (Corrado Baglioni), 1084
Oxidase (Tryptophan Peroxidase-) Enzyme System Specificity of the (Dr R H Marchant), 1711
Oxidase Activity in the Mitochondria of the Human Heart Histochemical Localization of (Dr M S Burstone), 476
Oxidase Activity (Cytochrome), in the Sea Urchin Egg An Inhibitor of (Rachele Maggio and Alberto Monroy), 68
Oxidase Activity (Xanthine) A Rapid and Sensitive Method for the Determination of, using the Oxygen Electrode (Metry Bacila and Dr Gilberto G Villela), 1394
Oxidase Apo-Protein (D-Amino-Acid) Binding of the Sulphydryl Group in, with Flavin Adenine Dinucleotide (Dr Kunio Yagi and Takayuki Ozawa), 1227
Oxidase Apo-Protein (D-Amino-Acid), and Benzoate Change of Absorption Spectrum of Flavin Adenine Dinucleotide by its Binding with both (Dr Kunio Yagi, Takayuki Ozawa and Minoru Harada), 1938
Oxidase Systems (*d*-Amino-Acid) Effect of Chlorpromazine upon Isolated (Dr Andrew Lasslo and Anne L Meyer), 1922
Oxidation of Ascorbic Acid Presence in Rose Hips of Substances Inhibiting the (Dr G A D Jackson and R B Wood), 902
Oxidation of Ethyl Alcohol by a Mixture of Hydrogen Peroxide and Ferric Salts (Dr Mordechai L Kremer), 720
Oxidation of Krebs Cycle Acids by Apple Tissue (M D Hatch, J A Pearson, A Millerd and R N Robertson), 506
Oxidation of Organic Compounds (Symposium on, at Queen Mary College, London), 326
α-Oxidation of Indoleacetonitrile (H F Taylor and Prof R L Wain), 1142
Oxidation (Aerobic), of D-Xylose Glycolaldehyde Trapped from, by *Torulopsis utilis* (V Bolcato and G Leggiero), 1318
Oxidation (Diphosphopyridine Nucleotide) Inhibition of Reduced, by Ammonia (R T Wedding and H M Vines), 1226
Oxidation (Fat) and Haematin Systems in Cheese (Tallowy Discoloration in Cheddar Cheese), (C G Rammell), 1296
Oxidation (Fat), and Trace Metals in Cheese (Tallowy Discoloration in Cheddar Cheese), (F Bishop), 1295
Oxidation (Pyrogallol), in the System Iron(III)–Cellulose Reaction-directing Properties of Non-enzymic Macromolecules— (N S Goodmand and S M Siegel), 53
Oxidation (Selective), of Tetrapyrrole Side-Chains (J Barrett and P Clezy), 1988
Oxidation and Reduction Principles of (Dr A G Sharpe), *review* by Dr V Gold, 1902
Oxidations stimulated by Dinitrophenol Need for Inorganic Phosphate in (P Borst and Prof E C Slater), 1396
Oxidative Dissimilation of *p*-Aminobenzoic Acid by *p*-Aminosalicylic Acid Antagonism of the (Prof Norman N Durham and Jerry S Hubbard), 1398
Oxidative Phosphorylation Protein Synthesis and, in Isolated Rat Liver Mitochondria (P J Reis, J L Coote and T S Work), 165
Oxidative Phosphorylation in *Azotobacter vinelandii* Fractionation of the System bringing about (H G Hovenkamp), 471
Oxidative Phosphorylation in Guinea Pig Heart Sarcosomes Reversal by Acetylcholine of the Inhibition by Thyroxine of (Heitor Medina and Metry Bacila), 1066
Oxidative Phosphorylation (Mitochondrial), in Intact Ascites Tumour Cells Efficiency of the (Dr P Emmelot and C J Bos), 2024
Oxidative and Phosphorylative Activities of Cytoplasmic Particles from Plant Tissue Cultures (Taiki Tamaoki, Prof A C Hildebrandt, A J Riker, R H Burris and Bunji Hagihara), 1491
Oxide (Cobaltic) Pellets Effect of, on the Vitamin B_{12} Content of Ewes' Milk (L I Hart and E D Andrews), 1242
Oxide (Deuterium) Culture of Algae and other Micro-organisms in (Henry L Crespi, Sylvia M Archer and Joseph J Katz), 729
  Effects of, on the Synthesis of T5 and T7 Bacteriophages (E L Rothstein, L A Manson, R Hartzell, jun, and David Kritchevsky), 1167
  Saliva-Serum Ratios of, after Administration of Heavy Water (Nan Taggart and Dr F E Hytten), 457
Oxide (Phenazine Di-*N*-), as a Carcinostatic Agent (Arthur Furst, Claire Klausner and Windsor C Cutting), 908
Oxide (Zinc) Effect of Gamma-Radiation on the Synthesis of Methanol over (T I Barry and R Roberts), 1061
Oxide Cathode Current Fluctuations in the (Margaret Chisholm and Dr L Jacob), 1058
Oxides (Amine) Prophylactic Effects of, in Radiation Injury in Mice (Dr Thomas J Haley, Dr Anna M Flesher and Dr Nathan Komesu), 198
Oxine and its Sulphonic Acid Stability of Metal Complexes of (Prof Adrien Albert and Prof Reino Nasanen), 449
Oxygen Effect of, on Endogenous Metabolism of a Respiratory-deficient Brewer's Yeast (V E Chester), 1956
Oxygen in Irradiated Solutions Aromatic Ring Opening in the Presence of (Israel Leoff and Gabriel Stein), 901
Oxygen-containing Functional Groups in the Organic Matter of a Podzol Soil (J R Wright and M Schnitzer), 1462
Oxygen (High-Pressure), and Radiotherapy, 94
Oxygen (Molecular) Incorporation of, in Bacterial Cells utilizing Hydrocarbons for Growth (E R Leadbetter and J W Foster), 1428
Oxygen Consumption (Increased), in Rats during Irradiation (Dr A Vacek), 197
Oxygen Electrode A Rapid and Sensitive Method for the Determination of Xanthine Oxidase Activity using the (Metry Bacila and Dr Gilberto G Villela), 1394
Oxygen Isotope Variations in Antarctic Snow Samples (Dr R Gonfiantini and Prof E Picciotto), 1557
Oxygen Isotopes Ratio in Fossil Calcareous Organisms Determination of the Temperatures of Ancient Seas by the Measurement of the (Y A Birstein), 1025
Oxygen Tension Effect of, on Haem and Porphyrin Biosynthesis (J E Falk, R J Porra, Ann Brown, F Moss and Helen E Larminie), 1217
Oxygen Uptake of Glycerol-extracted Muscle Fibres (James A Wilson, Paul R Elliott, Prof Karl F Guthe and David G Shappirio), 1947
Oxytocic and Pressor Activity Peptides with, obtained from Acidified Rat Serum (Prof H Croxatto, T Pereda and R Mellada), 1496
Oxytocin A New Crystalline Salt of (Dr Miklos Bodanszky and Prof Vincent du Vigneaud), 981, *erratum*, 1777
  Specific and Sensitive Assay Method for Vasopressin and, using Glass-Paper Chromatography (Akira Arimura and Prof Joseph F Dingman), 1874
Oxytocin and Vasopressin Gel Filtration as a Method for Purification of Protein-bound Peptides as exemplified by (E B Lindner, Dr A Elmqvist and Dr J Porath), 1565
Oxytocin (Arginine Vasotocin and), in Neurohypophysial Extracts from Cold-blooded Vertebrates Pharmacological Evidence for the Presence of (Active Principles for the Neurohypophysis of Cold-blooded Vertebrates), (Wilbur H Sawyer, Robert A Munsick and Prof H B van Dyke), 1464
O-Phosphorylated Analogue Action of Trypsin on α-Carbethoxy-L-lysyl-L-serylglycine and its (Dr D Theodoropoulos, H Bennich, G Folsch and Prof O Mellander), 187
O-Phosphorylated and Unphosphorylated Peptide-Substrates suitable for Tryptic Action (Dr D Theodoropoulos, H Bennich and Prof O Mellander), 270
Oyolu, C *Capsicum* Species of West Africa, 1163
Ozawa, Takayuki, and others Complex Formation of Chlorpromazine with Flavins, 982
  Change of Absorption Spectrum of Flavin Adenine Dinucleotide by its Binding with both D-Amino Acid Oxidase Apo-Protein and Benzoate, 1938
  Occurrence of Polynucleotide Phosphorylase in Atypical Epithelioma of Rat 1939
Ozawa, Takayuki (Yagi, Dr Kunio, and) Binding of the Sulphydryl Group in D-Amino-Acid Oxidase Apo-Protein with Flavin Adenine Dinucleotide, 1227
Ozeki, H, and others Production of Colicine by Single Bacteria, 337

PACAULT, A Thermodynamics (Experimental Thermochemistry), 1607
Pace, Dr J (McDermott, E E, and) Extraction of the Total Protein from Wheaten Flour in the Form of Soluble Derivatives, 546

Pachytene in *Puccinia kraussiana* Cooke, on *Smilax kraussiana* (Dr Eva Sansome), 1820
Pacific Ocean Evidence of a South Equatorial Countercurrent in the (Joseph L Reid, jun), 209
Pacific Ocean (western), and eastern Indian Ocean Oceanographic and Geophysical Investigation of the (Scripps Institution of Oceanography), 24
Pacific Sardine *Sardinops caerulea* (Girard) Behavior and Reactions of the, under the Influence of White and Colored Lights and Darkness (Dr A S Loukashkin and Dr N Grant), 865
Packaging New Techniques in, *review* by Dr V G W Harrison, 1437
  Pressurized–Aerosols (A Herzka and J Pickthall), *review* by Dr V G W Harrison, 1437
Packed and Capillary Gas Chromatographic Columns Comparison of Efficiency and Separating Power of (Dr J H Purnell), 2009
Packer, Dr D M , and others Lyman-Alpha Photographs of the Sun, 8
Padmavathi, P B (Seshachar, Prof B R , and) Conjugation in *Spirostomum*, 1510
Paecht, Dr Mella, and Katchalsky, Prof A Spontaneous De-amination of Amino-acid Phosphates under Physiological Conditions, 1489

Page, S G Awarded an Overseas Scholarship by the Royal Commission for the Exhibition of 1851, 409
Paget-Tomlinson, E W Models of Marine Engines at the Liverpool Public Museums, 1534
Pain, H J Thermonuclear Energy (Shock Waves in Gases), 1017
Pain (Dental) Association between Colour of the Iris of the Eye and Reaction to (Dr Philip R N Sutton), 122
Paint, Colour and Varnish Manufacturers (British), Research Association of Retirement of Dr L A Jordan as founder-director, 852
Pakistan Planning in (Political and Economic Planning, Broadsheet No 433), 504
Pal, R , and Krishnamurthy, B S Induced Mutations of X-Ray Irradiations in *Culex fatigans* Wied (1828), 658
Palade, Dr G E Comparative Studies in Ultrastructure (Microsomes and Ribonucleoprotein Particles), 1445
Palaeomagnetic Studies of Cenozoic Volcanic Rocks in New Zealand (Dr D S Coombs and Dr T Hatherton), 883
Palaeomagnetism of some Dolerite Intrusions from the Theron Mountains and Whichaway Nunataks, Antartica (D J Blundell and P J Stephenson), 1860
Palaeomagnetism in some Norwegian Sparagmites and the Late Pre-Cambrian Ice Age (W B Harland and D E T Bidgood), 1860
Palaeomagnetism and Rotation of Newfoundland (Dr P M Du Bois), B A 63
Palaeontological Journal (published in the Russian language by the Academy of Sciences of the U S S R), 410
Palaeontology Recent Developments and Trends in (Prof O M B Bulman), B A 42
Palaeotemperatures and the Origin of the Deep Sea Fauna, 1025
Palay, Dr S A Comparative Studies in Ultrastructure (The Fine Structure of Vertebrate Neurons and their Processes), 1446
Palearctic Fauna The Birds of the—Order Passeriformes (Dr Charles Vaurie), *review* by Sir Landsborough Thomson, 666
Palm The Coconut (Dr K P V Menon and Dr K M Pandalai), *review* by Prof C W Wardlaw, 1760
Palmeira, R (Sarabhai, Dr V , and) North–South Anisotropy and Anticipatory Increase of Intensity associated with the Cosmic-Ray Storm of February 11, 1958, 1204
Palmen, Prof Erik Herbert Elected a member of the Geophysics and Meteorology Section of the Leopoldina Academy of Natural Sciences, 595
Palmer, Dr H P International Conference of Radio Astronomers, *review*, 1755
Palmer, P F (Jackson, Dr J S , and) Special Ceramics (Apparatus designed for Hot-pressing small specimens of Refractory Hard Materials to High Density), 1116
Palmer, R W , and others Ionization Phenomena in Gases (Recent Measurements on the Growth of Pre-breakdown Ionization Currents for Air), 1354
Palmitic Acid Biosynthesis of Corynomycolic Acid from Two Molecules of (Dr Mireille Gastambide-Odier and Prof E Lederer), 1563
Pampfer, E (Meyer, J , and) Nitrogen Content of Rain Water collected in the Humid Central Congo Basin, 717
Panagglutinin Production of an Agglutinating Auto-Antibody, Active upon Tanned Erythrocytes in the Rabbit (P O Hubinont, P Ghysdael and O Thys), 1250
Panbiogeography, or an Introductory Synthesis of Zoogeography, Phytogeography and Geology (Dr Léon Croizat), Vol 1, The New World , Vol 2a, The Old World , Vol 2b, The Old World (continuation), *review* by Prof Ronald Good, 924
Pancreas Slices Effect of Acetylcholine on the Incorporation of Radiophosphorus into the Phosphatido-Peptide Fraction of (Prof C G Huggins), 1412
Pandalai, Dr K M , and Pillai, R V Albinism in Coconut Seedlings, 1163
Pandalai, Dr K M (Menon, Dr K P V , and) The Coconut Palm, *review* by Prof C W Wardlaw, 1760
Pandya, J R (Pandya, Dr N S , and) Etching of Calcite, 894
Pandya, Dr N S , and Pandya, J R Etching of Calcite, 894
Panicum antidotale Floral Malformation in, caused by a Species of *Eriophyes* (Dr V M Desai and Dr M J Thirumalachar), 1586
Panonychus citri (McG) A Suspected Virus Disease of the Citrus Red Mite (Dr Kenneth M Smith, G J Hills, F Munger and J E Gilmore), 70
Panov, Prof Dimitri Silver Medal of the City of Paris awarded to I I Basilewsky for, B A 16
Pantin, Prof C F A Elected president for 1959-60 of the Linnean Society of London, B A 16
  Biology and Physics, 1194
  The Young Darwin and the 'Origin of Species', 1533
Panton, C J Appointed to a Phillips Petroleum Co research studentship at University College of North Staffordshire, 322
Pantothenic Acid Deficiency and Ubiquinone Levels in Rat Liver Mitochondria (A S Aiyar, G A Sulebele, D V Rege and A Sreenivasan), 1867
Papain-injected Rabbits Cartilage Homografts in (M B L Craigmyle), 1243
Papavassiliou, Dr J Production of Colicines in Simmons's Citrate Agar, 1339
Paper A Two-Dimensional System for the Separation of Amino-Acids and Peptides on (Virginia Richmond and Brian S Hartley), 1869
  Use of Porter–Silber and Schiff Reagents as Spot Tests for Steroids applied on, and their Application to the Study of Rat Adrenal Lipids (Dr Marion K Birmingham), B A 67
Paper Chromatograms Autoradiography of Tritium-labelled Compounds on (Dr A W Rogers), 721
  Detection of 2 4-Dinitrophenyl Amino-Acids on (Dr A H Maddy), 1397
Paper-Chromatographic Method for the Determination of Suitable Buffer Systems for Countercurrent Distribution (Andrzej Waksmundzki and Edward Soczewinski), 977
Paper Chromatographic Method (New Two-Dimensional), applied to the Separation of Amino-acids (C S Knight), 1486
Paper Chromatographic Separation of Components of Rose Bengal Labelled with Iodine-131 (Fausto W Lima and Rômulo R Pieroni), 1065
Paper Chromatography Applications of, to Systematics—Recombination of Parental Biochemical Components in a *Baptisia* Hybrid Population (Dr R E Alston and Dr B L Turner), 285
Paper Chromatography of Cell Fragments (A T Wilson), 2016
Paper Chromatography of Corticosteroids at Room Temperature (J Tuzson), 1937
Paper Chromatography (Quantitative), based on the Sub-Micro Titration of Derivatives containing Nitro Groups (L Blom and J Caris), 1313
Paper Chromatography and Paper Electrophoresis A Manual of (Richard J Block, Emmett L Durrum and Gunter Zweig), second edition, *review* by Dr R Consden, 1436
Paper Electrophoresis A Manual of Paper Chromatography and (Richard J Block, Emmett L Durrum and Gunter Zweig), second edition, *review* by Dr R Consden, 1436
Paper Electrophoresis of Hippopotamus Haemoglobin (D H L Rollinson and G D Lomax), 1653
Paper Electrophoresis of Trypanosomal Extracts (Dr Robert S Desowitz), 986
Paper Electrophoresis (High-Voltage), of Aliphatic Amines and related Compounds (Dr D Gross), 1633
Paper Electrophoresis (Two-Dimensional High-Voltage), of Amino- and other Organic Acids (Dr D Gross), 1298
Paper Electrophoretic Patterns obtained by Paraffin-Oil Fixation (H Waldmann-Meyer), 1567
Paper-folding Exhibit at Cooper Union's Museum for the Arts of Decoration, 770
Papermaking Fibres Fundamentals of—Transactions of the Symposium held at Cambridge, 1957 (edited by Francis Bolam), *review* by Dr Julius Grant, 1011
Papierchromatographie (Dr Friedrich Cramer), vierte Auflage, *review* by Dr R Consden, 1436
Papierchromatographie Handbuch der (herausgegeben von Dr I M Hais und Dr K Macek), Band I, Grundlagen und Technik, *review* by Dr R Consden, 1436
Para-Isomers (*Meta*- and), of the Xylenes, Cresols and Toluidines by Gas Solid Chromatography Separation of the (M A Hughes, D White and Prof A L Roberts), 1796
Parabiosis Tolerance to Skin Homografts of Adult Mice after (Dr B A Rubin), 205
Parabiotic Mice Skin Homografts in (Anna Skowron-Cendrzak and Barbara Konieczna-Marczynska), 1590
Paraffin-Detergent Interactions in Aqueous Systems Solid State Rheological Study of the Mechanism of (F J Radd and L H Crowder), 443
Paraffin-Oil Fixation Paper Electrophoretic Patterns obtained by (H Waldmann-Meyer), 1567
Paraffin-Wax Fraction from Tobacco Leaf and Tobacco Smoke Composition of a (Dr W Carruthers and Dr R A W Johnstone), 1131
Paralysing Activity of *d*-Tubocurarine Chloride Increase by Chlorothiazide of the (Prof W Ferrari, G L Gessa and G Sangiorgi), 1235
Paralysis (Immunological), and Unresponsiveness Specific Inhibition of Antibody Formation during (Dr E Sercarz and Dr A H Coons), 1080
Paramagnetic Resonance (Electron), at 4 2° K of λ-Irradiated Polymethyl Methacrylate and Polymethacrylic Acid (Dr Derick W Ovenall), 181
Paramecium multimicro-nucleatum Effect of the Potassium Salt of Gibberellic Acid on the Growth and Reproduction Rate of (A A Oravec, N G Strovilas, J L Beal and Arthur Tye), 1405
Parasitic Animals (Dr Geoffrey Lapage), second edition, *review* by Dr C A Wright, 1011
Parasitic Fungi British (W C Moore), *review* by Dr Lilian E Hawker, 1977
Parasitism in Gram-Positive Bacteria Characters associated with (Dr K A Bisset), B A 29
Parasitism (Avian Brood) Prolactin in the Cowbird's Pituitary in relation to (Prof E O Hohn), 2030
Parathyroid Tissue Fragments Maintenance of, on Agar Substrates (Dr John H Wallace, Dr George J Hill, Jean M McCarthy and Dr John R Brooks), 1734
Parbrook, Dr H D Appointed to a senior lectureship in physics–acoustics in the University of Liverpool, 410
Parc National de la Garamba, Exploration du Mission H de Saeger, Fasc 9, Écologie et Biologie des Grands Mammifères (Primates, Carnivores, Ongulés), (Jacques Verschuren), 155
Pardee, A B Cytoplasmic Inheritance (Genotypic Change and the Rate of Enzyme Induction), 1012
Parenchyma (Lacunal), of *Mimosa pudica* Changes in the, in Diurnal and Nocturnal Conditions (Hideo Toriyama), 737
Parenchymatous Liver Cells Some Enzymatic Properties of Suspensions of (Dr Keith S Henley, Ole Sorensen and H Marvin Pollard), 1400
Parenchymatous Spleno-Pulmonary Venous Anastomosis Establishment of (Dr George R Walker, Dr Paul Field and Dr Patrick E Conen), 703

Parental Biochemical Components in a *Baptisia* Hybrid Population Applications of Paper Chromatography to Systematics—Recombination of (Dr R E Alston and Dr B L Turner), 285
Parenti, Dr M A, and others Sulphonamides with Diuretic Activity, 1711
Pargeter, A R At the Annual General Meeting and Conference of the Mathematical Association (Plaited Polyhedra), 33
Paris Symposium on Radio Astronomy, 1958 (edited by Ronald N Bracewell), *review* by Dr H P Palmer, 1755
Paris (City of) Medal Awards, B A 16
Park, D The Cellular Slime Molds, *review*, 1976
Park, R Appointed lecturer in civil engineering at the University of Bristol, 322
Park (Banff National), Alberta Mammals of (A W Banfield), 594
Parker, Dr C A Electron Bombardment Floating-zone Melting and Allied Electron Bombardment Techniques (Present Methods for Analysing High-purity Materials), 692
Parker, Dr C A, and Rees, W T Photolysis of Thionine in Rigid Medium—Measurement of Spectrofluorimetry, 1223
Parker, E R Atomic Mechanisms of Fracture (Cleavage Fracture in Tension of Single Crystals of Magnesium Oxide), 325
Parker, K D, and Rudall, K M Biological Fibres, B A 26
Parker, Prof Robert L International Mineralogical Association—First General Meeting, 1909
  Alpine Mineral Fissures, 1909
Parker, W Appointed to a research fellowship in chemistry in the University of Glasgow, 1915
Parker, W G, and Ruston, G Chemistry of Propellants (Merits of Utilizing High-Energy Propellants), 778
Parkes, Dr A S Dietary Factors in the Homograft Reaction, 699
  Biological Problems arising from the Control of Pests and Diseases, 1102
Parkes, Dr E W Appointed to the new chair of engineering in the University of Leicester, 938, work of, 938
Parkhouse, R M E, and others A Haemoglobin with Unusual Alkaline-denaturation Properties in a Turkish-Cypriot Woman, 1876
Parkin, Michael Retirement from the Department of Glass Technology in the University of Sheffield, 1271, work of, 1271
Parkinson, Joan Effect of Pempidine on the *in vitro* Synthesis of Acetylcholine, 554
Parks, Prof George S Some Remarks on the Thermodynamic Properties of Organic Compounds (Hugh M Huffman Memorial Lecture of Yale University), 1194
Parks, P C Appointed lecturer in aeronautical engineering at the University of Southampton, 1915
Parks (National), and Nuclear Power Stations in Britain, 1005
Parliamentary Responsibility for Science and Technology, 1190
Paronetto, Dr Fiorenzo Interfering Substances in the Determination of Glucosamine Synthesis, 1317
Parotid Tumour Virus (Polyoma Virus) Antibody Status of Mice and Response of their Litters to (Lloyd W Law, Clyde J Dawe, Wallace P Rowe and Janet W Hartley), 1420
Parr, G (Godfrey, J W, and) The Technical Writer, *review* by A L Bacharach, 1749
Parr, H C M *Stomoxys* Control in Uganda, East Africa, 829
Parr, N L, and Martin, G F Special Ceramics (Measurement of Creep at High Temperature), 1116
Parr, N L, and others Special Ceramics (Silicon Nitride—its Preparation, its Properties as an Engineering Material and its Microstructure), 1116
Parr and Smolt Stages of the Atlantic Salmon Sodium Regulation in the Blood of (Prof H J Koch, J C Evans and E Bergstrom), 283
Parrini, L (Tessari, L, and) Glutamic-Pyruvic Transaminase in Rabbit's Long Bones, 904
Parry, J V L (Essen, Dr L, and) An Improved Caesium Frequency and Time Standard, 1791
Parsloe, Guy *Obituary* of Sir William Larke, 21
'Parsnip' Dermatitis (B J Youngman), 594
Parsons, Dr T R, and Strickland, Dr J D H Proximate Analysis of Marine Standing Crops, 2038
Parthasarathy, S, and Bindal, V N Ultrasonic Absorption in Acetic Acid at 450 kc/s by the Calorimetric Method, 631
Parthenocarpy in *Rosa arvensis* Huds Induction of, with Gibberellic Acid (M V Prosser and G A D Jackson), 108
Partial Chemical Characterization of Maize Coleoptile Cell Walls prepared with the Aid of a Continually Renewable Filter (Prof Aleksander Kivilaan, Teofila C Beaman and Robert S Bandurski), B A 81
Partial Differential Equations Numerical Analysis and (George E Forsythe and Paul C Rosenbloom), *review* by Prof T A A Broadbent, 576
Partial Identification of Lysins and Agglutinins in Lymphomatous Mouse Tissue (Dr Eric Ponder and Ruth V Ponder), 819
Partially Distinguishable Coins Heads-Tails Statistics for Two (Gabriel Weinreich), 1825
Particle (Virus) Rotational Friction Coefficients of Models of Tobacco Mosaic Virus and the Size of the (Dr A J Haltner and Dr B H Zimm), 265
Particle Physics (Elementary) Development of Bubble Chambers and some recent Bubble Chamber Results in (Dr D A Glaser), 954
Particle Tracks (Low-Energy) Bubble Counting on (I R Birss), 1474
Particles (Autoradiographed Radioactive) Electron Microscopy of (L A George, II, and G S Vogt), 1474
Particles (Bentonite) Detection of Thyroid Antibodies using (Dr J A M Ager, Dr M S R Hutt and G Smitn), 478
Particles (Cytoplasmic), from Plant Tissue Cultures Oxidative and Phosphorylative Activities of (Taiki Tamaoki, Prof A C Hildebrandt, A J Riker, R H Burris and Bunji Hagihara), 1491
Particles (Elementary) The Physics of (Prof J D Jackson), *review* by P T Matthews, 1677
Particles (Insulating), on Cathode Surfaces—their Effect upon Electrical Discharges (L B Griffiths and P C L Pfeil), 1475
Particles (Titanium Dioxide Pigment) Forces between (James E Latty and Dr W C Clark), 49
Particles (Turnip Yellow Mosaic Virus Nucleoprotein), with Differing Biological and Physical Properties (R E F Matthews), 530
Particles (Zinc Phosphide) Absorption of (Dr A S Curry, Dr D E Price and Dr F G Tryhorn), 642
Particules Détecteurs de (Compteurs et Scintillateurs), Mécanisme et Réalisation (Daniel Blanc), *review* by Dr E B Paul, 1977
Partington, Prof J R *Obituary* of Dr E J Holmyard, 1360
  The National Chemical Laboratory, 1779
  Old Chemistry, *review*, 1900
Partition (Ionic), and Fine Structure in Muscle (Dr Shirley E Simon, 1978
Partition Chromatography Volatile Liquid (Dr Roger S Porter and Dr Julian F Johnson), 978
Partnership for Progress—International Technical Co-operation (Annals of the American Academy of Political and Social Science, May 1959), *review* by R Brightman, 1673
Pascal, Blaise—the Life and Work of a Realist (Ernest Mortimer), *review* by F I G Rawlins, 388
Passage of Insulin through the Wall of the Gastro-intestinal Tract of the Infant Rat (Dr B Mosinger, Z Placer and O Koldovsky), 1245
Passage of Lymphocytic Cells through Cellulose Membrane Filters Relation of Invasive Capacity to (Dr Emma Shelton and Dr Mary E Rice), 479
Passive Immunity in an Insectivore Transmission of (B Morris), 1151
Passive Sensitization (*in vitro*), of Isolated Plain Muscles with Precipitating Antibody Promoting Effect of Urea on the (R Binaghi, Dr B N Halpern, P Liacopoulos and T Neveu), 1805
Paste Transducers Ultrasonic Barium Titanate Adhesion and (Dr A Lutsch), 1458
Pasture Œstrogens in (J L van Haaften), 1575
Patat, F Macromolecules (Osmotic Pressure Techniques and Results), 1689
Pate, Dr J S Appointed lecturer in botany at Queen's University, Belfast, 322
Patella aspera Lamarck, New to Norway (Knut Kolstad), 1886
Patents and Development, Ltd (Canadian) Forty-second Annual Report of the National Research Council of Canada (1958-59), including the Annual Report of, 1916
Paterson, W G Awarded a Canadian Fellowship in Chemistry for 1959-60 by the Ramsay Memorial Fellowships Trustees, B A 16
Pathogenic Agent of Tyzzer's Disease of Mice Pure Culture of the (Dr K Kanazawa and A Imai), 1810
Pathogenic Factors in the Rooting Space and the Development of Even-Aged Plantations (W R Day), B A 46
Pathogenic *Fusarium oxysporum* Production of a Perfect Stage in a Nutritionally Deficient Mutart of, after Ultra-violet Irradiation (E W Buxton), 1258
Pathogenic *Xanthomonas* spp (Plant) Some New Specific Bacteriophages for (Z Klement), 1248
Pathogenic and Non-Pathogenic Fungi Human Precipitins against Common (Dr J Pepys, Dr R W Riddell and Dr Y M Clayton), 1328
Pathogenicity Test (A Rapid and Simple), for Detecting Virulent Clones of *Fusarium oxysporum* f *cubense* using Seedlings of *Musa balbisiana* (Dr R H Stover), 1591
Pathophysiological Effects of Circulating Ferritin (Yoshio Oki), 1944
Pathway of Carbon-^{14} Incorporation from $NaH^{14}CO_3$ to Haem in Duck Blood incubated *in vitro* (A Breccia, A L Fantola, E Lazzarini and A Giustina), 1879
Patients Radiological Hazards to—Interim Report of the Committee (Ministry of Health and the Department of Health for Scotland), 162
Patients with Bone Fractures Urinary β-Glucuronidase Activity in (F J W Lewis and Dr Constance H J Plaice), 1249
Paton, Dr A M Enhancement of Pigment Production by Pseudomonas, 1254
Patrick, Dr C R Gas Chromatography (Problems attached to 'Scaling-up' Analytical Columns), 1199
Pattabhiraman, T N, and Bachhawat, B K Biochemical Research in India (Purification and Properties of Glutamic–Oxalacetic Transaminase from Ox Brain and from Human Brain), 1368
Pattern (Cyclic Growth), in *Neurospora* Genetic Control of a (Growth Patterns in *Neurospora*), (Dr D R Stadler), 170
Pattern (Electron Diffraction) Structure of Precipitated Cadmium Sulphide as studied by Single-Crystal (Dr Ryoitiro Sato), 2005
Pattern Haemoglobin), of the Cyclostome *Pertromyzon planeri* during the Course of Development (M Adinolfi, G Chieffi and M Siniscalco), 1325
Pattern (Sex Chromatin), in the Male Rat Effect of Sexual Maturation and Castration on the (St Zsifkovits, Ch Mehes and C Jobst), 1239
Pattern (X-Ray Diffraction), of Carbide in Low-Carbon Iron-Silicon Alloys (G Konoval, L Zwell, L A Gorman and W C Leslie), 1862
Pattern and Control of Sclereid Formation in the Leaf of *Camellia japonica* (Donald E Foard), 1663
Patterns of Discovery (Prof Norwood Russell Hanson), *review* by Gerd Buchdahl, 572
Patterns (Behaviour), in a Hemileucine Moth Central Control of Interactions between (Dr A D Blest), 1164
Patterns (Blood Velocity) Intravascular and Intracardiac, recorded by means of *NTC* Resistors (Dr W G Zijlstra, J R Brunsting and L B v d Slikke), 991
Patterns (Growth), in *Neurospora*—A Biological Clock in *Neurospora* (C S Puttendrigh, Dr V G Bruce, N S Rosensweig and M L Rubin), 169, Genetic Control of a Cyclic Growth Pattern in *Neurospora* (Dr D R Stadler), 170
Patterns (Paper Electrophoretic), obtained by Paraffin-Oil Fixation (H Waldmann-Meyer), 1567
Patterns (Starch Gel Electrophoretic) Localization of Haemocyanin on (J R Whittaker), 193
Patterson, A, and Ettinger, R Fast Chemical Reations in Solution (Carbon Dioxide–Water Equilibrium, using Nuclear Magnetic Resonance Methods), 1453
Patterson, W Bradford (edited by) Wound Healing and Tissue Repair (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Patwardhan, Dr V N Biochemical Research in India (Mode of Action of Vitamin D), 1367
Paul, Dr E B Détecteurs de Particules (Compteurs et Scintillateurs) Mécanisme et Réalisation, *review*, 1977

Paul, Dr John Cell and Organ Culture (Recent Technical Advances in Cell Culture), 935
  Cell and Tissue Culture, *review* by Dr I Leslie, 1009
Paul Instrument Fund Awards, 507
Paulian, Dr Renaud A Zoological Survey of Madagascar, 1387
Pauly, Dr Helmut X-Ray Sensitivity and Target Volume of Enzyme Induction, 1570
Pauson, Dr P L Appointed to the chair of chemistry in the Royal College of Science and Technology, Glasgow, 233 , work of, 233
  Title of reader in organic chemistry in the University of Sheffield conferred on, 684
Pav, Dr J (Wenkeova, Dr J , and) Release of Non-Esterified Fatty Acids from Adipose Tissue in Normal and Diabetic Rats, 1147
Pavlichenko, Vladimir P , and others Statement on Biological and Chemical Warfare, 1018
Pawlowski, B Origin and Dispersal of Flowering Plants (Survivors of an Endemic Tertiary Flora on the east and west of the Carpathians), 1200
Pawlowsky, Prof E N Elected a member of the Zoology Section of the Leopoldina Academy of Natural Sciences, 595
Pawstiks, Dr E A , and Grutzov, Dr L N Polar Front Survey (Biology—Distribution of Plankton in the Norwegian Sea), 1183
Payak, Dr M M '*LO*-Analysis' as an Aid in the Study of Fungal Spore Morphology, 738
Payen, P (Boyer, A F , and) Coal Science (Carbonization—Apparent Exothermic Peak found in Differential Thermal Analysis of certain Coals), 413
Payen, P (Ladam, A , and) Coal Science (Ultra-fine Structure of Coals and Chars—Sorption of Pyridine by Carbonization Products), 413
Payne, L N (Biggs, P M , and) Cytological Identification of Proliferating Donor Cells in Chick Embryos injected with Adult Chicken Blood, 1594
Paywa, D K (Modi, Dr V V , and) Biosynthesis of Carotenes in Carrot Extracts, 983
Pea and Wheat Embryos Fine Structure in Cells of (G Setterfield, H Stern and F B Johnston), 505
Peach Seeds Gibberellic Acid and the Chilling Requirements of (the late Prof Margaretha G Mes), 2034
Peacock, F C Dagger Nematodes associated with a Clover Sickness, 123
Pearce, Prof James W (Chapman, Prof Kent M , and) Vagal Afferents in the Monkey, 1237
Pearce, Dr Louise *Obituary* by Dr J D Fulton, 588
Pearce, S C Loss of Information brought about by Loss of Data, 1826
Pearsall, Prof W H Conservation in the Scottish Highlands (Problems of Conservation in the Highlands), 1529
Pearson, D J Awarded a Perkin Centenary Scholarship, 237
Pearson, E O , assisted by R C Maxwell Darling The Insect Pests of Cotton in Tropical Africa, *review* by Dr W E China, 1011
Pearson, J A , and others Oxidation of Krebs Cycle Acids by Apple Tissue, 506
Pearson, Dr M C Coast Erosion and Accretion (Biology of the Sea Buckthorn, *Hippophae rhamnoides*), 500
Pearson, R G Fast Chemical Reactions in Solution (Paramagnetic Ions in Solution), 1453
Pearson, Dr W B A Handbook of Lattice Spacings and Structures of Metals and Alloys *review* by Dr J A Catterall, 841
Peas A Chemical Effect of Ethylene during the Storage of (Prof Frank A Lee), 462
Peat, Prof S Steric Aspects of the Chemistry and Biochemistry of Natural Products, 948
Peats (Ombrogenous) Occurrence of *Schoenus nigricans* L on (D J Bellamy), 1590
Peel, A J , and Weatherley, Dr P E Composition of Sieve-Tube Sap, 1955
Pegge, C Denis Instructional Film Research in Pennsylvania, 866
Peierls, Prof R E The Graduate School in Mathematical Physics at Birmingham, 96
  Awarded a Royal Medal for 1959 of the Royal Society, 1360, 1833 , work of, 1833
Peirson, D H , and Salmon, L Gamma Radiation from Deposited Fall-Out, 1678
Pejaudier, L (Steinbach, Marion, and) The Behaviour of Haptoglobin during Routine Fractionation, 362
Pelc, Dr S R Cell and Organ Culture (Application of Cell and Organ Culture in Cancer Research), 937
  Influence of Sexual Stimulation on the Metabolic Activity of Deoxyribonucleic Acid in the Seminal Vesicle, 1414
Pelentane or Thromexane (the Anti-coagulant Drug) Isomeric O-Methyl Ethers of Ethyl di-(4-hydroxycoumarinyl-3)-Acetate (Dr Eduard Knobloch), 1568
Pelham, Dr R A Title of senior lecturer in geography at the University of Southampton conferred on, 595
Pellegrino-Iraldi, Amanda A , and others The C_{17}-OH Group of Œstradiol—Relationships between its Anti-Atherogenic and Endocrine Actions, 1720
Pellerin, P , and others Low-Temperature Autoradiography for the Detection of Tritium in Tissue, with Removal of Luminescence induced by Tritium, 1385
Pellets (Cobaltic Oxide) Effect of, on the Vitamin B_{12} Content of Ewes' Milk (L I Hart and E D Andrews), 1242
Pelling, G Chromosomal Synthesis of Ribonucleic Acid as shown by Incorporation of Uridine labelled with Tritium, 655
Peluchon, G Polar Front Survey (Hydrography—French Observations in the North Atlantic and Davis Strait), 1182
Pemberton, Dr R T Life-Cycle of *Cyathostoma lari*, Blanchard 1849 (Nematoda, Strongyloidea), 1423
Pempidine Congeners of, with High Ganglion-blocking Activity (L Bretherick, G E Lee, E Lunt, W R Wragg and N D Edge), 1707
  Effect of, on the *in vitro* Synthesis of Acetylcholine (Joan Parkinson), 554
Penetration of the Liver-fluke, *Fasciola hepatica*, into the Snail, *Limnaea truncatula* (Dr Ben Dawes), 1334
Penfold, J Appointed to a United States Rubber Co research studentship at University College of North Staffordshire, 322
Penguin (New Fossil), from Australia (G G Simpson), 1612
Penicillin Lowered Bactericidal Efficiency of Hydrogen Peroxide on Milk from Cows treated with (J Babad, D L Boros and F Baier), 292
Penicillium chrysogenum Inhibitory Effect of Fungistatic Antibiotics on the Production of Amylase by (Dr I Horvath and A Szentirmai), 57
Penicillium chrysogenum (the Filamentous Mould), and the Control of its Morphology Continuous-Flow Culture of (S J Pirt and D S Callow), 307
Pennington, Dr W (Mrs T G Tutin) Relict Fauna of Ennerdale Water—a Problem Distribution, 1421
Pennsylvania Instructional Film Research in (C Denis Pegge), 866
Penny, R H C Lectureship in chemical pathology (veterinary) in the University of Bristol conferred on, 410
Penrice, T W Special Ceramics (Use of a Reversible Gel as a Mould Material giving substantially True Hydrostatic Pressures up to 50 tons/in^2), 1117
Pentachlorocyclohexene as a Possible Intermediate Metabolite of Benzene Hexachloride in Houseflies (R G Bridges), 1337
Pentelow, F T K River Purification, 94
Pentose Phosphate Metabolism (Dr D P Burma), 1368
Pentosuria Essential—Renal or Enzymic Disorder (Dr R C Bozian and Prof Oscar Touster), 463
Penttinen Dr Kari, and Saxen, Dr Erkki Growth-Controlling Action of Human Serum in Cell Culture, 1570
People Numbers of, *review* by Dr B Benjamin, 1521
Peoples (South African) Haptoglobin and Transferrin Variants in Bushmen and some other (Dr N A Barnicot, J P Garlick, Ronald Singer and Dr J S Weiner), 2042
Peover, Dr M E (Given, Dr P H , and) Hydrogenolysis of Carbon-Oxygen Bonds in some Aromatic Compounds by Electrolysis, 1064
Pepper, Dr Florence J Awarded a Research Fellowship in zoology in the University of Birmingham, 1688
Peptide (Nucleotide–) Compounds of *Saccharomyces cerevisiae* (G Harris and J W Davies), 788
Peptide (Phosphatido-) Fraction of Pancreas Slices Effect of Acetylcholine on the Incorporation of Radiophosphorus into the (Prof C G Huggins), 1412
Peptide Sequence (Terminal), of Human Haemoglobin ? (Dr J A Hunt and Dr V M Ingram), 640
Peptide-Substrates (O-Phosphorylated and Unphosphorylated), suitable for Tryptic Action (Dr D Theodoropoulos, H Bennich and Prof O Mellander), 270
Peptides with Oxytocic and Pressor Activity obtained from Acidified Rat Serum (Prof H Croxatto, T Pereda and R Mellada), 1496
Peptides (Amino-Acids and) . A Two-Dimensional System for the Separation of, on Paper (Virginia Richmond and Brian S Hartley), 1869
Peptides (Protein-bound), as exemplified by Oxytocin and Vasopressin Gel Filtration as a Method for Purification of (E B Lindner, Dr A Elmqvist and Dr J Porath), 1565
Peptides and Proteins Action of Anhydrous Formic Acid on (H Kienhuis, G Blasse and J Matze), 2015
Pepys, Dr J Delayed Hypersensitivity (Characteristic Delay in the Development of the Tuberculin Reaction), 1029
Pepys, Dr J , and others Human Precipitins against Common Pathogenic and Non-Pathogenic Fungi, 1328
Percentages (Small), of Foetal Haemoglobin Estimation of (Prof K Betke, H R Marti and I Schlicht), 1877
Perception A Mathematical Model for, and a Theoretical Confusion Function (M Hammerton), 1668
Perception (Olfactory) Discrimination between Ebb and Flood Tide in Migrating Elvers (*Anguilla vulgaris* Turt) by means of (F Creutzberg), 1961
Perception, Attention and Consciousness (Prof Magdalen D Vernon), B A 45
Perception and Learning, *review* by Prof O L Zangwill, 1523
Perception (Extra-Sensory) Experimental Evidence for (C M Hansel), 1515
Perception of Visual Space Possible Rôle of Higher Proprioceptive Centres in the, and in the Control of Motor Behaviour (Dr B Gurevitch), 1219
Perchonok, E Chemistry of Propellants (Air-Burning Fuels—Performance Evaluation), 779
Percival, Prof E *Obituary* by Elliot W Dawson, 403
Pereda, T , and others Peptides with Oxytocic and Pressor Activity obtained from Acidified Rat Serum, 1496
Perera, A Appointed chairman of the Executive Council of the Commonwealth Agricultural Bureaux, 943
Pereira, Dr H C A Physical Basis for Land Use Policy in Tropical Catchment Areas 1768
Perfect Stage Production of a, in a Nutritionally Deficient Mutant of Pathogenic *Fusarium oxysporum* after Ultra-violet Irradiation (E W Buxton), 1258
Perfused Rat Spleen (Isolated and) Production of γ- and α-Globulins by the (Dr E Espinosa), 1801
Pergamon Press To provide the funds for the *Talanta* Medal, 956
Period (Latent), of X-Ray Induced Ageing Study based on Mortality Rate and Tumour Incidence (Dr H I Kohn and Dr P H Guttman), 735
Periodate Technique for the Identification of Sugar Phosphates (Eugene A Davidson), 1395
Periodic Acid-Schiff-Positive Material and Alkaline Phosphatase in the Uterine Wall of the Pig during the Sexual Cycle (Rolv Austad and Dr Otto Garm), 999
Periodic Classification of Elements (A A Clifford), 2012
Periodic Law (D I Mendeleieff), edited by B M Kedrov (Russian Text), *review* by Prof S I Tomkeieff, 1598
Periodicals (British Books and) Exhibition in Moscow of (British Council and the Soviet Ministry of Culture), 1361
Peripheral Effect of the Bromide Ion on the Contraction of Striated Muscle (Dr D K de Jongh and H A Linnewiel), 1240
Peristaltic Reflex Are Mucosal Nerve Fibres Essential for the (Dr K H Ginzel), 1235
Perkin Centenary Trust Awards, 237
  Programme of Awards for 1960-61, 856
Perkins, Donald F (Goodman, Gordon T , and) Mineral Uptake and Retention in Cotton-Grass (*Eriophorum vaginatum* L), 467, *erratum*, 1845
Perkins, H R (Rogers, H J , and) Cell-Wall Mucopeptides of *Staphylococcus aureus* and *Micrococcus lysodeikticus*, 520

Perkins, W J Electronics in Biology, *review*, B A 4
Permanent Gases Analysis of, by Gas Chromatography using a Radioactive Ionization Type Detector (V Willis), 894
Permanent Moisture Expansion of Clay Products on Natural Exposure (J S Hosking and H V Hueber), 1373
Permanent Set, Supercontraction, and Urea-Bisulphite Solubility—the Proton-Transfer Nature of some Changes in Keratin and the Analogy with Muscle Contraction (Dr P T Speakman), 339
Permanganate (Lithium) Szilard-Chalmers Reaction in (J R Bolton and Prof K J McCallum), 1717
Permeability of Human Red Cells Calcium Ions and the (Prof M Maizels), 366
Permeability (Increased Capillary) Pharmacological Suppression of, following Irradiation of the Intestine of Rats (Dr D A Willoughby), 1156
Permutit Co, Ltd Portable 'Deminrolit' Plants for Distilled Water, 25
Peroxidase Histological Localization of (D S Van Fleet), 506
Peroxidase-Oxidase (Tryptophan), in *Drosophila melanogaster* Genetic Control of (Corrado Baglioni), 1084
Peroxidase-Oxidase (Tryptophan) Enzyme System Specificity of the (Dr R H Marchant), 1711
Peroxidation (Lipide), in Tissues Deficient in Vitamin E An Effect of Selenium and Cystine on (Dr John G Bieri), 1148
Peroxide (Hydrogen) Lowered Bactericidal Efficiency of, on Milk from Cows treated with Penicillin (J Babad, D L Boros and F Baier), 292
Peroxide (Hydrogen), H_2O_4? A Higher (Dr J G Marshall and Dr P V Rutledge), 2013
Peroxide (Hydrogen), and Ferric Salts Oxidation of Ethyl Alcohol by a Mixture of (Dr Mordechai L Kremer), 720
Perret, R Thermodynamics (Experimental Thermochemistry), 1607
Perrin, Dr D D Histidine–Copper (II) Complexes, 1868
Perrin, Dr D D, and others Binding of Haem to Protein in Haemoglobin and Myoglobin, 1651
Perrin, Dr R M S Soils of Tanganyika, *review*, 1901
Perrone, J C, and others Electrophoretic Heterogeneity of Trypsin, 1225
Perry, Dr Robert P, and others Localization and Assay of Respiratory Enzymes in Single Living Cells—Absorbancy Measurements on the *Neberkern*, 929
Perry, Dr S V Appointed professor of biochemistry in the University of Birmingham, 679, work of, 679
Perry, Dr Thomas L, and others Urinary Excretion of β-Amino-isobutyric Acid in Mongolism, 1970
Perry, W E *Obituary*, 151
Personnel Scientific and Technical (United States National Science Foundation to establish and maintain a Programme of National Information on), 592
Personnel Management, Institute of Staff in Industry and Commerce—Management of Workers whose Skills are mainly Mental or Social rather than Manual (E M Barling), 319
  Management Development—a Systematic Approach to the Provision of Supervisors and Managers (F I de la P Garforth), 319
  Annual Conference (Personnel Management and Technological Change), 1614
Personnel Management and Technological Change (Institute of Personnel Management Annual Conference), 1614
Perspectives in Marine Biology, a Symposium held at Scripps Institution of Oceanography, 1956 (edited by A A Buzzati-Traverso), *review* by Dr J A Allen, 215
Perspectives in Virology—a Symposium (edited by Morris Pollard), *review* by N W Pirie, 920
Pertromyzon planeri Haemoglobin Pattern of the Cyclostome, during the Course of Development (M Adinolfi, G Chieffi and M Siniscalco), 1325
Peru Flora of (Rogers McVaugh), *review*, 666
  Orchids of (C Schweinfurth), 409
Perus (Fische), II Beitrage zur Kenntnis der (Dr Hans-Wilhelm Koepche), (Beiträge zur Neotropischen Fauna), *review* by Dr F A Turk, 1177
Pest Control, 941
Pest Control Research Advances in (edited by R L Metcalfe), Vol 2, *review* by F C Bawden, 1258
Pests of Farm Crops Recognition of Diseases and (Ernst Gram, Prosper Bovien and Chr Stapel), *review* by F C Bawden, 1258
Pests (Insect), of Cotton in Tropical Africa (E O Pearson, assisted by R C Maxwell Darling), *review* by Dr W E China, 1011
Pests (New), of Cocoa (*Theobroma cacao* L) in Ghana following Applications of Insecticides (P F Entwistle, C G Johnson and E Dunn), 2040
Pests and Diseases Biological Problems arising from the Control of (Institute of Biology Symposium on), 1100
Pests and Diseases in Agricultural and Horticultural Crops Control of (G L Hey and K Marshall), *review* by F C Bawden, 1258
Petals (Flower), of *Adonis annua* L Occurrence of Astaxanthin in the (A Seybold and Prof T W Goodwin), 1714
Petch, N J Atomic Mechanisms of Fracture (Metallurgical Aspects of Cleavage), 325
Peters, Sir Rudolph Enzymes (Enzyme Inhibitors), 687
Petragnani, Nicola, and others Methaemoglobin Reduction through Cytochrome B_5, 1651
Petrobius maritimus Leach Composition of the Haemolymph of (Dr A P M Lockwood and Dr P C Croghan), 370
Petrographie Precis de (Prof Jean Jung), *review* by J C M Taylor, 1677
Petroleum Catalytic Processes and, *review* by Dr David M Wilson, 1090
  The Future of Chemicals from (L H Williams), 1915
Petroleum, Institute of (Gas Chromatography Discussion Group and the Hydrocarbon Research Group) Completion of the reorganization of the, 327
  Symposium on Gas Chromatogtaphy, 327
  Honorary life membership conferred on Dr A J P Martin, 327
Petroleum Engineers (Mining, Metallurgical and), American Institute of (Metallurgical Society of the) New series of books entitled Metallurgical Society Conferences, 1362
Petroleum Industry Centenary of the, 1611
  Handbook of the (edited by G Sell and H A Dossett), *review*, 1832
Petroleum Industry (United Kingdom), Statistics relating to Consumption and Refinery Production, 1957 and 1958 (Petroleum Information Bureau), 855
Petroleum Information Bureau United Kingdom Petroleum Industry Statistics relating to Consumption and Refinery Production, 1957 and 1958, 855
Pettersson, Dr Max Main Stages of Social Evolution in Man, 481
  Diffusion of a New Habit among Greenfinches, 649
Petty, J H P, and others Extended Dormancy of Deciduous Woody Plants treated in Autumn with Gibberellic Acid, 69
Peus, Prof Fritz Elected a member of the Zoology Section of the Leopoldina Academy of Natural Sciences, 595
Peyssou, J Special Ceramics (Possible Variations of Properties of Ceramic Articles caused by Variations in Firing Conditions and Methods of Manufacture), 1117
Pfeiffer, Dr H H Flow Properties of Biological Systems (Measurements of Rheodichroism), 1540
Pfeil, P C L (Griffiths, L B, and) Insulating Particles on Cathode Surfaces—their Effect upon Electrical Discharges, 1475
*p*H Relationship of, to Aerobic Corrosion Fatigue Life of Steel (Dr Frederick J Radd, L Hugh Crowder and Louis H Wolfe), 2008
*p*H and Volatile Fatty Acid Relationship between, and Diversion of Saliva from the Actively Fermenting Rumen of Sheep (W R McManus), 1572
*p*H Meter Analytical Pocket (Analytical Measurements, Ltd), 683
Phage Formation Induction of, in the Lysogenic *Escherichia coli* K-12 by Mitomycin C (Dr Nozomu Otsuji, Dr Mutsuo Sekiguchi, Dr Teiji Iijima and Dr Yasuyuki Takagi), 1079
Phages (Type-determining), of *Salmonella typhi* Mutation in the (E S Anderson), 1822
Phagocytic Activity of the Macrophage System Assessment of the (Dr D L J Bilbey and Dr H. Salem), 992
  Influence of Sulphur Dioxide Inhalation on the (Prof D L J Bilbey and Dr H Salem), 722
Phagocytic Activity of the Reticulo-Endothelial System Effect of Sulphonamides on the (Prof T Nicol and I A Sewell), 1241
Phalaris Staggers Blood Acetylcholinesterase in (Dr D J Walker), 1411
Phanomenologischen Reduktion Theorie der (Erste Philosophie, 1923-24 (Edmund Husserl), Teil 2), herausgegeben von Rudolf Boehm (Husserliana, Band 8), *review* by F I G Rawlins, 1751
Pharmaceutical Research Soviet, Vol 1, Pharmaceutical Chemistry, Vol 2, Pharmacognosy, Vol 3, Medicinal Chemistry, *review* by Dr D Train, 1831
Pharmaceutical Research in the U S S R, *review* by Dr D Train, 1831
Pharmaceutical Society of Great Britain Tribute paid to its founder, Jacob Bell, on the hundredth anniversary of his death (Gwilym Hughes), 23
  Appointment of Gwilym Hughes as president, 95
Pharmacological Effects of Staphylolysin on the Isolated Rat Uterus Some (Dr B Wiegershausen), 2017
Pharmacological Evidence for the Presence of Arginine Vasotocin and Oxytocin in Neurohypophysial Extracts from Cold-blooded Vertebrates (Active Principles of the Neurohypophysis of Cold-blooded Vertebrates), (Wilbur H Sawyer, Robert A Munsick and Prof H B van Dyke), 1464
Pharmacological Suppression of Increased Capillary Permeability following Irradiation of the Intestine of Rats (Dr D A Willoughby), 1156
Pharmacology Annual Review of, 943
Pharmacology of 16-Acetyl Digitalinum Verum Chemistry and (Z Kanda, Prof A Sekiya K Katayama, A Okano and T Miki), 1414
Pharmacology of Plant Phenolics—Proceedings of a Symposium held at Oxford, 1958 (edited by J W Fairbairn), *review* by Dr F A Robinson, 486
Pharmacy as a Career (Central Youth Employment Executive), 95
Phase Systems (Aqueous Polymer) Counter-Current Distribution of Proteins in (Per-Ake Ålbertsson and Ed Jacques Nyns), 1465, *erratum*, 1688
Phase Transitions in Interlamellar Films (Dr D M C MacEwan and Dr F Aragon de la Cruz), 1859
Phaseolus vulgaris (Bean) Hypocotyls Influence of Kinetin, β-Indoleacetic Acid and Gibberellic Acid on Nuclease Activity of (Dr W Maciejewska-Potapczyk), 557
Phenazine Di-*N*-Oxide as a Carcinostatic Agent (Arthur Furst, Claire Klausner and Windsor C Cutting), 908
Phenazocine, a Potent New Analgesic Identification of (Dr E G C Clarke), 451
Phenol Effect of Flavins on Cramp caused by (Prof Kunio Yagi, Dr Hirofumi Yagi and Dr Ikuko Nagatsu), 1648
Phenolic Œstrogens Two Enzymic Mechanisms for Hydrogen Transport by (Dr H G Williams-Ashman, M Cassman and Margaret Klavins), 427
Phenolics (Plant) The Pharmacology of—Proceedings of a Symposium held at Oxford, 1958 (edited by J W Fairbairn), *review* by Dr F A Robinson, 486
Phenols Colour Reactions of certain, with Ehrlich's Reagent (Dr Cornelius Steelink), 720
Phenols of Plant Origin Biological Properties of, *review* by Dr F A Robinson, 486
Phenomena Co-operative (Prof Lars Onsager), 1195
Phenomena occurring in Steels during Quenching and Tempering (Academician G V Kurdjumov), 1450
Phenomena (Fluctuating), in Semi-Conductors (Prof A Van der Ziel), *review* by Dr R A Hyman, 1754
Phenomena (Fluctuation), and Stochastic Processes (Physical Society Conference on), 509
Phenomena (Fractionation), in Nuclear Weapons Débris (K Edvarson, Kerstin Low and J Sisefsky), 1771
Phenomena (Geomagnetic), associated with Nuclear Explosions Some (Dr R G Mason and Dr M J Vitousek), B A 52
Phenomena (Geomagnetic and Ionospheric), associated with Nuclear Explosions (Dr S Matsushita), B A 33
Phenomena (Ionization), in Gases (J Dutton, D Harcombe and E Jones), 1353
Phenomena (Some New Subjective), apparently due to Interocular Transfer (Ian P Howard), 1516
Phenomena (Very Low Frequency), at Godhavn, Greenland Observations of 'Whistlers' and (Eigil Ungstrup), 806

Phenothiazine-Tranquillizers Differential Analysis of the Effects of, on Emotional and Motor Behaviour in Experimental Animals (Dr M Taeschler and Dr A Cerletti), 823
Phenoxy-Compounds (Substituted), and other Translocated Herbicides Effects of, on the Rhizome of Bracken (Dr Elsie Conway and J A Forrest), 1416
DL-beta-Phenylserine Influence of, on the Synthesis of Proteins in *Escherichia coli* (J Janeček, J Chaloupka, K Vereš and M Havranek), 1895
Philanthropic Foundations Grants for Private, during 1957 (United States National Science Foundation, Reviews of Data on Research and Development, No 15), 1272
Philips Electrical Industries Pty, Ltd Grant of £3,500 towards the cost of the third Summer School for Science Teachers of the Australian Nuclear Research Foundation, 1108
Phillips, C S G Gas Chromatography, 1199
Phillips, F T Effect of Emulsifiers and Organic Diluents in Soil Insecticide and Nematicide Formulations, 1512
Phillips, G C Awarded a Nature Conservancy Research Studentship for post-graduate training in ecology (zoology), 156
Phillips, Dr J G, and Mulrow, Dr P J Failure of Corpuscles of Stannius from Winter Flounder (*Pseudopleuronectes americanus*) to Synthesize Adrenocorticosteroids *in vitro*, 558
Phillips, Dr J N, and others Binding of Haem to Protein in Haemoglobin and Myoglobin, 1651
Phillips, J W, and others Compaction of Briquettes, 120
  Coal Science (Carbonization—Effect of Macerals on Volume Changes in Briquettes during Carbonization), 413
Phillips, Dr R Nuclear Forces and the Few-Nucleon Problem (Scattering of Nucleons by Light Nuclei at High Energy), 1113
Phillips Petroleum Co Foundation of a postgraduate research studentship at University College of North Staffordshire, 322
Philosophical Development My (Bertrand Russell), *review* by Prof R B Braithwaite, 749
Philosophical Society, American Transactions, New Series, Vol 48, Part 6, Preliminary Archaeological Investigations in the Sierra de Tamaulipas, Mexico (Dr Richard S MacNeish), 593
Philosophie Erste (1923-24), (Edmund Husserl), Teil 2, Theorie der Phänomenologischen Reduktion (herausgegeben von Rudolf Boehm), (Husserliana, Band 8), *review* by F I G Rawlins, 1571
Philosophy Science and (G E Denyer), 1193
Philosophy of Science History and (L W H Hull), *review* by Dr H D Anthony, 131
  Scientific Research and the (British Society for the Philosophy of Science Symposium on), 1193
Philosophy of Science, British Society for the Fourth Annual Conference, 1193
  Symposium on Scientific Research and the Philosophy of Science, 1193
  Symposium on Biology and Physics, 1193
  Symposium on Classification, Concept-formation and Language, 1193
  Symposium on Knowing and Being, 1193
Philosophy (Natural), and related Documents Papers and Letters on (Isaac Newton), edited with a General Introduction by I Bernard Cohen, assisted by Robert E Schofield, *review* by Dr M A Hoskin, 1570
Phoenix Re-born (Dr Maurice Burton), *review* by T H Hawkins, 665
Phosphatase (Acid and Alkaline) Visualization of, after Starch-Gel Electrophoresis of Seminal Plasma, Serum and Bile (Dr Bengt Estborn), 1636
Phosphatase (Alkaline) Periodic Acid-Schiff-Positive Material and, in the Uterine Wall of the Pig during the Sexual Cycle (Rolv Austad and Dr Otto Garm), 999
Phosphatases (Pituitary Acid), *in vitro* Effects of Methylthiouracil or Thyroidectomy on Activation of, by Whole Hypothalamic Extract (Dr V Schreiber and Dr V Kmentova), 728
Phosphate (Calcium) Purification of Herpes Simplex Virus by Chromatography of (Janice Taverne and Peter Wildy), 1655
Phosphate (l-Glyceryl-2-*myo*-inositol) Synthesis and Properties of (Dr T Malkin), 789 , Synthesis of l-Glyceryl-2-*myo*-inositol Phosphate (J H Davies and Dr T Malkin), 789 , l-Glyceryl-2-*myo*-inositol Phosphate —Alternative Synthesis and Behaviour on Hydrolysis (R B Ellis and J N Hawthorne), 790
Phosphate (Inorganic) Need for, in Oxidations stimulated by Dinitrophenol (P Borst and Prof E C Slater), 1396
Phosphate (Isotopically Exchangeable), in Soil Effect of the Level of Microbial Population on (Dr P Newbould and Dr R L Lucas), 1155
Phosphate (Pentose) Metabolism (Dr D P Burma), 1368
Phosphate (Polyphloretin) Effect of, on the Suspension Stability of Red Blood Corpuscles (Dr Bengt Fries), 62
Phosphate (Pyridoxal), a Coenzyme for Histidine Decarboxylase (S Ono and Prof P Hagen), 1143
Phosphate (L-Serine) Crystal Structure of (G H McCallum, Prof J Monteath Robertson and Dr G A Sim) 1863
Phosphates (Amino-acid), under Physiological Conditions Spontaneous De-amination of (Dr Mella Paecht and Prof A Katchalsky), 1489
Phosphates (Sugar) Periodate Technique for the Identification of (Eugene A Davidson), 1395
Phosphatidic Acid as the Sodium Carrier Evidence for (Dr Lowell E Hokin and Mabel R Hokin), 1068
Phosphatido-Peptide Fraction of Pancreas Slices Effect of Acetylcholine on the Incorporation of Radiophosphorus into the (Prof C G Huggins), 1412
Phosphide and Nitride (Boron) Synthesis of (Dr R C Vickery), 268
Phosphide (Zinc) Particles Absorption of (Dr A S Curry, Dr D E Price and Dr F G Tryhorn), 642
Phospholipid Phosphoric Esters in the Human Placenta (G Porcellati, B Curti and S Luciani), 1870
Phospholipids (Oilseed) Sterol Glycosides in (Dr Francis Aylward and B W Nichols), 1319
Phosphonic Acid (2-Aminoethane) Isolation of, from Rumen Protozoa (Masaaki Horiguchi and Makoto Kandatsu), 901
Phosphonitrilic Chlorides Polymerization of (Prof Thomas R Merton), 899
Phosphoric Esters (Phospholipid), in the Human Placenta (G Porcellati, B Curti and S Luciani), 1870
Phosphorus Chemistry of, *review* by Dr F G Mann, 389
Phosphorus and its Compounds (John R Van Wazer), Vol I, Chemistry, *review* by Dr F G Mann, 389
Phosphorus-32 Injected Intraperitoneally into Rats Fate of the Highly Polymerized Spleen Deoxyrobonucleic Acid labelled with (Tamara A Hudnik-Plevnik, Vladimir R Glišin and Marta M Simic), 1818
Phosphorus and Die-Back in Yellow Lupins High Levels of (R G Warren and B Benzian), 1588
Phosphorus Content of Forages A Method of Increasing the (Prof R Ferrando, S Metivier and R Gervy), 76
Phosphorus (Organic-) Compounds (Bradford Institute of Technology Symposium on), 1688
Phosphorus (Radioactive) An Effect of Dose Fractionation on the Incidence of Bone Tumours using (Dr N M Blackett), 565
Phosphorylase (Polynucleotide), in Atypical Epithelioma of Rat Occurrence of (Dr Kunio Yagi, Takayuki Ozawa and Hiroshi Konogi), 1939
O-Phosphorylated Analogue Action of Trypsin on α-Carbethoxy-L-lysyl-L-serylglycine and its (Dr D Theodoropoulos, H Bennich, G Folsch and Prof O Mellander), 187
O-Phosphorylated and Unphosphorylated Peptide-Substrates suitable for Tryptic Action (Dr D Theodoropoulos, H Bennich and Prof O Mellander), 270
Phosphorylation Excitability and, of Muscle and Nerve in Sodium-free Hydrazinium Solution (L G Abood and K Koketsu), 725
Phosphorylation (Oxidative) Protein Synthesis and, in Isolated Rat Liver Mitochondria (P J Reis, J L Coote and T S Work), 165
Phosphorylation (Oxidative), in *Azotobacter vinelandii* Fractionation of the System bringing about (H G Hovenkamp), 471
Phosphorylation (Oxidative), in Guinea Pig Heart Sarcosomes Reversal by Acetylcholine of the Inhibition by Thyroxine of (Heitor Medina and Metry Bacila), 1066
Phosphorylations (Mitochondrial Oxidative), in Intact Ascites Tumour Cells Effiicency of the (Dr P Emmelot and C J Bos), 2024
Phosphorylative Activities (Oxidative and), of Cytoplasmic Particles from Plant Tissue Cultures (Taiki Tamaoki, Prof A C Hildebrandt, A J Riker, R H Burris and Bunji Hagihara), 1491
Photoautomerization of Cytosine Derivatives on Ultra-violet Irradiation (Shih Yi Wang), 184
Photobiology Group Election of Dr D Vince as honorary secretary, 1362
Photo-bleaching (Reductive) Effect of Added Substances on the Rate of (Reductive Photo-bleaching of Eosine), (Kengo Uchida, Shunji Kato and Masao Koizumi), 1620
Photo-bleaching (Reductive), of Eosine—Primary Processes indicated by the Flash Technique (Shunji Kato and Masao Koizumi), 1620 , Effect of Added Substances on the Rate of Reductive Photo-bleaching (Kengo Uchida, Shunji Kato and Masao Koizumi), 1620
Photochemical Behaviour of Retinene (Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures), (Dr Lawrence Jurkowitz), 614
Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures (Staff of the Biological Laboratories of Harvard University)—Photochemical Behaviour of Retinene (Dr Lawrence Jurkowitz), 614 , *Cis-trans* Isomerism and Steric Hindrance (John N Loeb, Paul K Brown and Prof George Wald), 617 , Discussion (Prof George Wald), 620
Photographic Society, Royal (Scientific and Technical Group) Symposium on Photography in the International Geophysical Year, 1032
Photographs (Aerial), of Quarries and Mines Exhibition of (Geological Museum, London), 855
Photographs (Lyman-Alpha), of the Sun (J D Purcell, Dr D M Packer and Dr R Tousey), 8
Photography in the International Geophysical Year (Scientific and Technical Group of the Royal Photographic Society Symposium on), 1032
Photography (Colour) Kodak Scholarships in, 1915
Photography (Colour), of the Aurora (B P Sandford and P Heiser), 540
Photolysis of Thionine in Rigid Medium—Measurement by Spectrofluorimetry (Dr C A Parker and W T Rees), 1223
Photometric Methods Colorimetric Methods of Analysis, including (Dr Foster Dee Snell and Dr Cornelia T Snell, assisted by Dr Chester Arthur Snell), Vol 2A, *review* by J King 1522
Photomicrography (Dr Roy M Allen), second edition, *review* by Dr S Bradbury, 1174
  Applied Microscopy and (H M Malies), *review* by Dr S Bradbury, 1174
  Microscopes and, *review* by Dr S Bradbury, 1174
Photon Correlation Polarization and Resolving Time Effects in (Dr E Brannen and Prof W Wehlau), 263
Photon Streams Fluctuations in (Dr Peter Fellgett, Dr R Clark Jones and Dr R Q Twiss), 967 , (Dr C W McCombie), 969
Photoperiod Effect of, on the Gonadal Cycle in an Equatorial Bird, *Quelea quelea* (Dr Albert Wolfson and David P Winchester), 1658
  Influence of Gibberellic Acid and, on the Growth, Flowering, Nodulation and Nitrogen Assimilation of *Vicia villosa* (the late Prof Margaretha G Mes), 2035
Photoperiodic Reaction in the Genus *Chenopodium* (Tourn) L Extreme Sensitivity of Germination and (Dr Bruce G Cumming), 1044
Photophosphorylation and the Hill Reaction Relationship between (Dr H E Davenport), 524
Photopositive Domination in a Scolytid Beetle Release by Flight Exercise of a Chemotropic Response from (Prof Kenneth Graham), 283
Photoreactive Pigments in Flagellates—Chromoprotein Pigments of some Cryptomonad Flagellates (Dr Mary Belle Allen, Dr Ellsworth C Dougherty and Dr John J A McLaughlin), 1047 , Phycoerythrins and Phycocyanins of Cryptomonads (Dr C OhEocha and M Raftery), 1049 , Photosynthetically Active Accessory Pigments of Cryptomonads (Dr F T Haxo and D C Fork), 1051
Photosynthetic Bacteria Function of Carotenoids in (Prof M Dworkin), 1891
Photosynthesis Conversion of Light into Chemical Energy in (Prof David I Arnon), 10, *errata*, 1613
Photosynthesis in the Ear of Barley (Prof A Frey-Wyssling and Dr M S Buttrose), 2031
Photosynthetically Active Accessory Pigments of Cryptomonads (Photoreactive Pigments in Flagellates), (Dr F T Haxo and D C Fork), 1051
Phycocyanins of Cryptomonads Phycoerythrins and (Photoreactive Pigments of Flagellates), (Dr C OhEocha and M Raftery), 1049

Phycoerythrins and Phycocyanins of Cryptomonads (Photoreactive Pigments in Flagellates), (Dr C OhEocha and M Raftery), 1049
Phycology in Britain, 1534
Phycomyces Sporangiophores Gallic Acid in (David S Dennison), 2036
Phylogeny of the Genus *Aniba* Aubl —a Comparative Morphological and Chemical Observation (Walter B Mors, Otto Richard Gottlieb and Ida de Vattimo), 1589
Physalia Dimorphism and Size Distribution in *Velella* and (Prof Robert Bieri), 1333
Physical Basis for Land Use Policy in Tropical Catchment Areas (Dr H C Pereira), 1768
Physical Metallurgy of Magnesium and its Alloys (Prof G V Raynor), *review* by Dr J W Martin, 486
Physical Properties of Materials Relationship between Structure and (Non-Destructive Testing Group of the Institute of Physics and the Société Française de Métallurgie Discussion on), 1688
Physical Properties of Mucin Molecular Shape and the (R A Gibbons), 610
Physical Properties (Biological and) Turnip Yellow Mosaic Virus Nucleoprotein Particles with differing (R E F Matthews), 530
Physical Society Annual General Meeting, 419
  Presidential Address, Recent Trends in the Theory of the Ionosphere (J A Ratcliffe), 419
  Election of Officers, 420
  Conference on Fluctuation Phenomena and Stochastic Processes, 509
  1958 Year Book, 954
  Guthrie Lecture, Experimental Tests of Quantum Electrodynamics (Prof W E Lamb), 954
  Holweck Lecture, Spin Temperature (Prof A Abragam), 943
  Charles Chree Lecture (Sir Edward Bullard), 954
  Duddell Medal Address, Measurement of the Thickness of the Helium Film (Prof L C Jackson), 954
  Charles Vernon Boys Prize Address, Development of Bubble Chambers and some recent Bubble Chamber Results in Elementary Particle Physics (Dr D A Glaser), 954
  Conference on Thermonuclear Research, 1015
  Conference on Electron–Phonon Interaction in Solids, 1613
  Exhibition, 1688
Physical Society (Acoustics Group) Symposium on Recent Studies of Noise Problems, 414
Physical Society (Low Temperature Group) Institution of a Simon Memorial Prize, 1026
  First Simon Memorial Prize awarded to Dr Heinz London, 1026
Physical Society (Acoustics Group), and the Institute of Physics Symposium on New Techniques in the Analysis of Noise and Vibration, 415
Physical Theory of Neutron Chain Reactors (Alvin M Weinberg and Eugene P Wigner), *review* by Dr J Walker, 1973
Physical and Chromatographical Observations of γ-Irradiated Potato Starch Granules (Akira Mishina and Ziro Nikuni), 1867
Physicians of Philadelphia, College of Alvarenga Prize for 1959 awarded to Dr Hilary Koprowski, 683
Physics Applications of Statistics in, *review* by Dr H Steeple, 664
  Biology and (British Society for the Philosophy of Science Symposium on), 1193
  Crystal (British Association for the Advancement of Science, Section A (Mathematics and Physics), Discussion on), 596
  Elementary Statistical (Prof C Kittel), *review* by Dr G M Bell, 1178
  Handbook of (edited by Dr E U Condon and Dr Hugh Odishaw), *review* by Prof H Lipson and S G Lipson, 298
  Solid State (Australian Branch of the Institute of Physics Conference on), 1117
  Solid State (edited by Frederick Seitz and David Turnbull), Vols 4, 5 and 6, *review* by Prof E C Stoner, 1753
  Statistical (L D Landau and E M Lifshitz), translated from the Russian by E Peierls and R F Peierls, *review* by Dr H Steeple, 664
  Theoretical (Prof F Woodbridge Constant), *review* by Dr R M Tennent, 1832
  Turning Points in—a Series of Lectures given at Oxford University in Trinity Term, 1958 (Dr R J Blin-Stoyle, Dr D ter Haar, Dr K Mendelssohn, Prof G Temple, F Waismann and Prof D H Wilkinson), *review* by G R Noakes, 1090
Physics at the University College of North Staffordshire, 590
Physics, Institute of Notes for Authors, revised edition, 95
  Conference on Some Apsects of Magnetism, 322
  Thirty-ninth Annual Report (1958), 603
  Election of Officers, 604
  Conference on Structure Analysis and Experimental Techniques, 857
Physics, Institute of (London and Home Counties Branch) Symposium on the Design of Physics Research Laboratories (London, 1957), *review* by S Weintroub, 925
Physics, Institute of (Acoustics Group of the Physical Society and the) Symposium on New Techniques in the Analysis of Noise and Vibration, 415
Physics, Institute of (X-Ray Analysis Group) Conference on Biological Fibres, B A 25
  Discussion on Clay Minerals, 780
Physics, Institute of (Australian Branch) Conference on Solid State Physics, 1117
Physics, Institute of (Non-Destructive Testing Group), and the Societé Française de Métallurgie Discussion on the Relationship between Structure and Physical Properties of Materials, 1688
Physics of Elementary Particles (Prof J D Jackson), *review* by P T Matthews, 1677
Physics of the Solid Body (published in the Russian language by the Academy of Sciences of the U S S R), 410
Physics and Chemistry of Glasses (Society of Glass Technology), 855
Physics (Applied), at Durham, 1022
Physics (Biological and Medical) Advances in, Vol 6 (edited by Cornelius A Tobias and John H Lawrence), *review* by Dr N M Blackett, 1766
Physics (Electron) Advances in Electronics and (edited by L Marton, assisted by Claire Marton), Vol 10, *review* by J R Tillman, 1601
Physics (Electron), and Technology (Dr J Thomson and E B Callick), *review* by Dr D A Bell, 83
Physics (Elementary Particle) Development of Bubble Chambers and some recent Bubble Chamber Results in (Dr D A Glaser), 954
Physics (Health) Radiation Safety and (J W Lucas), 329
Physics (Low-Temperature) Experimental Techniques in (Guy Kendall White), *review* by Prof J F Allen, 1260
Physics (Mathematical), at Birmingham, 679
Physics (Mathematical), at Birmingham The Graduate School in (Prof R E Peierls), 96
Physics (Modern) Guide to, *review* by Prof H Lipson and S G Lipson, 298
  Principles of (Prof Robert B Leighton), *review* by Dr E Stanley, 1438
Physics (Nuclear), at the University of the Witwatersrand, 233
Physics (Nuclear), Development Commission on Biological (Non-Medical) Problems of (Agricultural Research Council, the Medical Research Council and the) Appointment of Sir James Denby Roberts as chairman of the Joint Committee of the, 237
Physics (Solid State) Aspects of, *review* by Prof E C Stoner, 1753
Physics (Theoretical), at Cambridge Applied Mathematics and, 686
Physics (Theoretical), at Sydney, 1447
Physics (Thermo-Nuclear), at Sydney, 1447
Physics Research, Brazilian Centre for Appeal by Unesco and the International Atomic Energy Agency for help to reconstruct the Library of the, 769
Physics Research Laboratories The Design of—a Symposium of the London and Home Counties Branch of the Institute of Physics (London, 1957), *review* by S Weintroub, 925
Physik Handbuch der (herausgegeben von S Flugge), Band 50, Astrophysik I, Sternoberflachen-Doppelsterne, *review* by Prof R O Redman, B A 3
Physikalische Chemie, Deutsche Bunsengesellschaft fur, and the Max-Planck Gesellschaft Colloquium on Fast Chemical Reactions in Solution, 1453
Physikalische Chemie, Deutsche Bunsengesellschadt fur, and the International Union of Pure and Applied Chemistry Symposium on Thermodynamics, 1606
Physiological Activity in Extracts of *Albizia* Species (A Lipton), 822
Physiological Anticoagulating System Interrelations between the Blood Coagulating System and the (Prof P A Kudrjashov), 454
Physiological Conditions Spontaneous De-amination of Amino-acid Phosphates under (Dr Mella Paecht and Prof A Katchalsky), 1489
Physiology Annual Review of (edited by Victor E Hall, in association with Frederick A Fuhrman and Arthur C Giese), Vol 21, *review* by Prof D C Harrison, 838
  Progress in, *review* by Prof D C Harrison, 838
Physiology at King's College, London 405
Physiology of Fungi (Prof Vincent W Cochrane), *review* by Dr J L Harley, 85
Physiology of Milk Secretion Potassium and Lactose in Milk in relation to the (Dr J A F Rook and Marian Wood), 647
Physiology (Cell), of Neoplasia (University of Texas Anderson Hospital and Tumour Institute fourteenth Annual Symposium on Fundamental Cancer Research), 1451
Physiology (Fungal) A Source Book of, *review* by Dr J L Harley, 85
Physique du Globe Realisation du Centre de, a Dourbes (Prof E Lahaye), 1022
Phytogeography and Geology Panbiogeography, or an Introductory Synthesis of Zoogeography, (Dr Léon Croizat), Vol 1, The New World, Vol 2a, The Old World , Vol 2b, The Old World (continuation), *review* by Prof Ronald Good, 924
Phytoplankton (Freshwater) Buoyancy in relation to the Ecology of the (Dr J W G Lund), 1534
π The Value of, and the Old Testament (Dr J Heading), 78
cio otto, Prof E (Gonfiantini, Dr R , and) Oxygen Isotope Variations in Antarctic Snow Samples, 1557
Pick, Jiří, and others Vapour–Liquid Equilibrium (translated by G Standart), *review* by Dr R Sargent, 837
Pickavance, T J At the Conference of the Mammal Society of the British Isles (Methods of carrying out Regional Mammal Surveys), 30
Pickering, B T , and Heller, Prof H Active Principles of the Neurohypophysis of Cold-blooded Vertebrates—Chromatographic and Biological Characteristics of Fish and Frog Neurohypophysial Extracts, 1463
Pickering, F B Appointed head of the Physical Metallurgy Section of the United Steel Companies, Ltd , 95
Pickering, Sir George White Elected an Honorary Member of the American Academy of Arts and Sciences, 410
Pickthall, J (Herzka, A , and) Pressurized Packaging (Aerosols), *review* by Dr V G W Harrison, 1437
Piddington, Dr J H Awarded the T K Sidey (Summertime) Award of the Royal Society of New Zealand, B A 16
  Awarded the David Syme Research Prize of the University of Melbourne, B A 16
Piel, Gerard Feeding the Hungry, 162
Pierce, R L (Grayson, J F , and) Origin and Dispersal of Flowering Plants (Low Representation of Angiosperms in two American Cretaceous Floras), 1201
Pieroni, Rômulo R (Lima, Fausto W , and) Paper Chromatographic Separation of Components of Rose Bengal Labelled with Iodine-131, 1065
Pig during the Sexual Cycle Periodic Acid-Schiff-Positive Material and Alkaline Phosphatase in the Uterine Wall of the (Rolv Austad and Dr Otto Garm), 999
Pig Kidney Tissue Culture Monolayers Effect of Proflavine on the Formation of the Virus of Foot-and-Mouth Disease and its Infective Ribonucleic Acid in (F Brown and Doreen L Stewart), B A 74
Piggott, W R The Calculation of the Median Sky Wave Field Strength in Tropical Regions, 605
Pigment Particles (Titanium Dioxide) Forces between (James E Latty and Dr W C Clark), 49
Pigment Production by Pseudomonas Enhancement of (Dr A M Paton), 1254
Pigments in Flagellates Photoreactive—Chromoprotein Pigments of some Cryptomonad Flagellates (Dr Mary Belle Allen, Dr Ellsworth C Dougherty and Dr John J A McLaughlin), 1047 , Phycoerythrins and Phycocyanins of Cryptomonads (Dr C OhEocha and M Raftery), 1049 , Photosynthetically Active Accessory Pigments of Cryptomonads (Dr F T Haxo and D C Fork), 1051

Pigments (Carotenoid) Function of, in Non-Photosynthetic Bacteria (Micheline M Mathews and W R Sistrom), 1892
  Light-induced Production of, by *Cephalosporia* (R C Codner and B C Platt), 741, *erratum*, 1108
Pigments (Chloroplast), of Deuterated Green Algae (Harold H Strain, Henry L Crespi and Joseph J Katz), 730
Pigments (Chromoprotein), of some Cryptomonad Flagellates (Photoreactive Pigments in Flagellates), (Dr Mary Belle Allen, Dr Ellsworth C Dougherty and Dr John J A McLaughlin), 1047
Pigments (Photosynthetically Active Accessory), of Cryptomonads (Photoreactive Pigments in Flagellates), (Dr F T Haxo and D C Fork), 1051
Pigments (Plant) Chromosome Breakage with (Dr Arun Kumar Sharma and Arati Gupta), 1821
Pigments (Visual), of some Common Laboratory Mammals (Dr C D B Bridges), 1727
Pigott, Dr C D Genetics and the Origin of Species, 587
Pilar de la Maza, Ma, and others Quantitative Estimation of the Fatty Acids of Olive Oil, 1941
Pillai, Dr P A Awarded a scholarship by the Lady Tata Memorial Trust, for research on Leukaemia and allied Diseases, 507

Plain Muscles (Isolated) Promoting Effect of Urea on the *in vitro* Passive Sensitization of, with Precipitating Antibody (R Binaghi, Dr B N Halpern, P Liacopoulos and T Neveu), 1805
Planck (Max-) Gesellschaft (Deutsche Bunsengesellschaft fur Physikalische Chemie and the) Colloquium on Fast Chemical Reactions in Solution, 1453
Planning More Land-Use (Prof L Dudley Stamp), 27
Planning in Pakistan (Political and Economic Planning, Broadsheet No 433), 504
Planning of Experiments (Dr D R Cox), 156
Plant (Non-Leguminous), *Hyptis suaveolens* Poit Anti-A Haemagglutinins from a (Dr G W G Bird), 109
Plant (Rice) Fixation of Nitrogen by the (S P Chakraborty and S P Sen Gupta), 2033
Plant Cell Membranes Maintenance of Semipermeability of, in the Absence of Metabolic Energy Supply (Dr B Ginzburg), 1073
Plant Diseases caused by Arabis Mosaic Virus Rôle of a Dagger Nematode (*Xiphinema* sp) in Outbreaks of (Dr B D Harrison and Dr C H Cadman), 1624
Plant Embryos A Quick Method for Extracting, from certain Types of Seed (M D Gwynne), 1588
Plant Extracts Tumour Production in Plants by (Dr Archana Sharma), 1083
Plant Geography and Ecology, International Society for International Symposium on Mapping Vegetation, B A 23
Plant Growth Activities of 5- and 8-Halogeno- Dihydro- and Tetrahydro-1-naphthoic Acids (Toshio Fujita, Sadao Imai, Koichi Koshimizu, Tetsuo Mitsui and Jiro Kato), 1415
Plant-Growth Promoting Activity Isolation of Fatty Alcohols with, from Maryland Mammoth Tobacco (Dr A J Vlitos and Dr D G Crosby), 462
Plant Growth Regulation (Boyce Thompson Institute for Plant Research, the New York Botanical Garden and the Brooklyn Botanic Garden fourth International Conference on), 599
Plant Growth Regulators in Regeneration Processes Interaction of (H Schraudolf and Prof J Reinert), 465
Plant Growth Substances (Prof L J Audus), second edition, *review* by Prof R L Wain, 925
Plant-Growth Substances and the Copper Chelation Theory of their Mode of Action (Dr C H Fawcett) 796
Plant Haemagglutinins (Lectins) A Method for Distinguishing between α- and β-Glycosides by the use of (Dr O Mäkela), 111
Plant Morphology, *review* by Dr S Williams, 84
Plant Nematodes (Dr Jesse R Christie), *review* by Dr W G Inglis, 1349
Plant Nematology (Ministry of Agriculture, Fisheries and Food, Technical Bulletin No 7), 855
Plant Nutrients Availability of (British Society of Soil Science Discussion on), 159
  Surface of the Ocean as a Source of Air-borne Nitrogenous Material and other (Dr A T Wilson), 99
Plant Origin Biological Properties of Phenols of, *review* by Dr F A Robinson, 486
Plant Pathogenic *Xanthomonas* spp Some New Specific Bacteriophages for (Z Klement), 1248
Plant Phenolics The Pharmacology of—Proceedings of a Symposium held at Oxford, 1958 (edited by J W Fairbairn), *review* by Dr F A Robinson, 486
Plant Pigments Chromosome Breakage with (Dr Arun Kumar Sharma and Arati Gupta), 1821
Plant Research, Boyce Thompson Institute for, and others Fourth International Conference on Plant Growth Regulation, 599
Plant Tissue Cultures Oxidative and Phosphorylative Activities of Cytoplasmic Particles from (Taiki Tamaoki, Prof A C Hildebrandt, A J Riker, R H Burris and Bunji Hagihara), 1491
Plant Tissues (Virus-infected) Biochemical Mechanism of Lesion Formation in (Dr F Solymosy, Dr G L Farkas and Dr Z Kiraly), 706
Plant-Virus Inhibitor from Rice Chemical Nature of a (W A Jones, M Jacobson and R P Kahn), 1146
Plantations (Even-Aged) Pathogenic Factors in the Rooting Space and the Development of (W R Day), B A 46
Plants Conversion of Salicylic Acid to Gentisic Acid and *o*-Pyrocatechuic Acid, all Labelled with Carbon-14, in (Dr Ragai K Ibrahim and Prof G H N Towers), 1803
  Distribution of Ascorbic Acid in the Leaves of some (Dr Philippe Hagene), 284
  Effects of Gibberellic Acid on Juvenility in *Marsilea* and certain other (Dr A Allsopp), 1575
  Tumour Production in, by Plant Extracts (Dr Archana Sharma), 1083
Plants on Land and in the Oceans (Dr W R G Atkins), B A 46
Plants (Cacao) Deficient in Copper Swellings on the Shoots of (Dr R G Lockard, P Vamathevan and S Thamboo), 75
Plants (Deciduous Woody), treated in Autumn with Gibberellic Acid Extended Dormancy of (Dr P W Brian, J H P Petty and P T Richmond), 69
Plants (Flowering) The Families of (Dr J Hutchinson), second edition, Vol 1, Dicotyledons, Vol 2, Monocotyledons, *review* by Prof T G Tutin, 1759
  Origin and Dispersal of (Prof A S Boughey), 1200
Plants (Higher) A New Technique for Isolating and Cloning Cells of (Ludwig Bergmann), 648
Plants (Rice) Quantitative Changes in γ-Aminobutyric Acid induced by Low Temperature in (F Zsoldos), 280
Plants (Soya Bean) Translocation of Carbon-14-labelled Amino-Acids and Amides in the Stems of young (C D Nelson and P R Gorham), 855
Plants (Strawberry) Transmission of a Virus to, by a Nematode (*Xiphinema* sp), (Asharfi Jha and Dr A F Posnette), 962, *erratum*, 1192
Plants (Vascular) Comparative Morphology of (Adriance S Foster and Ernest M Gifford, Jr), *review* by Dr S Williams, 84
Plasma of Anaemic Dogs after Nephrectomy Disappearance of the Erythropoietic Factor from (Dr Jean-Pierre Naets), 371
Plasma (Seminal), Serum and Bile Visualization of Acid and Alkaline Phosphatase after Starch-Gel Electrophoresis of (Dr Bengt Estborn), 1636
Plasma-Cell Neoplasm (Transplantable Mouse) Bence Jones Proteinuria associated with a (John L Fahey and Michael Potter), 654, *erratum*, 1108

Plasma Cholesterol in the Rat Effect of Dietary Fat and Extent of Blood Sampling on the Level of (I Coleman and J M R Beveridge), 1039
Plasma Fractions (Promethium), in Rats Distribution of (Dr Bergene Kawin), 1722
Plasma Heating by Current-Saturation (K A George), 1790
Plasma Insulin in Human Subjects Assay of, by Immunological Methods (Dr Rosalyn S Yalow and Dr Solomon A Berson), 1648
Plasma Sodium Concentration (Elevated) Effects of, on Sodium and Potassium in the Erythrocyte of the Lizard *Trachysaurus rugosus* (Gray), (P J Bentley), 1403
Plasmalogen Reaction of Mercuric Chloride with (Dr William T Norton), 1144
Plaster (Gypsum) Effect of Temperature on the Rate of Setting of (M J Ridge), 47
Plasticity of Erythrocytes coated with Incomplete Antibodies Loss of (Prof C T Nicolau, P Teitel and M Fotino), 1808
Plastics Lectures on (City of London College, in collaboration with the Plastics Institute), 508
Plastics (Ageing of) International Symposium on the (Eighth German Plastics Convention), 508
Plastics Convention Eighth German (International Symposium on the Ageing of Plastics), 508
Plastics Institute Annual Lecture (Lord Verulam), 1688
Plastics Institute (City of London College, in collaboration with the) Lectures on Plastics, 508
Plastron Respiration in the Eggs of *Drosophila* and other Flies (Dr H E Hinton), 280
Platelets (Long), from Pulmonary Megakaryocytes A Possible Explanation of the Formation of (Dr J George Sharnoff), B A 75
Plates (Crystal), between Crossed Polars A Special Case of the Superposition of, and its Bearing on the Microscopy of Cellulosic Fibres (Dr N H Hartshorne), 179
Platinum (II) Structure of α-Hydroxyacetylene Complexes of (Dr J Chatt, L A Duncanson and R G Guy) 526
Platinum in Mercury Influence of, on the Mechanism of Electrode Reactions at the Mercury Electrode (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus), 1795
Platon a Copernic Le Systeme du Monde—Histoire des Doctrines Cosmologiques de (Prof Pierre Duhem), Tome 10, *review* by Prof E J Dijksterhuis, 836
Platt, B C (Codner, R C, and) Light-induced Production of Carotenoid Pigments by *Cephalosporia*, 741, *erratum*, 1108
Platt, Sir Harry Biomechanics, 513
Platt, H Renewal Times of some Squamous Epithelia in the Guinea Pig, 1654
Pleistocene Climatic Significance of Calcretes and Ferricretes (Dr R J Mason, A B A Brink and K Knight), 568
Plenderleith, Dr H J Appointed first director of the International Centre for the Study of the Preservation and Restoration of Cultural Property, 504
Plesiosaur A Giant, 1914
Plots (Non-Inverted versus Inverted) in Enzyme Kinetics (Dr B H J Hofstee), 1296, (Dr Malcolm Dixon and Dr Edwin C Webb), 1298
Plunkett, R (edited by) Colloquium on Mechanical Impedance Methods for Mechanical Vibrations, presented at the Annual Meeting of the American Society of Mechanical Engineers, 1958 *review* by Prof R E D Bishop, 1764
Pneumococci Transformation Reaction of, in the Absence of Serum Factor (Prof Takeshi Odaka and Tadashi Watanabe), 471
Poa pratensis L A 'Progressive' Mutation induced in, by Ionizing Radiation (A A Hanson and F V Juska), 1000
Pochet, P, et autres Recherches sur l'Autosterilite du Cafeier robusta (*Coffea canephora* Pierre), 518
Pocock, N J B Awarded a Mond Nickel Fellowship for 1959, 1272
Podzol Soil Oxygen-containing Functional Groups in the Organic Matter of a (J R Wright and J Schnitzer), 1462
Poe, A J, and Vaidya, M S A Radiochemical Tracer Study of the Relative Stability of the Halogenoplatinates, 1139
Point Defects in Metals and Alloys Vacancies and other—a Symposium organized by the Institute of Metals, 1957 (Monograph and Report Series, No 23), *review* by Dr F C Thompson, 1765
Poisoning by Carbon Tetrachloride Prophylaxis o (C H Gallagher and R A Simmonds), 1407
Poisoning (Organophosphorus) in the House-Fly Esterase Inhibition and (Dr D Stegwee), 1253
Polanyi, Prof M Knowing and Being, 1194
Polar Diagrams of Birds Radar Echoing Area (J Edwards and E W Houghton), 1059
Polar Dyes Incorporation of N-Methyl Carbon of Monoethylaminoazobenzene into (Prof Hiroshi Terayama, Prof Morizo Ishidate and Akira Hanaki), 1460
Polar Front Survey in the North Atlantic Ocean, 1180
Polar Ice Caps Temperatures in (Dr Uwe Radok), 1056
Polarisationsmikroscop Die gesunden und die erkrankten Zahngewebe des Menschen und der Wirbeltiere im (Prof W J Schmidt und Dr A Keil), *review* by Prof A I Darling, 218
Polarity of Benzene and Borazole Substituents Intermolecular Distances and Diamagnetic Anisotropy in Crystals as Measures of the (Dame Kathleen Lonsdale), 1060
Polarity (Reversed) Resting and Action Potentials of, in Frog Nerve Cells (Dr I Tasaki), 1574
Polarization Deviation of Zone Lenses produced by (Prof Jurgen R Meyer-Arendt), 811
Polarization of Light from Noctilucent Clouds (Georg Witt), 1618
Polarization and Resolving Time Effects in Photon Correlation (Dr E Brannen and Prof W Wehlau), 263
Polarized Light Orientation of Animals to (Dr H Kalmus), 228
  Response of a Single Retinula Cell to (M Kuwabara and K Naka), 455
Polarographic Determination of Serine A Micromethod for the (J Ladik and Dr I Szekacs), 188
Polarographic Maximum of Copper Effect of Polycyclic Aromatic Hydrocarbons on the (C E Searle), 1716
Polarographic Society First Medal awarded to Prof J Heyrovsky, 772
Polars (Crossed) A Special Case of the Superposition of Crystal Plates between, and its Bearing on the Microscopy of Cellulosic Fibres (Dr N H Hartshorne) 179
Policy (Land Use), in Tropical Catchment Areas A Physical Basis for (Dr H C Pereira), 1768
Polio Virus Ribonucleic Acid Infectivity of, for Embryonated Eggs and Unsusceptible Cell Lines (F De Somer, Dr A Prinzie and E Schonne), 652
Poliomyelitis Virus Appearance of Crystalline Needles in Monkey Kidney Cell Cultures infected with, and Incubated at 22-30° C (Dr Esther Tenenbaum), 1657
Polish Academy of Sciences Election of Sir John Russell as a member, 95
Polished Metal Surfaces The Nature of (L E Samuels), 1280
Political and Commercial Control Two Threats to Broadcasting— (H Carleton Greene), 661
Political and Economic Planning Broadsheet No 431, Prospects for Nuclear Power, 383
  Broadsheet No 433, Planning in Pakistan, 504
  Broadsheet No 434, Management and Under-developed Territories, 483
  Broadsheet No 435, The Work of Newspaper Trusts, 1687
Political and Social Science, American Academy of Annals, May, 1959, Partnership for Progress—International Technical Co-operation, *review* by R Brightman, 1673
Pollard, Dr F H Gas Chromatography, 1199
Pollard, H Marvin, and others Some Enzymatic Properties of Suspensions of Parenchymatous Liver Cells, 1400
Pollard, Morris (edited by) Perspectives in Virology—a Symposium, *review* by N W Pirie, 920
Pollen of *Acacia* from Tufaceous Limestone near Udaipur (T Trivedi), 123
Pollen (Fossil), from Seymour Island, Antarctica (Lucy M Cranwell), 1782
Pollen Tubes Effect of Gibberellin on the Growth of (Nanda Bose), 1577
Pollination (Interspecific) Production of Seedless Hops by (Prof Edward L Davis), 1336
Pollution River (Dr Louis Klein), I, Chemical Analysis, *review* by Prof R Belcher, 1177
Pollution (Oil), of the Sea, Co-ordinating Advisory Committe on International Conference, 940
Pollution (River) Sewage Disposal and Trade Waste Treatment (Department of Civil Engineering and the Department of Extra-Mural Studies in the University of Birmingham Course on), 1451
Polunin, Dr Nicholas Circumpolar Arctic Flora, *review* by R D Meikle, 1347
Polyaldehyde Moieties in Sections and Smears Fluorescent Schiff-Type Reagents for Cytochemical Detection of (Prof Frederick H Kasten, Vivian Burton and Peggy Glover), 1797
Polycyclic Aromatic Hydrocarbons Effect of, on the Polarographic Maximum of Copper (C E Searle), 1716
Polyethylene Absorption Cells for Infra-Red Spectrophotometry (Trevor Robinson), 448
Polygalacturonase in Lucerne and Clover Effect of *Rhizobium* Polysaccharide on the Formation of (H Ljunggren and G Fahraeus), 1578
Polyglucoses (Synthetic) Reduction of Toxicity of Cationic Macromolecules by Complexing with Anionic Derivatives of (P T Mora, B G Young and M J Shear) 431
Polyisoprene Incorporation of DL-[2-^{14}C] Mevalonic Acid Lactone into (R G O Kekwick, B L Archer, D Barnard, G M C Higgins, G P McSweeney and C G Moore), 268, *erratum*, 772
Polymer, a Journal to Promote the Science of Large Molecules (Butterworths Scientific Publications, Ltd), B A 16
Polymer Chemistry Recent Progress in (Prof H Mark), 156
Polymer (High) Chemistry New Techniques in (Bradford Institute of Technology Course in) 1845
Polymer Phase Systems (Aqueous) Counter-Current Distribution of Proteins in (Per-Ake Ålbertsson and Ed Jacques Nyns), 1465, *erratum*, 1688
Polymer Science (Applied), Journal of, Vol I, No I, 784
Polymer Single Crystals Evidence for Distinct Sectors in (D C Bassett, Prof F C Frank and Dr A Keller), 810
Polymerization of Phosphonitrilic Chlorides (Prof Thomas R Merton), 899
Polymerizations (Vinyl), initiated by γ-Rays A Capacitance Method for following (G J K Acres and F L Dalton), 335
Polymerized (Highly) Spleen Deoxyribonucleic Acid labelled with Phosphorus-32 Injected Intraperitoneally into Rats Fate of the (Tamara A Hudnik-Plevnik, Vladimir R Glišin and Marta M Simić), 1818
Polymethacrylic Acid Electron Paramagnetic Resonance at 4 2°K of λ-Irradiated Polymethyl Methacrylate and (Dr Derick W Ovenall), 181
Polymethyl Methcrylate (λ-Irradiated), and Polymethacrylic Acid Electron Paramagnetic Resonance at 4 2°K of (Dr Derick W Ovenall), 181
Polymorphic Population Recombinational Lethals in a (J B Gibson and Prof J M Thoday), 1593
Polymyxin and Acetone Combined Use of, to obtain Cell-free Enzymes (J R Villanueva), 1565
Polynomial Representation of Thermodynamic Tables (Prof C J Pings), 444
Polynuclear Complexes of Molybdenum (II), (Dr J C Sheldon), 1210
Polynucleotide Phosphorylase in Atypical Epithelioma of Rat Occurrence of (Dr Kunio Yagi, Takayuki Ozawa and Hiroshi Konogi), 1939
Polyols Formation of, by the Lens of the Rat with 'Sugar' Cataract (Dr Ruth van Heyningen), 194
Polyoma Formation of Different Cell–Virus Relationships in Tumour Cells induced by (Dr Leo Sachs and Ernest Winocour), 1702
Polyoma-induced Tumours Influence of Adult Lymphoid Tissues on (Dr V Defendi and Dr H Koprowski), 1579
Polyoma Virus (Parotid Tumour Virus) Antibody Status of Mice and Response of their Litters to (Lloyd W Law, Clyde J Dawe, Wallace P Rowe and Janet W Hartley), 1420
Polypeptides (Synthetic) Immunochemical Studies of Polypeptidyl Proteins and (Prof M A Stahmann, D J Buchanan-Davidson, Dr C Lapresel and Dr P Grabar), 549
Polypeptidyl Proteins and Synthetic Polypeptides Immunochemical Studies of (Prof M A Stahmann, D J Buchanan-Davidson, Dr C Lapresel and Dr P Grabar), 549
Polyphenoloxidase (Insect) Interaction between Thiourea and (Wanda Chmurzynska and Lech Wojtczak), 1941
Polyphenoloxidase Substrate of the Banana Detection and Identification of the (Dr L A Griffiths), 58

Polyphloretin Phosphate Effect of, on the Suspension Stability of Red Blood Corpuscles (Dr Bengt Fries), 62

Polyploidy (Intraspecific), and Evolution of Diverse Morphological Forms in *Convolvulus pluricaulis* Chois (Dr S L Tandon and C P Mzalik) 481

Polypodiaceous Ferns Deoxyribonucleic Acid in Eggs of the (Dr P R, Bell), 1664

Polyporic Acid Antileukaemic Activity of (J F Burton and B F Cain), 1326

Polysaccharide (Extracellular), of *Azotobacter vinelandii* A Function for the (Dr Michael H Proctor), 1934

Polysaccharide (*Rhizobium*) Effect of, in the Formation of Polygalacturonase in Lucerne and Clover (H Ljunggren and G Fahraeus), 1578

Polysaccharide Chemistry Application of the Mass Spectrometer to (Dr P A Finan and Dr R I Reed), 1866

Polysaccharides (Group and Type-specific), of Group *D* Streptococci (Dr S D Elliott), 1342

Polysaccharides (Fibrillar) Liquid Crystal Systems from (R H Marshessault, F F Morehead and N M Walter), 632

Polytechnic Management Association New Development Series No 3, New Developments in Training—Five Studies in the Efficient Communication of Skills (edited by Frank A Heller), 421

Polyvinyl Chloride and Polyvinyl Acetate Separation of, by Chromatographic Methods (W J Langford and D J Vaughan), 116

Polyvinyl Acetate Gas Chromatographic Separation of Long-chain Fatty Acid Methyl Esters on (Irwin Hornstein, L E Elliott and P F Crowe), 1710

  Separation of Polyvinyl Chloride and, by Chromatographic Methods (W J Langford and D J Vaughan), 116

Ponder, Dr Eric, and Ponder, Ruth V Partial Identification of Lysins and Agglutinins in Lymphomatous Mouse Tissue, 819

Ponder, Ruth V (Ponder, Dr Eric, and) Partial Identification of Lysins and Agglutinins in Lymphomatous Mouse Tissue, 819

Pontecorvo, Prof G Trends in Genetic Analysis, *review* by J Maynard Smith, 752

  Biological Sciences, *review*, 1902

Ponten, Dr J Awarded a grant by the Lady Tata Memorial Trust, for research on Leukaemia and allied Diseases, 507

Poole, J B, and others A New Approach to the Dating of the Dead Sea Scrolls, 533

Pooled Human Gamma-Globulin Staphylocoagulase Inhibition by (Prof Murray M Streitfeld, Prof Bennett Sallman and Seymour M Shoelson), 1665

Poore, Prof M E D Appointed to the chair of botany in the University of Malaya in Kuala Lumpur, 306 , work of, 306

Pope, Dr J A Metal Fatigue, *review* by Dr K M Entwistle, 1438

Pope, M I (Gregg, S J, and) Coal Science (Ultra-fine Structure of Coals and Chars—Effect of Pressure and of Exposure to Atmospheres of various humidities on the Electrical Conductivity of Coal Artefacts), 413

Popov, —, and others Ionization Phenomena in Gases (The Interaction of a Beam of Charged Particles with a Plasma), 1356

Popper, P Special Ceramics (Preparing an Extremely Strong, Dense Silicon Carbide, without the Need for Hot-pressing), 1116 , (Silicon Nitride—its Preparation, its Properties as an Engineering Material and its Microstructure), 1116

Popper, P (Ingles, Dr T A, and) Special Ceramics (Preparation of Boron Nitride), 1116

Population The Study of (edited by Philip M Hauser and Otis Dudley Duncan), *review* by Dr B Benjamin, 1521

Population (*Baptisia* Hybrid) Applications of Paper Chromatography to Systematics—Recombination of Parental Biochemical Components in a (Dr R E Alston and Dr B L Turner), 285

Population (Lead-tolerant), of *Agrostis tenuis* Adaptation of a, to Low Soil Fertility (D Jowett), 43

Population (Mast Cell), of Lung of the Guinea Pig and other Tissues (Dr W G Smith), 1154

Population (Microbial) Effect of the Level of, on Isotopically Exchangeable Phosphate in Soil (Dr P Newbould and Dr R L Lucas), 1155

Population (Normal American) An Association between Abo Blood Groups and Fertility in a (Dr T Edward Reed and Dr J H Ahronheim), 611

Population (Polymorphic) Recombinational Lethals in a (J B Gibson and Prof J M Thoday), 1593

Population Council, Inc, New York Grant of 89,348 dollars to the National Institute for Research in Dairying, in support of researches on cervical mucus, with particular reference to the control of fertility, 1362

Population Ecology A Controversial Equation in (Dr A Milne), 1582 , (W B Yapp), 1582 , (Prof G C Varley), 1583

Population Subdivision Genetical Effects of (P A P Moran), 505

Populations Estimating Earthworm, by using Formalin (Dr F Raw), 1661

Populations (Animal) Exploitation of Natural (British Ecological Society Symposium on), 1451

Populations (Nematode) Effective Increase in, by the Addition of Aureomycin (C O R Everard and William A Feder), 1887

Porath, Dr J, and others Gel Filtration as a Method for Purification of Protein-bound Peptides as exemplified by Oxytocin and Vasopressin, 1565

Porcellati, G, and others Phospholipid Phosphoric Esters in the Human Placenta, 1870

Pork and Fish (Freeze-dried) Absorption of Atmospheric Moisture by (Norman A Matheson), 1949

Porous Materials The Structure and Properties of—Proceedings of the Tenth Symposium of the Colston Research Society held in the University of Bristol, 1958 (edited by D H Everett and F S Stone), *review*, 1525

Porous Media Sedimentation Rates, Fluidization and Flow through (Colin C Harris), 716

Porphyrin Biosynthesis (Haem and) Effect of Oxygen Tension on (J E Falk, R J Porra, Ann Brown, F Moss and Helen E Larminie), 1217

Porphyrin Ring Formation of the (Prof Jonathan B Wittenberg), 876

Porphyrins (Formyl) Reaction of, with Acetone-Hydrochloric Acid (Dr P S Clezy), 1142

Porra, R J, and others Effect of Oxygen Tension on Haem and Porphyrin Biosynthesis, 1217

Portela, A, and others Effects of Irradiation of Nerve on Muscular Response, 734

Porteous, Prof Norman W Myth and Ritual, *review*, 1972

Porter, Prof G, and Smith, Dr J A Mechanism of Atom Recombination, 446

Porter, Prof G, and Weber, Dr G Energy Transfer with special reference to Biological Systems, 688

Porter, Prof G, and Wilkinson, F Fast Chemical Reactions in Solution, 1453

Porter, Prof G, and Wright, Dr M R Energy Transfer with special reference to Biological Systems (Processes of Deactivation involving Change of Multiplicity), 689

Porter, Dr Roger S, and Johnson, Dr Julian F Volatile Liquid Partition Chromatography, 978

Porter–Silber and Schiff Reagents Use of, as Spot Tests for Steroids applied on Paper and their Application to the Study of Rat Adrenal Lipids (Dr Marion K Birmingham), B A 67

Portland Cement (Hydrated) Carbonate Minerals in (W F Cole and B Kroone), B A 57

Posener, Dr D W At the Second Australian Spectroscopy Conference (Microwave Spectroscopy), 1197

Position (Taxonomic), of *Arthrobacter* (Dr C S Cummins and Dr H Harris), 831

Positions of Microscopical Objects Recording the (Dr J R Baker), 34

Positions (Astronomical), of Uranus Great Earthquakes and the (Prof A Tomaschek), 177

Positive Inotropic Activity of Cytidine Triphosphate (Winifred G Nayler and Marian McCulloch), 67

Posnette, Dr A F (Jha, Asharfi, and) Transmission of a Virus to Strawberry Plants by a Nematode (*Xiphinema* sp), 962, *erratum*, 1192

Pospisil, Dr M, and Novak, Dr L Importance of the Type of Metabolism for the Radiosensitivity of Mice, 1814

Possible Asymmetry in the Daily Range of the Geomagnetic Vertical Intensity around the Magnetic Equator (Dr C A Onwumechilli), 51

Possible Explanation of the Formation of Long Platelets from Pulmonary Megakaryocytes (Dr J George Sharnoff), B A 75

Possible Explanation for Part of the Difference in Heat Tolerance Exhibited by *Bos taurus* and *Bos indicus* Beef Cattle (H P Ledger), 1405

Possible Intermediate Metabolite of Benzene Hexachloride in Houseflies Pentachloro*cyclo*hexene as a (R G Bridges), 1337

Possible Mechanism of Cysteine Protection against Radiation Cataract (A Pirie and L G Lajtha), 1125

Possible Relation between Carcinogenicity and Ease of Hydrolysis *in vitro* of Derivatives of 2-Aminofluorene (Prof Mary F Argus and Francis E Ray), 2018

Possible Relation with an Excess of Iron in the Forage A Lesion of the Follicle and of the Fibre of Wool and its (Prof G Gonzelez, J Garcia and E. Fernandez), 559

Possible Reversals of the Earth's Magnetic Field in the Jurassic Period (Dr R W Girdler), 540

Possible Rôle of Glycerol in the Winter-Hardiness of Insects (P Dubach, D Pratt, Prof F Smith and C M Stewart), 288

Possible Rôle of Higher Proprioceptive Centres in the Perception of Visual Space and in the Control of Motor Behaviour (Dr B Gurevitch), 1219

Possible Rôle of Indoleacetic Acid Oxidase in Crown Gall Tumour Induction (Dr Jacques Lipetz), 1076

Possible Simplified Structure of Deoxyribonucleic Acid (Dr M H Silk and A O Hawtrey), 1484

Post, R F Ionization Phenomena in Gases (Recent Progress in Mirror Machines), 1356

Post Office, General Appointment of A H Mumford as engineer-in-chief, 1531

  Retirement of Sir Lionel Harris as engineer-in-chief, 1531

  Appointment of Capt C F Booth and D A Barron as deputy engineers-in-chief, 1531

Post-Activation Changes at the Mammalian Neuromuscular Junction (J I Hubbard), 1945

Postdoctoral Fellowships (United States National Science Foundation), 1534

Post-Exposure Analysis of Organic Compounds in the Blood by a Rapid Infra-red Technique (Dr R D Stewart, D S Erley, T R Torkelson and C L Hake), 192

Postganglionic Mechanism Sympathetic (Prof J H Burn and M J Rand), 163

Postgraduate Agricultural Research Scholarships Junior (Agricultural Institute of Ireland Awards), 1612

Postgraduate Courses, 1959-60 (Imperial College of Science and Technology), 235

Postgraduate Research Studentship founded by the Phillips Petroleum Co at University College of North Staffordshire, 322

Postgraduate Research Studentship (a second) founded by the United States Rubber Co at University College of North Staffordshire, 322

Postgraduate Training in the Public Health Aspects of Nuclear Energy (World Health Organization, Technical Report Series No 154), 33

Potash Institute, International Sixteen Papers read at the Fourth Congress of the (Vienna, 1957), *review*, 1976

Potash Salts Biological Action of Potassium-40 in Naturally Occurring (Prof E Welte and KI Mechsner), 1958

Potassium Glass Micro-Electrodes for Measuring Intracellular Activities of Sodium and (Dr J A M Hinke), 1257

Potassium-40 Biological Action of, in Naturally Occurring Potash Salts (Prof E Welte and KI Mechsner), 1958

Potassium-42 Relative Rates of Exchange of, by the Foetal Metanephros and Foetal Liver (Dr J G Bearn and Dr F T C Harris), 1959

Potassium, Calcium and Magnesium Effect on the Groundnut of Variations in Supply of (Dr R Comber), 1003

Potassium and Lactose in Milk in relation to the Physiology of Milk Secretion (Dr J A F Rook and Marian Wood), 647

Potassium/Sodium Ratio in Rainwater (B C V Oddie), 1791

Potassium (Sodium and), in the Erythrocyte of the Lizard *Trachysaurus rugosus* (Gray) Effects of Elevated Plasma Sodium Concentration on (P J Bentley) 1403

Potassium Fluxes (Salicylate and), of Rat Diaphragm (Dr J A Hicklin), 2029

Potassium Salt of Gibberellic Acid Effect of the, on the Growth and Reproduction Rate of *Paramecium multimicro-nucleatum* (A A Oravec, N G Strovilas, J L Beal and Arthur Tye) 1405
Potassium Symposium 1957—Sixteen Papers read at the Fourth Congress of the International Potash Institute, *review*, 1976
Potassium rich Solutions Action Potentials from Single Nodes of Ranvier in (Dr Hans-Christoph Luttgau), 1494
Potato (Sweet) Effect of Indole Acetic Acid and α-Naphthalene Acetic Acid on the Growth, Flowering and Fruit Set in (G Satyanarayana and Dr G Rangaswami), B A 73
Potato Beetle (Colorado), *Leptinotarsa decemlineata* (Say) Common Attractant for the Tobacco Hornworm, *Protoparce sexta* (Johan) and the (Dr Robert T Yamamoto and Prof G Fraenkel), 206
Potato Starch Granules Physical and Chromatographical Observations of γ-Irradiated (Akira Mishina and Ziro Nikuni), 1867
Potent New Analgesic Identification of Phenazocine, a (Dr E G C Clarke), 451
Potentials (Action), from Single Nodes of Ranvier in Potassium-rich Solutions (Dr Hans-Christoph Luttgau), 1494
Potentials (Evoked), in Visual Cortex of the Unanaesthetized Cat (Gabriel Horn and John Blundell), 173
Potentials (Nerve Action) Amplitude-Modulation Radio-Telemetry of (Roger M Morrell), 1129
Potentials (Redox), in Soybean Nodules during the Vegetative Period (Dr Helena Ebertova), 1046
Potentials (Resting and Action), of Reversed Polarity in Frog Nerve Cells (Dr I Tasaki), 1574
Potentiation of Contractions after Rest in the Isolated Rat Ventricle Preparation (Dr R L Speirs), 66
Potter, Dr H H *Obituary*, 1912
Potter, Michael (Fahey, John L , and) Bence Jones Proteinuria associated with a Transplantable Mouse Plasma-Cell Neoplasm, 654, *erratum*, 1108
Potteries Industrial Health in the, 420
Potts, W H Biological Problems arising from the Control of Pests and Diseases, 1101
Poulik, Dr M D Separation of Prealbumins by Starch Gel Electrophoresis, 1067
Poulik, Dr M D , and others Separation of Fast-Moving γ-Globulins by Starch-Gel Electrophoresis, 1800
Poulton, E C Effects of Printing Types and Formats on the Comprehension of Scientific Journals, 1824
Poults (Turkey) Effect of Thioctic Acid on Gain in Body-Weight by (J R Jowsey, R M Blakeley and H I MacGregor), 1323
Powder Rapid Estimation of the Specific Surface of a (Dr H E Rose and R M E Sullivan), 46
Powder Method in X-Ray Crystallography (Prof Leonid V Azaroff and Prof Martin J Buerger), *review* by Prof H Lipson, 1599
Powder Methods X-Ray, *review* by Prof H Lipson, 1599
Powdered Tragacanth (Tragacanthae Pulvis, B P) Growth Inhibition of Mouse Ascites Tumour Cells by (Dr E M F Roe), 1891
Powell, C , and Hendley, D A Awarded the Clerk Maxwell Premium of the British Institution of Radio Engineers, 857
Powell, the late Joan F , and Strange, R E Synthesis of Dipicolinic Acid from αε-Diketopimelic Acid, 878
Power, E A (Griffiths, Dr T C , and) Nuclear Forces and the Few-Nucleon Problem, 1113
Power, Ministry of Thirty-sixth Annual Report (1957) of the Safety in Mines Research Establishment, 154
  Appointment of Dr C M Cawley as chief scientist, 232
  Appointment of Major-General S W Joslin as chief inspector of nuclear installations, 680
Power (Separating), of Packed and Capillary Gas Chromatographic Columns Comparison of Efficiency and (Dr J H Purnell), 2009
Power Generation Nuclear Reactors for (edited by E Openshaw Taylor), *review* by R Vaux 301
Power Projects The St Lawrence Seaway and—Geographical Background (Prof T L Hills) B A 49
Power Reactors (Directory of Nuclear Reactors, Vol I), (International Atomic Energy Agency), *review* by Dr A J Salmon, 1438
Power (Nuclear) Development of, *review* by R Brightman 1673
  The Economics of, including Administration and Law (edited by I R Maxwell, P W Mummery and Philip Sporn), Vol 2, *review* by R Brightman, 1673
  Prospects for (Political and Economic Planning, Broadsheet No 431), 383
  Research and Development Charges in Civic, 406
Power (Nuclear), and its Development, 383
Power (Nuclear) Station The Japanese, 407
Powles, Dr J G Molecular and Atomic Motions by Radio-Frequency Methods—Maxwell-A M P E R E Conference, 157
Powles, Dr J G , and Cutler, D Proton Resonance Relaxation Times in Mobile Liquids, 1123
Powning, R F , and Irzykiewicz, H A Reduced Triphosphopyridine Nucleotide-linked Cystine Reductase in the Clothes Moth, *Tineola bisselliella* (Humm), 1230
Poynter, Dr F N L Distribution of Scientific Publications in Underdeveloped Countries, B A 23
Practical Animal Ecology (W H Dowdeswell), *review* by Prof J B Cragg, 1262
Practical Use of the Microscope (George Herbert Needham), *review* by Dr S Bradbury, 1174
Practice Electrophoresis in Theory and, *review* by Dr R Consden, 84
Practice of Crop Protection The Principles and, *review* by F C Bawden, 1258
Practice of Semiconductors An Introduction to the Theory and (Dr A A Shepherd), *review* by Dr R A Hyman, 1754
Pragmatics (Systematic) Toward a (R M Martin), *review* by F I G Rawlins, 754
Prain, Sir Ronald Elected president of the Institute of Metals, 1688
Prantl, Dr F Elected to foreign membership of the Geological Society of London, 1360
Prasad, A N , and Craggs, J D Ionization Phenomena in Gases (Recent Measurements on the Growth of Pre-breakdown Ionization Currents for Air), 1354
Pratt, D , and others Possible Role of Glycerol in the Winter-Hardiness of Insects, 288
Pratt, Dr D D Retirement from the directorship of the National Chemical Laboratory, 1610 , work of, 1610
Pratt, M W T , and Helsby, R Ultrasonically Dispersed Sodium, 1694
Prealbumins Separation of, by Starch Gel Electrophoresis (Dr M D Poulik), 1067
Pre-Cambrian Geology of South-western Australia (A F Wilson) 237
Pre-Cambrian Gneiss of Ongul Islands in the Antarctic Natural Remanent Magnetization of (T Nagata and Y Shimizu), 1472
Pre-Cambrian Ice Age (Late) Palaeomagnetism in some Norwegian Sparagmites and the (W B Harland and D E T Bidgood), 1860
Precipitate (A New Nitride), in Iron-Silicon Alloys (G R Booker and J Norbury), 1311
Precipitated Cadmium Sulphide Structure of, as studied by Single-Crystal Electron Diffraction Pattern (Dr Ryoitiro Sato), 2005
Precipitating Antibody Promoting Effect of Urea on the *in vitro* Passive Sensitization of Isolated Plain Muscles with (R Binaghi, Dr B N Halpern, P Liacopoulos and T Neveu), 1805
Precipitation Reaction (Surface) A Method for the Quantitative Study of the (Francis T Ashton), 1735
Precipitator (Long-Running Thermal) Measurement of Asbestos Dust Concentrations with the (Dr C G Addingley and Dr R Gaze), 715
Precipitins (Human), against Common Pathogenic and Non-Pathogenic Fungi (Dr J Pepys, Dr R W Riddell and Dr Y M Clayton), 1328
Precursor for Haemoglobin Nonhaem Iron in Erythrocytes as a (Dr M Faber and Dr I Falbe-Hansen) 1043
Precursors (Nicotinamide Analogues and) Reversal of Effects of 2-Substituted Thiadiazoles by (Dr Irwin H Krakoff, Corrine R Lacon and Dr David A Karnofsky), 1805
Predators Pirates and—the Piratical and Predatory Habits of Birds (Colonel R Meinertzhagen), *review* by Sir Landsborough Thomson, 1435
Prediapause Eggs of *Aedes* Mosquitoes Control of Hatching in the (Dr J D Gillett), 1621
Prediction of Selection Factors in a Tropical Trawl Fishery (Alan R Longhurst), 1170
Prediction of Sunspot Numbers until the End of the Present Cycle (Dr P Herrinck), 51
Prediction of Sunspot Numbers for Cycle 20 (Dr W B Chadwick), 1787
Prediction (Electronic), of Swarming in Bees (E F Woods), 842
Preece, Prof A *Obituary* by Prof A F Burstall, 316
Preece, B W Appointed assistant lecturer in engineering at the University College of Swansea, 156
Preece E R , and others Atomic Weight of Silver, 358
Preer, Dr John R The Structure of Science (Mechanism of Gene-action), B A 8
Prefreezing as a Method enabling Animals to survive Freezing at an Extremely Low Temperature (Eizo Asahina), 1003
Prégermain, S (Chiche, P , and) Coal Science (Ultra-fine Structure of Coals and Chars), 413
Pregnancy Blood Cortisol in the Sheep—Normal Concentration and Changes in Ketosis of (H R Lindner), 1645
Pregnancy in the Mouse An Exteroceptive Block to (Hilda M Bruce), 105
Pregnancy in Ovariectomized Ewes Maintenance of by means of Progesterone (N W Moore and L E A Rowson), 1410
Prehistoric Background of Indian Culture (Colonel D H Gordon), *review* by M C Burkitt, 131
Prehistoric Wooden Trackways Radiocarbon Dating of (Dr H Godwin and Dr E H Willis), 490
Prehistory Indian, *review* by M C Burkitt, 131
Prehistory (Australian) Dating of (D J Mulvaney), 918
Preliminary Observations on the Fate of Intravenously Administered Lactose Labelled with Carbon-14 (Dr Frederick J Carleton and Dr Henry R Roberts), 1650
Prelude to Space Research, *review* by D G King-Hele, 663
Premiums for articles on Electronics (Radio Industry Council and the Electronic Engineering Association), 943
Prenatal Development Environmental Influences on (edited by Beatrice Mintz), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Prentice, Neville, and others Production of Emetic Material by Species of *Fusarium*, 1319
Preobragenski, Prof J V Polar Front Survey (Hydrography—Greenland and Norwegian Seas) 1181
Preobragenski, Prof J V (Betin, Dr V V , and) Polar Front Survey (Hydrography—Ice Research in the Baltic) 1183
Preparation of Crystalline *trans-trans* Methyl Linoleate Hydroperoxide (A Banks, S Fazakerley, J N Keay and J G M Smith), 816
Preparation of Diamond (Dr H P Bovenkerk, Dr F P Bundy, Dr H T Hall, Dr H M Strong and Dr R H Wentorf, jun), 1094
Preparation of a Highly Purified Carbohydrate-free Johnin Protein (E Annau), 1642
Preparation of a Highly Purified Sample of the Urinary Gonadotrophin (Roland Bourrillon René Got and René Marcy), 983
Preparation (Coal) Second Symposium on (Department of Mining, University of Leeds, 1957), *review* by Prof S G Ward, 1601
Prescott, Prof J C Retirement from the chair of electrical engineering in King's College, Newcastle-upon-Tyne, 404 , work of, 404
Presence of Activated Charcoal Carbonization of Coals in the (Studies of Coal), (R L Bond, A M Godridge, A R Murnaghan, D H Napier and D J Williams), 425
Presence of Arginine Vasotocin and Oxytocin in Neurohypophysial Extracts from Cold-blooded Vertebrates Pharmacological Evidence for the (Active Principles of the Neurohypophysis of Cold-blooded Vertebrates), (Wilbur H Sawyer, Robert A Munsick and Prof H B van Dyke), 1464
Presence of Behinic Acid in Sphingomyelin from Horse Spinal Cord (Prof Yasuhiko Fujino and Takashi Negishi), 817
Presence of certain Onium Compounds in Brain Tissue following Intravenous Administration to Rats (Prof Ruth R Levine), 1412
Presence of Oxygen in Irradiated Solutions Aromatic Ring Opening in the (Israel Loeff and Gabriel Stein), 901

Presence in Rose Hips of Substances Inhibiting the Oxidation of Ascorbic Acid (Dr G A D Jackson and R B Wood), 902
Present Systems of Superannuation Difficulties in the, 503
Presentation of Bone Sarcoma in Man A Seasonal Rhythm in the (Dr C H G Price), B A 76
Preservation of Antiquities Chemistry in the (British Association for the Advancement of Science, Sections B (Chemistry) and H (Anthropology), Discussion on), 585
Preservation of Cornish Scenery, 1776
Preservation of the Malvern Hills, 1272
Preservation of Natural and Historical Monuments and Relics, Southern Rhodesia, (Commission for the) Khami Ruins—Report on Excavations, 1947-1955 (K R Robinson), *review* by R R Inskeep, 1349
Preservation of Rural England, Council for the (Sheffield and Peak District Branch) Twenty-eighth Annual Report (1959), 408
Preservation and Restoration of Cultural Property, International Centre for the Study of the Inauguration of the, 504
  Appointment of Dr H J Plenderleith as first director, 504
Preservatives (Water-borne) Limitations Imposed by some, on the Soil Block Test Method for Timber (A J MacQuire), 1430
President of the United States, Science Advisory Committee to the Report on Education for the Age of Science, 81, 87
Pressey, B G Signals from Satellite 1958 δ2 (*Sputnik III*), 261
Pressor Activity (Oxytocic and) Peptides with, obtained from Acidified Rat Serum (Prof H Croxatto T Pereda and R Mellada), 1496
Pressure World Distribution of Atmospheric Water Vapour (G A Tunnell), B A 15
Pressure (Bursting) Measurement of the Effects of Piston Mass and, on the Motion of a Piston in a Hypersonic Gun Tunnel (B J Belcher), 1207
Pressure (High-) Oxygen and Radiotherapy, 94
Pressure (Reduced) Habit of Ice Crystals grown in Hydrogen, Carbon Dioxide and Air at (A P van den Heuvel and Dr B J Mason), 519
Pressure (Rock), in Mines (E de St Q Isaacson), *review* by J K L Graham, 1349
Pressurized Packaging (Aerosols), (A Herzka and J Pickthall), *review* by Dr V G W Harrison, 1437
Preston, Prof R D Biological Fibres, B A 25
Presumed Glossopteridean Fructifications in Rhodesia and Nyasaland Occurrence of (Dr William S Lacey), 1592
Prevalence (High), of High-Level β-Amino-*iso*butyric Acid Excretors in Micronesians (Dr B S Blumberg and Dr S M Gartler), 1990
Preventing Juvenile Delinquency, 1203
Prevention of Foetal Development by Enzyme Inhibition (Prof G Kahlson and Elsa Rosengren) 1238
Prevention of the Onset of Seed Dormancy by Gibberellic Acid (Dr M Black and J M Naylor), 468, *erratum*, 857
Priborostroenie To be produced under the title *Instrument Construction* (translated from the Russian) (British Scientific Instrument Research Association), 592
Prey Birds of, *review* by Sir Landsborough Thomson, 1435
Priapulid (Abyssal) *Priapulus abyssorum*, New Species, the first (Robert J Menzies), 1585
Priapulus abyssorum, New Species, the first Abyssal Priapulid (Robert J Menzies, 1585
Price, Dr C H G A Seasonal Rhythm in the Presentation of Bone Sarcoma in Man, B A 76
Price, Dorothy (edited by) Dynamics of Proliferating Tissues (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Price, Dr D E, and others Absorption of Zinc Phosphide Particles, 642
Price, Dr D J Appointment as visiting professor of the history of science in Yale University, for the academic year 1959-60, 95
Price, Prof J M, and others 8-Hydroxyquinaldic Acid, the Red Fluorescent Substance in the Urine of Pyridoxine-deficient Rats, 1573
Price, S A, and others Tocopherols in Micro-organisms, 1339
Priede Dr D (Austen, Dr A E W and) Recent Studies of Noise Problems (Physical Acoustics—Diesel Engine Noise), 415
Priestley, M B Fluctuation Phenomena and Stochastic Processes (Detecting a Signal containing several Harmonic Components in the presence of Background Noise), 509
Primaquine-sensitive Erythrocytes (Normal and) Characteristics of Glucose-6-phosphate Dehydrogenase from (Glucose-6-phosphate Dehydrogenase and Human Erythrocytes), (Dr Henry N Kirkman), 1291
Primaries Colour-Image Synthesis with Two Unorthodox (Arthur Karp), 710
Primary Processes indicated by the Flash Technique (Reductive Photobleaching of Eosine), (Shunji Kato and Masao Koizumi), 1620
Primavesi, G R Analysis of Light Hydrocarbons, 2010
Primer Explosion Triggers Reaction (G Larikov), 447
Prince, Dr Morton B, and Wolf, M Awarded the Marconi Premium of the British Institution of Radio Engineers, 857
Principal Magnetic Moments of Co^{++} Ions Temperature Variation of the, and the Asymmetry of the Crystalline Electric Field in Cobalt Acetate Tetrahydrate (Dr Bhagawati Charan Guha), 50
Principle (Hormonal) Natriferin a New in the Neurohypophysis of certain Vertebrates (J Maetz, F Morel and R Lahlouh), 1236
Principle (Transforming), of *Bacillus subtilis* Incorporation of 5-Bromouracil into, and its Biological Effects (Dr Erela Ephrati-Elizur and Prof Stephen Zamenhof), 472
Principles of Electrolysis (Prof C W Davies), *review* by Dr V Gold, 1902
Principles of Electronics (Prof M R Gavin and Dr J E Houldin), *review* by Prof D G Tucker, 751
Principles of Electrophoresis (Rene Audubert and Serge de Mende), translated by A J Pomerans, *review* by Dr R Consden 84
Principles of Geochemistry (Prof Brian Mason), second edition, *review* by Dr S R Nockolds, 1601
Principles of Humane Experimental Technique (Dr W M S Russell and R L Burch), *review* by Prof M Weatherall, 1675
Principles of Modern Physics (Prof Robert B Leighton), *review* by Dr E Stanley, 1438
Principles of Oxidation and Reduction (Dr A G Sharpe), *review* by Dr V Gold, 1902
Principles of Statistical Techniques (P G Moore), *review* by W J Langford, 1523
Principles (Active), of the Neurohypophysis of Cold-blooded Vertebrates—Chromatographic and Biological Characteristics of Fish and Frog Neurohypophysial Extracts (B T Pickering and Prof H Heller), 1463 , Pharmacological Evidence for the Presence of Arginine Vasotocin and Oxytocin in Neurohypophysial Extracts from Cold-blooded Vertebrates (Wilbur H Sawyer, Robert A Munsick and Prof H B van Dyke), 1464 , Arginine Vasotocin (Panayotis G. Katsoyannis and Prof Vincent du Vigneaud), 1465
Principles (Scientific), of Crop Protection (Hubert Martin), fourth edition, *review* by F C Bawder, 1258
Principles and Practice of Crop Protection, *review* by F C Bawden, 1258
Printing Dispute *Nature* and the Recent, 919
Printing Types and Formats Effects of, on the Comprehension of Scientific Journals (E C Poulton), 1824
Prinzie Dr A and others Infectivity of Polio Virus Ribonucleic Acid for Embryonated Eggs and Unsusceptible Cell Lines, 652
Priroda Articles dealing with Space Projectiles launched in the Soviet Union, 771
Private Philanthropic Foundations Grants for, during 1957 (United States National Science Foundation, Reviews of Data on Research and Development, No 15), 1272
Privy Council Committee of Appointment of Sir Hugh Linstead as House of Commons member of the Medical Research Council, 772
Probability Chance and (British Association for the Advancement of Science, Section J (Psychology), Discussion on), 497
  Some Aspects of Analysis and (Irving Kaplansky, Marshall Hall, Jr, Edwin Hewitt and Robert Fortet), *review* by D G Kendall, 214
Probing Behaviour of *Aedes aegypti* (L) in Response to Heat and Moisture (L Burgess), 1968
Problem of Distribution Relict Fauna of Ennerdale Water—a (Dr W. Pennington), 1421
Problem of Viscoelasticity A Molecular Approach to the (Prof Alfred H. Nissan and H G Higgins), 1477
Problem (Few-Nucleon) International Conference on Nuclear Forces and the (Dr T C Griffith and E A Power), 1113
Problems Under-developed Territories and their, 1519
Problems in Chemical Kinetics and Reactivity Some (N N Semenov), Vol I (translated by Michael Boudart), *review* by Dr T M Sugden, 299
Problems of Sex Grants-in-aid for Research in (United States National Academy of Sciences—National Research Council), 1107
Problems and Education Handicapped Children in Britain—their (compiled by W A Axford), (Library Association), 1777
Problems (Administrative), in Expanding Universities (Home Universities Conference, 1959), 1613
Problems (Basic), in Propulsion (Combustion and Propulsion Panel of the Advisory Group for Aeronautical Research and Development Discussion on) 779
Problems (Biological), arising from the Control of Pests and Diseases (Institute of Biology Symposium on), 1100
Problems (Educational), of the Commonwealth, 747
Problems (Management), in Under-developed Countries, 483
Problems (Mental Health), in Old Age (World Health Organization of the United Nations, Technical Report Series No 171), 1844
Problems (Noise) Recent Studies of (Acoustics Group of the Physical Society Symposium on), 414
Problems (Scientific Man-power), in Britain, 1971
Procedures (Diazotization), used in Biological Assay Systems Interference by Azide with (J R Villanueva), 549
Process (Szilard-Chalmers), in Solids Influence of Crystal Defects on the (Dr A G Maddock and J I Vargas), 1931
Processes Thermonuclear (Institution of Electrical Engineers and the British Nuclear Energy Conference Convention on), 240
Processes (Catalytic), and Petroleum, *review* by Dr David M Wilson, 1090
Processes (Condensation), for the Extraction of Radioactivity from Air (Rama), 1789
Processes (Electrode) Influence of Gold in a Mercury Electrode on certain (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus), B A 56
Processes (Magnetic) The Visualization of (Prof L F Bates), B A 41
Processes (Primary), indicated by the Flash Technique (Reductive Photobleaching of Eosine), (Shunji Kato and Masao Koizumi), 1620
Processes (Regeneration) Interaction of Plant Growth Regulators in (H Schraudolf and Prof J Reinert), 465
Processes (Stochastic) Fluctuation Phenomena and (Physical Society Conference on), 509
Processing (Chemical), of Nuclear Fuels (Dr F S Martin and Dr G L Miles) *review* by Dr J E Littlechild, 1346
Processing Mixtures containing Anhydrous Aluminium Chloride A New Method for Working up (Dr T Szell and A Furka), 117, *erratum*, 595
'Procinyl' Dyes (Imperial Chemical Industries, Ltd), 152
Proctor, Dr M H Awarded an Overseas Scholarship by the Royal Commission for the Exhibition of 1851, 409
  A Function for the Extracellular Polysaccharide of *Azotobacter vinelandii*, 1934
Proctor, Nancy G Science by the Upper Form, 597
Produce Malignant Change with Deoxyribonucleic Acid from Rat Sarcoma and Hepatoma An Attempt to (Dr J G Bearn), 824
Product (The Coloured), of the Sakaguchi Reaction (Kshirod R Bhattacharya), 53
Production The Computer in (Institution of Mechanical Engineers Discussion on), 1613
  Tree Fruit (Dr James S Shoemaker and Dr Benjamin J E Teskey), *review* by Prof H W Miles, 487
Production of an Agglutinating Auto-Antibody (Panagglutinin) Active upon Tanned Erythrocytes in the Rabbit (P O Hubinont, P Ghysdael and O Thys), 1250
Production of Amylase by *Penicillium chrysogenum* Inhibitory Effect of Fungistatic Antibiotics on the (Dr I Horvath and A Szentirmai), 57
Production of Colicine by Single Bacteria (H Ozeki, Dr B A D Stocker and Helene de Margerie), 337
Production of Colicines in Simmons s Citrate Agar (Dr J Papavassiliou), 1339

Production of Emetic Material by Species of *Fusarium* (Neville Prentice, A D Dickson and Prof J G Dickson), 1319
Production of Ethylene by Mitochondria from Tomatoes (Prof Mary S Spencer), 1231
Production of Fungal Arbuscular Organs on Laboratory Media (G A Atkins), 1738
Production of γ- and α-Globulins by the Isolated and Perfused Rat Spleen (Dr E Espinosa), 1801
Production of Odd-Numbered Carbon Fatty Acids from Propionate by Mice (Prof S B Tove), 1647
Production of Œstrogen in the Ovary of the Rat Site of (Dr Bengt Falck), 1082
Production of a Perfect Stage in a Nutritionally Deficient Mutant of Pathogenic *Fusarium oxysporum* after Ultra-violet Irradiation (E W Buxton), 1258
Production of all the Rare Earth Metals (Johnson, Matthey and Co , Ltd), 683
Production of Seedless Hops by Interspecific Pollination (Prof Edward L Davis), 1336
Production of Serum Albumin and of Globulins by Chick Mesenchymal Tissue and by HeLa Tumour Tissue in Culture (Y Abdel-Samie, Prof E Broda, G Kellner and W Zischka) 361, *erratum*, 943
Production (Antibiotic), as a Function of Spore Formation in *Bacillus licheniformis* (Robert W Bernlohr and G D Novelli), 1256
Production (Citric Acid), by *Aspergillus niger* Effect of Sulphanilamide on (K V Rajagopalan, R Radhakrishnamurthy and P S Sarma), 461
Production (Experimental), of Magnesium Deficiency in Lambs on a Diet containing Roughage (Dr D M McAleese and Dr R M Forbes), 2025
Production (Light-induced), of Carotenoid Pigments by *Cephalosporia* (R C Codner and B C Platt), 741, *erratum*, 1108
Production (Pigment), by Pseudomonas Enhancement of (Dr A M Paton), 1254
Production (Refinery), 1957 and 1958 United Kingdom Petroleum Industry Statistics relating to Consumption and (Petroleum Information Bureau), 855
Production (Thermoregulatory Heat), in the Brain (Prof Sz Donhoffer, Gy Szegnari I Jarai and M Farkas), 993
Production (Tumour), in Plants by Plant Extracts (Dr Archana Sharma), 1083
Production Facilities New Research and, at Ciba (A R L), Ltd (R F Webb), 601
Productivity Grass (Andre Voisin), translated from the French by Catherine T M Herriot, *review* by Dr W Davies, 1675
Productivity (Grassland) The Measurement of (Sixth Easter School in Agricultural Science at the University of Nottingham School of Agriculture), 154
Productivity Measurement in Great Britain (T E Easterfield), 592
Products (Clay) Permanent Moisture Expansion of, on Natural Exposure (J S Hosking and H V Hueber), 1373
Products (Fission) Biogeochemical Enrichment of (Prof Pontus Ljunggren), 912
Products (Food) The Chemical Analysis of Foods and (Dr Morris B Jacobs), third edition, *review* by Dr V H Booth, 1347
Products (Natural) The Chemistry of, Vol 1, The Alkaloids (K W Bentley) , Vol 2, Mono-and Sesquiterpenoids (P de Mayo) , Vol 3, The Higher Terpenoids (P de Mayo), *review* by Prof A J Birch, 754
  Steric Effects of the Chemistry and Biochemistry of (Biochemical Society Symposium on), 947
Prof The—a Personal Memoir of Lord Cherwell (Sir Roy Harrod), *review* by Prof R V Jones, 1752
Profession of Government (Dr Brian Chapman), 1087
Profession of Government—the Public Service in Europe (Dr Brian Chapman), 127
Professional Societies (Learned and), in Britain Taxation of, 1343
Proflavine Effect of, on the Formation of the Virus of Foot-and-Mouth Disease and its Infective Ribonucleic Acid in Pig Kidney Tissue Culture Monolayers (F Brown and Doreen L Stewart), B A 74
Progeny of the Migratory Locust Maternal Control of Ovariole Number in the (F O Albrecht, M Verdier and R E Blackith), 103
Progesterone Maintenance of Pregnancy in Ovariectomized Ewes by means of (N W Moore and L E A Rowson), 1410
Progesterone and Œstrogen Seasonal Changes in the Œstrous Response by the Ovariectomized Ewe to (Prof J I Raeside and M F McDonald), 458
Progress Partnership for—International Technical Co-operation (Annals of the American Academy of Political and Social Science, May 1959), *review* by R Brightman, 1673
Progress in Biophysics and Biophysical Chemistry (edited by Prof J A V Butler and Prof B Katz) Vol 9, *review* by P A Merton, 1092
Progress of Chemical Engineering in Britain (Sir Hugh Beaver), 408
Progress in Chromatography, Electrophoresis and related Methods Chromatographic Reviews— (edited by Michael Lederer), Vol I, *review* by Dr R Consden, 1436
Progress in Coke Research in Great Britain, 1778
Progress in Dielectrics (edited by Dr J B Birks and Dr J H Schulman), Vol I, *review* by Dr V Daniel, 1175
Progress in Gas Chromatography (C G Scott), 1199
Progress in Industrial Microbiology (edited by Dr D J D Hockenhull), Vol I, *review* by Dr N Blakebrough, 1598
Progress in Nuclear Energy Series 6, Biological Sciences, Vol 2 (edited by J C Bugher, J Coursaget and J F Loutit), *review* by Prof G Pontecorvo, 1902,
  Series 7, Medical Sciences, Vol 2 (edited by J C Bugher, J Coursaget and J F Lutit), *review* by Dr N M Blackett, 1766
Progress in Organic Chemistry (edited by Dr J W Cook), Vol 4, *review* by Dr K H Overton, 1439
Progress in Physiology, *review* by Prof D C Harrison, 838
Progress in Polymer Chemistry Recent (Prof H Mark), 156
Progress of Public Education in the United States of America (1957-58), 418
Progress of Rubber Technology Annual Report on the (edited by Dr T J Drakeley), (Institution of the Rubber Industry), 854
Progress of Satellite $1958\delta_2$ (*Sputnik III*) The Continued (B R May and D E Smith), 765
Progress in Semiconductors (edited by Dr Alan F Gibson, Prof R E Burgess and Prof P Aigrain), Vol , 3, *review* by Dr R A Hyman, 1754
Progress (Some Recent), in the Analytic Theory of Numbers (Prof H Davenport), 1533
'Progressive Mutation induced in *Poa protensis* L by Ionizing Radiation (A A Hanson and F V Juska), 1000
Projectiles Space, launched in the Soviet Union (Articles in *Priroda* dealing with), 771
Prolactin in the Cowbird's Pituitary in relation to Avian Brood Parasitism (Prof E O Hohn), 2030
Proliferating Donor Cells in Chick Embryos injected with Adult Chicken Blood Cytological Identification of (P M Biggs and L N Payne), 1594
Proliferating Tissues Dynamics of (edited by Dorothy Price), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Proline *in vitro* Hydroxylation of (Dr M Chvapil and J Hurych), 1145
Prolonged Survival of Dystrophic Mice treated with 17α-Ethyl-19-Nortestosterone (Dr Robert M Dowben), 1966
Prolonged Thyroid Administration Effect of, on Aged Male Rats (Prof John F Lhotka, Lloyd Glenn McArthur and Arthur A Hellbaum), 1149
Promethium-147 in Rats Hormone Effects on Early Distribution and Disappearance from the Blood of (Dr Bergene Kawin), 1816
Promethium Plasma Fractions in Rats Distribution of (Dr Bergene Kawin), 1722
Promoting Effect of Urea on the *in vitro* Passive Sensitization of Isolated Plain Muscles with Precipitating Antibody (R Binaghi, Dr B N Halpern, P Liacopoulos and T Neveu), 1905
Proof of the Formation of Enzyme-Substrate Complex by 'Crossing-Paper Electrophoresis' (Prof S Nakamura, K Takeo, I Sasaki and M Murata), 638
Prop, Dr F J A Organ Cultures of Total Mammary Glands of the Mouse, 379
Propagation of Ultrasonic Waves in Liquids (Prof A K Dutta, M Subudhi and K Samal), 352
Propagation (Tropospheric Radio) Inadequacy of Scatter Mechanisms in (P C M de Belatini), 1558
Propellants Chemistry of (Combustion and Propulsion Panel of the Advisory Group for Aeronautical Research and Development Discussion on), 778
Proper Study of Mankind is Man (Sir James Gray), B A 35
Properties of Damaged Endothelial Cells Some (Dr J R O'Brien), 1580
Properties of 1-Glyceryl-2-*myo*-inositol Phosphate Synthesis and (Dr T Malkin), 789 , Synthesis of 1-Glyceryl-2-*myo*-inositol Phosphate (J H Davies and Dr T Malkin), 789 , 1-Glyceryl-2-*myo*-inositol Phosphate—Alternative Synthesis and Behaviour on Hydrolysis (R B Ellis and J N Hawthorne), 790
Properties of Liquids, *review* by Prof H C Longuet-Higgins, 1901
Properties of Porous Materials The Structure and—Proceedings of the Tenth Symposium of the Colston Research Society held in the University of Bristol, 1958 (edited by D H Everett and F S Stone), *review*, 1525
Properties (Alkaline-denaturation) A Haemoglobin with Unusual, in a Turkish-Cypriot Woman (Dr J E O'N Gillespie, Dr J C White, M J Ellis, Dr G H Beaven, W B Gratzer, Dr E M Shooter and R M E Parkhouse), 1376
Properties (Biological), of Coal and Coal Extracts (Dr A A Mills), 1885
Properties (Biological), of Phenols of Plant Origin, *review* by Dr F A Robinson, 486
Properties (Biological and Physical) Turnip Yellow Mosaic Virus Nucleoprotein Particles with differing (R E F Matthews), 530
Properties (Flow), of Blood and other Biological Systems (British Society of Rheology and the Colloid and Biophysics sub-Committee of the Faraday Society Discussion on), 322, 1539
Properties (Optical), of Semi-Conductors (Dr T S Moss), *review* by Dr R A Hyman, 1754
Properties (Photochemical and Stereochemical), of Carotenoids at Low Temperatures (Staff of the Biological Laboratories of Harvard University)—Photochemical Behaviour of Retinene (Dr Lawrence Jurkowitz), 614 , *Cis-trans* Isomerism and Steric Hindrance (John N Loeb, Paul K Brown and Prof George Wald), 617 , Discussion (Prof George Wald), 620
Properties (Physical), of Materials Relationship between Structure and (Non-Destructive Testing Group of the Institute of Physics and the Societé Française de Metallurgie Discussion on), 1688
Properties (Physical), of Mucin Molecular Shape and (R A Gibbons), 610
Properties (Reaction-directing), of Non-enzymic Macromolecules—Pyrogallol Oxidation in the System Iron (III)–Cellulose (N S Goodman and S M Siegel), 53
Properties (Redox), of some Dipyridyl Quaternary Salts (R F Homer and T E Tomlinson), 2012
Properties (Some Enzymatic), of Suspensions of Parenchymatous Liver Cells (Dr Keith S Henley, Ole Sorensen and H Marvin Pollard), 1400
Properties (Some Semi-conductive), of Dilute Binary Solid Solutions of Bismuth in Tellurium and Tellurium in Bismuth (Dr Tomasz R Piwkowski), 355
Properties (Surface) Evidence for a Hydrate of Cellulose from Studies of its (Dr J M Joubert, Dr G J R Krige and Dr K Borgin), 1561
Properties (Thermodynamic), of Organic Compounds Some Remarks on the (Prof George S Parks) 1194
Properties and Inheritance of Haemoglobin by Asymmetric Recombination (Dr Harvey A Itano and Elizabeth Robinson), 1468
Property (Anthelminthic), of *Artemesia monosperma* grown in Egypt *In vitro* Study of the (A Sharaf, Z F Ahmed and F Abdel Moneim), 647
Prophylactic Effects of Amine Oxides in Radiation Injury in Mice (Dr Thomas J Haley, Dr Anna M Flesher and Dr Nathan Komesu), 198
Prophylaxis of Poisoning by Carbon Tetrachloride (C H Gallagher and R A Simmonds), 1407
Propionate Production of Odd-Numbered Carbon Fatty Acids from, by Mice (Prof S B Tove), 1647
Propionate Side-Chains of Haematin Decrease in Acid Strength of, on Reduction to Haem (Dr J E O'Hagan), 1808
Propionic Acid (α-Amino-β-(pyrazolyl-N))—a New Amino-Acid from *Citrullus vulgaris* (Water Melon), (Dr F F Noe and Dr L Fowden), B A 69

Proprioceptive Centres (Higher) Possible Role of, in the Perception of Visual Space and in the Control of Motor Behaviour (Dr B Gurevitch), 1219
Propulsion Basic Problems in (Combustion and Propulsion Panel of the Advisory Group for Aeronautical Research and Development Discussion on), 779
  Jet, *review* by D G King-Hele, 1346
  Rocket (British Association for the Advancement of Science, Section B (Chemistry), Discussion on), 1264
Prosen, E J Thermodynamics (Experimental Thermochemistry), 1607
Prospects for Nuclear Power (Political and Economic Planning, Broadsheet No 431), 383
Prosser, M V, and Jackson, G A D Induction of Parthenocarpy in *Rosa arvensis* Huds with Gibberellic Acid, 108
Protected Heptapeptide Synthesis of a, related to the Histidine Analogue of Hypertensin II (Dr Dimitrios Theodoropoulos), 1634
Protection Radiation, 939
Protection of Ancient Buildings, Society for the (Central Council for the Care of Churches and the) Report on the Conservation of English Wallpaintings, 1119
Protection (Crop) The Principles and Practice of, *review* by F C Bawden, 1258
  The Scientific Principles of (Hubert Martin), fourth edition, *review* by F C Bawden, 1258
Protection (Cysteine), against Radiation Cataract Possible Mechanism of (A Pirie and L G Lajtha), 1125
Protective Action of Interferon against Infection with West Nile Virus Duration of (Dr Alick Isaacs and Margueirte A Westwood), 1232
Protective Effect of Foreign Bone Marrow in Lethally X-Irradiated Mice Abrogation by Injected Mouse Blood of (L J Cole and R M Garver), 1815
Protein Binding of Haem to, in Haemoglobin and Myoglobin (Dr J E Falk, Dr J N Phillips and Dr D D Perrin), 1651, (Dr J E O'Hagan), 1652
Protein for Cultivation of HeLa Cells Discarded Blood Bank Blood as a Source of (Billy R Blakey and Prof George E Gifford), 1158
Protein of Human Serum Denatured with Tannin Effect of Ultrasound on the (Dr Wizold Mizgalski and Irena Zygmunt), 1486
Protein from Insoluble Protein-Tannin Compounds Regeneration of (Dr W Mejbaum-Katzenellenbogen, W Dobryszycka, J Boguslawska-Jaworska and B Morawiecka), 1799
Protein (Actomyosin-like), from Human Thrombocytes Extraction of an (M Bettex-Galland and Dr E F Luscher), 276
Protein (D-Amino-Acid Oxidase Apo-) Binding of the Sulphydryl Group in, with Flavin Adenine Dinucleotide (Dr Kunio Yagi and Takayuki Ozawa), 1227
Protein (Bacterial Flagellar) ε-N-Methyllysine in (R P Ambler and M W Rees), 56
Protein (Dietary), and Serum Cholesterol in Rats (A P de Groot), 903
Protein (Johnin) Preparation of a Highly Purified Carbohydrate-free (E Annau), 1642
Protein (Serum) Changes in the Level of, during Treatment of Kwashiorkor (Dr Olumbe Bassir), 2019
Protein (Total), from Wheaten Flour Extraction of the, in the Form of Soluble Derivatives (E E McDermott and Dr J Pace), 546
Protein (Virus) Kinetics of, and Ribonucleic Acid Biosynthesis (Replication of Tobacco Mosaic Virus), (Prof Barry Commoner, Dr James A Lippincott and Dr Janey Symington), 1992
Protein Biogenesis Specificity in (Centre Interuniversitaire de Recherches enzymologiques Colloquium on), 1198
Protein Biosynthesis and Oxidative Phosphorylation in Isolated Rat Liver Mitochondria (P J Reis, J L Coote and T S Work), 165
Protein Depletion Effect of, on the Distribution of Protein Synthesis (Dr John Waterlow), 1875
Protein Molecules The Shape of, suggested by Electron Microscopy (Dr R C Valentine), 1838
Protein Percentage (Dietary) Influence of, on Growth of Wool (K A Ferguson), 907
Protein Synthesis (Dr P M Bhargava), 1368
  Effect of Protein Depletion on the Distribution of (Dr John Waterlow), 1875
Protein Synthesis in Macrophages containing *Eimeria tenella* (Dr G A Gresham and J G Cruickshank), 1153
Protein Synthesis in *Mycobacterium smegmatis* Effect of Iron and Zinc on Nucleic Acid and (Frank Winder and Joan M Denneny), 742
Protein-bound Peptides as exemplified by Oxytocin and Vasopressin Gel Filtration as a Method for Purification of (E B Lindner, Dr A Elmqvist and Dr J Porath), 1565
Protein-Tannin Compounds (Insoluble) Regeneration of Protein from (Dr W Mejbaum-Katzenellenbogen, W Drobyszycka, J Boguslawska-Jaworska and B Morawiecka), 1799
Proteins Action of Anhydrous Formic Acid on Peptides and (H Kienhuis, G Blasse and J Matze), 2015
  The Structure and Chemistry of (Commonwealth Scientific and Industrial Research Organization Symposium on), 1276
Proteins in Aqueous Polymer Phase Systems Counter-Current Distribution of (Per-Ake Albertsson and Ed Jacques Nyns), 1465, *erratum*, 1688
Proteins exposed to Ionizing Radiations in the Solid State Disorganization of the Secondary Structure in (Dr Peter Alexander, L D G Hamilton and Dr K A Stacey), 226
Proteins in *Escherichia coli* Influence of DL-beta-Phenylserine on the Synthesis of (J Janeček, J Chaloupka, K Vereš and M Havranek), 1895
Proteins (Glyco-) of Human Cerebrospinal Fluid (Dr Samuel Bogoch), 1628
Proteins (Normal Soluble), in Guinea Pig Liver Agar Electrophoresis of (Prof Iv Goranov, Y Todorov, X Skatshokova, M Hlebarova and P Kuzmanova), B A 64
Proteins (Polypeptidyl), and Synthetic Polypeptides Immunochemical Studies of (Prof M A Stahmann, D J Buchanan-Davidson, Dr C Lapresel and Dr P Grabar), 549
Proteins (Substituted Human Serum) Modifications in Immunological Behaviour, Electrophoretic Mobility and Colourability of (M Steinbuch, Dr J M Fine and A Battistini), 1571
Proteinuria (Bence Jones), associated with a Transplantable Mouse Plasma-Cell Neoplasm (John L Fahey and Michael Potter), 654, *erratum*, 1108
Proteus Lysogeny in the Genus (Prof J N Coetzee and T G Sacks), 1340
Proteus P 18 Distribution of Nucleic Acids among Different Stable *L* Forms of (Prof P Mandel, M Sensenbrenner, P De Gregorio and A M Bader), 566
Prothoracic Gland Stimulation by Juvenile Hormone Extracts of Insects (Dr Lawrence I Gilbert and Dr Howard A Schneiderman), 171
Prothrombin (Purified Human) Activation of Staphyloccal-free Coagulase by (G Haughton and E S Duthie), 116
Proton and Neutron (Electron,) A Comparison of the Charges of the (A M Hillas and T E Cranshaw), 892, (Prof H Bondi and Dr R A Lyttleton), 974
Proton Linear Accelerator at the Rutherford High Energy Laboratory, 94
Proton Resonance Relaxation Times in Mobile Liquids (Dr J G Powles and D Cutler), 1123
Proton Synchrotron *Nimrod* (7,000-MeV) Contracts for work on the (National Institute for Research in Nuclear Science), B A 14
Proton-Transfer Nature of some Changes in Keratin and the Analogy with Muscle Contraction Permanent Set, Supercontraction and Urea-Bisulphite Solubility—the (Dr P T Speakman) 339
Protoparce sexta (Johan), (Tobacco Hornworm), and the Colorado Potato Beetle, *Leptinotarsa decemlineata* (Say) Common Attractant for the (Dr Robert T Yamamoto and Prof G Fraenkel), 206
Protoplasts (Naked), of Yeasts Nuclear Structure of Growing (Dr O Necas), 1664
Protoplasts (Streptococcal) Formation of Streptolysis *S* by (Dr Yoshiharu Maruyama, Sadako Sugai and Prof Fugio Egami), 832
Protozoa (Rumen) Hydrogenation of Lipids by (Dr D E Wright), 875
  Isolation of 2-Amino-ethane Phosphonic Acid from (Masaaki Horiguchi and Makoto Kandatsu), 901
Protozoologists, United States Society of Election of Officers for 1959-60, 1272
Prout, E G (Herley, P J, and) Thermal Decomposition of Irradiated Lead Oxalate, 445
Providing United States Scientists with Soviet Scientific Information (United States National Science Foundation), revised edition, 1611
Provision of Supervisors and Managers Management Development, a Systematic Approach to the (F I de la P Garforth), 319
Proximate Analysis of Marine Standing Crops (Dr T R Parsons and Dr J D H Strickland), 2038
Przemieniecki, Dr J S Structural Effects of Kinetic Heating (The Design of Transparencies), 31
Przybykski, A Ionization Phenomena in Gases (Measurements of the Absorption Coefficients in Oxygen and Nitrogen of Gas-ionizing Radiation produced by Corona Discharges in the same Gases), 1354
Pseudomonas Enhancement of Pigment Production by (Dr A M Paton), 1254
Pseudomonas aeroginosa Effect of Ultra-Violet Irradiation on Transduction in (J S Loutit), 1960
  Transduction in (Dr B W Holloway and Marilyn Monk), 1426
Pseudomonas solanacearum Comparison of Slime from Tomato and Banana Strains of (Dr W F Dudman), 1969
Pseudopleuronectes americanus (Winter Flounder) Failure of Corpuscles of Stannius from, to Synthesize Adrenocorticosteroids *in vitro* (Dr J G Phillips and Dr P J Mulrow), 558
Pseudoscorpioniden-Fauna des Andengebietes Zur Kenntnis der (Max Beier), (Beiträge zur Neotropischen Fauna), *review* by Dr F A Turk, 1177
Pseudotsuga menziesii (Mirb) Franco Seedlings Response of *Sequoia sepervirens* (D Don) Endl and, to Temperature (Henry Hellmers and William P Sundahl), 1247
Psittacosis Elementary Bodies (F L Constable), 473
Psychology at Sheffield, 93
Psychology of Social Class (Maurice Halbwachs), translated by Claire Delavenay, *review* by Prof T S Simey, 754
Psychology (Industrial), National Institute of Grant of £6,000 a year for five years from the Department of Scientific and Industrial Research, 940
  Vernon Prize for 1960, 1450
Psychopharmacologia, Vol I, Fasc I, 940
Puberulonic Acids (Stipitatonic and) Tropolone Biosynthesis—the Enzymatic Decarboxylation of (Prof Ronald Bentley and Clara P Thiessen), 552
Public Education in the United States of America Progress of (1957-58), 418
Public Expenditure Control of, 857
Public Health Aspects of Nuclear Energy Post-Graduate Training in the (World Health Organization, Technical Report Series No 154), 33
Public Health Service (United States) Grant of 14,160 dollars to the University of Oxford, for the continuation of research on vision and light quanta, 943, 1273
  Grant of 30,600 dollars to the University of Oxford, for research in the Department of Biochemistry, 1362
Public Libraries (Rate Supported) in Great Britain and Northern Ireland Statistics of, 1957-1958 (Library Association), 592
Public Service in Britain Scientists in the—Special Promotions, 858, 1273
Public Service in Europe The Profession of Government—the (Dr Brian Chapman), 127
Public Services in a Modern Democracy The Development of, 1087
Publications (Scientific) Distribution of, in Under-developed Countries (Scientific Publications Council Discussion on), B A 22
Publications (Scientific), of South and South-East Asia Bibliography of (Unesco Science Co-operation Office), Vol 5, No 6, 772
Puccinia kraussiana Cooke Pachytene in, on *Smilax kraussiana* (Dr Eva Sansome), 1820
Puffinus tenuirostris Experimental Demonstration of an Internal Rhythm of Reproduction in a Trans-Equatorial Migrant, the Short-tailed Shearwater (Dr A J Marshall and Dr D L Serventy), 1704
Pugwash International Conference of Scientists—Statement on Biological and Chemical Warfare, 1018
Puig Muset, P, and others Radiomimetic Action of Lipoxidase, 1506
Pulmonary Megakaryocytes A Possible Explanation of the Formation of Long Platelets from (Dr J George Sharnoff), B A 75
Pulse Conditions (Microsecond) Conduction Currents in Liquid *n*-Hexane under (A Harry Sharbaugh and P Keith Watson), 2008

Pulses (Strong), of Ionic Current Effects of the Energy of, in Micro-organisms in Suspension (B S Gossling), 1881
Pump (Boyle's Air) Robert Hooke and (Dr H D Turner), 395
Pupal Periods of some Lepidopterous Insects Relationship between Larval and (Dr M A Zaher and Dr Moufied A Moussa), 289
Purcell, J D, and others Lyman-Alpha Photographs of the Sun 8
Purchon, Prof R D University of Malaya in Kuala Lumpur 306
Pure Culture of the Pathogenic Agent of Tyzzer's Disease of Mice (Dr K Kanazawa and A Imai), 1810
Pure Metals Spectrographically (Prof W Hume-Rothery), 1794
Pure and Applied Chemistry, International Union of Meeting of the Commission on Geochemistry, 1193
  Election of members of the Commission on Geochemistry, 1193
  Election of Prof C W Correns as president for 1960 of the Commission on Geochemistry, 1193
Pure and Applied Chemistry, International Union of (Committee of the Analytical Chemistry Section) Nomenclature in Titrimetric Analysis, 1686
Pure and Applied Chemistry, International Union of (Commission on Macromolecules) International Symposium on Macromolecules, 1689
Pure and Applied Chemistry, International Union of (Deutsche Bunsengesellschaft fur Physikalische Chemie and the) Symposium on Thermodynamics, 1606
Puri, G S Origin and Dispersal of Flowering Plants (Himalayas invaded by Conifers during the Pleistocene Glaciation), 1200
Purification River (F T K Pentelow) 94
Purification of Enzymes (Dr B K Bachhawat), 1368
Purification of Herpes Simplex Virus by Chromatography of Calcium Phosphate (Janice Taverne and Peter Wildy), 1655
Purification of Nitrate Reductase from Embryos of Germinating Wheat Isolation and (D Spencer), 682
Purification of Protein-bound Peptides as exemplified by Oxytocin and Vasopressin Gel Filtration as a Method for (E B Lindner, Dr A Elmqvist and Dr J Porath), 1565
Purification of 'Queen Substance' from Queen Bees Extraction and (Dr C G Butler, Dr R K Callow and Norah C Johnston), 1871
Purified Human Prothrombin Activation of Staphylococcal-free Coagulase by (G Haughton and E S Duthie), 116
Purified (Highly) Carbohydrate-free Johnin Protein Preparation of a (E Annau), 1642
Purified (Highly) Sample of the Urinary Gonadotrophin Preparation of a (Roland Bourrillon, René Got and Rene Marcy), 983
Purine and Pyrimidine Analogues Effect of, on Reversion of a Tryptophan-requiring Strain of *Escherichia coli* (C O Doudney and F L Haas), 114
Purine Nucleotides of Red Lateral Muscle of Rainbow Trout Changes in (Tsuneyuki Saito, Ken-ichi Arai and Toshikatsu Yajima), 1415
Purity (High-) Aluminium Analysis for Magnesium in (C A Youngdahl and F E DeBoer), 54
Purkinje Nerve Cells of some Mammals Sex Chromatin ('Chromoleme') in the (Nylceo Marques de Castro and Wilson da Silva Sasso), 293
Purkis, H J Recent Studies of Noise Problems (Human Response to Noise—Community Reaction to Noise), 414
Purnell, Dr J H Comparison of Efficiency and Separating Power of Packed and Capillary Gas Chromatographic Columns, 2009
Purves, Dr David Implications of Restricting Cows to a Clover-free Diet in order to Reduce the Strontium Content of Milk, 1408
Putzeike, E, and others Energy Transfer with special reference to Biological Systems (Properties of Isolated Chlorophyll), 690
Puzzle-Math (Prof George Gamow and Dr Marvin Stern), *review* by Prof T A A Broadbent, 217
Pyelonephritis in Mice An Experimental Enterococcal (Dr Arvid L Erlandson, jun, Dr Leola A Gagliardi and Dr Myron W Fisher), 561
Pyrah, A E (Allen, W D, and), and others The Tandem Generators of the United Kingdom Atomic Energy Authority, 303
Pyrethrum Resistance conferred by Resistance to DDT in the Blue Tick (G B Whitehead), 378
Pyridine Nucleotide (Mitochondrial) Fluorescence Measurements of, in Aerobiosis and Anaerobiosis (Localization and Assay of Respiratory Enzymes in Single Living Cells), (Prof Britton Chance and Dr Bo Thorell), 931
Pyridine Nucleotide Oxidase from Heart Sarcosomes Corticosterone Inhibition of (P K Jensen), 451
Pyridoxal Phosphate, a Coenzyme for Histidine Decarboxylase (S Ono and Prof P Hagen), 1143
Pyridoxine Deficiency Rat Brain Glutathione and (M J Ashwood-Smith and A D Smith), 2028
Pyridoxine-deficient Rats 8-Hydroxycuinaldic Acid the Red Fluorescent Substance in the Urine of (Dr J K Roy, Dr R R Brown and Prof J M Price), 1573
Pyrimidine Analogues (Purine and) Effect of, on Reversion of a Tryptophan-requiring Strain of *Escherichia coli* (C O Doudney and F L Haas), 114
o-Pyrocatechuic Acid Conversion of Salicylic Acid to Gentisic Acid and, all Labelled with Carbon-14, in Plants (Dr Ragai K Ibrahim and Prof G H N Towers), 1803
Pyrogallol Oxidation in the System Iron (III)–Cellulose Reaction-directing Properties of Non-enzymic Macromolecules— (N S Goodman and S M Siegel), 53
Pyruvic Acid in Blood, Cerebrospinal Fluid and Urine α-Ketoglutaric Acid and (Dr E Zelnicek), 727

QUADRUPOLE Anti-Shielding Factor in Copper (E A Faulkner), 442
Quagliariello, Prof E, and others An Antimetabolic Action of Vitamin K, 820
Quality in Merino Wool Routine Methods for determining (P L le Roux), 917
Quality Control (Quality Control Group of the Textile Institute Conference on), B A 16
Quality Control in Electronics Sixth National Symposium on Reliability and, 1362
Quantitative Assay of Compounds in Isolated, Fresh Nerve Cells and Glial Cells from Control and Stimulated Animals (Prof Holger Hydén), 433
Quantitative Changes in γ-Aminobutyric Acid induced by Low Temperature in Rice Plants (F Zsoldos), 280
Quantitative Determination Occurrence and, of 2-Dimethylaminoethanol in Animal Tissue Extracts (Dr Conrad G Honegger and Ruth Honegger), 550, *erratum*, 1986
Quantitative Estimation of the Fatty Acids of Olive Oil (J Gracian, E Vioque and Mª Pilar de la Maza), 1941
Quantitative Paper Chromatography based on the Sub-Micro Titration of Derivatives containing Nitro Groups (L Blom and J Caris), 1313
Quantitative Study of the Surface Precipitation Reaction A Method for the (Francis T Ashton), 1735
Quantities (μgm) of Iron in Culture Medium Estimation of, using Bathophenanthroline (P A. Seamer), 636
Quantities (Observed) A Least-Squares Solution for a Linear Relation between Two (P A Wayman), 77 (B K Kelly) 1086
Quantity (Light) Fusion Frequency and (A Angel, D A Hems, W Rose, R C Woledge and Dr R A Weale), 1873
Quantum Electrodynamics Experimental Tests of (Prof W E Lamb), 954
Quarries and Mines Aerial Photographs of (Exhibition at the Geological Museum, London), 855
Quastel, Prof J H (Kini, M M, and) Carbohydrate—Amino-Acid Interrelations in Brain Cortex *in vitro*, 252
Quaternary Ecology (Linnean Society of London Symposium on), 1535
Quaternary Salts (Dipyridyl) Redox Properties of some (R F Homer and T E Tomlinson), 2012
Queen Bees Extraction and Purification of 'Queen Substance' from (Dr C G Butler, Dr R K Callow and Norah C Johnston), 1871
Queen Elizabeth College, London The new Sir John Atkins Laboratories, 26
Queen Mary College, London Appointment of E M Rawstron as reader in geography, 322
  Symposium on the Oxidation of Organic Compounds, 326
  Appointment of Dr A Ashmore to the University of London readership in experimental physics, 595
'Queen Substance' from Queen Bees Extraction and Purification of (Dr C G Butler, Dr R K Callow and Norah C Johnston), 1871
Queen's College, Dundee Appointment of Dr A J O Cruickshank as reader in electrical engineering, 684
  Appointment of Dr J L Copp as senior lecturer in chemistry, 684
  Appointment of W McNicoll as senior lecturer in civil and mechanical engineering, 684
  Appointment of Dr F Walker as senior lecturer in geology, 684
Queen's University, Belfast Appointment of Dr C J M Stirling as lecturer in organic chemistry, 322
  Appointment of Dr J S Pate as lecturer in botany, 322
  Appointment of Dr B V Jayawant as lecturer in electrical engineering, 322
  Appointment of N C Mitchel as lecturer in geography, 322
  Appointment of W D Ryan as lecturer in light electrical engineering, 322
  Appointment of Dr F J Wallace as senior lecturer in mechanical engineering, 1613
  Appointment of L J Clein as lecturer in mental health, 1613
Quelea quelea Duration of the Regeneration Period of the Internal Reproductive Rhythm in a Xerophilous Equatorial Bird (H J de S Disney, B Lofts and Dr A J Marshall), 1659
  Effect of Photoperiod on the Gonadal Cycle in an Equatorial Bird (Dr Albert Wolfson and David P Winchester), 1658
Quenching and Tempering The Phenomena occurring in Steels during (Academic an G V Kurdjumov), 1450
Quennell, A M, and others Summary of the Geology of Tanganyika, Part I, Introduction and Stratigraphy, 1688
Quenouille, M H The Fundamentals of Statistical Reasoning, *review* by Dr D J Finney 217
Quick Method for Extracting Plant Embryos from certain Types of Seed (M D Gwynne), 1588
Quiescence or Diapause Dormancy of the Khapra Beetle— (H D Burges), 1741
Quinnat Salmon Stomach Contents of Spawning (J S Bullivant), 71

RAAL, Dr F A (Mutch, R E, and) Electrical Resistivity Changes observed in a Semiconducting Diamond after Heat Treatment, 1857
Rabbit Production of an Agglutinating Auto-Antibody (Panagglutinin) Active upon Tanned Erythrocytes in the (P O Hubinont, P Ghysdael and O Thys), 1250
  A Specific Response in the Hippocampus of the, to Olfactory Stimulation (B G Cragg), 1697
Rabbit γ-Globulin *Iso*-Antigens of (S Dubiski, Danuta Skalba, Anna Dubiska and Dr A Kelus), 1811
Rabbit Ova Fertilization of, *in vitro* (Dr M C Chang), 466
Rabbit-pox Virus Antiviral Chemotherapeutic Activity of Isatin β-thiosemicarbazone in Mice infected with (D J Bauer and F W Sheffield), 1496
Rabbit's Long Bones Glutamic-Pyruvic Transaminase in (L Tessari and L Parrini), 904
Rabbits Asymmetrical Delivery in (Dr Luiz Macedo Costa and Dr Arpad Csapo), 144
  A Seasonal Sex Difference in the Infestation of, with the Nematode *Trichostrongylus retortaeformis* (Zeder, 1800), (P C Bull), 281
Rabbits (Alloxan-Diabetic) A Low Concentration of certain Blood Constituents observed in Offspring of (Dr Otakar Sirek and Dr Anna Sirek), 456
Rabbits (Papain-injected) Cartilage Homografts in (M B L Craigmyle), 1243
Rabbits (Wild) Age Determination in (R H Taylor), 1158
Rabenau, Dr A, and Eckerlin, Dr P Special Ceramics (A New Hexagonal Form of Be_3N_2), 1116
Rabinowitch, Prof B, and Brody, Dr S S Energy Transfer with special reference to Biological Systems (Energy Migration in Photosynthesis), 689
Rabinowitch Prof Eugene, and others Statement on Biological and Chemical Warfare, 1018
Rabinowitz, I N (Bernstein, I B, and) Ionization Phenomena in Gases (Velocity Distribution of Plasma Electrons in an External Magnetic Field), 1357

Races (Local), in Lugworms, *Arenicola marina* (L), (Dr A Duncan), 71
Radar (Ground-Based) Use of in Meteorology (excluding Upper-Wind Measurements), (World Meteorological Organization, Technical Note No 27), 942
Radar Echoing Area Polar Diagrams of Birds (J Edwards and E W Houghton), 1059
Radd, Dr F J Crack Behaviour at a Weld Structure Discontinuity, 543
Radd, Dr F J , and Crowder, L H Solid State Rheological Study of the Mechanism of Paraffin-Detergent Interactions in Aqueous Systems, 443
Radd, Dr F J , and Qertle, Donald H Strength Impairment Mechanism of Glass in Aqueous Systems 976
Radd, Dr F J , and others Relationship of pH to Aerobic Corrosion Fatigue Life of Steel, 2008
Radhakrishnamurthy, R , and others Effect of Sulphanilamide on Citric Acid Production by *Aspergillus niger*, 461
Radiation, a Tool for Industry (National Industrial Conference Board, Inc , seventh Annual Conference on Atomic Energy in Industry), 506
Radiation Colour Centres produced by, in Silica Gel (Harold W Kohn), 630, *erratum*, 1026
γ-Radiation Effect of, on the Synthesis of Methanol over Zinc Oxide (T I Barry and R Roberts), 1061
γ-Radiation from Deposited Fall-Out (D H Peirson and L Salmon), 1678
γ-Radiation (Background), in Leeds during 1955-59 Some Measurements of (Prof F W Spiers), 1680
Radiation (Cerenkov), and its Applications (Dr J V Jelley), *review*, 1260
Radiation (Enhanced), on 200 Mc /s Correlation between the Intensity of the Umbra of Sunspots and (Per Maltby), 1391
Radiation (Enhanced Solar Radio) Observations of the Fine Structure of with a Narrow-Band Spectrum Analyser (Oystein Elgaroy), 887
Radiation (High Energy) Estimation of Chain Fracture and Cross-Linking of Rubber by (P Hayden) 1865
Radiation (Ionizing) Cross-linking of Cellulose Acetate by (Dr S H Pinner, T T Greenwood and D G Lloyd), 1303
  A 'Progressive' Mutation induced in *Poa pratensis* L by (A A Hanson and F V Juska) 1000
  A Sensitive Chemical Dosimeter for (Prof Gerald Oster and Dr Barret Broyde), 545
Radiation from Jupiter Anomalous Continuum (Dr Eugene E Epstein), 52
Radiation Balance at Scott Base (D C Thompson and W J P Macdonald), 541
Radiation Belt and the Solar Wind The Aurora, the—a Unifying Hypothesis (M H Rees and G C Reid), 539
Radiation Belts (Van Allen) The Upper Boundary of the (Dr Conway W Snyder), 439
Radiation Cataract Possible Mechanism of Cysteine Protection against (A Pirie and L G Lajtha), 1125
Radiation Injury in Mice Prophylactic Effects of Amine Oxides in (Dr Thomas J Haley, Dr Anna M Flesher and Dr Nathan Komesu), 198
Radiation Leukaemia Dose–Response Relationship in (Dr P Armitage, Dr W M Cort Brown and Dr R Doll), 1669 , (Dr D J Mewissen), 1670
Radiation Measurements to 658,000 km with *Pioneer IV* (Prof James A Van Allen and Louis A Frank), 219
Radiation Observations with Satellite 1958δ over Australia (Dr A J Herz, Dr K W Ogilvie, J Olley and R B White), 391
Radiation Protection, 939
Radiation Safety and Health Physics (J W Lucas), 329
Radiation Syndrome The Acute—a Medical Report on the Y-12 Accident, 1958 (compiled by Dr Marshall Brucer), (United States Atomic Energy Commission, Report ORINS-25), 1022
Radiations (Ionizing) Advice concerning Hazards from (Ministry of Housing and Local Government, Circular No 57/59), 1450
  Biological Effects of Low Doses of (Unesco, the International Atomic Energy Agency and the Comitato Nazionale per le Ricerche Nucleari Symposium on), 1111
  Cross-Linking of Deoxyribonucleic Acid in Sperm Heads by (Dr P Alexander and Dr K A Stacey), 958
  Degradation of Thiotaurine by (D Cavallini, B Mondovi, B Giovanella and C De Marco), B A 61
  Disorganization of the Secondary Structure in Proteins exposed to, in the Solid State (Dr Peter Alexander, L D G Hamilton and Dr K A Stacey), 226
  Immediate and Low-level Effects of (Dr Tikvah Alper), 1111
  Waterways and, 1450
Radicals Free—an Introduction (A F Trotman-Dickenson), *review* by Dr T M Sugden, 1259
Radicals (Free), in Coal during Carbonization at Different Heating Rates Number of (J Smidt and Prof D W van Krevelen), 719
Radicals (Free), as Studied by Electron Spin Resonance (Dr D J E Ingram), *review* by Dr T M Sugden, 1259
Radicals (Free), in X-Rayed Seeds of High and Low Water Content, as Measured by Electron Spin Resonance (Dr W Klingmuller, Dr G R Lane, M C Saxena and Dr D J E Ingram), 464
Radio Astronomers International Conference of, *review* by Dr H P Palmer, 1755
Radio Astronomy Paris Symposium on, 1958 (edited by Ronald B Bracewell), *review* by Dr H P Palmer, 1755
Radio Astronomy Observatory, United States National Appointment of Prof Otto Struve as first director, B A 14
Radio Bursts (Slow-Drift Solar) Geomagnetic Disturbance and Velocity of (M B Wood and C S Warwick), 1471
Radio Echo Observations of Venus (J V Evans and G N Taylor), 1358
Radio Engineers, British Institution of Clerk Maxwell Premium awarded to C Powell and D A Hendley, 857
  Heinrich Hertz Premium awarded to K Foster, 957
  Sir Louis Sterling Premium awarded to Dr A van Weel, 957
  Sir J C Bose Premium awarded to Dr B Ramachandra Rao, Dr M Srirama Rao and C Abhirama Reddy, 857
  Brabazon Premium awarded to Prof D G Tucker, Dr V G Welsby, R Kendall and D E N Davies, 857
  Marconi Premium awarded to Dr Morton B Prince and M Wolf, 857
Radio Field-Strengths in the Tropics, 605
Radio Industry Council and the Electronic Engineering Association Premiums for articles on Electronics, 943
Radio Noise Effect of Atomic Tests on (C A Samson), 538
Radio Noise from the Outer Atmosphere Directional Observations of (G R A Ellis and D G Cartwright), 1307
  Spaced Observations of (G R A Ellis, D G Cartwright and J R V Groves), 1391
Radio Noise (Low-Frequency) (100 kc /s), from the Aurora (R L Dowden), 803
Radio Outbursts Association of, with Solar Flares (L D de Feiter, A D Fokker and J Roosen), 805
Radio Propagation (Tropospheric) Inadequacy of Scatter Mechanisms in (P C M de Belatini), 1558
Radio Radiation (Enhanced Solar) Observations of the Fine Structure of, with a Narrow-Band Spectrum Analyser (Oystein Elgaroy), 887
Radio Research, 1024
Radio Research Board Special Report No 28, The Conversion of Ionospheric Virtual Height-Frequency Curves to Electron Density-Height Profiles (Dr J O Thomas and M D Vickers), 1024
Radio Signals at Ionospheric Heights Refraction of Very High Frequency (S Weisbrod and L Colin) 119
Radio Source (Cygnus-A) Red-Shift Absorption Spectrum of the (Dr R D Davies and Dr R C Jennison), 803
Radio Telescope The Ohio State University 350-ft (Prof John D Kraus), 669
Radio Telescope for Australia, 93
Radioactivation Analysis (International Atomic Energy Agency and the International Council of Scientific Unions Symposium on), 951
Radioactive Barium in Eye Tissues Distribution of (R J Garner), 733
Radioactive Exchange Labelling of Rose Bengal with Iodine-131 by (J Liebster and O Andrysek), 913
Radioactive Iodine Affinity of Lysozyme with Structural Elements of the Bacterial Cell as studied with Enzyme Labelled with (Prof C Weibull, B Zacharias and H Beckman), 1744
Radioactive Iodine in Thyroid Glands Accumulation of, subsequent to Nuclear Weapon Tests and the Accident at Windscale (Dr Hamish A Robertson and Ian R Falconer), 1699
Radioactive Ionization Type Detector Analysis of Permanent Gases by Gas Chromatography using a (V Willis), 894
Radioactive Materials Glove Boxes and Shielded Cells for Handling—a Record of the Proceedings of the Symposium on Glove Box Design and Operation held in the Cockcroft Hall, A E R E , Harwell, 1957 (edited by G N Walton), *review*, 1599
Radioactive Particles (Autoradiographed) Electron Microscopy of (L A George, II , and G S Vogt), 1474
Radioactive Phosphorus An Effect of Dose Fractionation on the Incidence of Bone Tumours using (Dr N M Blackett), 565
Radioactive Raw Materials Mineralogy and Geology of (Prof E Wm Heinrich), *review* by Prof C F Davidson, 1262
Radioactive Waste Disposal of (K Saddington and W L Templeton), *review*, 301
Radioactivity from Air Condensation Processes for the Extraction of (Rama), 1789
Radioactivity in Erythrocytes of Different Ages Enzymes and (Dr Lester M Levy, Harry Walter and Martin D Sass), 643
α-Radioactivity of Cerium-142 (F E Senftle, T W Stern and V P Alekna), 630
Radiocarbon Dating (British Association for the Advancement of Science, Sections A (Mathematics and Physics) and H (Anthropology), Discussion on), 672
Radiocarbon Dating (*American Journal of Science*, Radiocarbon Supplement, Vol I), 1686
Radiocarbon Dating of the Piltdown Skull and Jaw (Prof H de Vries and Dr K P Oakley), 224
Radiocarbon Dating of Prehistoric Wooden Trackways (Dr H Godwin and Dr E H Willis), 490
Radiochemical Tracer Study of the Relative Stability of the Halogenoplatinates (A J Poe and M S Vaidya), 1139
Radiochemistry (published in the Russian language by the Academy of Sciences of the U S S R), 410
Radiochemistry Advances in Inorganic Chemistry and (edited by H J H J Emeléus and A G Sharpe), Vol I, *review* by Dr D W A Sharp, 1756
Radiofrequency Methods Molecular and Atomic Motions in Liquids and Solids by (Colloque AMPERE and the Radiofrequency Spectroscopy Group Joint Discussion on), 157
Radiofrequency Spectroscopy Group (Colloque AMPERE and the) Joint Discussion on Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 157
Radioiron in Man Biological Half-Life of (R Oliver and Dr L G Lajtha), 1882
Radioisotopes Course on the basic techniques of handling (United States Atomic Energy Commission), 771
Radioisotopes in Agricultural Research The Use of (Ministry of Food and Agriculture of the Government of India, Food and Agriculture Organization of the United Nations, International Atomic Energy Agency and Unesco South East Asia Science Co-operation Office Course on), 1451
Radiological Hazards to Patients—Interim Report of the Committee (Ministry of Health and the Department of Health for Scotland) 162
Radiomimetic Action of Lipoxidase (P Puig Muset, J Martin Esteve and J Valls Mateu), 1506
Radionuclides in Air and in Water for Occupational Exposure Maximum Permissible Body Burdens and Maximum Permissible Concentrations of (United States National Bureau of Standards, Handbook 69), 939
Radiophosphorus Effect of Acetylcholine on the Incorporation of, into the Phosphatido-Peptide Fraction of Pancreas Slices (Prof C G Huggins), 1412
Radioprotective Action of Methoxamine (A D Smith, Dr M J Ashwood-Smith and Doreen Lowman), 1729
Radiosentivity of the Intact Mouse Spleen Decrease in, produced by Hypozia (Dr L Weiss), 1156
Radiosensitivity of Mice Importance of the Type of Metabolism for the (Dr M Pospisil and Dr L Novak), 1814
Radio-Telemetry of Nerve Action Potentials Amplitude-Modulation (Roger M Morrell), 1129

Radiotherapy High-Pressure Oxygen and, 94
Radiozinc Behaviour of Zinc and, in Tumour-bearing Rats (Dr D M Taylor), 1649
Rado, P Special Ceramics (Preparation and Properties of Calcium Fluoride), 1116
Radok, Dr Uwe Temperatures in Polar Ice Caps, 1056
Rae, D M (read by) Special Ceramics (Measurement of Creep at High Temperature, by N L Parr and G F Martin), 1116
Raeside, Prof J I, and McDonald, M F Seasonal Changes in the Œstrous Response by the Ovariectomized Ewe to Progesterone and Œstrogen, 458
Raether, H Ionization Phenomena in Gases (Current Growth and Avalanches of Large Amplification), 1354
Raffkina, L I, and others Various Types of Acquired Resistance to Experimental 'Allergic' Encephalomyelitis, 1552
Rafflesia arnoldi in Sumatra (W Meijer), 506
Raftery, M (ÓhEocha, Dr C, and) Photoreactive Pigments in Flagellates—Phycoerythrins and Phycocyanins in Cryptomonads, 1049
Ragle, J L Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
Rai, U K A 40-Chromosome Variant in *Solanum nigrum* L, 1587
Rain-Forest Zone (Nigerian) Non-Symbiotic Nitrogen Fixation in a Soil of the (Dr A W Moore and J N Abaelu), 75
Rainwater Potassium/Sodium Ratio in (B C V Oddie), 1791
Rain Water collected in the Humid Central Congo Basin Nitrogen Content of (J Meyer and E Pampfer), 717
Rainbow Trout Changes in Purine Nucleotides of Red Lateral Muscle of (Tsuneyuki Saito, Ken-ichi Arai and Toshikatsu Yajima), 1415
Rains, A H J Appointed to the chair of surgery in Charing Cross Hospital Medical School, London, 322
Raja clavata A Functional Interpretation of the Electron-Microscopic Structure of the Sensory Hairs in the Cristae of the Elasmobranch, in Terms of Directional Sensitivity (Prof O Lowenstein and J Wersall), 1807
Rajagopalan, K V, and others Effect of Sulphanilamide on Citric Acid Production by *Aspergillus niger*, 461
Rajam, Dr P C, and Jackson, Anne-Louise *In vitro* Labelling of Antibody Globulin by Tritium Exchange, 375
Ram, Dr Manasi Occurrence of Embryo Sac-like Structures in the Microsporangia of *Leptomeria billardierii* R Br, 914
Rama Condensation Processes for the Extraction of Radioactivity from Air, 1789
Ramakrishnan, T (Sastry, L V S, and) Biochemical Research in India (New Type of Enzymatic Transamination Reaction in which Glyoxylate Transaminates with a number of Amino-Acids to produce Glycine), 1368
Ramasarma, Dr T Coenzyme Q, 1368
Rammell, C G Tallowy Discoloration in Cheddar Cheese—Fat Oxidation and Haematin Systems in Cheese, 1296
Rampion, *Campanula rapunculus* L Carbohydrates of the (Dr J D S Bacon), 1957
Ramsay Memorial Fellowships Trustees Awards of new Fellowships in Chemistry for 1959-60, B A 16
Ramsbottom, Dr J Conception of Evolution—Meeting in Paris, 859
Ramsey, H W (Gennaro, jun, Prof J F, and) Distribution in the Mouse of Lethal and Sub-Lethal Doses of Cottonmouth Moccasin Venom labelled with Iodine-131, 1244
Ramsey, Dr N F Chemistry of Propellants, 778
Ramshaw, Dr C, and Thornton, Dr J D Droplet Circulation and Interfacial Disturbances in Gas–Liquid Systems, 719
Rand, M J (Burn, Prof J H, and) Sympathetic Postganglionic Mechanism, 163
Randle, P J (Battaglia, F C, and) Monosaccharide Transport in Rat Diaphragm Muscle, 1713
Rangaswami, Dr G (Satyanarayana, G, and) Effect of Indole Acetic Acid and α-Naphthalene Acetic Acid on the Growth, Flowering and Fruit Set in Sweet Potato, B A 73
Range (Daily), of the Geomagnetic Vertical Intensity around the Magnetic Equator Possible Asymmetry in the (Dr C A Onwumechilli), 51
Ranvier in Potassium-rich Solutions Action Potentials from Single Nodes of (Dr Hans-Christoph Luttgau), 1494
Rao, Dr B Ramachandra, and others Awarded the Sir J C Bose Premium of the British Institution of Radio Engineers, 857
Rao, Dr M Srirama, and others Awarded the Sir J C Bose Premium of the British Institution of Radio Engineers, 857
Rao, N Appaji, and others Biochemical Research in India (Occurrence of Flavin Nucleotides in Plants and the Changes in their Concentration with Germination of Green Gram and Cow Pea), 1368
Rapid Estimation of the Specific Surface of a Powder (Dr H E Rose and R M E Sullivan), 46
Rapid Infra-red Technique Post-Exposure Analysis of Organic Compounds in the Blood by a (Dr R D Stewart, D S Erley, T R Torkelson and C L Hake), 192
Rapid Method for Studying Tumour Blood Supply using Systemic Dyes (Dr R J Goldacre and Dr B Sylven), 63
Rapid and Sensitive Method for the Determination of Xanthine Oxidase Activity using the Oxygen Electrode (Metry Bacila and Dr Gilberto G Villela), 1394
Rapid and Simple Pathogenicity Test for Detecting Virulent Clones of *Fusarium oxysporum* f *cubense* using Seedlings of *Musa balbisiana* (Dr R H Stover), 1591
Rapoport, Dr Anatol The Road to Knowledge (The Language of Science), B A 7
Rapoport, Lorence (edited by Edwin M Smolin and) *s*-Triazines and Derivatives (The Chemistry of Heterocyclic Compounds, Vol 13), *review* by Dr F G Mann, 1758
Rappaport, Dr Irving Recovery of Infectious Nucleic Acid from Tobacco Mosaic Virus inactivated by Antibody, 1732
Rappoport, Prof D A, and Sewell, B W Metabolic Changes induced in Mammalian Erythrocytes by Whole-Body X-Irradiation, 846
Rare Earth Metals Production of all the (Johnson, Matthey and Co, Ltd), 683
Rare Hydromedusa A (Surg Comdr D C Howe), 1963
Rashevsky, Dr Nicolas The Road to Knowledge (Mathematical Principles in Biology), B A 6
Rasky, K Origin and Dispersal of Flowering Plants (Angiosperms in various Tertiary Floras of Hungary), 1201
Rat Carbonic Anhydrase in the Deciduoma of the (Dr T H Johnson, Dr C Lutwak-Mann and Prof M C Shelesnyak), 961
  Effect of Adrenalectomy on the Hormone Content of the Thymus in the (Dr J Comsa), 279
  Effect of Dietary Fat and Extent of Blood Sampling on the Level of Plasma Cholesterol in the (I Coleman and J M R Beveridge), 1039
  Effect of Ethylenediamine Tetra-acetate on Vitamin B_{12} Absorption in the (Edward G Rice Dr Samuel M Greenberg, John F Herndon and E J Van Loon), 1948
  Influence of the Thymus upon the Egg-White Allergy in the (Dr J Comsa), 1726
  Occurrence of Polynucleotide Phosphorylase in Atypical Epithelioma of (Dr Kunio Yagi, Takayuki Ozawa and Hiroshi Konogi), 1939
  Relation of Ethanol Metabolism to Several Factors in the (Dr F W Kinard, J C Aull, jun, and R E Ulmer), 1721
  Residual Bodies of Seminiferous Tubules of the (B V Kingsley Smith and Dr D Lacy), 249
  Site of Production of Œstrogen in the Ovary of the (Dr Bengt Falck), 1082
Rat with 'Sugar' Cataract Formation of Polyols by the Lens of the (Dr Ruth van Heyningen) 194
Rat (Infant) Passage of Insulin through the Wall of the Gastro-intestinal Tract of the (Dr B Mosinger, Z Placer and O Koldovsky), 1245
Rat (Male) Effect of Sexual Maturation and Castration on the Sex Chromatin Pattern in the (St Zsifkovits, Ch Mehes and C Jobst), 1239
Rat (Multimammate) Is the, a Natural Reservoir of *Borrelia duttoni*?, (Dr F Zumpt), 793
Rat (White) Effect of 'Amino-Acid Imbalance' on Growth and Vitamin A Storage in the (M Rechcigl, jun, S Berger, J K Loosli and H H Williams), 1404
Rat Adrenal Lipids Use of Porter–Silber and Schiff Reagents as Spot Tests for Steroids applied on Paper and their Application to the Study of (Dr Marion K Birmingham), B A 67
Rat Brain Histochemical Study of Monoamine Oxidase in the Developing (Nobuo Shimizu and Nogaaki Morikawa), 650
  Increase in the γ-Aminobutyric Acid Content of, after Ingestion of Ethanol (Dr H -M Hakkinen and E Kulonen), 726
  Noradrenaline and Adrenaline in the, during Acute and Chronic Morphine Administration and during Withdrawal (Dr Lars-M Gunne), 1950
Rat Brain Glutathione and Pyridoxine Deficiency (M J Ashwood-Smith and A D Smith), 2028
Rat Diaphragm Salicylate and Potassium Fluxes of (Dr J A Hicklin), 2029
Rat Diaphragm *in vitro* Role of Magnesium in the Insulin-Sensitivity of the (Dr Gangagobinda Bhattacharya), 1401
Rat Diaphragm Muscle Monosaccharide Transport in (F C Battaglia and P J Randle), 1713
Rat Kidney Deaminases of Adenylic Acid and Adenosine in (Dr M Zydowo), 1641
Rat Liver Mitochondria A Cardiolipin-like Compound in (G S Getz and W Bartley), 1229
  Formation of Noradrenaline from Adrenaline by (Dr Kunio Yagi and Dr Toshiharu Nagatsu), 1316
  Pantothenic Acid Deficiency and Ubiquinone Levels in (A S Aiyar, G A Sulebele, D V Rege and A Sreenivasan), 1867
Rat Liver Mitochondria (Isolated) Protein Biosynthesis and Oxidative Phosphorylation in (P J Reis, J L Coote and T S Work), 165
Rat Mast Cells Release of Histamine from, by Blood treated with Dextran (Dr G T Archer), 1151
Rat Oral Tissue Effect of Vitamin D on the Respiration of (L Zar and Prof J T Irving), 1410
Rat Sarcoma and Hepatoma An Attempt to produce Malignant Change with Deoxyribonucleic Acid from (Dr J G Bearn), 824
Rat Serum (Acidified) Peptides with Oxytocic and Pressor Activity obtained from (Prof H Croxatto, T Pereda and R Mellada), 1496
Rat Spleen (Isolated and Perfused) Production of γ- and α-Globulins by the (Dr E Espinosa), 1801
Rat Tail Tendon Collagen Chromatographic Fractionation of (Alexander Kessler, Hyman Rosen and Dr Stanley M Levenson), 1640
Rat Tissues Histological Localization of Fluorescent Thyroid-stimulating Hormone in (Dr E E Mancini, O Vilar, J M Dellacha, A Gimeno and A Castro), 1733
Rat Uterus (Isolated) Some Pharmacological Effects of Staphylolysin on the (Dr B Wiegershausen), 2017
Rat Ventricle Preparation Potentiation of Contractions after Rest in the Isolated (Dr R L Speirs), 66
Ratcliffe, J A Recent Trends in the Theory of the Ionosphere (Presidential Address to the Physical Society), 419
  Re-elected president for 1959-60 of the Physical Society, 420
  Fluctuation Phenomena and Stochastic Processes (Stochastic Problems arising in Radio Physics), 511
Rate of Appearance of Mutants with Respiration-deficiency in *Staphylococci* (G F Gause, G V Kochetjova and N A Sorbaeva), 1821
Rate of Growth of Wool Measurement of the, using Cystine labelled with Sulphur-35 (A M Downes and A G Lyne), 1884
Rate of Reductive Photo-bleaching Effect of Added Substances on the (Reductive Photo-bleaching of Eosine), (Kengo Uchida, Shunji Kato and Masao Koizumi) 1620
Rate of Setting of Gypsum Plaster Effect of Temperature on the (M J Ridge), 47
Rates (Relative), of Exchange of Potassium-42 by the Foetal Metanephros and Foetal Liver (Dr J G Bearn and Dr F T C Harris), 1959
Rating of Charities and Kindred Bodies Report of the Committee on the, 1343
Ratio of Nucleon Mass and Electron Mass (Prof A J Rutgers), 894
Ratios (Saliva-Serum), of Deuterium Oxide after Administration of Heavy Water (Nan Taggart and Dr F E Hytten), 457
Rats Application of Biometrical Genetics to Behaviour in (Dr P L Broadhurst), 1517
  Attempts to Modify the Normal Metabolism of Strontium-90 in (Dr V Volf), 1401
  Dietary Protein and Serum Cholesterol in (A P de Groot), 903

  Distribution of Promethium Plasma Fractions in (Dr Bergene Kawin), 1722
  Fate of the Highly Polymerized Spleen Deoxyribonucleic Acid labelled with Phosphorus-32 Injected Intraperitoneally into (Tamara A Hudnik-Plevnik, Vladimir R Glišin and Marta M Simic), 1818
  Hormone Effects on Early Distribution and Disappearance from the Blood of Promethium-147 in (Dr Bergene Kawin), 1816
  Increased Oxygen Consumption in , during Irradiation (Dr A Vacek), 197
  Pharmacological Suppression of Increased Capillary Permeability following Irradiation of the Intestine of (Dr D A Willoughby), 1156
  Presence of certain Onium Compounds in Brain Tissue following Intravenous Administration to (Prof Ruth R Levine), 1412
  Sex Difference in Ethanol Tolerance of (Henrik Wallgren), 726
Rats with Bile Fistulae Thirst for Bile in (Dr Albert J Bertinchamps, James J Greenough and George C Cotzias), 1405
Rats deficient in Vitamin E Curative Effect of Selenium upon the Incisor Teeth of (Prof J T Irving), 645
Rats (Adrenalectomized) Sodium Chloride Intake and Urinary Histamine in (Dr T Bjuro and Dr H Westling), 1241
Rats (Aged Male) Effect of Prolonged Thyroid Administration on (Prof John F Lhotka, Lloyd Glenn McArthur and Arthur A Hellbaum), 1149
Rats (Fasted) Effect of Whole-body X-Irradiation on the Insulin Resistance of (Dr V Stankovic and N Sestan), 1816
Rats (Normal and Diabetic) Release of Non-Esterified Fatty Acid from Adipose Tissue in (Dr E Wendeová and Dr J Pav), 1147
Rats (Pyridoxine-deficient) 8-Hydroxyquinaldic Acid, the Red Fluorescent Substance in the Urine of (Dr J K Roy, Dr R R Brown and Prof J M Price), 1573
Rats (Tumour-bearing) Behaviour of Zinc and Radiozinc in (Dr D M Taylor), 1649
Rats (WR Strain) A Sex Difference in White Blood Cells of (Dr Hans Meier), 1082
Rats and Mice Thiamine-sparing Action of Sorbitol in (Dr T B Morgan and Prof John Yudkin), 909
Rats and Mice (Newborn) An Improved Technique for Intravenous Injection of (N F Anderson, E J Delorme, Prof M F A Woodruff and D C Simpson), 1952
Raven, Canon Charles E Medicine—Mother of the Sciences (Inaugural Lecture to the Faculty of the History of Medicine and Pharmacy of the Worshipful Company of Apothecaries of London), 1448
Raw, Dr F Estimating Earthworm Populations by using Formalin, 1661
Raw, Dr Isaias, and Colli, Walter Crystalline Cytochrome *b_5*, 1798
Raw, Dr Isaias, and others Methaemoglobin Reduction through Cytochrome *B_5*, 1651
Raw Materials (Radioactive) Mineralogy and Geology of (Prof E Wm Heinrich), *review* by Prof C F Davidson, 1262
Rawlins, F I G The Nature of Experience, *review*, 218
  The Faith of a Realist, *review*, 388
  Toward a Systematic Pragmatics, *review*, 754
  Husserliana Completed, *review*, 1571
Rawstron, E M Appointed reader in geography at Queen Mary College, London, 322
Ray, Amal, and Sadhu, Prof D P Carbohydrate Metabolism in Hypervitaminosis A, 1323
Ray, Francis E (Argus, Prof Mary F, and) Possible Relation between Carcinogenicity and Ease of Hydrolysis *in vitro* of Derivatives of 2-Amino-fluorene, 2018
Ray, Dr N H Carrier Gas and Sensitivity in Gas Chromatography, B A 54
Ray (Cosmic) Energy Spectrum Changes Evidence for, during a Forbush Decrease (K W Ogilvie and M M Winn), 888
Ray (Cosmic-) Storm of February 11, 1958 North–South Anisotropy and Anticipatory Increase of Intensity associated with the (Dr V Sarabhai and R Palmeira), 1204
Raymond, J C, and others Gibberellic Acid and Nodulation of Legumes, 1576
Raynor, Prof G V The Physical Metallurgy of Magnesium and its Alloys, *review* by Dr J W Martin, 486
Rayon Research Association The British—Open Days (L A Wiseman) 600
γ-Rays A Capacitance Method for following Vinyl Polymerizations initiated by (G J K Acres and F L Dalton), 335
Rays (Cosmic), in Space Change of (Prof H V Neher), 423
Rays (Solar Cosmic) Satellite Observations of (Pamela Rothwell and Carl McIlwain), 138
Reaction Primer Explosion Triggers (G Larikov), 447
Reaction to Dental Pain Association between Colour of the Iris of the Eye and (Dr Philip R N Sutton), 122
Reaction of Epinephrine and Norepinephrine with Ethylene Diamine Evidence of Side-Chain Cleavage during the (Dr Louis-P Joly and Dr Guy Nadeau), 1483
Reaction of Formyl Porphyrins with Acetone-Hydrochloric Acid (Dr P S Clezy), 1142
Reaction of Meruric Chloride with Plasmalogen (Dr William T Norton), 1144
Reaction (Biuret) Crystallographic Studies of the (Dr H C Freeman, J E W L Smith and J C Taylor), 707
Reaction (Complex), in *Hyoscyamus niger* upon Night Interruption with Red Light (P J A L de Lint), 731
Reaction (Galactokinase) Equilibrium Constant of the, and Free Energy of Hydrolysis of Adenosine Triphosphate (Dr M R Atkinson, Eleanor Johnson and Prof R K Morton), 1925
Reaction (Grain Boundary), in Aluminium–Zinc Alloys Reversion of Nodules formed by the (Ryoji Watanabe and Shigeyasu Koda), 977
Reaction (Hill) Relationship between Photophosphorylation and the (Dr H E Davenport), 524
Reaction (Homograft) Dietary Factors in the (Dr A S Parkes), 699
Reaction (Photoperiodic), in the Genus *Chenopodium* (Tourn) L Extreme Sensitivity of Germination and (Dr Bruce G Cumming), 1044
Reaction (Sakaguchi) The Coloured Product of the (Kshirod R Bhattacharya), 53
Reaction (Surface Precipitation) A Method for the Quantitative Study of the (Francis T Ashton), 1735
Reaction (Szilard-Chalmers), in Lithium Permanganate (J R Bolton and Prof K J McCallum), 1717
Reaction (Transformation), of Pneumococci in the Absence of Serum Factor (Prof Takeshi Odaka and Tadashi Watanabe), 471
Reaction Kinetics, *review* by Dr T M Sugden, 299
Reaction Technology (Nuclear) Analytical Chemistry in (Third Conference on), 26
Reaction-directing Properties of Non-enzymic Macromolecules—Pyrogallol Oxidation in the System Iron (III)–Cellulose (N S Goodman and S M Siegel), 53
Reactions of the Pacific Sardine *Sardinops caerulea* (Girard) under the Influence of White and Colored Lights and Darkness Behavior and (Dr A S Loukashkin and Dr N Grant), 865
Reactions with Thiols *in vitro* Metabolic and Chemical Studies of 'Myleran' —Formation of 3-Hydroxytetrahydrothiophene-1,1-dioxide *in vivo*, and (Dr J J Roberts and Dr G P Warwick) 1288
Reactions (Colour), of certain Phenols with Ehrlich's Reagent (Dr Cornelius Steelink), 720
Reactions (Electrode), at the Mercury Electrode Influence of Platinum in Mercury on the Mechanism of (Prof Wiktor Kemula, Zenon Kublik and Zbigniew Galus), 1795
Reactions (Fast), in Solids (Dr F P Bowden and A D Yoffe), *review* by Dr Peter Gray, 664
Reactions (Fast Chemical), in Solution (Deutsche Bunsengesellschaft fur Physikalische Chemie and the Max-Planck Gesellschaft Colloquium on), 1453
Reactions (Nuclear), in Cosmical Electrical Discharges The Temperature required for (Dr C E R Bruce), 2004
Reactions (Organic) Tracer Applications for the Study of (John G Burr, Jr), *review* by Dr A I Scott, 1902
Reactivation of Vaccinia Virus Inactivated by Mercury (Colin Kaplan), 1074
Reactivity Some Problems in Chemical Kinetics and (N N Semenov), Vol I (translated by Michael Boudart), *review* by Dr T M Sugden, 299
Reactivity and Interrelationship of Intermediates in the Hydrolysis of *p*-Nitrophenyl Acetate Catalysed by Chymotrypsin (Mario A Marini and Prof George P Hess), 113
Reactor The Halden (Norway), 516, 1844
  Criticality of the Dounreay Fast Breeder, 1449
  Merlin, an Industrial Research (Dr T E Allibone), B A 11
  Neutron Source Thermal, (*Nestor*), to be purchased by the United Kingdom Atomic Energy Authority from the Hawker Siddeley Nuclear Power Co , 1533
Reactor *RB* (Nuclear) Accident in Yugoslavia, 406
Reactor (*Zenith*), at Winfrith Heath (United Kingdom Atomic Energy Authority), 680
Reactor Project at Halden, Norway, 516, 1844
Reactor School Course on the Control and Instrumentation of Reactors Third (Atomic Energy Research Establishment), 1026
Reactors Advanced Gas-cooled (United States Atomic Energy Commission and the United Kingdom Atomic Energy Authority to exchange Technical Information on), 1361
  Third Reactor School Course on the Control and Instrumentation of (Atomic Energy Research Establishment), 1026
  Power (Directory of Nuclear Reactors, Vol I), (International Atomic Energy Agency), *review* by Dr A J Salmon, 1438
Reactors (Neutron Chain) The Physical Theory of (Alvin M Weinberg and Eugene P Wigner), *review* by Dr J Walker, 1973
Reactors (Nuclear) Directory of (International Atomic Energy Agency), Vol I, Power Reactors, *review* by Dr A J Salmon, 1438
Reactors (Nuclear), for Power Generation (edited by E Openshaw Taylor), *review* by R Vaux, 301
Read, Prof John Organic Syntheses, Vol 37, 1957 (edited by James Cason), Vol 38, 1958 (edited by John C Sheehan), *review*, 134
Reagent (Ehrlich's) Colour Reactions of certain Phenols with (Dr Cornelius Steelink), 720
Reagent (Neutral Citrate-Dithionite) Aluminium extracted by (W M H Saunders), 2037
Reagents (Fluorescent Schiff-Type), for Cytochemical Detection of Polyaldehyde Moieties in Sections and Smears (Prof Frederick H Kasten, Vivian Burton and Peggy Glover), 1797
Reagents (Porter–Silber and Schiff) Use of, as Spot Tests for Steroids applied on Paper and their Application to the Study of Rat Adrenal Lipids (Dr Marion K Birmingham), B A 67
Realist The Faith of a, *review* by F I G Rawlins, 388
Reasoning (Statistical) The Fundamentals of (M H Quenouille), *review* by Dr D J Finney, 217
Receptors (Red Blood Cell) Influence of Streptomycin Solutions on the Interaction between the Agglutinating Sera and the Corresponding (Dr M Kout and Dr Z Kubickova), 639
Rechcigl, jun , M , and others Effect of 'Amino-Acid Imbalance' on Growth and Vitamin A Storage in the White Rat, 1404
Recherche Scientifique, Centre National de la Colloques Internationaux, No 84, Acoustique Musicale (Marseilles, 1959), *review* by Prof E G Richardson, 1902
Recherche Scientifique en Afrique Centrale, Institut pour la Dixieme Rapport Annuel (1957), 407
Recherches sur les Affinités Chromosomiques dans le Genre *Coffea* (J Bouharmont), 518
Recherches sur l'Autostérilité du Caféier robusta (*Coffea canephora* Pierre), (M Devreux, G Vallaeys, P Pochet et A Gilles), 518
Recherches Enzymologiques, Centre Interuniversitaire de Colloquium on Specificity in Protein Biogenesis, 1198
Recherches Géologiques, Géophysiques et Minieres, Bureau de (Service d'Information Géologique) A New Geological Documentation Service, 153
Recognition of Diseases and Pests of Farm Crops (Ernst Gram, Prosper Bovien and Chr Stapel), *review* by F C Bawden, 1258
Recoil Damage Annealing of, by Ultra-Violet Light (R F C Claridge and Dr A G Maddock) 1932
Recombination of Parental Biochemical Components in a *Baptisia* Hybrid Population Applications of Paper Chromatography to Systematics — (Dr R E Alston and Dr B L Turner), 285
Recombination (Asymmetric) Properties and Inheritance of Haemoglobin by (Dr Harvey A Itano and Elizabeth Robinson), 1468
Recombination (Atom) Mechanism of (Prof G Porter and Dr J A Smith), 446

Recombinational Lethals in a Polymorphic Population (J B Gibson and Prof J M Thoday), 1593
Recording Eye Movement (G H Byford), 1493
Recording the Positions of Microscopical Objects (Dr J R Baker), 34
Recover Infective 'Ribonucleic Acid' Failure to, from Myxovirus Preparations (G L Ada, Patricia E Lind, Lois Larkin and Sir Macfarlane Burnet), 360
Recovery of Infectious Nucleic Acid from Tobacco Mosaic Virus inactivated by Antibody (Dr Irving Rappaport), 1732
Recovery in Mammalian Cells in Culture X-Ray Damage and (M M Elkind and Harriet Sutton), 1293
Recovery from Whole-Body γ-Irradiation Cells which Synthesize Deoxyribonucleic Acid in Guinea Pig Bone Narrow during (P F Harris and J H Kugler), 1883
Recovery (Bacterial), from Ultra-violet Light Macromolecular Synthesis in (C O Doudney), 189
Recreation Studies in, 1034
Recrystallization of Zone-Refined Lead (G F Bolling), 718
Rectification (Stochastic), of Non-linear Clocks (David G Kendall), 1476
Red Alga (Marine) A Free-Floating (Dr H B S Womersley and Dr R E Norris), 828
Red Blood Cell Receptors Influence of Streptomycin Solutions on the Interaction between the Agglutinating Sera and the Corresponding (Dr M Kout and Dr Z Kubickova), 639
Red Blood Cells Coating of, with Antigenic Substances (Dr K Deutsch), 278
Red Blood Corpuscles Effect of Polyphloretin Phosphate on the Suspension Stability of (Dr Bengt Fries), 62
Red Cells (Duck), *in vitro* Role of Stroma in Haemoglobin Synthesis—Experiments on (A Breccia, A L Fantola, E Lazzarini and A Giustina), 1878
Red Cells (Human) Accumulation of Dextran in, after Haemolysis (N V B Marsden and S G Ostling), 723
  Calcium Ions and the Permeability of (Prof M Maizels), 366
Red Clover (*Trifolium pratense* L) Floral Initiation and its Relationship to Growth-Stage in (J L Stoddart), 559
Red Fluorescent Substance in the Urine of Pyridoxine-deficient Rats 8-Hydroxyquinaldic Acid, the (Dr J K Roy, Dr R R Brown and Prof J M Price), 1573
Red Lateral Muscle of Rainbow Trout Changes in Purine Nucleotides of (Tsuneyuki Saito, Ken-ichi Arai and Toshikatsu Yajima), 1415
Red Light Complex Reaction in *Hyoscyamus niger* upon Night Interruption with (P J A L de Lint), 731
Red Locust Control Service, International Work of the, 589
  Retirement of Dr D L Gunn from the directorship, 589
  Appointment of C du Plessis as director, 590
Red Mite (Citrus), *Panonychus citri* (McG) A Suspected Virus Disease of the (Dr Kenneth M Smith, G J Hills, F Munger and J E Gilmore), 70
Red-Shift Absorption Spectrum of the Cygnus-A Radio Source (Dr R D Davies and Dr R C Jennison), 803
Red Sulphur Bacteria Amino-Acids of (H Mukherjee) 1742
Redd, jun , B L , and others Effects of Irradiation of Nerve on Muscular Response, 734
Reddy, C Abhirama, and others Awarded the Sir J C Bose Premium of the British Institution of Radio Engineers, 857
Rede Lecture for 1959 (Sir Charles Snow), 295, 411
Rediscovery of *Bathynella chappuisi* Delachaux in Britain (Ian Efford) 558
Redish, K A Appointed lecturer in computing at the University of Birmingham, 684, 1362
Redman, Prof R O Astrophysics, *review*, B A 3
  Awarded a grant of £5,500 by the Paul Instrument Fund Committee of the Royal Society, 507
Redox Potentials in Soybean Nodules during the Vegetative Period (Dr Helena Ebertova), 1046
Redox Properties of some Dipyridyl Quaternary Salts (R F Homer and T E Tomlinson), 2012
Reduce the Strontium Content of Milk Implications of Restricting Cows to a Clover-free Diet in order to (Dr David Purves), 1408
Reduced Diphosphorpyridine Nucleotide Effect of on the Swelling of Isolated Mitochondria (Dr G Di Sabato), *erratum*, 95
Reduced Diphosphopyridine Nucleotide Oxidation Inhibition of, by Ammonia (R T Wedding and H M Vines), 1226
Reduced Pressure Habit of Ice Crystals grown in Hydrogen, Carbon Dioxide and Air at (A P van den Heuvel and Dr B J Mason), 519
Reduced Triphosphopyridine Nucleotide-linked Cystine Reductase in the Clothes Moth, *Tineola bisselliella* (Humm), (R F Powning and H Irzykiewicz), 1230
Reductase (Nitrate) Isolation and Purification of, from Embryos of Germinating Wheat (D Spencer) 682
Reductase (Triphosphopyridine Nucleotide-linked Cystine) A Reduced, in the Clothes Moth, *Tineola bisselliella* (Humm), (R F Powning and H Irzykiewicz), 1230
Reductases (Folic Acid) Flavins as Components of (Dr Beatriz M Braganca and U W Kenkare) 1488
Reduction Principles of Oxidation and (Dr A G Sharpe), *review* by Dr V Gold, 1902
Reduction in the Anoestrus Period of Laboratory Cats by Increased Illumination (Dr Patricia P Scott and Marny A Lloyd-Jacob), 2022
Reduction of the $FeS_2O_3^+$ Ion at the Dropping Mercury Electrode (F M Page), 1481
Reduction to Haem Decrease in Acid Strength of Propionate Side-Chains of Haematin on (Dr J E O'Hagan), 1808
Reduction of Toxicity of Cationic Macromolecules by Complexing with Anionic Derivatives of Synthetic Polyglucoses (P T Mora, B G Young and M J Shear), 431
Reduction (Enzymic), of α-Aminoadipic Acid by Yeast Enzyme (S Sagisaka and Prof K Shimura), 1709
Reduction (Methaemoglobin), through Cytochrome B_5 (Nicola Petragnani, Otilia C Nogueira and Isaias Raw), 1651
Reduction (Nitrate), by Aqueous Extracts of Excised Tomato Roots (C S Vaidyanathan and Prof H E Street), 531
Reductive Photo-bleaching Effect of Added Substances on the Rate of (Reductive Photo-bleaching of Eosine), (Kengo Uchida, Shunji Kato and Masao Koizumi), 1620
Reductive Photo-bleaching of Eosine—Primary Processes indicated by the Flash Technique (Shunji Kato and Masao Koizumi), 1620 , Effect of Added Substances on the Rate of Reductive Photo-bleaching (Kengo Uchida, Shunji Kato and Masao Koizumi), 1620
Reed, Dr R , and others A New Approach to the Dating of the Dead Sea Scrolls, 533
Reed, Dr R I Substitution at Elements other than Carbon, *review*, 1262
Reed, Dr R I , and Snedden, W Coal Science (Spectroscopy of Coals—Fragments produced from Aromatic Compounds), 413
Reed, Dr R I (Finan, Dr P A , and) Application of the Mass Spectrometer to Polysaccharide Chemistry 1866
Reed Dr T Edward, and Ahronheim Dr J H An Association between Abo Blood Groups and Fertility in a Normal American Population, 611
Rees, M H , and Reid, G C The Aurora, the Radiation Belt and the Solar Wind—a Unifying Hypothesis, 539
Rees, M W (Ambler, R P and) ε-N-Methyllysine in Bacterial Flagellar Protein, 56
Rees, W H The Chemistry of Clothing (Physical Aspects of Clothing for Comfort), 849
Rees, W T (Parker, Dr C A , and) Photolysis of Thionine in Rigid Medium—Measurement by Spectrofluorimetry, 1223
Reeves, Dr J Wynn Title of reader in psychology in the University of London (at Bedford College) conferred on, 322
Re-examination of Theories A (Replication of Tobacco Mosaic Virus), (Prof Barry Commoner), 1998
Refined Lead (Zone-) Recrystallization of (G F Bolling), 718
Refinery Production, 1957 and 1958 United Kingdom Petroleum Industry Statistics relating to Consumption and (Petroleum Information Bureau), 855
Reflections of a Mathematician (Prof L J Mordell), 681
Reflex (Peristaltic) Are Mucosal Nerve Fibres Essential for the (Dr K H Ginzel), 1235
Reflex Inhibition of Intestinal Motility (Nils G Kock), 1069
Reflex Muscular Responses Does an Increase in the Tension in a Ligament elicit (Dr Bertil Stener), 1495
(III) Reflexion for Diamond Intensity of the (Prof R Brill and H Barth), 264
Reflexion (Direct Continuous-Wave) Apparent Observation of Solar Corpuscular Clouds by (Dr John D Klaus and W Reed Crone), 965
Refraction of Very High Frequency Radio Signals at Ionospheric Heights (S Weisbrod and L Colin), 119
Refrigeration, International Institute of Tenth International Congress of Refrigeration, 946
Rege, D V , and others Pantothenic Acid Deficiency and Ubiquinone Levels in Rat Liver Mitochondria, 1867
Regeneration of Protein from Insoluble Protein-Tannin Compounds (Dr W Mejbaum-Katzenellenbogen, W Dobryszycka, J Boguslawska-Jaworska and B Morawiecka), 1799
Regeneration in Vertebrates (edited by Charles S Thornton), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Regeneration (Shell and Siphon), in *Mactra stultorum* Linne (Lamellibranchiata), (L Birkett and R J Wood), 1075
Regeneration' ('Thermal), in the Nickel-Oxygen System (Prof J S Anderson and D F Klemperer), 899
Regeneration Period of the Internal Reproductive Rhythm in a Xerophilous Equatorial Bird, *Quelea quelea* Duration of the (H J de S Disney, B Lofts and Dr A J Marshall), 1659
Regeneration Processes Interaction of Plant Growth Regulators in (H Schraudolf and Prof J Reinert), 465
Regional Advisory Council (London and Home Counties) for Technological Education Tenth Annual Report, 94
Regional Research Centre of the British Caribbean Soil and Land-Use Surveys, No 1, Parish of St Catherine Jamaica (K C Vernon) , No 2, The Rupuruni Savannas of British Guiana (R F Loxton, G K Rutherford and J Spector) , No 3, St Vincent (J P Watson, J Spector and T A Jones), 27
Regional Research Laboratory, Hyderabad Annual Report for 1957-58, 320
Regional Training Course on Diagnosis, Improvement and Management of Salt-affected Soils (Unesco Middle East Science Co-operation Office), 1778
Regional Training Course for Laboratory Technicians (University Institute of Chemistry, Lahore), 857
Registrar General Statistical Review of England and Wales for the Year 1957, Part 2, Tables, Civil, 1107
Registration of Scientific and Technical Persons (1958), 854
Registration of the Spermicidal Effects of Dioctyl Sodium Sulphosuccinate (Prof Per Eric Lindahl and Kjell Wedin), 1289
Regulation Plant Growth (Boyce Thompson Institute for Plant Research, the New York Botanical Garden and the Brooklyn Botanic Garden fourth International Conference on), 599
Regulation (Light), of Coat-Shedding in a Tropical Breed of Hair Sheep (R B Symington), 1076
Regulation (Self-) in Living Systems (Second Ottawa Symposium on), 239
Regulation (Sodium), in the Blood of Parr and Smolt Stages of the Atlantic Salmon (Prof H J Koch, J C Evans and E Bergstrom), 283
Regulators (Plant Growth) Interaction of, in Regeneration Processes (H Schraudolf and Prof J Reinert) 465
Reichenberg, D Ion Exchange, *review* 1757
Reichstein, Prof T , and others 3 4,ω-Trihydroxyacetophenone 3-methyl Ether in Adrenal Extracts, 268
  Isolation of 24-Methylene-cholesterol from Honey Bees (*Apis mellifica* L), 732
Reid, Dr D D Title of professor of epidemiology in the University of London (at the London School of Hygiene and Tropical Medicine) conferred on, 1108
Reid, G C (Rees, M H , and) The Aurora, the Radiation Belt and the Solar Wind—a Unifying Hypothesis, 539
Reid, jun , Joseph L Evidence of a South Equatorial Countercurrent in the Pacific Ocean, 209
Reinacker, Prof Gunther Elected a member of the Chemistry Section of the Leopoldina Academy of Natural Sciences, 595
Reiner, Dr John M Behavior of Enzyme Systems, *review* by Dr J B Chappell, 388

Reiner, Prof M Flow Properties of Biological Systems 1539
Reiner, Prof M , and Blair, Dr G W Scott The Flow of Blood through Narrow Tubes, 354
Reiners, W J (Entwistle, Alison, and) Incentives in the Building Industry (National Building Studies Special Report No 28), 98
Reinert, Prof L (Schraudolf, H and) Interaction of Plant Growth Regulators in Regeneration Processes 465
Re-Interpretation of Charnockites (A P Subramaniam), 321
Reis, P J , and others Protein Biosynthesis and Oxidative Phosphorylation in Isolated Rat Liver Mitochondria 165
Relation of Ethanol Metabolism to Several Factors in the Rat (Dr F W Kinard, J C Aull, jun , and R E Ulmer), 1721
Relation between Giant Travelling Disturbances and Sporadic E Ionization (L H Heisler), 1788
Relation to Invasive Capacity to Passage of Lymphocytic Cells through Cellulose Membrane Filters (Dr Emma Shelton and Dr Mary E Rice) 479
Relation (Linear), between Two Observed Quantities A Least-Squares Solution for a (P A Wayman), 77 , (B K Kelly) 1086
Relation (Possible), between Carcinogenicity and Ease of Hydrolysis *in vitro* of Derivatives of 2-Aminofluorene (Prof Mary F Argus and Francis E Ray), 2018
Relation (Possible), with an Excess of Iron in the Forage A Lesion of the Follicle and of the Fibre of Wool and its (Prof G Gonzelez, J Garcia and E Fernandez), 559
Relations (Structural) Estimation of Linear and Non-Linear (D E Barton and C L Mallows) 1086
Relations (Time), of Humorally Co-ordinated Chromatic Responses Significance of the (Dr A K Kent) 2027
Relationship to Growth-Stage Floral Initiation and its, in Red Clover (*Trifolium pratense* L), (J L Stoddart), 559
Relationship between Industry and Technical Colleges (Liverpool District of the Federation of British Industries Conference on), 1690
Relationship between Larval and Pupal Periods of some Lepidopterous Insects (Dr M A Zaher and Dr Moufied A Moussa), 283
Relationship of *p*H to Aerobic Corrosion Fatigue Life of Steel (Dr Frederick J Radd, L Hugh Crowder and Louis H Wolfe), 2008
Relationship between *p*H and Volatile Fatty Acid and Diversion of Saliva from the Actively Fermenting Rumen of Sheep (V R McManus), 1572
Relationship between Photophosphorylation and the Hill Reaction (Dr H E Davenport) 524
Relationship between Structure and Physical Properties of Materials (Non-Destructive Testing Group of the Institute of Physics and the Société Française de Métallurgie Discussion on), 1688
Relationship between Weight of Internal Fat, 'Fill', and the Herbage Intake of Grazing Cattle (J C Tayler), 2021
Relationship (θ-φ), for a Constrictive Resistance in Thermal Equilibrium Influence of the Thomson Effect on the (Dr W Davies) 975
Relationship (Dose–Response), in Radiation Leukaemia (Dr P Armitage, Dr W M Court Brown and Dr R Doll), 1669 , (Dr D J Mewissen), 1670
Relationships between its Anti-Atherogenic and Endocrine Actions The C_{17}-OH Group of Œstradiol— (Dr Manuel Rene Malinow, Alvaro L Gimeno, Amanda A Pellegrino-Iraldi, Martha A Fernandez-Gimeno, Jorge L Lacuara and Jaime A Moguilevsky), 1720
Relationships in Industry—some Changing Concepts of Management (British Institute of Management and the Ministry of Labour Conference on), 156
Relationships (Different Cell–Virus) Formation of, in Tumour Cells induced by Polyoma (Dr Leo Sachs and Ernest Winocour), 1702
Relationships (Host–Parasite) Evolution of (British Association for the Advancement of Science, Section D (Zoology), Symposium on), 760
Relative Rates of Exchange of Potassium-42 by the Foetal Metanephros and Foetal Liver (Dr J G Bearn and Dr F T C Harris), 1959
Relative Stability of the Halogenoplatinates A Radiochemical Tracer Study of the (A J Poe and M S Vaidya) 1139
Relatively High-Energy Ions Emission of, from Low-Voltage Arcs (E R Harrison), 345
Relativity (Special) A New Experimental Test of (J P Cedarholm and Prof C H Townes), 1350
Relaxation (Vibrational), and Dissociation of Carbon Dioxide behind Shock Waves (Dr I R Hurle and Dr A G Gaydon) 1858
Relaxation Times (Proton Resonance) in Mobile Liquids (Dr J G Powles and D Cutler), 1123
Relaxing Gases Velocity of Sound in (H J Wintle) 2007
Release of Adenosine Triphosphate and Serotonin from Injured Cellular Blood Elements in Extracorporeal Circuits (Dr H S S Sarajas, Dr R Kristoffersson and Dr M H Frick), 1127
Release of Compounds containing Diaminopimelic Acid from *Vibrio metchnikovi* treated with Antibody and Complement (Dr F Shafa and Dr M R J Salton), 1341
Release by Flight Exercise of a Chemotropic Response from Photopositive Domination in a Scolytid Beetle (Prof Kenneth Graham), 283
Release of Histamine from Rat Mast Cells by Blood treated with Dextran (Dr G T Archer), 1151
Release of Non-Esterified Fatty Acids from Adipose Tissue in Normal and Diabetic Rats (Dr J Wendeova and Dr J Pav), 1147
Release of Nucleotides from Yeast Cells (Masataka Higuchi and Prof Teijiro Uemura), 1381
Release and Use of Atomic Energy (Dr T E Allibone) 1613
Reliability and Quality Control in Electronics Sixth National Symposium on, 1362
Relict Fauna of Ennerdale Water—a Problem of Distribution (Dr W Pennington), 1421
Religion of the Ch'iang The Customs and (D C Graham) B A 15
Religion of Man? A, *review* by Dr D J McCracken, 1571
Remains of Swedenborg Blood Grouping of the (Madeleine Smith), 867
Remanent Magnetization (Natural) of Pre-Cambrian Gneiss of Ongul Islands in the Antarctic (T Nagata and Y Shimizu), 1472
Remnants (Conchiolin) in Mother-of-Pearl from Fossil Cephalopoda (Dr Ch Gregoire), 1157
Removal of Luminescence induced by Tritium Low-Temperature Autoradiography for the Detection of Tritium in Tissue, with (P Pellerin, P Fallot, M Laine-Boszormenyi and F Serrel), 1385
Removal of Strontium and Caesium from Milk (Dr B B Migicovsky), 374
Renaissance Anatomy, *review* by Dr A R Hall, 1761
Renal Blood Flow Mechanism of Autoregulation of (Dr Allen M Scher), 1322
Renal or Enzymic Disorder Essential Pentosuria— (Dr R C Bozian and Prof Oscar Touster), 463
Renbourn, Dr E T , and Stockbridge, H C Ergonomics, its Place in Industry (Activities in the Clothing and Stores Experimental Establishment of the Ministry of Supply), B A 21
Rendel, Dr J M Appointed chief of the Division of Animal Genetics of the Commonwealth Scientific and Industrial Research Organization, 1532 , work of, 1532
Renewable Filter (Continually) A Partial Chemical Characterization of Maize Coleoptile Cell Walls prepared with the Aid of a (Prof Aleksander Kivilaan, Teofila C Beaman and Robert S Bandurski), B A 81
Renewal Times of some Squamous Epithelia in the Guinea Pig (H Platt), 1654
Renshaw, A , and others Alkali Ion Determinations by means of Glass Electrodes (Tests on Experimental Electrodes of Aluminosilicate Glasses), 1617
Renton, Dr P H (Stratton Dr F , and) Practical Blood Grouping, *review* by Dr R A Zeitlin, 130
Reorganization of Root Apices after Irradiation (F A L Clowes) 1025
Repair (Tissue) Wound Healing and (edited by W Bradford Patterson), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Repartition des Êtres Vivants Causes de la (Raymond Furon), *review* by Prof Ronald Good, 390
Replenishment (Nitrogen), in the Soil (Dr N R Dhar), 942
Replicas of Workshops, 1534
Replication of Tobacco Mosaic Virus—Kinetics of Virus Protein and Ribonucleic Acid Biosynthesis (Prof Barry Commoner, Dr James A Lippincott and Dr Janey Symington), 1992 , A Re-examination of Theories /Prof Barry Commoner), 1998
Replication (Fibre Surface), by Rolling (J Molgaard), 264, 1478 , (H J Woods), 1478
Reports of the United States Geological Survey Suggestions to Authors of the, fifth edition, *review* by Prof, C F Davidson, 390
Representation (Polynomial), of Thermodynamic Tables (Prof C J Pings), 444
Representative of a New Group of Bacteria *Fasciculus limpidus* nov gen , nov spec , a (Prof E G Pringsheim), 1098
Reproduction Colour, *review* by Dr W S Stiles, 1092
  The Endocrinology of (edited by Prof Joseph Thomas Velardo), *review* by Dr T Mann, 1434
Reproduction of Colour (Dr R W G Hunt), *review* by Dr W S Stiles, 1092
Reproduction in Domestic Animals (edited by H H Cole and P T Cupps), Vol I, *review* by Dr S J Folley, 1091
Reproduction in a Trans-Equatorial Migrant (the Short-tailed Shearwater *Puffinus tenuirostris*) Experimental Demonstration of an Internal Rhythm of (Dr A J Marshall and Dr D L Serventy), 1704
Reproduction (Asexual), in the Enchytraeidae (Olig), (B Christensen), 1159
Reproduction (House Fly) Role of Cholesterol in (Ronald E Monroe), 1513
Reproduction (Human) Essentials of (edited by Prof Joseph Thomas Velardo), *review* by Dr T Mann, 1434
Reproduction Rate of *Paramecium multimicro-nucleatum* Effect of the Potassium Salt of Gibberellic Acid on the Growth and (A A Oravec, N G Strovilas, J L Beal and Arthur Tye), 1405
Reproduction and Fertility Current Research on, *review* by Dr T Mann, 1434
Reproduction and Infertility Proceedings of the Third Symposium on, Colorado State University (edited by F X Gassner, in association with Rue Jensen and H J Hill), *review* by Dr T Mann, 1434
Reproductive Rhythm (Internal), in a Xerophilous Equatorial Bird, *Quelea quelea* Duration of the Regeneration Period of the (H J de S Disney, B Lofts and Dr A J Marshall), 1659
Requirement (An Absolute), for 'Iron Transport Factors' by *Microbacterium lacticum* 8181 (Dr D Hendlin and Dr A L Demain), 1894
Requirements (Chilling), of Peach Seeds Gibberellic Acid and the (the late Prof Margaretha G Mes), 2034
Research Animal, at the Commonwealth Scientific and Industrial Research Organization, 1532
  Biochemical, in India—Golden Jubilee Symposium (Prof P S Sarma), 1367
  British Space, 24
  Building, in Britain, 1023
  European Nuclear Energy, 1278
  Feltmaking, 320
  Fishery (J H S Blaxter) 865
  Fundamental, in Britain, 1
  Future Marine Biological, *review* by Dr J A Allen, 215
  Geochemical, in the United States, *review* by Dr S R Nockolds 1757
  Instructional Film, in Pennsylvania (C Denis Pegge), 866
  Microbiological, 680
  Nuclear, in Australia, 1118
  Pharmaceutical, in the U S S R , *review* by Dr D Train, 1831
  Radio, 1024
  Rubber, 854
  Safety in Mines (Thirty-sixth Annual Report on), 154
  Scientific, in Alberta, 1370
  Scientific, in British Universities, 1958-59 (British Council), 854
  Scientific, in Great Britain, 1897
  Sea Fisheries, in East Africa, 855
  Sex, 1107
  Soviet Pharmaceutical , Vol I, Pharmaceutical Chemistry, Vol 2, Pharmacognosy , Vol 3, Medicinal Chemistry, *review* by Dr D Train, 1831
  Sponsored, in Great Britain, 235
  Thermonuclear (Physical Society Conference on), 1015
  Water Pollution (1958)—the Report of the Water Pollution Research Board with the Report of the Director of the Water Pollution Research Laboratory (Department of Scientific and Industrial Research), 1542

Research, Journal of, of the United States National Bureau of Standards to be published in four separate Sections, 320
Research, Educational, No 3, 153
Research in the Antarctic during 1960 (Sir Vivian Fuchs), 851 , American Programme, 852
Research in Dairying, National Institute for Annual Report for 1958, 770
  Grant of 89,348 dollars from the Population Council, Inc , New York, in support of researches on cervical mucus, with particular reference to the control of fertility, 1362
Research on Driver Behaviour A Simulator for (Prof J H Mathewson), 237
Research on Element 102, Nobelium (P R Fields *et al*), 507
Research in Gas Dynamics, *review* by Prof J H Horlock, 1173
Research for Industry 1958, a Report on Work done by the Industrial Research Associations in the Government Scheme (Department of Scientific and Industrial Research), 211, 238
Research on Leukaemia and allied Diseases (Lady Tata Memorial Trust Awards for), 507
Research on Noise Current (Derwent M A Mercer), 414
Research in Nuclear Science, National Institute for Contracts for work on the 7,000-MeV Proton Synchrotron *Nimrod*, B A 14
Research in Problems of Sex Grants-in-aid for (United States National Academy of Sciences—National Research Council), 1107
Research on Weed Transportation New Zealand, 1361
Research (Agricultural), in Britain, 238
Research (Agricultural) The Use of Radioisotopes in (Ministry of Food and Agriculture of the Government of India, Food and Agriculture Organization of the United Nations, International Atomic Energy Agency and Unesco South East Asia Science Co-operation Office Course on), 1451
Research (Agricultural), in Eire—An Foras Taluntais (The Agricultural Institute), 28
  Appointment of Dr T Walsh as director, 29
  Appointment of Dr L B O'Moore as chief of the Animal Production Division, 29
  Appointment of J J Byrne as chief of the Rural Economy Division, 29
Research (Agricultural), Indian Council of Misc Bulletin No 82, Bovine Stars of India, 941
Research (Agricultural), Indian Council of, and Unesco International Symposium on Algology, 595
Research (Biological) Electronic Apparatus for (P E K Donaldson), *review* by W J Perkins, B A 4
Research (Clinical Metabolic) Enzymic Activities of Human Skeletal Muscle Mitochondria—a Tool in (Dr L Ernster, Dr D Ikkos and Dr R Luft), 1851
Research (Coke), in Great Britain Progress in, 1778
Research (Current), on Reproduction and Fertility, *review* by Dr T Mann, 1434
Research (Fire) The Use of Models in (Committee on Fire Research and the Fire Research Conference of the Division of Engineering and Industrial Research of the United States National Academy of Sciences –National Research Council Symposium on), 772
Research (Fundamental Cancer) Fourteenth Annual Symposium on (Cell Physiology of Neoplasia), (University of Texas Anderson Hospital and Tumour Institute), 1451
Research (High-Altitude) British Contribution to, 1776
Research (Marine) The Need for, *review* by Dr F S Russell, 129
Research (Nuclear), European Organization for (CERN) Present Status, 944
  International Co-operation in the field of High-Energy Accelerators, 1844
  Election of Officers, 1844
Research (Operations) Mathematical Methods of (Thomas L Saaty), *review* by Prof L S Goddard, 1763
  Mathematics and, *review* by Prof L S Goddard, 1763
Research (Pest Control) Advances in (edited by R L Metcalfe), Vol 2, *review* by F C Bawden, 1258
Research (Physics), Brazilian Centre for Appeal by Unesco and the International Atomic Energy Agency for help to reconstruct the Library of the, 769
Research (Pioneer), on the Atom—the Life Story of Frederick Soddy (Muriel Howorth), *review* by Prof Norman Feather, 298
Research (Plant), Boyce Thompson Institute for, and others Fourth International Conference on Plant Growth Regulation, 599
Research (Scientific) Central African, 407
  Development Trends in Australian, 1027
Research (Scientific), and the Philosophy of Science (British Society for the Philosophy of Science Symposium on), 1193
Research (Scientific and Technological), in Britain Organization of, 1255
Research (Space) Prelude to, *review* by D G King-Hele, 663
Research (Space), Canadian Committee on, 24
Research (Underwater) Application of Ultra-Violet Lights to (Richard G Woodbridge, III, and Dr Richard C Woodbridge), 259
Research (Virus) Advances in (edited by Kenneth M Smith and Max A Lauffer), Vol 6, *review* by N W Pirie, 920
Research and Development Reviews of Data on, No 13, Research and Development and Economic Growth (Dr A T Waterman), (United States National Science Foundation), 591
  Reviews of Data on, No 14, Funds for Research and Development Performance in American Industry (United States National Science Foundation), 1022
  Reviews of Data on, No 15, Grants for Private Philanthropic Foundations during 1957 (United States National Science Foundation), 1272
Research and Development at the Heston Laboratories of Atomic Power Constructions, Ltd , 517
Research and Development Charges in Civil Nuclear Power, 406
Research and Development Expenditure (Government), in Britain Control of, 696
Research and Development Performance in American Industry Funds for (United States National Science Foundation, Reviews of Data on Research and Development No 14), 1022
Research and Development (Aeronautical), Advisory Group for (Combustion and Propulsion Panel) Discussion on the Chemistry of Propellants, 778
  Discussion on Basic Problems in Propulsion, 779
Research and Development and Economic Growth (Dr A T Waterman), (United States National Science Foundation, Reviews of Data on Research and Development, No 13), 591
Research and Production Facilities of Ciba (A R L), Ltd New (R F Webb), 601
Research Appointments (Royal Society), 595
Research Association of British Paint, Colour and Varnish Manufacturers Retirement of Dr L A Jordan as founder-director, 852
Research Associations and their Functions, 211, 238
Research Bureau (Building) Establishment of a (New Zealand Master Builders' Federation and the New Zealand Institute of Architects), 235
Research Centre (Regional) of the British Caribbean Soil and Land-Use Surveys, No 1, Parish of St Catherine, Jamaica (K C Vernon) , No 2, The Rupununi Savannas of British Guiana (R F Loxton, G K Rutherford and J Spector) , No 3, St Vincent (J P Watson, J Spector and T A Jones), 27
Research Council of Alberta Thirty-ninth Annual Report (1958), 1370
Research Council, Overseas Establishment of the, B A 14
Research Equipment Exhibit Ninth Annual Instrument Symposium and (United States National Institutes of Health), 26
Research Fellowships (Travelling) Carlsberg–Wellcome (Awards), 683
Research Grants (Australian Atomic Energy Commission), 940
Research Laboratories (New), for the Cambridge Instrument Company, Ltd (Dr M C Marsh), 1364
Research Laboratories (Physics) The Design of—a Symposium of the London and Home Counties Branch of the Institute of Physics (London, 1957), *review* by S Weintroub, 925
Research Laboratory (Regional), Hyderabad Annual Report for 1957-58, 320
Research Reactor *Merlin*, an Industrial (Dr T E Allibone), B A 11
Research Scholarships Junior Postgraduate Agricultural (Agricultural Institute of Ireland Awards), 1612
Research Studentship (Postgraduate) founded by the Phillips Petroleum Co at University College of North Staffordshire, 322
Research Studentship (a second Postgraduate) founded by the United States Rubber Co at University College of North Staffordshire, 322
Research Studentships for postgraduate training in Ecology (Nature Conservancy Awards for 1959), 156
Research Training Scholarship of the Animal Health Trust awarded to W A G Charleston, 771
Researches in Geochemistry (edited by Philip H Abelson), *review* by Dr S R Nockolds, 1757
Reserpine Abolition by Chlorpromazine of the Inhibiting Effect of Iproniazid on the Depletion of Adrenal Catechol Amines induced by (F Camanni, Dr G M Molinatti and M Olivetti), B A 65
  Effects of, on Secretion from the Denervated Adrenal Medulla (L Stjarne and S Schapiro), 2023
Reservoir (Natural), of *Borrelia duttoni* Is the Multimammate Rat a (Dr F Zumpt), 793
Resident British Birds (Educational Productions, Ltd , Filmstrip CX 6208), 1777
Residual Bodies of Seminiferous Tubules of the Rat (B V Kingsley Smith and Dr D Lacy), 249
Resin, 'Dowex-1' Chemical Activities of *E coli* adsorbed on a (Tsutomu Hattori and Choseki Furusaka), 1566
Resin (An Embedding), Miscible with Water for Electron Microscopy (Dr I R Gibbons), 375
Resin and the Isolation of Thrombins Rivanol, (Dr Kent D Miller), 460
Resins Ion Exchange (Robert Kunin), second edition, *review* by D Reichenberg, 1757
Resins, Rubbers Plastics Appointment of Dr Norman G Gaylord as editor, 1108
Resistance of Adult Houseflies to the Insecticide Dieldrin Mechanisms of (F P W Winteringham and A Harrison), 608
Resistance to DDT in the Blue Tick Pyrethrum Resistance conferred by (G B Whitehead) 378
Resistance to Flow in Vascular Beds (Harris S Burry), 453
Resistance of Houseflies to γ-Benzene Hexachloride and Dieldrin (R G Bridges and J T Cox), 1740
Resistance of *Sorghum* to Witchweed (C N Williams), 1511
Resistance (Acquired), to Experimental 'Allergic' Encephalomyelitis Various Types of (G J Svet-Moldavsky, I A Svet-Moldavskaya and L I Raffkina), 1552
Resistance (Haemolytic) Influence of X-Rays on the Activity of Carbonic Anhydrase in Erythrocytes and on their (A Lauwers, J Van Bavinchove and W Dierick), 111
Resistance (Insulin), of Fasted Rats Effect of Whole-body X-Irradiation on the (Dr V Stanković and N Sestan), 1816
Resistance (Pyrethrum), conferred by Resistance to DDT in the Blue Tick (G B Whitehead), 378
Resistance (Restrictive), in Thermal Equilibrium Influence of the Thomson Effect on the θ-φ Relationship for a (Dr W Davies), 975
Resistivity Changes (Electrical), observed in a Semiconducting Diamond after Heat Treatment (R E Mutch and Dr F A Raal), 1857
Resistor (Silicon) Use of the, in the d c Stabilization of Transistor Circuits (J T Zakrzewski and D H Mehrtens), 811
Resistors (*NTC*) Intravascular and Intracardiac Blood Velocity Patterns recorded by means of (Dr W G Zijlstra, J R Brunsting and L B v d Slikke), 991
Resolution of Wide-range Grating Spectrometers (Dr A E Martin) 975
Resolution (High-) Fibre Optics using Sub-Micron Multiple Fibres (Dr N S Kapany), 881
Resolving Time Effects (Polarization and), in Photon Correlation (Dr E Brannen and Prof W Wehlau), 263
Resonance (Electron Paramagnetic), at 4 2°K of γ-Irradiated Polymethyl Methacrylate and Polymethacrylic Acid (Dr Derick W Ovenall), 181
Resonance (Electron Spin) Free Radicals as Studied by (Dr D J E Ingram), *review* by Dr T M Sugden, 1259
  Free Radicals in X-Rayed Seeds of High and Low Water Content, as Measured by (Dr W Klingmuller, Dr G R Lane, M C Saxena and Dr D J E Ingram), 464
Resonance (Electron Spin), and Divalency of some Dithiocarbamates of the Coinage Metals (Cu, Ag, Au), (Tore Vanngard and Stig Åkerstrom), 183

Resonance (Electron Spin) Investigations of *Allium cepa* and *Calliphora vomitoria* (M Edwards, Dr G A Kerkut, K A Munday, Dr D J E Ingram, M C Saxena and K Leach), 1402
Resonance (Proton) Relaxation Times in Mobile Liquids (Dr J G Powles and D Cutler), 1123
Resources (Living), of the Sea (Dr Lionel A Walford), *review* by Dr F S Russell, 129
Resources (Surface-Water) Techniques for Surveying (Prof Ray K Linsley), (World Meteorological Organization, Technical Note No 26), 96, *erratum*, 684
Resources (Water) Effects of Forest Areas on, and the Technique of Lysimetry—Water and Woodlands (Dr L Leyton), 1184 , Lysimeters (F W Green), 1186
  Information on (Report of the Subcommittee of the Central Advisory Water Committee), B A 18
Resources (Water-) and Water-Use Survey (Dr Alice Garnett), 96, *erratum*, 684
Respiration of Rat Oral Tissue Effect of Vitamin D on the (L Zar and Prof J T Irving), 1410
Respiration-deficiency Rate of Appearance of Mutants with, in *Staphylococci* (G F Gause, G V Kochetkova and N A Sorbaeva), 1821
Respiration (Plastron), in the Eggs of *Drosophila* and other Flies (Dr H E Hinton), 280
Respiratory Brewer's Yeast Effect of Oxygen on Endogenous Metabolism of a (V E Chester), 1956
Respiratory Chain in Liver Mitochondria Functional Organization of the (Dr Tokuji Kimura and Dr Thomas P Singer), 791
Respiratory Enzymes Localization and Assay of, in Single Living Cells—Absorbancy Measurements on the *Nebenkern* (Dr Robert P Perry, Dr Bo Thorell, Dr Lennart Åkerman and Prof Britton Chance), 929 , Fluorescence Measurements of Mitochondrial Pyridine Nucleotide in Aerobiosis and Anaerobiosis (Prof Britton Chance and Dr Bo Thorell), 931 , Absorbancy Measurements on Liver and Kidney Cells (Dr Bo Thorell and Prof Britton Chance), 934
Respiratory Grana Cancer and the (Prof Carl C Lindegren), 397
Response of Cholinergically Innervated Sweat Glands to Adrenaline and Noradrenaline (Dr David P C Lloyd), 277
Response to Heat and Moisture Probing Behaviour of *Aedes aegypti* (L) in (L Burgess), 1968
Response of their Litters to Parotid Tumour Virus (Polyoma Virus) Antibody Status of Mice and (Lloyd W Law, Clyde J Dawe, Wallace P Rowe and Janet W Hartley), 1420
Response of *Sequoia sepervirens* (D Don) Endl and *Pseudotsuga menziesii* (Mirb) Franco Seedlings to Temperature (Henry Hellmers and William P Sundahl), 1247
Response of a Single Retinula Cell to Polarized Light (M Kuwabara and K Naka), 455
Response (Avoidance) Effect of a Signal Contingent upon an (Prof J D Keehn and Sanniyah Nakkash), 566
Response (Chemotropic), from Photopositive Domination in a Scolytid Beetle Release by Flight Exercise of a (Prof Kenneth Graham), 283
Response (Dose-) Relationships in Radiation Leukaemia (Dr P Armitage, Dr W M Court Brown and Dr R Doll), 1669 , (Dr D J Mewissen), 1670
Response (Muscular) Effects of Irradiation of Nerve on (A Portela, D Brandes, Prof G H Bourne, Marion Hines, P Stewart and B L Redd iun), 734
Response (Œstrous), by the Ovariectomized Ewe Seasonal Changes in the, to Progesterone and Œstrogen (Prof J I Raeside and M F McDonald), 458
Response (Specific), in the Hippocampus of the Rabbit to Olfactory Stimulation (B G Cragg), 1697
Responses to Localized Distension of the Oesophagus in Decerebrate Sheep (Prof A F Sellers and Dr D A Titchen), 645
Responses (Chromatic) Significance of the Time Relations in Humorally Co-ordinated (Dr A K Kent), 2027
Responses (Growth), to Selenium in Lambs (Dr J W McLean, G G Thomson and J H Claxton), 251
Responses ('On'- and 'Off'-), of the Olfactory Epithelium (Dr S F Takagi and Dr T Shibuya), 60
Responses (Reflex Muscular) Does an Increase in the Tension in a Ligament elicit (Dr Bertil Stener), 1495
Responses (Retinal), of Pink Salmon associated with its Downstream Migration (Dr M A Ali and Prof W S Hoar), 106
Responsibility (Parliamentary), for Science and Technology, 1190
Rest Potentiation of Contractions after, in the Isolated Rat Ventricle Preparation (Dr R L Speirs), 66
Resting and Action Potentials of Reversed Polarity in Frog Nerve Cells (Dr I Tasaki), 1574
Restoration of Cultural Property, International Centre for the Study of the Preservation and Inauguration of the, 504
  Appointment of Dr H J Plenderleith as first director, 504
Restricting Cows to a Clover-free Diet in order to Reduce the Strontium Content of Milk Implications of (Dr David Purves), 1408
Rete Mirabile in the Gas Bladder of *Coregonus lavaretus* (Goran Fahlen), 1001
Retentate, a New Scientific Term (E G Turner and J G Feinberg), 1139
Retention (Mineral Uptake and), in Cotton-Grass (*Eriophorum vaginatum* L), (Gordon T Goodman and Donald F Perkins), 467, *erratum*, 1845
Reticulo-Endothelial System Effect of Sulphonamides on the Phagocytic Activity of the (Prof T Nicol and I Z Sewell), 1241
Retinal Responses of Pink Salmon associated with its Downstream Migration (Dr M A Ali and Prof W S Hoar), 106
Retinine Photochemical Behaviour of (Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures), (Dr Lawrence Jurkowitz), 614
Retinula Cell Response of a Single, to Polarized Light (M Kuwabara and K Naka), 455
Revans, Prof R W Personnel Management and Technological Change (Application of Operational Research to the Understanding of Human Beings), 1615
Reversal by Acetylcholine of the Inhibition by Thyroxine of Oxidative Phosphorylation in Guinea Pig Heart Sarcosomes (Heitor Medina and Metry Bacila), 1066
Reversal of Effects of 2-Substituted Thiadiazoles by Nicotinamide Analogues and Precursors (Dr Irwin H Krakoff, Corrine R Lacon and Dr David A Karnofsky), 1805
Reversal (Form), in Aphids Ants and (Dr Bruce Johnson), 740
Reversals (Possible), of the Earth's Magnetic Field in the Jurassic Period (Dr R W Girdler), 540
Reverse Thermo-Remanent Magnetism Exchange Interaotion as a Cause of (T Nagata and S Uyeda), 890
Reversed Polarity Resting and Action Potentials of, in Frog Nerve Cells (Dr I Tasaki), 1574
Reversion of Nodules formed by the Grain Boundary Reaction in Aluminium–Zinc Alloys (Ryoji Watanabe and Shigeyasu Koda), 977
Reversion of a Tryptophan-requiring Strain of *Escherichia coli* Effect of Purine and Pyrimidine Analogues on (C O Doudney and F L Haas), 114
Reviews of Data on Research and Development No 13, Research and Development and Economic Growth (Dr A T Waterman), (United States National Science Foundation), 591
  No 14, Funds for Research and Development Performance in American Industry (United States National Science Foundation), 1022
  No 15, Grants for Private Philanthropic Foundations during 1957 (United States National Science Foundation), 1272
Revised Classification of the Ludlovian Succession at Ludlow (C H Holland, J D Lawson and V G Walmsley), 1037
Revised Equilibrium Diagram for the System Al_2l_3-SiO_2 (Shiger Aramaki and Prof Rustum Roy), 631
Revision (Taxonomic), of the Spotted Skunks of the Genus *Spilogale* (R G Van Gelder), 1024
Revolution (Darwinian) Darwin and the (Dr Gertrude Himmelfarb), *review* by Sir Gavin de Beer, 385
Revolution (Scientific) The Two Cultures and the (Sir Charles Snow), 295
  The Two Cultures and the (Dr W L Sumner), 411
Reyniers, James A (and 30 other authors) Germfree Vertebrates—Present Status, 1541
Reynolds, G A , and others (C F H Allen, in collaboration with) Six-Membered Heterocyclic Nitrogen Compounds with Three Condensed Rings, *review* by Dr F G Mann, 216
Reynolds Number (Very High) A Spectrum of Turbulence at (H L Grant, A Moilliet and Prof R W Stewart), 808
L-Rhamnulose to L-Fuculose Enzymic Conversion of, in *Escherichia coli* (Laura Frontali and Giorgio Tecce), 1315
Rheological Study (Solid State), of the Mechanism of Paraffin-Detergent Interactions in Aqueous Systems (F J Radd and L H Crowder), 443
Rheology, British Society of Election of Officers for 1959-60, 943
  Meeting in Manchester, 1535
Rheology, British Society of, and the Colloid and Biophysics sub-Committee of the Faraday Society Discussion on Flow Properties of Blood and other Biological Systems, 322, 1539
Rhinoceros The Great Indian (E P Gee), 1986
Rhipicephalus appendiculatus Neumann New Cell Types in the Salivary Glands of the Brown Ear Tick (Dr W M Till), 1078
Rhizobium Gums Occurrence of 4-O-Methyl Glucuronic Acid in (Beverley A Humphrey), 1802
Rhizobium Polysaccharide Effect of, on the Formation of Polygalacturonase in Lucerne and Clover (H Ljunggren and G Fahraeus), 1578
Rhizome of Bracken Effects of Substituted Phenoxy-Compounds and other Translocated Herbicides on the (Dr Elsie Conway and J A Forrest), 1416
Rhodanine Derivatives Mothicidal (Frederick J Allan, G Graham Allan and Claud M'F M'Neil), 1637
Rhoderick, Dr E H Promoted to Senior Principal Scientific Officer in the Scientific Civil Service, 858 , work of, 858
Rhodes, E Thermodynamics (Phase Changes in Condensed Systems), 1609
Rhodesia (Southern) *Haematopota insidiatrix* Austen (Diptera, Tabanidae) in (Dr Robert Barrass), 739
Rhodesia and Nyasaland Occurrence of Presumed Glossopteridean Fructifications in (Dr William S Lacey), 1592
Rhys, D W Electron Bombardment Floating-zone Melting and Allied Electron Bombardment Techniques (Electron Bombardment Floating-zone Melting of Platinum, Ruthenium, Rhodium and Iridium), 691
Rhythm (Internal), of Reproduction in a Trans-Equatorial Migrant (the Short-tailed Shearwater *Puffinus tenuirostris*) Experimental Demonstration of an (Dr A J Marshall and Dr D L Serventy), 1704
Rhythm (Internal Reproductive), in a Xerophilous Equatorial Bird, *Quelea quelea* Duration of the Regeneration Period of the (H J de S Disney, B Lofts and Dr A J Marshall), 1659
Rhythm (Seasonal), in the Presentation of Bone Sarcoma in Man (Dr C H G Price), B A 76
Rhythms (Endogenous), of Body Temperature in Hibernating Bats (Prof Michael Menaker), 1251
Ribe, F L Ionization Phenomena in Gases (Recent Work on *Scylla* and on a Rotating Plasma Containment Device called *Ixion*), 1355
Ribonuclease Action of, on Nerve Axoplasm as Demonstrated by Silver Staining (R K Winkelmann and Robert W Schmit), 553
Ribonucleases of Mouse Tissues and of the Ehrlich Ascites Tumour (K A O Ellem, J S Colter and Jeanne Kuhn), 984
Ribonucleic Acid Chromosomal Synthesis of as shown by Incorporation of Uridine labelled with Tritium (G Pelling), 655
  Inactivation of some Animal Viruses by Hydroxylamine and the Structure of (Dr Richard M Franklin and Dr Eberhard Wecker), 343
Ribonucleic Acid in Solution Secondary Structure of (Dr R A Cox and Dr U Z Littauer), 818
Ribonucleic Acid Biosynthesis Kinetics of Virus Protein and (Replication of Tobacco Mosaic Virus), (Prof Barry Commoner, Dr James A Lippincott and Dr Janey Symington), 1992
Ribonucleic Acid Synthesis in *Staphylococcus aureus* Selective Inhibition of, by Vancomycin (Prof D C Jordan and W E Inniss), 1894
Ribonucleic Acid (Bacterial) Massive Incorporation of 5-Fluorouracil into a (Dr Jack Horowitz and Prof Erwin Chargaff), 1213
Ribonucleic Acid (Infectious), from Mouse Brains infected with Tick-borne Encephalitis Virus (F Sokol, H Libikova and J Zemla), 1581
'Ribonucleic Acid' (Infective) Failure to Recover, from Myxovirus Preparations (G L Ada, Patricia E Lind, Lois Larkin and Sir Macfarlane Burnet), 360

Ribonucleic Acid (Infective), in Pig Kidney Tissue Culture Monolayers Effect of Proflavine on the Formation of the Virus of Foot-and-Mouth Disease and its (F Brown and Doreen L Stewart), B A 74
Ribonucleic Acid (Polio Virus) Infectivity of, for Embryonated Eggs and Unsusceptible Cell Lines (P de Somer, Dr A Prinzie and E Schonne), 652
Ribo-Nucleic Acids (Deoxyribo- or) Comparative Effects of Heat on Chromatography and Ultra-Violet Absorption of (Dr Saul Kit) 36
Ribonucleic Acids (High Molecular Weight), from the Nuclei of Calf Thymus (Dr Ping-yao Cheng), 190
Ribonucleoprotein (Chromium), from Bovine Liver (Dr W E C Wacker and Dr B L Vallee), 1399
Rice, Edward G , and others Effect of Ethylenediamine Tetra-acetate on Vitamin B_{12} Absorption in the Rat, 1948
Rice, Dr Mary E (Shelton, Dr Emma, and) Relation of Invasive Capacity to Passage of Lymphocytic Cells through Cellulose Membrane Filters, 479
Rice's Blue Material Some Experiments on (J W Clarke and G McTurk), 2014
Rice Chemical Nature of a Plant-Virus Inhibitor from (W A Jones, M Jacobson and R P Kahn), 1146
Rice Plant Fixation of Nitrogen by the (S P Chakraborty and S P Sen Gupta), 2033
Rice Plants Quantitative Changes in γ-Aminobutyric Acid induced by Low Temperature in (F Zsoldos), 280
Ricerche Nucleari, Comitato Nazionale per le, and others Symposium on the Biological Effects of Low Doses of Ionizing Radiations, 1111
Rich, Prof Alexander, and others Statement on Biological and Chemical Warfare, 1018
Richardson, Prof E G Fluctuation Phenomena and Stochastic Processes (Propagation of Sound Waves in a Fluid having Random Variations in either Density or Momentum), 512
  International Congress on Acoustics, 1031
  Music and Electronic Computers, *review*, 1754
  Acoustique Musicale *review*, 1902
Richmond, James H , and others (C F H Allen, in collaboration with) Six-Membered Heterocyclic Nitrogen Compounds with Three Condensed Rings, *review* by Dr F G Mann, 216
Richmond, P T , and others Extended Dormancy of Deciduous Woody Plants treated in Autumn with Gibberellic Acid, 69
Richmond, Virginia, and Hartley, Brian S A Two-Dimensional System for the Separation of Amino-Acids and Peptides on Paper, 1869
Richter, Derek (edited by) Schizophrenia—Somatic Aspects, *review* by Prof Martin Roth, 487
Ridd, J H (de la Mare, Dr P B D , and) Aromatic Substitution—Nitration and Halogenation, *review* by Prof M J S Dewar, 925
Riddell, Dr R W , and others Human Precipitins against Common Pathogenic and Non-Pathogenic Fungi, 1328
Riddell Memorial Lecture (Sir Russell Brain), *review* by F I G Rawlins, 218
Ridge, M J Effect of Temperature on the Rate of Setting of Gypsum Plaster, 47
Ridge (Ectodermal) Limb Development in the Absence of (Dr Eugene Bell, Dr John W Saunders, jun , and Dr Edgar Zwilling) 1736
Rieder W , and Schneider, H Ionization Phenomena in Gases (Re-ignition of a c Arcs), 1355
Rigid-Body and Internal Vibrations of Organic Molecules An X-Ray Study of (Dame Kathleen Lonsdale and Dr H Judith Milledge), 1545
Rigid Medium Photolysis of Thionine in—Measurement by Spectrofluorimetry (Dr C A Parker and W T Rees), 1223
Rijnders, Dr G W A Gas Chromatography (Practical Aspects of the Measurement of Retention Volumes), 1199

Robinson, Dr J T A Bone Implement from Sterkfontein, 583
Robinson, K R Khami Ruins—Report on Excavations undertaken for the Commission for the Preservation of Natural and Historical Monuments and Relics, Southern Rhodesia, 1947-1955, *review* by R R Inskeep, 1349
Robinson Sir Robert *Obituary* of Sir Ian Heilbron, 768
Robinson Prof R A Appointed to the chair of chemistry in the University of Malaya in Kuala Lumpur, 306 , work of, 306, 405
Robinson, Trevor Polyethylene Absorption Cells for Infra-Red Spectrophotometry, 448
Robson, A E Ionization Phenomena in Gases (Experiments on the Amperian and Retrograde Motion of Arcs in a Magnetic Field inclined to the Plane of the Cathode), 1355
Roček, Dr J Oxidation of Organic Compounds (Oxidation of *n*-Paraffins), 326
Rochester Conference on Semiconductors, *review* by Dr J R Tillman, 1674
Rock Pressure in Mines (E de St Q Isaacson), *review* by J K L Graham, 1349
Rockborn, Prof Gunnar An Attenuated Strain of Canine Distemper Virus in Tissue Culture, 822
Rockefeller Foundation Retirement of Dr Warren Weaver as vice-president for the natural and medical sciences, 23
  Grant of 30,000 dollars for special equipment for the new Division of Tropical Pastures of the Australian Commonwealth Scientific and Industrial Research Organization, 93
  Grant of 100,000 dollars for the Divisions of Plant Industry and of Entomology of the C S I R O , 93
  Grant of 250 000 dollars towards the cost of the radio telescope for the C S I R O Division of Radiophysics, 93
Rockefeller Institute Honorary degree of D Sc conferred on Dr Peyton Rous and on Dr Herbert S Gasser, 26
  Appointment of Dr J S Gillespie as the first Sophie Fricke Royal Society Research Fellow, 595
Rockefeller Institute (Medical Electronics Center) Bibliography on Medical Electronics, 1026
Rocket The Second Russian Space, 406
  The Third Russian Space (Earth Satellite 1959θ) 852
Rocket *Lunik II* (Russian Moon) Observations of the (Dr J G Davies and Prof A C B Lovell), 501 , (Patrick Moore), 502 , (Dr H Percy Wilkins), 502
Rocket Propulsion (British Association for the Advancement of Science, Section B (Chemistry), Discussion on), 1264
Rocket Studies of Emissions caused by Solar Flares (United States National Science Foundation Grant), 406
Rockets Jets and (A Barker, T R F Nonweiler and R Smelt), *review* by D G King-Hele, 1346
Rockets and Satellites Manual on (edited by L V Berkner, in association with Gilman Reid, John Hanessian, Jr , and Leonard Cormier), *review*, 213
Rocks (Cenozoic Volcanic), in New Zealand Palaeomagnetic Studies of (Dr D S Coombs and Dr T Hatherton), 883
Rocks (Lewisian), from North-West Scotland Rubidium-Strontium Ages of (Dr Bruno J Giletti) 1793

Rodd, Dr E H (edited by) Chemistry of Carbon Compounds, Vol 4, Part B, Heterocyclic Compounds, *review* by Dr F G Mann, 1758
Rodda, Dr Harold J *Obituary* of Dr W A Hargreaves, 92
Rodeheaver, J L, and others Mechanism of Immunological Unresponsiveness, 873
Rodger, Alec Ten Years of Ergonomics, B A 20
Roe, Anne, and Simpson, George Gaylord (edited by) Behavior and Evolution, *review* by Dr W H Thorpe, 1762
Roe, Dr E M F Growth Inhibition of Mouse Ascites Tumour Cells by Powdered Tragacanth (Tragacanthae Pulvis, B P), 1891
Roff, W J Awarded a Nature Conservancy Research Studentship for postgraduate training in ecology (botany), 156
Rogers, Dr A W Autoradiography of Tritium-labelled Compounds on Paper Chromatograms, 721
Rogers, F E Modern Network Theory in Electrical Engineering (Place and Teaching of Electrical Network Theory in Universities and Technical Colleges), 1692
Rogers, G E Structure and Chemistry of Proteins (Structural Organization of Keratin), 1276
Rogers, Dr H J Flow Properties of Biological Systems (Hyaluronidase and Hyaluronic Acid), 1540
Rogers, Dr H J, and Perkins, H R Cell-Wall Mucopeptides of *Staphylococcus aureus* and *Micrococcus lysodeikticus*, 520
Rogers, Dr N A J Appointed lecturer in chemistry at the University of Birmingham, 1026, 1362
Rogulski, Jerzy (Angielski, Stefan, and) Significance of Lactose in the Diet in Aminoaciduria caused by Maleic Acid, 276
Role of the Anion in Magnesium Uptake from Foliar Applications of its Salts on Apple (M Allen), 995
Role of Cholesterol in House Fly Reproduction (Ronald E Monroe), 1513
Role of the Co-enzyme in the Stabilization of Glyceraldehyde-3-phosphate Dehydrogenase (P Elodi and G Szabolcsi), 56
Role of a Dagger Nematode (*Xiphinema* sp) in Outbreaks of Plant Diseases caused by Arabis Mosaic Virus (Dr B D Harrison and Dr C H Cadman), 1624
Role of the Glycolytic Enzyme System in the Germination of Spores of *Bacillus coagulans* var *thermoacidurans* (Prof Mikio Amaha and Tomoko Nakahara), 1255
Role of Magnesium in the Insulin-Sensitivity of the Rat Diaphragm *in vitro* (Dr Gangagobinda Bhattacharya), 1401
Role of the Scholar in Society (Dr Henry Allen Moe), 7
Role of Stroma in Haemoglobin Synthesis—Experiments on Duck Red Cells *in vitro* (A Breccia, A L Fantola, E Lazzarini and A Giustina) 1878
Role (Possible), of Glycerol in the Winter-Hardiness of Insects (P Dubach, D Pratt, Prof F Smith and C M Stewart), 288
Role (Possible), of Higher Proprioceptive Centres in the Perception of Visual Space and in the Control of Motor Behaviour (Dr B Gurevitch), 1219
Role (Possible), of Indoleacetic Acid Oxidase in Crown Gall Tumour Induction (Dr Jacques Lipetz), 1076
Rollason, Prof E C The Electric Arc in Welding, 1030
Rolle, Gloria K and others Inhibition of Skeletal Formation in the Chick Embryo following Administration of Tetracycline, 728
Roller Tube Tissue Cultures Use of Transparent Cellular Film for (John A Sharp), 1508
Rolling Fibre Surface Replication by (J Mølgaard), 264, 1478 , (H J Woods), 1478
Rollinson, D H L, and Lomax, G D Paper Electrophoresis of Hippopotamus Haemoglobin, 1653
Rook, Dr J A F, and Wood, Marian Potassium and Lactose in Milk in relation to the Physiology of Milk Secretion, 647
Rooksby, H P Clay Minerals (Work on Iron and Aluminium Oxides), 780
Room Temperature Paper Chromatography of Corticosteroids at (J Tuzson), 1937
Roonwal, Dr M L, and Chhotani, O B New Neotropical Element (*Anoplotermes*) in Indian Termite Fauna, 1967
Roosen J, and others Association of Radio Outbursts with Solar Flares, 805
Root of *Marsdenia erecta* R Br Sugars of the Glycoside of the Root of (Dr T Baytop, Dr M Tanker, Dr N Oner and Dr S Tekman), 1319
Root Apices Reorganization of, after Irradiation (F A L Clowes), 1025
Root Hairs Cell-Wall Formation in (A B Wardrop), 996
Root Knot Nematode (Southern) A Virus Disease of *Meloidogyne incognita incognita*, the (J R Loewenberg, T Sullivan and M L Schsuter), 1896
Rooting Space Pathogenic Factors in the, and the Development of Even-Aged Plantations (W R Day), B A 46
Roots (Excised Tomato) Nitrate Reduction by Aqueous Extracts of (C S Vaidyanathan and Prof H E Street), 531
  A Non-Dialysable Inhibitor of Glutamo-Transferase present in (C S Vaidyanathan and Prof H E Street), 347
Roots (Onion) Nuclear Deoxyribonucleic Acid Content and Endopolyploidy in the Meristem of (D Srinivasachar), B A 80
Roper, Dr J A Cytoplasmic Inheritance (Acriflavine-induced Cytoplasmic Variants of *Aspergillus*), 1012
  Appointed to the new chair of genetics in the University of Sheffield, 1189 , work of, 1189
Rosa arvensis Huds Induction of Parthenocarpy in, with Gibberellic Acid (M V Prosser and G A D Jackson), 108
Rosbaud, Dr P Distribution of Scientific Publications in Under-developed Countries, B A 23
Rose, Dr H E, and Sullivan, R M E Rapid Estimation of the Specific Surface of a Powder, 46
Rose Bengal Labelling of, with Iodine-131 by Radioactive Exchange (J Liebster and O Andrysek), 913
Rose Bengal Labelled with Iodine-131 Paper Chromatographic Separation of Components of (Fausto W Lima and Rômulo R Pieroni), 1065
Rose Hips The Organic Acids in (Dr G A D Jackson and S E Y Barakat), 1953
  Presence in, of Substances Inhibiting the Oxidation of Ascorbic Acid (Dr G A D Jackson and R B Wood), 902
Rosebury, Prof Theodor, and others Statement on Biological and Chemical Warfare, 1018
Rosen, Hyman, and others Chromatographic Fractionation of Rat Tail Tendon Collagen, 1640
Rosen, Dr L Nuclear Forces and the Few-Nucleon Problem (Binding Energies and Elastic Scattering of Light Nuclei at Low Energies), 1114
Rosenbloom, Paul C (Forsythe, George E, and) Numerical Analysis and Partial Differential Equations, *review* by Prof T A A Broadbent, 576
Rosenbluth, M N, and Rostoker, N Ionization Phenomena in Gases (Theoretical Approach to Transport Phenomena), 1356
Rosengren, Elsa (Kahlson, Prof G, and) Prevention of Foetal Development by Enzyme Inhibition, 1238
Rosensweig, N S, and others Growth Patterns in *Neurospora*—A Biological Clock in *Neurospora*, 169
Ross, D B Awarded a Vitamealo Fellowship by the Animal Health Trust, 771
Ross, Dr D M The Sea Anemone (*Calliactis parssitica*) and the Hermit Crab (*Eupagurus bernhardus*), 1161
Ross, Dr I G, and Wells, E J At the Second Australian Spectroscopy Conference (Studies on the Tetrahedral Molecules OsO_4 and RuO_4), 1195
Ross, Dr I G (Freeman, D E, and) At the Second Australian Spectroscopy Conference (Results of a Normal Co-ordinate Analysis of the 33 Planar Vibrations of Naphthalene), 1196
Ross, Dr I G (Hunt, Dr G R, and) At the Second Australian Spectroscopy Conference (Spectra of Aromatic Hydrocarbons—Vibrational Analysis of the 7000 A and 3500 A Absorption Systems of Azulene), 1195
Ross, Dr W C J (the late Sir John Simonsen and) The Terpenes, Vol 5, The Triterpenes and their Derivatives, *review* by Prof A J Birch, 302
Ross Sea An Oceanographic Survey of the (J S Bullivant), 422
Rosse, Lord Museums and Finance, 598
Rossini, Prof F D Thermodynamics (Experimental Thermochemistry), 1608 , (Physical Constants), 1608
Rostoker, N (Rosenbluth, M N, and) Ionization Phenomena in Gases (Theoretical Approach to Transport Phenomena), 1356
Rotating-Sector Method (A Modified), of Measuring Kinetic Chain Lifetimes (Dr W I Bengough, S A McIntosh and R A M Thomson), 266
Rotation of Newfoundland Palaeomagnetism and (Dr P M Du Bois), B A 63
Rotational Friction Coefficients of Models of Tobacco Mosaic Virus and the Size of the Virus Particle (Dr A J Haltner and Dr B H Zimm), 265
Rotatory Power (Optical), of Collagen (Dr R E Burge and R D Hynes), 1562
Rotblat, Prof Joseph, and others Statement on Biological and Chemical Warfare, 1018
Roth, Prof Martin Schizophrenia, *review*, 487
Rothamsted Experimental Station Report for 1958, 781
Rothstein, E L, and others Effects of Deuterium Oxide on the Synthesis of *T5* and *T7* Bacteriophages, 1167
Rothwell, Pamela, and McIlwain, Carl Satellite Observations of Solar Cosmic Rays, 138
Roucek, Joseph S (edited by) The Challenge of Science Education, *review* by Dr W L Sumner, 923
Roucek, Joseph S (edited by Howard Boone Jacobson and) Automation and Society, *review* by R Brightman, 1438
Rough, Frank A, and Bauer, Arthur A Constitutional Diagrams of Uranium and Thorium Alloys, *review* by Dr D E R Hughes, 925
Roughage Experimental Production of Magnesium Deficiency in Lambs on a Diet of (Dr D M McAleese and Dr R M Forbes), 2025
Roughton, F J W Fast Chemical Reactions in Solution (Fast-Reaction Methods, with particular reference to the Reactions of Haemoglobin), 1453
Round, M C (Froyd, G, and) Infection of Cattle with *Cysticercus bovis* by the Injection of Onchospheres, 1510
Rous, Dr Peyton Honorary degree of D Sc of the Rockefeller Institute conferred on, 26
Rous I Sarcoma Metastases Inhibition of, by a Copper-Catalyst Blocking Agent (Dr B M Jones), 1963
Rouse, W, and others Fusion Frequency and Light Quantity, 1873
Routine Fractionation The Behaviour of Haptoglobin during (Marion Steinbach and L Pejaudier), 362
Routine Methods for Determining Quality in Merino Wool (P L le Roux), 917
Rowatt, E (edited by S T Cowan and) The Strategy of Chemotherapy—Eighth Symposium of the Society for General Microbiology, 1958, *review* by Prof H Berry, 133
Rowe, J A (De Witt, Dr C W, and) *N*,O-Diacetylneuraminic Acid and *N*-Acetylneuraminic Acid in *Escherichia coli*, 381
Rowe, Wallace P, and others Antibody Status of Mice and Response of their Litters to Parotid Tumour Virus (Polyoma Virus), 1420

Rowley, Prof D (Jenkin, Dr C R, and) Opsonins as Determinants of Survival in Intraperitoneal Infections of Mice, 474
Rowlinson, Dr J S Thermodynamics (Phase Changes in Condensed Systems), 1609
  Liquids and Liquid Mixtures, *review* by Prof H S Longuet-Higgins, 1901
Rowlinson, Dr J S, and others Developments in Thermodynamics, 1606
Rowson, L E A (Moore, N W, and) Maintenance of Pregnancy in Ovariectomized Ewes by means of Progesterone, 1410
Roy, Dr J K, and others 8-Hydroxyquinaldic Acid the Red Fluorescent Substance in the Urine of Pyridoxine-deficient Rats, 1573
Roy, Prof Rustum (Aramaki, Shiger, and) Revised Equilibrium Diagram for the System Al_2O_3-SiO_2, 631
Royal Aeronautical Society Formation of an Agricultural Aviation Group, 25
  Discussion on the Structural Effects of Kinetic Heating, 30
  Prize of £5,000 offered by Henry Kremer for the first successful flight of a Man-powered Aircraft, 1534
Royal Agricultural Society of England Medal for research work of benefit to Agriculture, 1450
Royal Aircraft Establishment Appointment of Prof M J Lighthill as director, 151
  Promotion of P A Hufton to Chief Scientific Officer and appointment as head of the Aerodynamics Department, 233
Royal Astronomical Society *Geophysical Journal*, Vol 2, No 1, 504
Royal Australian Chemical Institute Election of C E C Nicholls as president, 1106

Royal Botanic Gardens, Kew (Dr W B Turrill), *review* by Dr Richard A Howard, 1345
Royal Cancer Hospital, London Extension to the Chester Beatty Research Institute, B A 15
Royal College of Science and Technology, Glasgow Retirement of Sir David Anderson as director, 151
  Appointment of Dr S C Curran as director, 152
  Retirement of Prof F S Spring from the chair of chemistry, 233
  Appointment of Dr P L Pauson to the chair of chemistry, 233
Royal Commission for the Exhibition of 1851 Awards of Studentships and Scholarships, 409
Royal Electrical and Mechanical Engineers (adapted to British and Commonwealth Usage by a special Electronics Training Investigation Team of the) Basic Electricity—a Course of Training developed for the United States Navy by Van Valkenburgh, Nooger and Neville, Inc, *review* by G R Noakes, 133
Royal Institute of Chemistry Meldola Medal for 1960, 1192
  Index of Chemistry Films, *review*, 1902
  Monographs for Teachers, No 1, Principles of Electrolysis (Prof C W Davies), *review* by Dr V Gold, 1902, No 2, Principles of Oxidation and Reduction (Dr A G Sharpe), *review* by Dr V Gold, 1902
Royal Institution Christmas Lectures (Dr T E Allibone), 1613
Royal Medals for 1959 of the Royal Society awarded to Prof R E Peierls and Prof P B Medawar, 1360, 1833
Royal Meteorological Society Election of Officers for 1959-60, 1108
Royal Photographic Society (Scientific and Technical Group) Symposium on Photography in the International Geophysical Year, 1032
Royal Society of Edinburgh To microfilm the David Hume manuscripts, 95
  Election of Officers for 1959-60, 1192
Royal Society of London Appointment of Sir Lawrence Bragg as Rutherford Memorial Lecturer for 1960, 26
  Appointment of D J Tritton as Rutherford Scholar for 1959, 26
  Awards by the Paul Instrument Fund Committee, 507
  Appointment of Dr J S Gillespie as the first Sophie Fricke Royal Society Research Fellow in the Rockefeller Institute, 595
  Locke Research Fellowship awarded to Dr B G Cragg, 595
  Stothert Research Fellowships awarded to W D Butt, R A Webster and to J A Hunt, 595
  Some International Geophysical Year Achievements, 604
  Appointment of Dr Ainsley Iggo to a Locke Research Fellowship, 772
  Copley Medal awarded to Sir Macfarlane Burnet, 1189, 1833
  Davy Medal awarded to Prof R B Woodward, 1189, 1834
  Hughes Medal awarded to Dr A B Pippard, 1189, 1834
  Royal Medals awarded to Prof R E Peierls and Prof P B Medawar, 1360, 1833
  Election of Officers, 1610
  Notes and Records, Vol 14, No 1, Darwin Centenary Issue, 1776
  Anniversary Address, The Internal and the External Worlds (Sir Cyril Hinshelwood), 1834
Royal Society of New Zealand T K Sidey (Summertime) Award awarded to Dr J H Piddinggon, B A 16
Royal Society of South Africa (Cape Council of the South African Association for the Advancement of Science and the) Second Science Exhibition, 952
Royal Society of South Australia Verco Medal awarded to Dr C G Stephens, 1611
Royal Society of Victoria Symposium on the Evolution of Living Species, 156
Royal Statistical Society Election of Sir Hugh Beaver as president, 26
Roycroft, J D Appointed to a research fellowship in solid state physics in the University of Glasgow, 1815
Ruanda-Urundi Carte del Sols et de la Vegetation du Congo Belge et du—6, Yangambi, Planchette 3, Lilanda, A, Sols, B, Vegetation (Notice explicative par P Gilson, P Jongen, A Van Wambeke et L Liben), (Institut National pour l'Étude Agronomique du Congo Belge), 27
Rubalcava, Dr H E (Carroll, Dr P K, and) Near Infra-Red System of Nitrogen, 119
Rubber Estimation of Chain Fracture and Cross-Linking of, by High-Energy Radiation (P Hayden), 1865
Rubber Industry, Institute of the Conference on Industrial Technical Organization, 322
  Annual Report on the Progress of Rubber Technology (edited by Dr T J Drakeley), 854
Rubber Manufacturers (British), Research Association of Publication of a translation of the Soviet journal *Kauchuk i Rezina* under the title *Soviet Rubber Technology*, 505
Rubber Research, 854
Rubber Technology Annual Report on the Progress of (edited by Dr T J Drakeley), (Institution of the Rubber Industry), 854
Rubber Technology, Soviet Title of an English translation of *Kauchuk i Rezina*, to be published by the Research Association of British Rubber Manufacturers, 505
Rubi of Great Britain and Ireland Handbook of the (the late W C R Watson), *review* by R D Meikle, 489
Rubidium-Strontium Ages of Lewisian Rocks from North-West Scotland (Dr Bruno J Giletti), 1793
Rubin, Dr B A Tolerance to Skin Homografts of Adult Mice after Parabiosis, 205
Rubin, M L, and others Growth Patterns in *Neurospora*—A Biological Block in *Neurospora*, 169
Rudall, K M (Parker, K D, and) Biological Fibres, B A 26
Ruddlesden, Dr S N Special Ceramics (Dependence of Macroscopic Properties on Crystal Structure), 1115
Ruddock, R, and Wilson, Dr A After Work—Leisure and Learning in Two Towns, 1034
Rudebeck, Gustaf, and others (edited by) South African Animal Life—Results of the Lund University Expedition in 1950-1951, Vol 5, *review*, 133
Rudnick, Dorothea (edited by) Cytodifferentiation (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
  Embryonic Nutrition (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Ruins Khami—Report on Excavations undertaken for the Commission for the Preservation of Natural and Historical Monuments and Relics, Southern Rhodesia, 1947-1955 (K R Robinson), *review* by R R Inskeep, 1349
Rumen Metabolism in the (E F Annison and D Lewis), *review* by Dr D P Cuthbertson, 839
Rumen (Actively Fermenting), of Sheep Relationship between *p*H and Volatile Fatty Acid and Diversion of Saliva from the (W R McManus), 1572
Rumen Contents The Anterior Pituitary-like Activity of (Dr F A Soliman), 1723
Rumen Protozoa Hydrogenation of Lipids by (Dr D E Wright), 875
  Isolation of 2-Aminoethane Phosphonic Acid from (Masaaki Horiguchi and Makoto Kandatsu), 901
Ruminants and Non-Ruminants Trans-Unsaturated Acids in the Depot Fats of (L Hartman and Dr F B Shorland), 2024
Rumination, *review* by Dr D P Cuthbertson, 839
Runners in the Strawberry Effect of Gibberellic Acid on the Initiation of Flowers and (P A Thompson and C G Guttridge) B A 72
Rural England, Council for the Preservation of (Sheffield and Peak District Branch) Twenty-eighth Annual Report (1959), 408
Rural Life (English), Museum of Report for 1958, 505
Rushbridge, M G Thermonuclear Research, 1015
Russell, Bertrand—Philosopher, *review* by Prof R B Braithwaite, 749
Russell, Bertrand My Philosophical Development, *review* by Prof R B Braithwaite, 749
  Wisdom of the West (edited by Paul Foulkes), *review* by Gerd Buchdahl, 1829
Russell, Dr F S The Need for Marine Research, *review*, 129
  A Viviparous Deep-Sea Jellyfish, 1527
Russell, Sir John Election as a member of the Polish Academy of Sciences, 95
Russell, L B Biological Effects of Low Doses of Ionizing Radiations (Chronic Irradiation less effective than an Acute Dose in bringing about Still-births and Neonatal Deaths), 113
Russell, Dr R L Appointed to the chair of electrical engineering in King's College, Newcastle-upon-Tyne 404, work of, 404
Russell, Dr R Scott Availability of Plant Nutrients (Nutrient Absorption by Roots), 160
Russell, Wm C Appointed to a research fellowship in virology (first Lock fellowship) in the University of Galsgow, 1915
Russell, W L Biological Effects of Low Doses of Ionizing Radiations (Genetic Effects of Ionizing Radiation on Mice), 1113
Russell, Dr W M S, and Burch, R L The Principles of Humane Experimental Technique, *review* by Prof M Weatherall, 1675
Russian Journal of Inorganic Chemistry (A translation of the Russian *Zhurnal Neorganicheskoi Khimii*, published by the Chemical Society,) 319
Russian Moon Rocket *Lunik II* Observations of the (Dr J G Davies and Prof A C B Lovell), 501, (Patrick Moore), 502, (Dr H Percy Wilkins), 502
Russian Space Rocket The Second, 406
  The Third (Earth Satellite 1959 θ), 852
Russian View of Space Flight *review* by D G King-Hele, 836
Rust (Wheat Stem), Race 15*B* Biosynthesis of some Amino-Acids from Sucrose by Germinating Uredospores of (B Kasting, A J McGinnis and W C Broadfoot), 1943
Ruston, G (Parker, W G, and) Chemistry of Propellants (Merits of Utilizing High-Energy Propellants), 778
Rutgers, Prof A J Ratio of Nucleon Mass and Electron Mass, 894

Scientific Staff in New Zealand, 854
Scientific Term (New) Retentate, a (E G Turner and J G Feinberg), 1139
Scientific Unions, International Council of *I C S U Review*, No 1, 319, No 2, 408
  Yearbook 1959, 408
  Financial Statement for November 1957 to December 1958, 939
Scientific Unions, International Council of (International Atomic Energy Agency and the) Symposium on Radioactivation Analysis, 951
Scientific Unions Review, International Council of, No 1, 319, No 2, 408
Scientific and Engineering Man-power in Great Britain, 1959 (Report of the Committee on Scientific Man-power of the Advisory Council on Scientific Policy), 1982
Scientific and Industrial Research, Council for Second Report (1958), 780
  Appointment of Prof C F Carter as a member, 1362
Scientific and Industrial Research, Department of Building Research Station, National Building Studies Special Report No 28, Incentives in the Building Industry (Alison Entwistle and W J Reiners), 98
  Open Days at the Water Pollution Research Laboratory, B A 17
  Warren Spring Laboratory, Stevenage, 146
  Research for Industry 1958, a Report on Work done by the Industrial Research Associations in the Government Scheme, 211, 238
  To resume publication of *Technical Digests*, 410
  Productivity Measurement in Great Britain (T E Easterfield), 592
  Radio Research Board, Special Report No 27, The Calculation of the Median Sky Wave Field Strength in Tropical Regions (W R Piggott), 605
  Lending Library Unit list of Current Periodicals received from China, 681
  Open Days at the National Physical Laboratory, 773
  New Ship Hydrodynamics Laboratory of the National Physical Laboratory, 926
  Grants to the University of Oxford—£1,000 for research on some natural products with biological activity , £1,500 for research into perceptual limitations in high-speed performance , £22,860 for an investigation of the geological age of rock series by methods based on natural radioactivity , £1,220 for equipment for research on the biochemical mechanism of cell division , £22,725 for an investigation of materials, using magnetic resonance and double resonance techniques , and £17,610 for an investigation of nuclear orientation and nuclear cooling in magnetic fields, 943, 1273
  Grant of £6,000 a year for five years to the National Institute of Industrial Psychology, 940
  Report of the National Physical Laboratory for 1958, 954
  Report of the Building Research Board with the Report of the Director of Building Research, 1023
  Radio Research Board, Special Report, No 28, Conversion of Ionospheric Virtual Height-Frequency Curves to Electron Density-Height Profiles (Dr J O Thomas and M D Vickers), 1024
  Grants to the University of Leeds—£1,835 towards the cost of cosmic-ray research, in the Department of Physics, £12,000 for an investigation into high-pressure chemistry and geochemistry , £3,000 for research by Dr P Gray in physical chemistry , and £1,050 for research in high alumina cements, 1108
  Crushing and Grinding, a Bibliography, *review* by Prof S G Ward, 1177
  Grant of £6,000 to the Department of Chemistry in the University of Hull, towards the purchase of a mass spectrometer, 1273
  Grant of £3,400 to the University of Oxford, for the maintenance of the 140 MeV synchrotron for nuclear physics research, 1362
  Grant of £35,900 to the University of Oxford, for research on high-energy phenomena using photographic plates, 1535
  Water Pollution Research 1958—the Report of the Water Pollution Research Board with the Report of the Director of the Water Pollution Research Laboratory, 1542
  Retirement of Dr D D Pratt from the directorship of the National Chemical Laboratory, 1610
  Appointment of Prof J S Anderson as director of the National Chemical Laboratory, 1610
  Grants to the University of Bristol—£16,680 to the Department of Physics, for research in cosmic radiation with balloons, photon-induced cascades at different altitudes, and time variations in the primary cosmic radiation over Great Britain , £35,084 to the Department of Psychology, for research into the complexity of industrial tasks , to the Department of Geology, £5,000 for investigations of feldspars in the Connemara granite series and preferred orientation in rock-forming minerals, and £3,550 for investigations of the submarine geology of the continental shelf of the Western Approaches of the English Channel , £3,850 to the Department of Physical and Inorganic Chemistry, for equipment , and £2,880 to the Department of Zoology, for investigations of the physiological basis of behaviour in protozoa, 1613
  Report of the National Chemical Laboratory for 1958, 1779
  Appointment of Dr G Macfarlane as deputy director of the National Physical Laboratory, 1844
Scientific and Industrial Research, South African Council for Thirteenth Annual Report (1957-58), 1449
Scientific and Industrial Research Organization (Australian Commonwealth) Grant of 30,000 dollars for the Rockefeller Foundation, for special equipment for the new Division of Tropical Pastures, 93
  Grant of 100,000 dollars from the Rockefeller Foundation, for the Divisions of Plant Industry and of Entomology, 93
  Grant of 250,000 dollars from the Rockefeller Foundation, towards the cost of the radio telescope for the Division of Radiophysics, 93
  Formation of a Division of Mineral Chemistry, 237
  Appointment of Dr F W G White as chairman, 317
  Appointment of Dr R N Robertson as a full-time member of the Executive, 317
  Rural Research in C S I R O, 27, Fencing Posts in Australia, 321
  List of Divisions and Sections, 410
  Tenth Annual Report (1957-58), 1027
  Second Australian Spectroscopy Conference, 1195
  Symposium on the Structure and Chemistry of Proteins, 1276
  Retirement of D A Gill as chief of the Division of Animal Health and Production, 1532
  Appointment of Dr J M Rendel as chief of the Division of Animal Genetics, 1532
  Appointment of Dr T S Gregory as chief of the Division of Animal Health, 1532
  Appointment of Dr I W McDonald as chief of the Division of Animal Physiology, 1532
  Cunningham Laboratory of the, 1776
  Appointment of C S Christian and Prof L G H Huxley as members of the Executive, 1984
  Appointment of G B Gresford as secretary, 1985
  Appointment of W Ives as executive officer, 1985
Scientific and Technical Books Recent, Supp v, July 25 , Supp iv, August 29 , Supp v, September 26 , Supp iv, October 31 , Supp vi, November 28 , Supp iv, December 26
Scientific and Technical Personnel Programme of National Information on (United States National Science Foundation to establish and maintain a), 592
Scientific and Technical Persons Registration of (1958), 854

Scientific and Technological Research in Britain Organization of, 1255

Scientist (Social) Air Surveys and the (Leo Silberman), 244

Scientists Pugwash International Conference of—Statement on Biological and Chemical Warfare, 1018

Scientists in the Public Service in Britain Special Promotions, 858, 1273

Scientists and Engineers in Britain, 1982

Scientists (Consulting), Association of Election of Officers, 508, 1777

Scientists (United States) Providing, with Soviet Scientific Information (United States National Science Foundation), revised edition, 1611

Scientists (United States and Soviet) Exchanges between, 680

Sclereid Formation in the Leaf of *Camellia japonica* Pattern and Control of (Donald E Foard), 1663

Sclerosis (Multiple) Geology and (Prof Harry V Warren), 561

Sclerotized Whole Insects Sectioning Large Heavily (Prof W E Beckel), 1584

Scoggan, Sybil M (Ettori, Prof J, and) Ionized Calcium in Biological Media, 1315

Scolytid Beetle Release by Exercise Flight of a Chemotropic Response from Photopositive Domination in a (Prof Kenneth Graham), 283

Scotland The Native Pinewoods of (Prof H M Steven and A Carlisle), *review* by Prof E W Jones, 133

Scotland (North-West) Rubidium-Strontium Ages of Lewisian Rocks from (Dr Bruno J Giletti), 1793

Scott, Dr A I The Chemistry of Vegetable Tannins, *review*, 1832

  Tracer Applications for the Study of Organic Reactions, *review*, 1902

Scott, C G Gas Chromatography (Alumina as a Packing), 328

  Progress in Gas Chromatography, 1199

Scott, D W Thermodynamics (Experimental Thermochemistry), 1607

Scott, Prof G David Substrate Damage in Film Thickness Measurement by Beam Interferometry, 354

Scott, Dr G R Heat Inactivation of Rinderpest-infected Bovine Tissues, 1948

Scott, Dr John Paul Animal Behaviour, *review* by Dr F Fraser Darling, 302

Scott, Dr Patricia P, and Lloyd-Jacob, Marny A Reduction in the Anoestrus Period of Laboratory Cats by Increased Illumination, 2022

Scott, Dr Russell B Cryogenic Engineering, *review* by Dr G G Haselden, 1174

Scott, R P W Gas Chromatography (Use of Fine Nylon Tubes as Capillary Columns), 328

  Gas Chromatography (Presentation of Gas Chromatographic Data with a High-persistence Cathode Ray Tube), 1199

Scott Base Radiation Balance at (D C Thompson and W J P Macdonald), 541

Scottish Highlands Conservation in the (Scottish Branch of the Institute of Biology Symposium on), 1529

Scripps Institution of Oceanography Oceanographic and Geophysical Investigation of the western Pacific Ocean and eastern Indian Ocean, 24

  Symposium on Perspectives in Marine Biology, 1956 (edited by A A Buzzati-Traverso), *review* by Dr J A Allen, 215

Scrolls (Dead Sea) A New Approach to the Dating of the (Prof D Burton, J B Poole and Dr R Reed), 533

Scurlock, Dr R G Appointed lecturer in physics at the University of Southampton, 595

Sea Living Resources of the (Dr Lionel A Walford), *review* by Dr F S Russell, 129

  The Open—its Natural History (Sir Alister Hardy), Part 2, Fish and Fisheries, with Chapters on Whales, Turtles and Animals of the Sea Floor, *review* by S M Marshall, 666

Sea, Co-ordinating Advisory Committee on Oil Pollution of the International Conference, 949

Sea, International Council for the Exploration of the Special International Geophysical Year Meeting (A J Lee and Dr D H Cushing), 1180

Sea (Dead) Scrolls A New Approach to the Dating of the (Prof D Burton, J B Poole and Dr R Reed), 533

Sea (Deep-) Ash Origin of the Worzel (Edward Anders and Dr D Nelson Limber), 44

Sea (Deep) Fauna Palaeotemperatures and the Origin of the, 1025

Sea (Deep) Jellyfish A Viviparous (Dr F S Russell), 1527

Sea (Ross) An Oceanographic Survey of the (J S Bullivant), 422

Sea Anemone (*Calliactis parasitica*) and the Hermit Crab (*Eupagurus bernhardus*), (Dr D M Ross), 1161

Sea-bottom (Soft), in Arctic North America The Benthos of (Dr D V Ellis), B A 79

Sea Fisheries Research in East Africa, 855

Sea-Horse and its Relatives (Gilbert Whitley and Joyce Allan), *review* by T H Hawkins, 390

Sea Urchin, *Diadema setosum* (Leske) Isolation of Echinochrome *A* from the Spines of the (Kokichi Nishibori), 1234

Sea Urchin Egg An Inhibitor of Cytochrome Oxidase Activity in the (Rachele Maggio and Alberto Monroy), 68

Sea Urchins Behaviour of (A N Sinclair), 783

Seaborg, Prof Glenn T The Transuranium Elements, *review* by Dr J K Dawson, 922

Seaman, J At the ninth International Starch Convention (Use of Starch as Sizing Agent in the Paper Industry), 514

Seamer, P A Estimation of μgm Quantities of Iron in Culture Medium, using Bathophenanthroline, 636

Search of a Conclusion Forty-seven Authors in, *review* by N W Pirie, 920

Search for Neutral Atomic Hydrogen in Globular Clusters (Dr Morton S Roberts), 1555

Searching for Interstellar Communications (Giuseppe Cocconi and Philip Morrison), 844

Searle, A G Hereditary Absence of Spleen in the Mouse, 1419

Searle, C E Effect of Polycyclic Aromatic Hydrocarbons on the Polarographic Maximum of Copper, 1716

Seas (Ancient) Determination of the Temperatures of, by the Measurement of the Oxygen Isotopes Ratio in Fossil Calcareous Organisms (Y A Birstein), 1025

Seas (British) *Acanthocottus lilljeborgi* (Collett) in (P J Miller), 1162

Season Influence of Site and, on Agricultural Variety Trials (A Sandison), 834

Seasonal Changes in the Œstrous Response by the Ovariectomized Ewe to Progesterone and Œstrogen (Prof J I Raeside and M F McDonald), 458

Seasonal Rhythm in the Presentation of Bone Sarcoma in Man (Dr C H G Price), B A 76

Seasonal Sex Difference in the Infestation of Rabbits with the Nematode *Trichostrongylus retortaeformis* (Zeder, 1800), (P C Bull), 281

Seaway and Power Projects The St Lawrence—Geographical Background (Prof T L Hills), B A 49

Sebba, Prof F Concentration by Ion Flotation, 1062

Secker, P E Ionization Phenomena in Gases (Arcs in Transverse Magnetic Fields), 1355

Second World War U S Army Neurosurgery in the, *review* by J E A O'Connell, 1676

Secondary Modern Schools Mathematics in (Mathematical Association Discussion of the Report on), 32

Secondary Structure in Proteins exposed to Ionizing Radiations in the Solid State Disorganization of the (Dr Peter Alexander, L D G Hamilton and Dr K A Stacey), 226

Secondary Structure of Ribonucleic Acid in Solution (Dr R A Cox and Dr U Z Littauer), 318

Secondary and Higher Education in Britain, 1671

Secretion of Adrenocortical Steroids Biosynthesis and (Biochemical Society Symposium on), 415

Secretion from the Denervated Adrenal Medulla Effects of Reserpine on (L Stjarne and S Schapiro) 2023

Secretion of Wax through the Cuticle of Insects (Dr M Locke), 1967

Secretion (Acid-) Defensive, in some Marine Gastropods (Dr T E Thompson), 1162

Secretion (Adrenal Medullary), of Catechol Amines Effects of 1,4-Dihydrazinophthalazine on Organ Content and (M Bygdeman and L Stjarne), 1646

Secretion (Milk) Potassium and Lactose in Milk in relation to the Physiology of (Dr J A F Rook and Marian Wood), 647

Sectioning Large Heavily Sclerotized Whole Insects (Prof W E Beckel), 1584

Sections (Neutron-activated) Distribution of Sodium in Compact Bone, as revealed by Autoradiography of (Prof J Vincent), 1332

Sections and Smears Fluorescent Schiff-Type Reagents for Cytochemical Detection of Polyaldehyde Moieties in (Prof Frederick H Kasten, Vivian Burton and Peggy Glover), 1797

Sectors (Distinct), in Polymer Single Crystals Evidence for (D C Bassett, Prof F C Frank and Dr A Keller), 810

Secular Solar Activity Changes in the Climate of the Atlantic–European Area and (Z Gregor and L Krivksy), 682

Sedimentation Rates, Fluidization and Flow through Porous Media (Colin C Harris), 716

Sedimentation and Effective Viscosity (Prof G J Kynch), 1311

Sedlund, F R, and Chang, Prof C C Blunt-Nosed Bodies in a High-Temperature Gas Jet, 812

Seed A Quick Method for Extracting Plant Embryos from certain Types of (M D Gwynne), 1588

Seed Dormancy Prevention of the Onset of, by Gibberellic Acid (Dr M Black and J M Naylor), 468, *erratum*, 857

Seed Germination (Educational Productions, Ltd, Filmstrip CX 6290), 1777

Seedless Hops Production of, by Interspecific Pollination (Prof Edward L Davis), 1336

Seedlings of *Musa balbisiana* A Rapid and Simple Pathogenicity Test for Detecting Virulent Clones of *Fusarium oxysporum* f *cubense* using (Dr R H Stover), 1591

Seedlings (Birch) Early Induction of Flowering in (Dr K A Longman and Prof P F Wareing), 2037

Seedlings (Coconut) Albinism in (Dr K M Pandalai and R V Pillai), 1163

Seedlings (Coniferous) Antibacterial Substances of, at Different Stages of their Development (R Vamos and L Vida), 915

Seedlings (*Sequoia sepervirens* (D Don) Endl and *Pseudotsuga menziesii* (Mirb) Franco) Response of, to Temperature (Henry Hellmers and William P Sundahl), 1247

Seedlings (*Striga*) Action of Inhibitor-β on the Growth of (C N Williams), 1577

Seeds (Peach) Gibberellic Acid and the Chilling Requirements of (the late Prof Margaretha G Mes), 2034

Seeds (X-Rayed), of High and Low Water Content Free Radicals in, as Measured by Electron Spin Resonance (Dr W Klingmuller, Dr G R Lane, M C Saxena and Dr D J E Ingram), 464

Segel, Dr R E Nuclear Forces and the Few-Nucleon Problem (Binding Energies and Elastic Scattering of Light Nuclei at Low Energies—Polarization Measurements in *n-d* and *p-d* Scattering at Low Energies), 1114

Segerstedt, Prof Torgny Opening Address at the Fourth International Conference on Ionization Phenomena in Gases, 1353

Segre, Dr Emilio, and Chamberlain, Dr Owen Awarded the Nobel Prize for Physics for 1959, 1189 , work of, 1189

Seismologie, Bureau Central International de Report of the Meetings of the Section for Seismology and the Physics of the Earth's Interior (Dr Markus Bath), 154

Seismology Recent Work in the Soviet Union in the field of (Committee on Geodesy and Geophysics of the Academy of Sciences of the U S S R Report on), 322

Seitz, Dr Chemistry of Propellants, 778

Seitz, Frederick, and Turnbull, David (edited by) Solid State Physics, Vols 4, 5 and 6, *review* by Prof E C Stoner, 1753

Sekiguchi, Dr Mutsuo, and others Induction of Phage Formation in the Lysogenic *Escherichia coli K*-12 by Mitomycin *C*, 1079

Sekiya, Prof A, and others Chemistry and Pharmacology of 16-Acetyl Digitalinum Verum, 1414

Selby Fellowship (Australian Academy of Science), 684

Select Committee on Estimates, Session 1958-59 Seventh Special Report, Treasury Control of Expenditure (Observations of the Treasury), 696

Selection Factors in a Tropical Trawl Fishery Prediction of (Alan R Longhurst), 1170

Selection Theory (The Clonal), of Acquired Immunity (Sir Macfarlane Burnet), *review* by Dr J H Humphrey, 753

Selective Feeding in Female *Calliphora erythrocephala* Meig Hormonal Control of (J Strangways-Dixon), 2040

Selective Inhibition of Ribonucleic Acid Synthesis in *Staphylococcus aureus* by Vancomycin (Prof D C Jordan and W E Inniss), 1894

Selective Oxidation of Tetrapyrrole Side-Chains (J Barrett and P Clezy), 1988
Selenium Curative Effect of, upon the Incisor Teeth of Rats deficient in Vitamin E (Prof J T Irving), 645
  Growth Responses to, in Lambs (Dr J W McLean, G G Thomson and J H Claxton), 251
Selenium and Cystine An Effect of, on Lipide Peroxidation in Tissues Deficient in Vitamin E (Dr John G Bieri), 1148
Self-Regulation in Living Systems (Second Ottawa Symposium on), 239
Sell, G , and Dossett, H A (edited by) Handbook of the Petroleum Industry, *review*, 1832
Sellers, Prof A F , and Titchen, Dr D A Responses to Localized Distension of the Oesophagus in Decerebrate Sheep, 645
Sellschop, Dr J P F Appointed to the chair of nuclear physics in the University of the Witwatersrand, 233 , work of, 233
Selye, Prof Hans Diaphragms for Analysing the Development of Connective Tissue, 701
Semenov, N N Some Problems in Chemical Kinetics and Reactivity, Vol I (translated by Michael Boudart), *review* by Dr T M Sugden, 299
Semi-Albino, a Third Sex-linked Allelomorph of Silver and Gold in the Fowl (W F Werret, A J Candy, J O L King and Dr P M Sheppard), 480
Semiconducting Diamond after Heat Treatment Electrical Resistivity Changes observed in a (R E Mutch and Dr F A Raal), 1857
Semiconducting Silicon Carbide (Dr H K Henisch), 158
Semiconductive Properties of Dilute Binary Solid Solutions of Bismuth in Tellurium and Tellurium in Bismuth Some (Dr Tomasz R Piwkowski), 355
Semiconductor Devices Transistors and Associated (Electronics and Communications Section of the Institution of Electrical Engineers International Convention on), 693
Semiconductor Science Advances in—Proceedings of the Third International Conference on Semi-Conductors, Rochester 1958 (edited by H Brooks), *review* by Dr J R Tillman, 1674
Semiconductor Surfaces (United States Office of Naval Research Second Conference on), 1192
Semiconductors, *review* by Dr R A Hyman 1754
Semiconductors Fluctuating Phenomena in (Prof A Van der Ziel), *review* by Dr R A Hyman, 1754
  An Introduction to the Theory and Practice of (Dr A A Shepherd), *review* by Dr R A Hyman, 1754
  Optical Properties of (Dr T S Moss), *review* by Dr R A Hyman, 1754
  Proceedings of the Third International Conference on, Rochester 1958 (Advances in Semi-Conductor Science, edited by H Brooks), *review* by Dr J R Tillman, 1674
  Progress in (edited by Dr Alan F Gibson, Prof R E Burgess and Prof P Aigrain), Vol 3, *review* by Dr R A Hyman, 1754
  Rochester Conference on, *review* by Dr J R Tillman, 1674
Semi-microchemical Methods Micro- and (Norwood Technical College Course of lectures and practical work on), 1845
Seminal Plasma, Serum and Bile Visualization of Acid and Alkaline Phosphatase after Starch-Gel Electrophoresis of (Dr Bengt Estborn), 1636
Seminal Vesicle Influence of Sexual Stimulation on the Metabolic Activity of Deoxyribonucleic Acid in the (Dr S R Pelc), 1414
Seminiferous Tubules of the Rat Residual Bodies of (B V Kingsley Smith and Dr D Lacy), 249
Semipermeability of Plant Cell Membranes Maintenance of, in the Absence of Metabolic Energy Supply (Dr B Ginzburg), 1073
Sen, Dhruba K Uraemia and its Treatment by Arginase Inhibitor, 459
Sen, Dr Randjit Transaminases in *Shigellae*, 741
Sen Gupta, S P (Chakraborty, S P , and) Fixation of Nitrogen by the Rice Plant, 2033
Senebier, Jean (1742-1809), 152
Senftle, F E , and others α-Radioactivity of Cerium-142, 630
Seno, Tamikazu, and Saito, Saburo A Chimaeric Duck with the Head of a Chick, B A 78
Sensenbrenner, M , and others Distribution of Nucleic Acids among Different Stable L Forms of *Proteus P* 18, 566
Sensitive Assay Method (Specific and), for Vasopressin and Oxytocin using Glass-Paper Chromatography (Akira Arimura and Prof Joseph F Dingman), 1874
Sensitive Chemical Dosimeter for Ionizing Radiation (Prof Gerald Oster and Dr Barret Broyde), 545
Sensitive Method (A Rapid and), for the Determination of Xanthine Oxidase Activity using the Oxygen Electrode (Metry Bacila and Dr Gilberto G Villela), 1394
Sensitive Strains of the Blue Tick, *Boophilus decoloratus* Contents of Cystine-Cysteine, Glutathione and Total Free Sulphydryl in Arsenic-resistant and (Dr J S Harington), 1739
Sensitivity of Catharometers in Gas Chromatography and the Thermal Conductivity of Binary Gas Mixtures (A B Littlewood) 1631
Sensitivity in Gas Chromatography Carrier Gas and (E M Fredericks, M Dimbat and F H Stross), B A 54 , (Dr N H Ray), B A 54
Sensitivity (Directional) A Functional Interpretation of the Electron-Microscopic Structure of the Sensory Hairs in the Cristae of the Elasmobranch *Raja clavata* in Terms of (Prof O Lowenstein and J Wersall), 1807
Sensitivity (Extreme), of Germination and Photoperiodic Reaction in the Genus *Chenopodium* (Tourn) L (Dr Bruce G Cumming), 1044
Sensitivity (Insulin-), of the Rat Diaphragm *in vitro* Role of Magnesium in the (Dr Gangagobinda Bhattacharya), 1401
Sensitivity (X-Ray), and Target Volume of Enzyme Induction (Dr Helmut Pauly), 1570
Sensitization (Passive), of Isolated Plain Muscles with Precipitating Antibody Promoting Effect of Urea on the *in vitro* (R Binaghi, Dr B N Halpern, P Liacopoulos and T Neveu), 1805
Sensitizing Factor (Histamine) Formation of the Toxoid of, in *Bordetella pertussis* (Prof Toshitaka Matsui and Yoshio Kuwajima), 199
Sensory Hairs in the Cristae of the Elasmobranch *Raja clavata* A Functional Interpretation of the Electron-Microscopic Structure of the, in Terms of Directional Sensitivity (Prof O Lowenstein and J Wersall), 1807
Sensory Mechanisms Haemoglobin and, *review* by P A Merton, 1092
Separating Power of Packed and Capillary Gas Chromatographic Columns Comparison of Efficiency and (Dr J H Purnell), 2009
Separation of Amino-acids A New Two-Dimensional Paper Chromatographic Method applied to the (C S Knight), 1486
Separation of Amino-Acids and Peptides on Paper A Two-Dimensional System for the (Virginia Richmond and Brian S Hartley), 1869
Separation of Antigenic Components from Isolated Nuclei Transplantation Immunity— (Andre Castermans and Andre Oth), 1224
Separation of Fast-Moving γ-Globulins by Starch-Gel Electrophoresis (Dr M D Poulik, Dr W W Zuelzer and Dr R Meyer), 1800
Separation by Gamma-Irradiation of Two Elements at the Vbs Locus in *Trifolium repens* (Dr D Roy Davies and E T Wall), 1957
Separation of the *Meta*- and *Para*-Isomers of the Xylenes, Cresols and Toluidines by Gas Solid Chromatography (M A Hughes, D White and Prof A L Roberts), 1796
Separation of Polyvinyl Chloride and Polyvinyl Acetate by Chromatographic Methods (W J Langford and D J Vaughan), 116
Separation of Prealbumins by Starch Gel Electrophoresis (Dr M D Poulik), 1067
Separation (Gas Chromatographic), of Long-chain Fatty Acid Methyl Esters on Polyvinyl Acetate (Irwin Hornstein, L E Elliott and P F Crowe), 1710
Separation (Paper Chromatographic), of Components of Rose Bengal Labelled with Iodine-131 (Fausto W Lima and Rômulo R Pieroni), 1065
Sequence (Terminal Peptide), of Human Haemoglobin ’ (Dr J A Hunt and Dr V M Ingram), 640
Sequoia sepervirens (D Don) Endl and *Pseudotsuga menziesii* (Mirb) Franco Seedlings Response of, to Temperature (Henry Hellmers and William P Sundahl), 1247
Sera (Agglutinating), and the Corresponding Red Blood Cell Receptors Influence of Streptomycin Solutions on the Interaction between the (Dr M Kout and Dr Z Kubickova), 639
Sercarz Dr E , and Coons, Dr A H Specific Inhibition of Antibody Formation during Immunological Paralysis and Unresponsiveness, 1080
Serine A Micromethod for the Polarographic Determination of (J Ladik and Dr I Szekacs), 188
L-Serine Phosphate Crystal Structure of (G H McCallum, Prof J Monteath Robertson and Dr G A Sim), 1863
Sermonti, G Cytoplasmic Inheritance (Cytoplasmic Inheritance in *Penicillium*), 1012
Serological Distinction of Adult and Foetal Human Haemoglobin (G R E Naylor and M E Adair), 1854
Serotonin Release of Adenosine Triphosphate and, from Injured Cellular Blood Elements in Extracorporeal Circuits (Dr H S S Sarajas, Dr R Kristoffersson and Dr M H Frick), 1127
Serotonin Metabolism A New Inhibitor of (Dr Alfred R Maass and Mary Jane Nimmo), 547
Serrel, F , and others Low-Temperature Autoradiography for the Detection of Tritium in Tissue, with Removal of Luminescence induced by Tritium, 1385
Serum (Acidified Rat) Peptides with Oxytocic and Pressor Activity obtained from (Prof H Croxatto, T Pereda and R Mellada), 1496
Serum (Anti-Rh) Specific Inhibition of, by 'Unnatural' Sugars (Dr William C Boyd, Marjorie H McMaster and Eugenia Waszczenko-Zacharczenko), 989
Serum (Blood) Determination of Magnesium in, by Atomic Absorption Spectroscopy (Dr J B Willis), 186
Serum (Human) Activation and Inhibition of the Arylesterase of (Prof E G Erdos, C R Debay and M P Westerman), 430
Serum (Human), in Cell Culture Growth-Controlling Action of (Dr Kari Penttinen and Dr Erkki Saxen), 1570
Serum (Human), denatured with Tannin Effect of Ultrasound on the Protein of (Dr Wizold Mizgalski and Irena Zygmunt), 1486
Serum (Normal Human) Effect of Coagulase on the Growth of Staphylococci in (Dr K Wlodarczek and Dr J Jeljaszewicz), 1514
Serum Albumin Production of, and of Globulins by Chick Mesenchymal Tissue and by HeLa Tumour Tissue in Culture (Y Abdel-Samie, Prof E Broda, G Kellner and W Zischka), 361, *erratum*, 943
Serum Cholesterol in Rats Dietary Protein and (A P de Groot), 903
Serum Factor Transformation Reaction of Pneumococci in the Absence of (Prof Takeshi Odaka and Tadashi Watanabe), 471
Serum Inhibitors of Asian Strains of Influenza Virus (Suzanne M James and Paul Fiset), 1656
Serum Protein Changes in the Level of, during Treatment of Kwashiorkor (Dr Olumbe Bassir), 2019
Serum Proteins (Substituted Human) Modifications in Immunological Behaviour, Electrophoretic Mobility and Colourability of (M Steinbuch, Dr J M Fine and A Battistini), 1571
Serum and Bile (Seminal Plasma,) Visualization of Acid and Alkaline Phosphatase after Starch-Gel Electrophoresis of (Dr Bengt Estborn), 1636
Serventy, Dr D L (Marshall, Dr A J , and) Experimental Demonstration of an Internal Rhythm of Reproduction in a Trans-Equatorial Migrant (the Short-tailed Shearwater *Puffinus tenuirostris*), 1704
Service Medals of the Textile Institute awarded to Walter Garner and Dr A R Urquhart, 156
Service (A New), for Naturalists (R S R Fitter), 1774
Service (Public), in Europe The Profession of Government—the (Dr Brian Chapman), 127
Service (State) Creative Leadership in a—a General Survey (Sir George Schuster), (Hospitals and the State—Hospital Organization and Administration under the National Health Service, Sixth and Final Research Report), 1087, 1201
Services (Public), in a Modern Democracy The Development of, 1087
Services Electronics Research Laboratory Symposium on Electron Bombardment Floating-zone Melting and Allied Electron Bombardment Techniques, 690
Seshachar, Prof B R , and Padmavathi, P B Conjugation in *Spirostomum*, 1510
Sesquiterpenoids Mono- and (P de Mayo), (The Chemistry of Natural Products, Vol 2), *review* by Prof A J Birch, 754
Sestan, N (Stankovic, Dr V , and) Effect of Whole-body X-Irradiation on the Insulin Resistance of Fasted Rats, 1816

Set (Permanent), Supercontraction, and Urea-Bisulphite Solubility—the Proton-Transfer Nature of some Changes in Keratin and the Analogy with Muscle Contraction (Dr P T Speakman), 339

Set Theory Axiomatic (Prof Paul Bernays), *review* by Dr L S Goddard, 1178

  Foundations of (Prof Abraham A Fraenkel and Prof Yehoshua Bar-Hillel), *review* by Dr L S Goddard, 1178

Smith, G , and others Detection of Thyroid Antibodies using Bentonite Particles, 478
Smith, Dr G F Herbert Gemstones, thirteenth edition revised by Dr F Coles Phillips, *review* by Dr W Campbell Smith, 1008
Smith, Dr I R Appointed lecturer in electrical engineering at the University of Birmingham, 684, 1362
Smith, Dr J A (Porter, Prof G , and) Mechanism of Atom Recombination, 446
Smith, Dr J A , and others Ionization Phenomena in Gases (Optical Excitation Functions in experiments with Mercury and Helium) 1354
Smith, J E W L , and others Crystallographic Studies of the Biuret Reaction, 707
Smith, J F Appointed reader in morbid anatomy at University College Hospital Medical School, London, 322
Smith, J G M , and others Preparation of Crystalline *trans-trans* Methyl Linoleate Hydroperoxide, 816
Smith, J M Thermodynamics (Phase Changes in Condensed Systems), 1609
Smith, J Maynard Genetic Analysis, *review*, 752
  A Theory of Ageing, 956
Smith, J W (Greenhow, E J , and) Coal Science (Chemical Reactions of Coal), 413
Smith, Dr Kenneth M Recent Work on the Electron Microscopy of Viruses, 1440
Smith, Dr Kenneth M , and others A Suspected Virus Disease of the Citrus Red Mite *Panonychus citri* (McG), 70
Smith, Dr Kenneth M , and Lauffer, Max A (edited by) Advances in Virus Research, Vol 6 *review* by N W Pirie, 920
Smith, L B Origin and Dispersal of Flowering Plants (Flora of south Brazil had its greatest source in central Brazil), 1201
Smith, L H (St Amand, Prof W , and) Interstrain Ovarian Transplantation in Lethally Irradiated Mice after Bone Marrow Therapy, 1503
Smith, jun , Dr Lloyd H , and others Distribution of 5-Carboxymethylhydantoinase, 1314
Smith, Madeleine Blood Grouping of the Remains of Swedenborg, 867
  The Future of the Etruscans, *review*, 1348
Smith, Piroska (*nee* Vermes), and Sproule, D O Experiments on the Acousto-Electric Effect, 264
Smith, Prof Paul K Acetophenetidin, *review* by Dr Marthe Vogt, 1349
Smith, Ray F (edited by Edward A Steinhaus and) Annual Review of Entomology, Vol 4, *review* by Dr P T Haskell, 489
Smith, Dr R H Absorption of Magnesium in the Large Intestine of the Calf, 821
Smith, Dr Sydney Animal Clocks, 765
Smith, Dr Wray Appointed assistant director of the Willow Run Laboratories in the University of Michigan, 26
Smith, Dr W Campbell, Gemmology, *review*, 1008
Smith, Dr W G Mast Cell Population of Lung of the Guinea Pig and other Tissues, 1154
Smith, Kline and French Research Institute Grant of £1,500 to the University of Oxford, for research on the electrophysiology and pharmacology of smooth muscle, 1362
Smith-Rose, Dr R L *Obituary* of Dr B van der Pol, 1020
  Obituary of Prof J Zenneck, 1188
Smithsonian Institution List of Publications available on June 30, 1958 (compiled by Eileen M McCarthy), 95
  Miscellaneous Collections, Vol 135, No 1, The Customs and Religion of the Ch'iang (D C Graham), B A 15
  Miscellaneous Collections, Vol 137, Studies in Invertebrate Morphology, in honor of Dr Robert Evans Snodgrass on the occasion of his eighty-fourth Birthday, 591
  Report for 1957-58, B A. 26
Smoke (Tobacco) Composition of Paraffin Wax Fraction from Tobacco Leaf and (Dr R Carruthers and Dr R A W Johnstone), 1131
Smoke Emission from Coal and Low-Temperature Chars (Studies of Coal), (D Finch), 426
Smolin, Edwin M , and Rapoport, Lorence (edited by) *s*-Triazines and Derivatives (The Chemistry of Heterocyclic Compounds, Vol 13), *review* by Dr F G Mann, 1758
Smolt Stages (Parr and), of the Atlantic Salmon Sodium Regulation in the Blood of (Prof H J Koch, J C Evans and E Bergstrom), 283
Smooth Muscles (Tonic), of Lamellibranch Molluscs Evidence for a Sliding Filament Contractile Mechanism in (Dr Jean Hanson and Dr L Lowy), 286
Smorodintsev, Prof A A , and others Statement on Biological and Chemical Warfare, 1018
Smy, P Thermonuclear Research (Shock Waves in Gases), 1017
Smyth, E H J Biomechanics (Functional Significance of the Formation of Trabeculae in the Neck of the Femur), 513
Snail, *Limnaea truncatula* Penetration of the Liver-fluke, *Fasciola hepatica*, into the (Dr Ben Dawes), 1334
Snedden, W (Reed, R I , and) Coal Science (Spectroscopy of Coals—Fragments produced from Aromatic Compounds), 413
Snell, A H Ionization Phenomena in Gases (Present State of the *DCX* Experiment), 1356
Snell, Dr Cornelia T (Snell, Dr Foster Dee and, assisted by Snell, Dr Chester Arthur) Colorimetric Methods of Analysis, including Photometric Methods Vol 2A, *review* by J King, 1522
Snell, Dr Foster Dee, and Snell, Dr Cornelia T , assisted by Snell, Dr Chester Arthur Colorimetric Methods of Analysis, including Photometric Methods, Vol 2A, *review* by J King, 1522
Snodgrass, Dr Robert Evans Studies in Invertebrate Morphology, in honor of, on the occasion of his eighty-fourth Birthday (Smithsonian Institution, Miscellaneous Collections Vol 137), 591
Snow, Sir Charles The Two Cultures and the Scientific Revolution (Rede Lecture, 1959), 295, 411
Snow Samples (Antarctic) Oxygen Isotope Variations in (Dr R Gonfiantini and Prof E Picciotto), 1557
Snyder, Dr Conway W The Upper Boundary of the Van Allen Radiation Belts, 439
Sobey, A J Structural Effects of Kinetic Heating (The Advantages and Limitations of the Use of Models), 31
Social Class The Psychology of (Maurice Halbwachs), translated by Claire Delavenay, *review* by Prof T S Simey, 754
Social Evolution in Man Main Stages of (Dr Max Pettersson), 481

Social Groupings in Fishes Studies on (Dr C M Breder, Jr), 865
Social Scientist Air Surveys and the (Leo Silberman), 244
Societe Française de Metallurgie Journees Metallurgiques d'Automne (Les Gas dans les Metaux), 95
Societe Française de Metallurgie (Non-Destructive Testing Group of the Institute of Physics and the) Discussion on the Relationship between Structure and Physical Properties of Materials, 1688
Societies (Learned and Professional), in Britain Taxation of, 1343
Society Automation and (edited by Howard Boone Jacobson and Joseph S Roucek), *review* by R Brightman, 1438
  Role of the Scholar in (Dr Henry Allen Moe), 7
  Science and, 127
Soczewinski, Edward (Waksmundzki, Andrzej, and) A Paper-Chromatographic Method for the Determination of Suitable Buffer Systems for Countercurrent Distribution, 977
Soddy, Frederick Pioneer Research on the Atom, the Life Story of (Muriel Howorth), *review* by Prof Norman Feather, 298
Sodium Distribution of, in Compact Bone, as revealed by Autoradiography of Neutron-activated Sections (Prof J Vincent), 1332
  Ultrasonically Dispersed (M W T Pratt and R Helsby), 1694
Sodium Carrier Evidence for Phosphatidic Acid as the (Dr Lowell E Hokin and Mabel R Hokin), 1068
Sodium Chloride Intake and Urinary Histamine in Adrenalectomized Rats (Dr T Bjuro and Dr H Westling), 1241
Sodium Concentration (Elevated Plasma) Effects of, on Sodium and Potassium in the Erythrocyte of the Lizard *Trachysaurus rugosus* (Gray), (P J Bentley), 1403
Sodium Regulation in the Blood of Parr and Smolt Stages of the Atlantic Salmon (Prof H J Koch, J C Evans and E Bergstrom), 283
Sodium Sulphosuccinate (Dioctyl) Registration of the Spermicidal Effects of (Prof Per Eric Lindahl and Kjell Wedin), 1289
NaH^{14}CO$_3$ to Haem Pathway of Carbon-^{14} Incorporation from, in Duck Blood Incubated *in vitro* (A Breccia, A L Fantola, E Lazzarini and A Giustina), 1879
Sodium-free Hydrazinium Solution Excitability and Phosphorylation of Muscle and Nerve in (L G Abood and K Koketsu), 725
Sodium and Potassium Glass Micro-Electrodes for Measuring Intracellular Activities of (Dr J A M Hinke), 1257
Sodium and Potassium in the Erythrocyte of the Lizard *Trachysaurus rugosus* (Gray) Effects of Elevated Plasma Sodium Concentration on (P J Bentley), 1403
Soft Sea-bottom in Arctic North America The Benthos of (Dr D V Ellis), B A 79
Soil Effect of the Level of Microbial Population on Isotopically Exchangeable Phosphate in (Dr P Newbould and Dr R L Lucas), 1155
  Isolation of Basidiomycetes from the (J H Warcup), 506
  Nitrogen Replenishment in the (Dr N R Dhar), 942
Soil of the Nigerian Rain-Forest Zone Non-Symbiotic Nitrogen Fixation in a (Dr A W Moore and J N Abaelu), 75
Soil (Podzol) Oxygen-containing Functional Groups in the Organic Matter of a (J R Wright and J Schnitzer), 1462
Soil (Uganda Swamp) Nitrogen Fixation in a (E A Calder) 746
Soil Block Test Method for Timber Limitations Imposed by some Water-borne Preservatives on the (A J McQuire), 1430
Soil Chemical Analysis (Prof M L Jackson), *review* by J M Bremner, 1093
Soil Cultures (Agar and) Translocation of Cobalt-60 and Caesium-137 by Fungi in (Dr Erna Grossbard and Dr D R Stranks), 310
Soil Fertility (Low) Adaptation of a Lead-tolerant Population of *Agrostis tenuis* to (D Jowett), 43
Soil Fungi in the Belgian Congo, 236
Soil Insecticide and Nematicide Formulations Effect of Emulsifiers and Organic Diluents in (F T Phillips), 1512
Soil Micro-Organisms Factors in Forest-Tree Litter Extracts affecting the Growth of (Dr Roger Knowles and Edward Laishley), 1169
Soil Organic Matter Titration Curves of (R S Beckwith), 745
Soil Salinity Course in Tunisia (Prof W R van Wijk), 1778
Soil Science Mineralogical Aspects of (Welsh Soils Discussion Group Discussion on), 156
Soil Science, British Society of Discussion on Availability of Plant Nutrients, 159
Soil Science, Indian Society of Presidential Address (Dr N R Dhar), 942
Soil Survey of Great Britain (England and Wales) Memoirs of the, The County of Anglesey—Soils and Agriculture (E Roberts), (Agricultural Research Council), 154
Soil and Land-Use Surveys of the Regional Research Centre of the British Caribbean No 1, Parish of St Catherine, Jamaica (K C Vernon), No 2, The Rupununi Savannas of British Guiana (R F Loxton, G K Rutherford and J Spector), No 3, St Vincent (J P Watson J Spector and T A Jones), 27
Soils Occurrence of Microbiological Filaments in (Roy D Bond), 744
Soils in the Kongwa and Nachingwea Districts of Tanganyika A Survey of (B Anderson), *review* by Dr R M S Perrin, 1901
Soils of Tanganyika, *review* by Dr R M S Perrin, 1901
Soils Discussion Group, Welsh Discussion on Mineralogical Aspects of Soil Science, 156
Soils (Salt-affected) Diagnosis, Improvement and Management of (Unesco Middle East Science Co-operation Office Regional Training Course on), 1778
Sokol, F, and others Infectious Ribonucleic Acid from Mouse Brains infected with Tick-borne Encephalitis Virus, 1581
Sol Moississures du, et des Litieres de la Region de Yamgambi (J Meyer), 236
Solanum nigrum L A 40-Chromosome Variant in (U K Rai), 1587
Solar Activity (Secular) Changes in the Climate of the Atlantic–European Area and (Z Gregor and L Křivsky), 682
Solar Corona Kellogg and Ney's Model of the (Dr D E Blackwell and Dr D W Dewhirst), 1120, (Prof Edward P Ney and Prof Paul J Kellogg), 1122
Solar Corona (The Inner), during June 1959 (G A Newkirk, G W Curtis, D K Watson, R Manning and J Shelby), 1308
Solar Corpuscular Clouds Apparent Observation of, by Direct Continuous-Wave Reflexion (Dr John D Klaus and W Reed Crone), 965
Solar Cosmic Rays Satellite Observations of (Pamela Rothwell and Carl McIlwain), 138
Solar Disk Distribution of Flares on the, Associated with Noise (L R McNarry), 806
Solar Effects in the Motion of *Vanguard* (Dr Stanley P Wyatt), 351
Solar Energy Transactions of the International Conference on the Use of—The Scientific Basis (Tucson, 1955), Vol 1, The Available Energy, Measurement of Radiation, Vol 2, Thermal Processes, Part 1, Section A, Flat Plate Collectors, Vol 2, Thermal Processes, Part 1, Section B, High-Temperature Solar Furnaces, Solar Power, Vol 3, Thermal Processes, Part 2, Solar House Heating, Solar Water Heating, Solar Stoves, Solar Distillation, Vol 4, Photochemical Processes, Vol 5, Electrical Processes, *review* by Dr H Heywood, 217
Solar Flare Magnetic Field associated with a Great (Dr Robert Howard, Dr Thomas Cragg and Dr Horace W Babcock), 351
Solar Flares Association of Radio Outbursts with (L D de Feiter, A D Fokker and J Roosen), 805
  Rocket Studies of Emissions caused by (United States National Science Foundation Grant), 406
Solar Radio Bursts (Slow-Drift) Geomagnetic Disturbance and Velocity of (M B Wood and C S Warwick), 1471
Solar Radio Radiation (Enhanced) Observations of the Fine Structure of, with a Narrow-Band Spectrum Analyser (Oystein Elgaroy), 887
Solar Wind The Aurora, the Radiation Belt and the—a Unifying Hypothesis (M H Rees and G C Reid), 539
Solid Chromatography (Gas) Separation of the *Meta-* and *Para-*Isomers of the Xylenes, Cresols and Toluidines by (M A Hughes, D White and Prof A L Roberts), 1796
Solid Solutions (Dilute Binary), of Bismuth in Tellurium and Tellurium in Bismuth Some Semiconductive Properties of (Dr Tomasz R Piwkowski), 355
Solid State Disorganization of the Secondary Structure in Proteins exposed to Ionizing Radiations in the (Dr Peter Alexander, L D G Hamilton and Dr K A Stacey), 226
Solid State Physics (Australian Branch of the Institute of Physics Conference on), 1117
Solid State Physics (edited by Frederick Seitz and David Turnbull), Vols 4, 5 and 6, *review* by Prof E C Stoner, 1753
  Aspects of, *review* by Prof E C Stoner, 1753
Solid State Rheological Study of the Mechanism of Paraffin-Detergent Interactions in Aqueous Systems (F J Radd and L H Crowder), 443
Solidago Chromosome Numbers in (J R Beaudry and D L Chabot), 236
Solids Electron–Phonon Interaction in (Physical Society Conference on), 1613
  Explosions in, *review* by Dr Peter Gray, 664
  Fast Reactions in (Dr F P Bowden and A D Yoffe), *review* by Dr Peter Gray, 664
  Influence of Crystal Defects on the Szilard-Chalmers Process in (Dr A G Maddock and J I Vargas), 1931
Solids such as Metals A Theory of the Abrasion of (J Goddard, H J Harker and H Wilman), 333
Solids (Liquids and) Molecular and Atomic Motions in, by Radiofrequency Methods (Colloque AMPERE and the Radiofrequency Spectroscopy Group Joint Discussion on), 157
Soliman, Dr F A The Anterior Pituitary-like Activity of Rumen Contents, 1723
Solomon, I Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
Sols et de la Vegetation du Congo Belge et du Ruanda-Urundi Carte des—6, Yangambi Planchette 3, Lilanda, A Sols, B, Vegetation (Notice explicative par P Gilson, P Jongen, A Van Wambeke et L Liben), (Institut National pour l'Etude Agronomique du Congo Belge), 27
Soltys, Dr M A The International Veterinary Congress, 598
Solubility of Water in Hydrocarbons Use of Tritium to Study the (B D Caddock and P L Davies), 2011
Solubility (Urea-Bisulphite) Permanent Set, Supercontraction and—the Proton-Transfer Nature of some Changes in Keratin and the Analogy with Muscle Contraction (Dr P T Speakman), 339
Solubility Data (Mutual) Estimation of the Interchange Energy for Binary Systems from (Kiyoharu Ishida), 814
Soluble Derivatives Extraction of the Total Protein from Wheaten Flour in the Form of (E E McDermott and Dr J Pace), 546
Soluble Proteins (Normal), in Guinea Pig Liver Agar Electrophoresis of (Prof Iv Goranov, Y Todorov, X Skatshokova, M Hlebarova and P Kuzmanova), B A 64
Solution Concentration of Stearic Acid in Monolayers Adsorbed from (George L Gaines, jun), 1139
  Fast Chemical Reactions in (Deutsche Bunsengesellschaft fur Physikalische Chemie and the Max-Planck Gesellschaft Colloquium on), 1453
  Influence of Counterion Association on the Configuration Stability of Deoxyribonucleic Acid in (F Ascoli, C Botre, V Crescenzi, A Mele and Prof A M Liquori), 1482
  Secondary Structure of Ribonucleic Acid in (Dr R A Cox and Dr U Z Littauer), 818
Solution (A Least-Squares), for a Linear Relation between Two Observed Quantities (P A Wayman), 77, (B K Kelly), 1086
Solution (Sodium-free Hydrazinium) Excitability and Phosphorylation of Muscle and Nerve in (L G Abood and K Koketsu), 725
Solutions (Concentrated Urea) Effect of, on the Infectivity and Haemagglutinin of Vaccinia Virus (Prof J F McCrea and Jean O'Loughlin), 1497
Solutions (Dilute Binary Solid), of Bismuth in Tellurium and Tellurium in Bismuth Some Semiconductive Properties of (Dr Tomasz R Piwkowski), 355
Solutions (Irradiated) Aromatic Ring Opening in the Presence of Oxygen in (Israel Loeff and Gabriel Stein), 901
Solutions (Potassium-rich) Action Potentials from Single Nodes of Ranvier in (Dr Hans-Christoph Luttgau), 1494
Solutions (Streptomycin) Influence of, on the Interaction between the Agglutinating Sera and the Corresponding Red Blood Cell Receptors (Dr M Kout and Dr Z Kubickova), 639
Solvents (Mixed) Action of, on Wool (J C Atkinson, A Filson and Prof J B Speakman), 444
Solyankin, Dr E V Polar Front Survey (Hydrography—Greenland and Norwegian Seas), 1181
Solymosy, Dr F, and others Biochemical Mechanism of Lesion Formation in Virus-infected Plant Tissues, 706
Somers, Dr E Fungitoxicity of Metal Ions, 475

Sommerfelt, Alf A Elected an Honorary Member of the American Academy of Arts and Sciences, 410
Sonneborn T M Cytoplasmic Inheritance (Kappa and Paramecin), 1012
Sorbaeva, N A, and others Rate of Appearance of Mutants with Respiration-deficiency in *Staphylococci*, 1821
Sorbitol Effect of, on the Urinary Excretion of some B Vitamins in Man (J D Watson and Prof John Yudkin), 911, *errata*, 1362
Sorbitol in Rats and Mice Thiamine-sparing Action of (Dr T B Morgan and Prof John Yudkin), 909
Sorensen, Ole, and others Some Enzymatic Properties of Suspensions of Parenchymatous Liver Cells, 1400
Sorghum Resistance of, to Witchweed (C N Williams), 1511
Sorokin, Dr Constantine Tabular Comparative Data for the Low- and High-Temperature Strains of *Chlorella*, 613
Sorvall, Inc, Ivan Super-speed Servall SS-3 Automatic Centrifuge, 322
  SS-4 Enclosed Centrifuge, 322
Soule, J L, and Durif, S Coal Science (Ultra-fine Structure of Coals and Chars—Coals of Pores of Sizes 22-25A), 413
Soulsby, Dr E J L *Obituary* of Dr D O Morgan, 1684
Sound Velocity of, in Relaxing Gases (H J Wintle), 2007
Sour and Sweet Cherries Occurrence of Leuco-Anthocyanin in (Dr Kuang C Li), 1935
Source of Air-borne Nitrogenous Material and other Plant Nutrients Surface of the Ocean as a (Dr A T Wilson) 99
Source of Protein for Cultivation of HeLa Cells Discarded Blood Bank Blood as a (Billy R Blakey and Prof George E Gifford), 1158
Source Book of Fungal Physiology, *review* by Dr J L Harley, 85
South Africa, Advisory Council on Scientific Policy of the Union of First and Second Annual Reports, 1191
South African Animal Life—Results of the Lund University Expedition in 1950-51, Vol 5 (edited by Bertil Hanstrom, Per Brinck and Gustaf Rudebeck), *review*, 133
South African Association for the Advancement of Science (Cape Council), and the Royal Society of South Africa, Second Science Exhibition, 952
South African Council for Scientific and Industrial Research Thirteenth Annual Report (1957-58), 1449
South African Peoples Haptoglobin and Transferrin Variants in Bushmen and some other (Dr N A Barnicot, J P Garlick, Ronald Singer and Dr J S Weiner), 2042
South America Transport of Driftwood from, to Tasmania and Macquarie Island (Prof H N Barber, Dr H E Dadswell and H D Ingle), 203
South American Indians Frequency of the New Blood Group Antigen Js among (Dr Miguel Layrisse and Dr Zulay de Layrisse), 640
South Equatorial Countercurrent in the Pacific Ocean Evidence of a (Joseph L Reid, jun), 209
South Pole Geodetic Marker at the (To be erected by the United States Coast and Geodetic Survey), 1612
South-western Australia Precambrian Geology of (A F Wilson), 237
Southern, H N (Hook, O, and) At the Conference of the Mammal Society of the British Isles (Erosion caused by Hippopotami in Uganda), 30
Southern Africa Eels in (R A Jubb), 827
Southern Rhodesia *Haematopota insidiatrix* Austen (Diptera, Tabanidae), in (Dr Robert Barrass), 739
Southern Root Knot Nematode A Virus Disease of *Meloidogyne incognita incognita*, the (J R Loewenberg, T Sullivan and M L Schuster), 1896
Southwood, Dr T R E, and Leston, Dennis Lanf and Water Bugs of the British Isles, *review* by W J Le Quesne, 1977
Soviet Encyclopaedia Large (Bolshaya Sovietskaya Enziclopediya), Vol 50, 857, 1451
Soviet Ministry of Culture (British Council and the) Exhibition in Moscow of British Books and Periodicals, 1361
Soviet Pharmaceutical Research Vol 1, Pharmaceutical Chemistry, Vol 2, Pharmacognosy, Vol 3, Medicinal Chemistry, *review* by Dr D Train, 1831
Soviet Rubber Technology Title of an English translation of *Kauchuk i Rezina*, to be published by the Research Association of British Rubber Manufacturers, 505
Soviet Scientific Information Providing United States Scientists with (United States National Science Foundation), revised edition, 1611
Soviet Slavic Studies (published in the Russian language by the Academy of Sciences of the U S S R), 410
Soviet Technology, Digest of, No 1 (Engineering Information Services, Ltd), 320
Soviet Union Recent Work in the, in the field of Seismology (Committee on Geodesy and Geophysics of the Academy of Sciences of the U S S R Report on), 322
Soviet and United States Scientists Exchanges between, 680
Soya Bean Plants Translocation of Carbon-14-labelled Amino-Acids and Amides in the Stems of young (C D Nelson and P R Gorham), 855
Soya Extracts A Lipoperoxidase Factor in (Dr John A Blain and Edward C C Styles), 1141
Soybean Nobules during the Vegetative Period Redox Potentials in (Dr Helena Ebertova), 1046
Space Change of Cosmic Rays in (Prof H V Neher), 423
  The Threshold of—the Proceedings of the Conference on Chemical Aeronomy, sponsored by the Geophysics Research Directorate, Air Force Cambridge Research Center, Cambridge, Mass, 1956 (edited by M Zelikoff), *review*, 1011
Space (Visual) Possible Role of Higher Proprioceptive Centres in the Perception of, and in the Control of Motor Behaviour (Dr B Gurevitch), 1219
Space Flight Russian View of, *review* by D G King-Hele, 836
Space Projectiles launched in the Soviet Union (Articles in *Priroda* dealing with), 771
Space Research British, 24
  Prelude to, *review* by D G King-Hele, 663
Space Research, Canadian Committee on, 24
Space Rocket The Second Russian, 406
  The Third Russian (Earth Satellite 1959θ), 852
Spaced Observations of Radio Noise from the Outer Atmosphere (G R A Ellis, D G Cartwright and J R V Groves), 1391
Spacings (Lattice), and Structures of Metals and Alloys A Handbook of (Dr W B Pearson), *review* by Dr J A Catterall, 841
Sparagmites (Norwegian), and the Late Pre-Cambrian Ice Age Palaeomagnetism in some (W B Harland and D E T Bidgood), 1860
Sparling, L G M Appointed lecturer in mechanical engineering at the University of Sheffield, 1451
Spatial Detail Vision Measurements of Temporal Adaptation to (A J Seyler and Z L Budrikis), 1215
Spatial and Temporal Summation Visual (Dr Ernest Baumgardt), 1951
Spawning of *Hydractinia echinata* Effect of Acetylcholine and Eserine on the (M Yoshida), 1151
Spawning Quinnat Salmon Stomach Contents of (J S Bullivant), 71
Speakman, Dr H B Report of the Director of the Ontario Research Foundation for 1958, 865
Speakman, Prof J B and others Action of Mixed Solvents on Wool, 444
Speakman, Dr P T Permanent Set, Supercontraction and Urea-Bisulphite Solubility—The Proton-Transfer Nature of some Changes in Keratin and the Analogy with Muscle Contraction, 339
Special Ceramics (British Ceramic Research Association Symposium on), 1115
Special Relativity A New Experimental Test of (J P Cedarholm and Prof C H Townes), 1350
Speciation among Lampreys (Dr Giuseppe Zanandrea), 380
Species Genetics and the Origin of (British Association for the Advancement of Science, Sections D (Zoology) and K (Botany), Symposium on), 587
  The Young Darwin and the, 'Origin of (Prof C F A Pantin), 1533
Species of *Eriophyses* Floral Malformation in *Panicum antidotale* caused by a (Dr V M Desai and Dr M J Thirumalachar), 1586
Species of *Fusarium* Production of Emetic Material by (Neville Prentice, A D Dickson and Prof J G Dickson), 1319
Species Specificity of Fish Mucus (J M Barry and Prof Fergus J O'Rourke), 2039
Species (Living) The Evolution of (Royal Society of Victoria Symposium on), 156
Specific Bacteriophages (Some New), for Plant Pathogenic *Xanthomonas* spp (Z Klement), 1248
Specific Infection of Mice Immunization with Biologically Active Fractions of Deoxyribonucleic Acid and Subsequent (Dr M Kohoutova), 1965
Specific Inhibition of Antibody Formation during Immunological Paralysis and Unresponsiveness (Dr E Sercarz and Dr A H Coons), 1080
Specific Inhibition of Anti-Rh Serum by 'Unnatural' Sugars (Dr William C Boyd, Marjorie H McMaster and Eugenia Waszczenko-Zacharczenko), 989
Specific Response in the Hippocampus of the Rabbit to Olfactory Stimulation (B G Cragg), 1697
Specific Surface of a Powder Rapid Estimation of the (Dr H E Rose and R M E Sullivan), 46
Specific and Sensitive Assay Method for Vasopressin and Oxytocin using Glass-Paper Chromatography (Akira Arimura and Prof Joseph F Dingman), 1874
Specificity in Protein Biogenesis (Centre Interuniversitaire de Recherches enzymologiques Colloquium on), 1198
Specificity of the Tryptophan Peroxidase-Oxidase Enzyme System (Dr R H Marchant), 1711
Specificity (Species), of Fish Mucus (J M Barry and Prof Fergus J O'Rourke), 2039
Specificity (Tumour), and Immunological Suppression (Elaine Levi, A M Schechtman, Richard S Sherins and Stanley Tobias), 563
Spector, J, and others Soil and Land-Use Surveys of the Regional Research Centre of the British Caribbean, No 2, The Rupununi Savannas of British Guiana, No 3, St Vincent, 27
Spectra (Atomic) Collision Effects in (W R Hindmarsh), 155
Spectra (Infra-Red), of Carbohydrate Sulphate Esters (Dr A G Lloyd and K S Dodgson), 548
Spectra (Very Low-Frequency), of Atmospherics propagated through the Ionosphere (Tatsuzo Obayashi), 34
Spectra (Visible Absorption), of Copper-ethylene-diamine-*bis* (acetylacetone) in the Crystalline State (Animesh Chakravorty and Dr Sadhan Basu), 50
Spectral Composition of the Luminescence of the Euphausiid *Thysanoessa raschii* (Dr Brian P Boden and Dr Elizabeth M Kampa), 1321
Spectral Lines Collision Broadening of, 155
Spectrofluorimetry Photolysis of Thionine in Rigid Medium—Measurement by (Dr C A Parker and W T Rees), 1223
Spectrographically Pure Metals (Prof W Hume-Rothery) 1794
Spectrometer (Mass) Application of the, to Polysaccharide Chemistry (Dr P A Finan and Dr R I Reed), 1866
Spectrometers (Wide-range Grating) Resolution of (Dr A E Martin), 975
Spectrophotofluorometric Assay of Griseofulvin (Carole Bedford, K J Child and E G Tomich), 364
Spectrophotometry (Infra-Red) Polyethylene Absorption Cells for (Trevor Robinson), 448
Spectroscopic Examination (Direct), of Electrophoretic Zones in Agar Gel (Dr G H Beaven and W B Gratzer), 359
Spectroscopic Identification of Alpha-Emitting Nuclides in Biological Material (Prof W V Mayneord and C R Hill), 667
Spectroscopy Conference Second Australian (Dr Norman S Ham), 1195
Spectroscopy Group (Radiofrequency), and the Colloque AMPERE Joint Discussion on Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 157
Spectroscopy (Atomic Absorption) Determination of Magnesium in Blood Serum by (Dr J B Willis), 186
Spectroscopy (Subjective Light Pattern), in the Encephalographic Frequency Range (Prof M Knoll and J Kugler), 1823
Spectrum of Turbulence at Very High Reynolds Number (H L Grant, A Moilliet and Prof R W Stewart), 808
Spectrum (Absorption), of Flavin Adenine Dinucleotide Change of, by its Binding with both D-Amino Acid Oxidase Apo-Protein and Benzoate (Dr Kunio Yagi, Takayuki Ozawa and Minoru Harada), 1938
Spectrum (Infra-Red), of Bacteriochlorophyll in *Chromatium* Influence of Carotenoids on the (Dr J A Bergeron and Dr R C Fuller), 1340
Spectrum (Red-Shift Absorption), of the Cygnus-A Radio Source (Dr R D Davies and Dr R C Jennison), 803

Spectrum Analyser (Narrow-Band) Observations of the Fine Structure of Enhanced Solar Radio Radiation with a (Oystein Elgaroy), 887
Spectrum Changes (Cosmic Ray Energy) Evidence for, during a Forbush Decrease (K W Ogilvie and M M Winn), 888
Speed (High) Computing (Dr S H Hollingdale), *review* by E M Deeley, 1832
Speirs, Dr R L Potentiation of Contractions after Rest in the Isolated Rat Ventricle Preparation, 66
Spencer, D Isolation and Purification of Nitrate Reductase from Embryos of Germinating Wheat, 682
Spencer, D H T (Bond, R L, and) Coal Science (Sorption Data obtained with Inert Gases on Coal and of Heats of Wetting of Coal in Polar Liquids), 412
Spencer, Prof Mary S Production of Ethylene by Mitochondria from Tomatoes, 1231
Spencer, E L (Chance, Prof Britton, and) Energy Transfer with special reference to Biological Systems (Rapid Establishment of Redox Equilibria in the Cytochromes of Cells and Cell Particles at the Temperature of Liquid Nitrogen), 690
Spencer, P S J, and others Insulin and Hypersensitivity, 2020
Sperm Heads Cross-Linking of Deoxyribonucleic Acid in by Ionizing Radiations (Dr P Alexander and Dr K A Stacey), 958
Spermatozoa Survival of, following Drying (Dr Harold T Meryman and Emanuel Kafig), 470
Spermicidal Effects of Dioctyl Sodium Sulphosuccinate Registration of the (Prof Per Eric Lindahl and Kjell Wedin), 1289
Sperry (Elmer A) Award for outstanding achievement in the field of transportation to be presented to the de Havilland Aircraft Co, Ltd, 595
Sphingomyelin from Horse Spinal Cord Presence of Behinic Acid in (Prof Yasuhiko Fujino and Takashi Negishi), 817
Spice, J E Thermodynamics (Phase Changes in Condensed Systems), 1609
Spiers, Prof F W Some Measurements of Background Gamma-Radiation in Leeds during 1955-59, 1680
Spiers Memorial Lecture of the Faraday Society (Prof Th Forster), 688
Spilogale (Genus) A Taxonomic Revision of the Spotted Skunks of the (R G Van Gelder), 1024
Spin Resonance (Electron) Free Radicals as Studied by (Dr D J E Ingram), *review* by Dr T M Sugden, 1259
  Free Radicals in X-Rayed Seeds of High and Low Water Content, as Measured by (Dr W Klingmuller, Dr G R Lane, M C Saxena and Dr D J E Ingram), 464
Spin Resonance (Electron), and Divalency of some Dithiocarbamates of the Coinage Metals (Cu, Ag, Au), (Tore Vanngard and Stig Åkerstrom), 183
Spin Resonance (Electron) Investigations of *Allium cepa* and *Calliphora vomitoria* (M Edwards, Dr G A Kerkut, K A Munday, Dr D J E Ingram, M C Saxena and K Leach), 1402
Spin Temperature (Prof A Abragam), 954
Spinal Cord (Horse) Presence of Behinic Acid in Sphingomyelin from (Prof Yasuhiko Fujino and Takashi Negishi), 817
Spines of the Sea Urchin, *Diadema setosum* (Leske) Isolation of Echinochrome *A* from the (Kokichi Nishibori), 1234
Spinner, Dr E At the Second Australian Spectroscopy Conference (Vibration Spectra and Structure of the Hydrochlorides of Urea, Thiourea and Acetamide), 1196
Spiral and other Growth Forms of Synthetic Diamonds—a Distinction between Natural and Synthetic Diamond (Prof S Tolansky and Dr I Sunagawa), 1526
Spirit of British Administration and some European Comparisons (C H Sisson), 128
Spirostomum Conjugation in (Prof B R Seshachar and P B Padmavathi), 1510
Spleen in the Mouse Hereditary Absence of the (A G Searle), 1419
Spleen (Intact Mouse) Decrease in Radiosensitivity of the, produced by Hypoxia (Dr L Weiss), 1156
Spleen (Isolated and Perfused Rat) Production of γ- and α Globulins by the (Dr E Espinosa), 1801
Spleen Deoxyribonucleic Acid (Highly Polymerized), labelled with Phosphorus-32 Injected Intraperitoneally into Rats Fate of the (Tamara A Hudnik-Plevnik, Vladimir R Glišin and Marta M Simic), 1818
Splenic Siderosis in Mice treated with Dithiourethane (Prof P N Cowen), 366
Spleno-Pulmonary Venous Anastomosis Establishment of Parenchymatous (Dr George R Walker, Dr Paul Field and Dr Patrick E Conen), 703
Sponge-hydrostatic and Weeping Bearings (Mechanism of Animal Joints), (Dr C W McCutchen), 1284
Sponsored Research in Great Britain, 235
Spontaneous De-amination of Amino-acid Phosphates under Physiological Conditions (Dr Mella Paecht and Prof A Katchalsky), 1489
Spontaneous Leukaemia in *AKR* Mice Chromosome Complement of (H F Stich, R Wakonig and Dr A A Axelrad), 998
Sporadic *E* Ionization A Relation between Giant Travelling Disturbances and (L H Heisler), 1788
Sporangiophores (*Phycomyces*) Gallic Acid in (David S Dennison), 2036
Spore Formation in *Bacillus licheniformis* Antibiotic Production as a Function of (Robert W Bernlohr and G D Novelli), 1256
Spore Morphology (Fungal) '*LO*-Analysis' as an Aid in the Study of (Dr M M Payak), 738
Spores of *Bacillus coagulans* var *thermoacidurans* Role of the Glycolytic Enzyme System in the Germination of (Prof Mikio Amaha and Tomoko Nakahara), 1255
Spores of Morphological Variants of *Streptomyces erythreus* Strains An Electron-Microscopic Study of (L Dolezilova, Z Vanek and O Králík), 1888
Sporidesmium bakeri recorded from Victoria, Australia (B S Janes), 1327
Sporidesmium bakeri and Facial Eczema of Sheep in the Field (R H Thornton and D P Sinclair), 1327
Sporn, Philip, and others (edited by) The Economics of Nuclear Power, including Administration and Law, Vol 2, *review* by R Brightman, 1673
Spot Tests for Steroids applied on Paper Use of Porter–Silber and Schiff Reagents as, and their Application to the Study of Rat Adrenal Lipids (Dr Marion K Birmingham), B A 67
Spots (Luminous), on Electrodes in Insulating Oil Gaps (T W Dakin and Daniel Berg), 120
Spotted Skunks of the Genus *Spilogale* A Taxonomic Revision of the (R G Van Gelder), 1024
Spring, Prof F S Retirement from the chair of chemistry in the Royal College of Science and Technology, Glasgow, 233, work of, 233
Sproule, D O (Smith, Piroska (*nee* Vermes), and) Experiments on the Acousto-Electric Effect, 264
Sputnik III The Continued Progress of Satellite 1958δ_2 (B R May and D E Smith), 765
  Signals from Satellite 1958δ_2 (B G Pressey), 261
Sputniks and After (Karl Gilzin), translated from the Russian by Pauline Rose, *review* by D G King-Hele, 836
Squamous Epithelia in the Guinea Pig Renewal Times of some (H Platt), 1654
Srb, A M Cytoplasmic Inheritance (Effects of Mutant and Normal Cytoplasms on *Neurospora* Phenotypes), 1012
Sreenivasan, A, and others Pantothenic Acid Deficiency and Ubiquinone Levels in Rat Liver Mitochondria, 1867
Sreenivasaya, Prof M Biochemical Research in India (Study of Enzymes both by the Ultra-micro- as well as by Micro-dilatometric Methods), 1367
Srinivasachar, D Nuclear Deoxyribonucleic Acid Content and Endopolyploidy in the Meristem of Onion Roots, B A 80
St Amand, Prof W, and Smith, L H Interstrain Ovarian Transplantation in Lethally Irradiated Mice after Bone Marrow Therapy, 1503
St George's Hospital Medical School, London Appointment of Dr G R Hilson as reader in bacteriology, 322
  Appointment of Dr D Dexter as reader in morbid anatomy, 322
St Lawrence Seaway and Power Projects—Geographical Background (Prof T L Hills), B A 49
St Salvator's College, St Andrews Appointment of Dr D Bijl as reader in natural philosophy, 684
  Appointment of Dr F D Gunstone as senior lecturer in chemistry, 684
  Appointment of Dr A R Mitchell as senior lecturer in mathematics, 684
Stability of Metal Complexes of Oxine and its Sulphonic Acid (Prof Adrien Albert and Prof Reino Nasanen), 449
Stability (Configurational), of Deoxyribonucleic Acid in Solution Influence of Counterion Association on the (F Ascoli, C Botre, V Crescenzi, A Mele and Prof A M Liquori), 1482
Stability (Glutathione), of the Erythrocytes in Iranians (Dr D G Walker and Dr J E Bowman), 1325
Stability (Relative), of the Halogenoplatinates A Radiochemical Tracer Study of the (A J Poe and M S Vaidya), 1139
Stability (Suspension), of Red Blood Corpuscles Effect of Polyphoretin Phosphate on the (Dr Bengt Fries), 62
Stabilization of Glyceraldehyde-3-phosphate Dehydrogenase Role of the Co-enzyme in the (P Elodi and G Szabolcsi) 56
Stabilization (d c), of Transistor Circuits Use of the Silicon Resistor in the (J T Zakrzewski and D H Mehrtens), 811
Stable *L* Forms of *Proteus P* 18 Distribution of Nucleic Acids among Different (Prof P Mandel, M Sensenbrenner, P De Gregorio and A M Bader), 566
Stacey, Dr K A, and others Disorganization of the Secondary Structure in Proteins exposed to Ionizing Radiations in the Solid State, 226
Stacey, Dr K A (Alexander, Dr P, and) Cross-Linking of Deoxyribonucleic Acid in Sperm Heads by Ionizing Radiations, 958
Stacey, Prof M Medical Aspects of Complex Carbohydrates (Presidential Address to Section B (Chemistry) of the British Association for the Advancement of Science), B A 42
  Rocket Propulsion (Possibility of using Fluorine in Propulsion Systems), 1267
Stacey, Prof M, and others Some Observations on certain Mucoproteins containing Neuraminic Acid, B A 68
  Action of Manganese Dioxide on Simple Carbohydrates, 1301
  N-Methylation of Methyl 2-Acetamido-2-Deoxy-α-D-Glucopyranoside, 1718
Stacey, W O (Cameron, A, and) Coal Science (Ultra-fine Structure of Coals and Chars—Two Distinct Pore Systems in Chars prepared from Brown-coals), 413
Stadler, Dr D R Growth Patterns in *Neurospora*—Genetic Control of a Cyclic Growth Pattern in *Neurospora*, 170
Staff in Industry and Commerce—Management of Workers whose Skills are mainly Mental or Social rather than Manual (E M Barling), 319
Staff (Scientific), in New Zealand, 854
Stage (Perfect) Production of a, in a Nutritionally Deficient Mutant of Pathogenic *Fusarium oxysporum* after Ultra-violet Irradiation (E W Buxton), 1258
Stages (Different), of their Development Antibacterial Substances of Coniferous Seedlings at (R Vamos and L Vida), 915
Stages (Main), of Social Evolution in Man (Dr Max Pettersson), 481
Stagg, Dr J M Auroral Frequency Lines, 262
  Elected president for 1959-60 of the Royal Meteorological Society, 1108
Staggers (*Phalaris*) Blood Acetylcholinesterase in (Dr D J Walker), 1411
Stahmann, Prof M A, and others Immunochemical Studies of Polypeptidyl Proteins and Synthetic Polypeptides, 549
Staining of *Hevea* Latex Ultracentrifugation and (G F J Moir), 1626
Staining (Silver) Action of Ribonuclease on Nerve Axoplasm as Demonstrated by (R K Winkelmann and Robert W Schmit), 553
Stainless Steel (Austenitic) Chromium Distribution around Grain Boundary Carbides found in (B E Hopkinson and K G Carroll), 1479
Stainsby, Dr G Gelation (The Mechanism of Gelation), 863
Stamm, Dr Otto Awarded a Swiss Fellowship in Chemistry for 1959-60 by the Ramsay Memorial Fellowships Trustees, B A 16
Stamp, Prof L Dudley More Land-Use Planning, 27
Standard (Time) An Improved Caesium Frequency and (Dr L Essen and J V L Parry), 1791
Standard Clots (Human) Urokinase-Induced Fibrinolysis of (Dr Kuro N von Kaulla), 1320
Standards, United States National Bureau of *Journal of Research* to be published in four separate Sections, 319
  Handbook 69, Maximum Permissible Body Burdens and Maximum Permissible Concentrations of Radionuclides in Air and in Water for Occupational Exposure, 939
Standards Organization, International First Meeting of Technical Committee No 93, 514

Standing Crops (Marine) Proximate Analysis of (Dr T R Parsons and Dr J D H Strickland), 2038
Standley, Dr K J Appointed to a readership in physics in the University of Nottingham, 410
Standley, Paul C, and Steyermark, Julian A Flora of Guatemala, 771
Stanković, Dr V, and Sestan, N Effect of Whole-body X-Irradiation on the Insulin Resistance of Fasted Rats, 1816
Stanley, Dr E Principles of Modern Physics, *review*, 1438
Stanley, Dr J S Alkali Ion Determinations by means of Glass Electrodes (Application of Glass Electrodes responsive to Sodium to the Study of Micelle Formation in Solutions of Paraffin Chain Salts and Dyestuffs), 1617
Stanley, Dr Wendell M Appointed chairman of the Department of Virology in the University of California, 26
Stannius from Winter Flounder (*Pseudopleuronectes americanus*) Failure of Corpuscles of, to Synthesize Adrenocorticosteroids *in vitro* (Dr J G Phillips and Dr P J Mulrow), 558
Stapel, Chr, and others Recognition of Diseases and Pests of Farm Crops, *review* by F C Bawden, 1258
Staphylocoagulase Inhibition by Pooled Human Gamma-Globulin (Prof Murray M Streitfeld, Prof Bennett Sallman and Seymour M Shoelson), 1665
Staphylococcal-free Coagulase Activation of, by Purified Human Prothrombin (G Haughton and E S Duthie), 116
Staphylococci Rate of Appearance of Mutants with Respiration-deficiency in (G F Gause, G V Kochetjova and N A Sorbaeva), 1821
Staphylococci in Normal Human Serum Influence of Coagulase on the Growth of (Dr K Wlodarczek and Dr J Jeljaszewicz), 1514
Staphylococcus albus Growth of *Bacterium coli* and, in Heavy Water (Elizabeth van Horn and Dr G C Ware) 833
Staphylococcus aureus Selective Inhibition of Ribonucleic Acid Synthesis in, by Vancomycin (Prof D C Jordan and W E Inniss), 1894
Staphylococcus aureus and *Micrococcus lysodeikticus* Cell-Wall Mucopeptides of (H J Rogers and H R Perkins), 520
Staphylolysin Some Pharmacological Effects of, on the Isolated Rat Uterus (Dr B Wiegershausen), 2017
Star Catalogues (Astronomische Gesellschaft), 856
Starch Interaction of Anti-Staling Agents with (Prof E J Bourne, A I Tiffin and Dr H Weigel), 547
  Interaction of Sucrose Stearate with (Prof E J Bourne, A I Tiffin and Dr H Weigel), 110
Starch-Gel Electrophoresis Separation of Fast-Moving γ-Globulins by (Dr M D Poulik, Dr W W Zuelzer and Dr R Meyer), 1800
  Separation of Prealbumins by (Dr M D Poulik), 1067
Starch-Gel Electrophoresis of Seminal Plasma, Serum and Bile Visualization of Acid and Alkaline Phosphatase after (Dr Bengt Estborn), 1636
Starch Gel Electrophoretic Patterns Localization of Haemocyanin on (J R Whittaker), 193
Starch Granules (Potato) Physical and Chromatographical Observations of γ-Irradiated (Akira Mishina and Ziro Nikuni), 1867
Stars Structure and Age of the (C B Haselgrove and F Hoyle), 1986
Stars and Man Of (Dr Harlow Shapley), *review* by Dr W L Sumner, B A 3
State Hospitals and the—Hospital Organization and Administration under the National Health Service, Sixth and Final Research Report (Creative Leadership in a State Service—a General Survey by Sir George Schuster), 1087, 1201
State Service Creative Leadership in a—a General Survey (Sir George Schuster), (Hospitals and the State—Hospital Organization and Administration under the National Health Service, Sixth and Final Research Report), 1087, 1201
Static Deformation of Armco Iron Dynamic and (H P Tardif and P Chollet), 1917
Statics Engineering, *review* by T M Charlton, 1674
Statics (Engineering) Elements of (Prof H Deresiewicz), *review* by T M Charlton, 1674
Statistical Methods, *review* by W J Langford, 1523
Statistical Physics (L D Landau and E M Lifshitz), translated from the Russian by E Peierls and R F Peierls, *review* by Dr H Steeple, 664
Statistical Physics Elementary (Prof C Kittel), *review* by Dr G M Bell, 1178
Statistical Reasoning The Fundamentals of (M H Quenouille), *review* by Dr D J Finney, 217
Statistical Review of England and Wales for the Year 1957 Part 2, Tables, Civil (Registrar General), 1107
Statistical Society, Royal Election of Sir Hugh Beaver as president, 26
Statistical Society of New South Wales Publication of the *Australian Journal of Statistics*, 504
Statistical Techniques Principles of (P G Moore), *review* by W J Langford, 1523
Statistics, an Introduction (Prof D A S Fraser), *review* by J Durbin, 1008
Statistics Awards for Study in (University of Chicago), 772
  A First Course in (Robert Loveday), *review* by J Durbin, 1008
  Labour (Ministry of Labour and National Service, Guides to Official Sources, No 1), B A 15
  Marriage and Divorce (Demographic Yearbook 1958, Special Topic), (United Nations), *review*, 1525
Statistics, Australian Journal of (Statistical Society of New South Wales), 504
Statistics relating to Consumption and Refinery Production, 1957 and 1958 United Kingdom Petroleum Industry (Petroleum Information Bureau), 855
Statistics of Extremes (Prof E J Gumbel), *review* by R N Curnow, 754
Statistics in Physics Applications of, *review* by Dr H Steeple, 664
Statistics of Public (Rate Supported) Libraries in Great Britain and Northern Ireland, 1957-1958 (Library Association), 592
Statistics (Divorce), in Britain, 1107
Statistics (Heads-Tails), for Two Partially Distinguishable Coins (Gabriel Weinreich), 1825
Statistics (Morbidity), from General Practice, Vol I, General (Studies on Medical and Population Subjects No 14), (Dr W P D Logan and A A Cushion), 154
Statistics Teaching Trends in, *review* by J Durbin, 1008
Status (Antibody), of Mice and Response of their Litters to Parotid Tumour Virus (Polyoma Virus), (Lloyd W Law, Clyde J Dawe, Wallace P Rowe and Janet W Hartley), 1420
Steady-Rate Universe and the Deduction of Continual Creation of Matter (Prof V A Bailey), 537, (Prof G Bondi) 537
Stearate (Sucrose) Interaction of, with Starch (Prof E J Bourne, A I Tiffin and Dr H Weigel), 110
Stearic Acid in Monolayers Absorbed from Solution Concentration of (George L Gaines, jun), 1139
Steczek, Katalin, and others A New Trichothecin-like Antifungal Antibiotic, 908
Steel, Dr R (edited by) Biochemical Engineering—Unit Processes in Fermentation *review* by Dr N Blakebrough, 1598
Steel Relationship of pH to Aerobic Corrosion Fatigue Life of (Dr Frederick J Radd, L Hugh Crowder and Louis H Wolfe), 2008
Steel in China A History of Iron and, *review* by Prof F C Thompson, 1830
Steel (Austenitic Stainless) Chromium Distribution around Grain Boundary Carbides found in (B E Hopkinson and K G Carroll), 1479
Steel (Mild) Surface-Hardened by Carbo-Nitriding Identification of the High-Temperature Constituent in (M A H Howes, G T F Jay, K Sachs and D Wilkinson), 1312
Steel Technology (Iron and), in China The Development of (Dr Joseph Needham), *review* by Prof F C Thompson, 1830
Steele, Dr J H Polar Front Survey (Hydrography—Shetland–Faroe–Iceland Region), 1181
Steelink, Dr Cornelius Colour Reactions of certain Phenols with Ehrlich's Reagent, 720
Steels during Quenching and Tempering The Phenomena occurring in (Academician G V Kurdjumov), 1450
Steeple, Dr H Applications of Statistics in Physics, *review*, 664
Steers Prof J A Coast Erosion and Accretion, 499
Steger, E H Clay Minerals (Problems in Civil Engineering), 779
Stegwee, Dr D Esterase Inhibition and Organophosphorus Poisoning in the House-Fly, 1253
Stehbens, Dr W E Flow Properties of Biological Systems (Turbulent Conditions in Blood Flow), 1540
Stein, Gabriel (Loeff, Israel, and) Aromatic Ring Opening in the Presence of Oxygen in Irradiated Solutions, 901
Steinbach, Marion, and Pejaudier, L The Behaviour of Haptoglobin during Routine Fractionation, 362
Steinberger, R Chemistry of Propellants (Solid Propellants—Properties of Double-Base Forms), 778
Steinbuch, M, and others Modifications in Immunological Behaviour, Electrophoretic Mobility and Colourability of Substituted Human Serum Proteins, 1571
Steinfeld, Dr Julius I A New Approach to Schizophrenia, *review* by Prof Martin Roth, 487
Steinhaus, Edward A, and Smith, Ray F (edited by) Annual Review of Entomology, Vol 4, *review* by Dr P T Haskell, 489
Stellar Associations from Galactic Gas Formation of (Prof Vladimir Vand), 441
Stem Wounds (Apple) *Gloeosporium* in (R O Sharples), 243, (A T K Cooke), 244
Stendall, J A S Science by the Upper Form, 596
Stener, Dr Bertil Does an Increase in the Tension in a Ligament elicit Reflex Muscular Responses?, 1495
Stephen, D At the Conference of the Mammal Society of the British Isles (Calving Season of Roe Deer), 30
Stephen, Dr I (Brown, G, and) Clay Minerals (Studies in Iddingsite), 780
Stephen, Dr W I Advanced Analytical Chemistry, *review*, 1525
  Classical Chemical Analysis, *review*, 1756
Stephens, Dr C G Awarded the Verco Medal of the Royal Society of South Australia, 1611, work of, 1611
Stephens, J, and others Unidentified Growth Factors, 271
Stephens, Jack D, and others Macromolecular Components of *Chlorella pyrenoidosa*, 963
Stephenson, P J (Blundell, D J, and) Palaeomagnetism of some Dolerite Intrusions from the Theron Mountains and Whichaway Nunataks, Antarctica, 1860
Stercobilin and *d*-Urobilin Optical Activity of (Prof C H Gray, P M Jones, Dr W Klyne and Dr D C Nicholson), 41
Stereochemical Properties Photochemical and, of Carotenoids at Low Temperatures (Staff of the Biological Laboratories of Harvard University)—Photochemical Behaviour of Retinene (Dr Lawrence Jurkowitz), 614, *Cis-trans* Isomerism and Steric Hindrance (John N Loeb, Paul K Brown and Prof George Wald), 617, Discussion (Prof George Wald) 620
Steric Aspects of the Chemistry and Biochemistry of Natural Products (Biochemical Society Symposium on), 947
Steric Effects in Conjugated Systems—Proceedings of a Symposium held at the University, Hull, 1958, by the Chemical Society (edited by Dr G W Gray), *review* by Dr G Eglinton, 1522
Steric Effects in Organic Molecules, *review* by Dr G Eglinton, 1522
Steric Hindrance *Cis-trans* Isomerism and (Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures), (John N Loeb, Paul K Brown and Prof George Wald), 617
Sterility in *Lathyrus odoratus* L (Dr J R Ellis and M A Burton), 204
Sterkfontein A Bone Implement from (Dr J T Robinson), 583
Sterling (Sir Louis) Premium of the British Institution of Radio Engineers awarded to Dr A van Weel, 857
Stern, H, and others Fine Structure in Cells of Pea and Wheat Embryos, 505
Stern, Dr Marvin (edited by Morton Alperin and) Vistas in Astronautics—First Annual Air Force Office of Scientific Research Astronautics Symposium, *review* by D G King-Hele, 663
Stern, Dr Marvin (Gamow, Prof George, and) Puzzle-Math, *review* by Prof T A A Broadbent, 217
Stern, Max H, and others Isomers of Vitamin A in Fish Liver Oils, 1377
Stern, T W, and others α-Radioactivity of Cerium-142, 630
Sternoberflachen-Doppelsterne (Handbuch der Physik, herausgegeben von S Flugge, Band 50, Astrophysik I), *review* by Prof R O Redman, B A 3
Steroid Metabolism in Different Tissues and Subcellular Fractions Distribution of Enzyme Systems responsible for (Virendra B Mahesh and Frank Ulrich), 1147
Steroids applied on Paper Use of Porter–Silber and Schiff Reagents as Spot Tests for, and their Application to the Study of Rat Adrenal Lipids (Dr Marion K Birmingham), B A 67

Steroids and related Compounds Effect of, on the Growth of Dermatophytes (Dr F W Chattaway, J D Townsley and A J E Barlow), 1731
Steroids (Adrenocortical) Biosynthesis and Secretion of (Biochemical Society Symposium on), 415
Sterol-Balance Experiments in Humans (Dr Harald Schon), 1872
Sterol Glycosides in Oilseed Phospholipids (Dr Francis Aylward and B W Nichols), 1319
Steuer, Robert O, and Saunders, J B de C M Ancient Egyptian and Cnidian Medicine, *review* by Dr Douglas Guthrie, 662
Steven, Prof H M, and Carlisle, A The Native Pinewoods of Scotland, *review* by Prof E W Jones, 133
Stevens, Dr B Energy Transfer with special reference to Biological Systems (Vapour Phase), 689
Stewart, C M, and others Possible Role of Glycerol in the Winter-Hardiness of Insects, 288
Stewart, Dr C P Elected president of the Association of Clinical Biochemists, 857
Stewart, Doreen L (Brown, F, and) Effect of Proflavine on the Formation of Virus of Foot-and-Mouth Disease and its Infective Ribonucleic Acid in Pig Kidney Tissue Culture Monolayers, B A 74
Stewart, J W Appointed to the University of London readership in haematology at Middlesex Hospital Medical School, London, 595
Stewart, P, and others Effects of Irradiation of Nerve on Muscular Response, 734
Stewart, Dr R D, and others Post-Exposure Analysis of Organic Compounds in the Blood by a Rapid Infra-red Technique, 192
Stewart, Prof R W, and others A Spectrum of Turbulence at Very High Reynolds Number, 808
Stewart, Air Commodore W K Behaviour in Conventional and Extra-Terrestrial Flight, 578
Stewart, W N Origin and Dispersal of Flowering Plants (Proposal that Conrad's Monophyletic Classification of Vascular Plants be revived), 1200
Steyermark, Julian A (Standley, Paul C, and) Flora of Guatemala, 771
Stibbs, Dr D W N Appointed to the Napier chair of astronomy in the University of St Andrews, 768, work of, 768
Stich, H F, and Emson, H E Aneuploid Deoxyribonucleic Acid Content of Human Carcinomas, 290
Stich, H F, and others Chromosome Complement of Spontaneous Leukaemia in AKR Mice, 998
Stickland Dr L H (Laws, Dr J O, and) Changes in Adenosine Di- and Tri-phosphate Concentrations in the Early Stages of the Action of Yeast on Glucose, 1246
Stiles, Dr W S Colour Reproduction, *review*, 1092
Stimulants (New Brain-Stem) N-Substituted 7-Methoxy-8-Aminomethylchromones and Flavones— (P Da Re, L Verlicchi, Dr I Setnikar, W Murmann and M J Magistretti), 362
Stimulated Animals (Control and) Quantitative Assay of Compounds in Isolated, Fresh Nerve Cells and Glial Cells from (Prof Holger Hydén), 433
Stimulation (Olfactory) A Specific Response in the Hippocampus of the Rabbit to (B G Cragg), 1697
Stimulation (Sexual) Influence of, on the Metabolic Activity of Deoxyribonucleic Acid in the Seminal Vesicle (Dr S R Pelc), 1414
Stimulatory Effect of Foreign Compounds on Ascorbic Acid Biosynthesis and on Drug-Metabolizing Enzymes (Dr A H Conney and Dr J J Burns), 363
Stipitatonic and Puberulonic Acids Tropolone Biosynthesis—the Enzymatic Decarboxylation of (Prof Ronald Bentley and Clara P Thiessen), 552
Stirling, Dr C J M Appointed lecturer in organic chemistry at Queen's University, Belfast, 322
Stjarne, L (Bygdeman, M, and) Effects of 1,4-Dihydrazinophthalazine on Organ Content and Adrenal Medullary Secretion of Catechol Amines, 1646
Stjarne, L, and Schapiro, S Effects of Reserpine on Secretion from the Denervated Adrenal Medulla, 2023
Stochastic Processes Fluctuation Phenomena and (Physical Society Conference on), 509
Stochastic Rectification of Non-linear Clocks (David G Kendall), 1476
Stockbridge, H C (Renbourn, Dr E T, and) Ergonomics, its Place in Industry (Activities in the Clothing and Stores Experimental Establishment of the Ministry of Supply), B A 21
Stocker, Dr B A D, and others Production of Colicine by Single Bacteria, 337
Stoddart, J L Floral Initiation and its Relationship to Growth-Stage in Red Clover (*Trifolium pratense* L), 559
Stoicheiometric Gas Hydrates Some (Dr D N Glew), 545
Stoichiometry of Bismuth Telluride and related Compounds (G Offergeld and J van Cakenberghe), 185
Stoker, Prof M G P, and others Statement on Biological and Chemical Warfare, 1018
Stokes, Dr A R Fluctuation Phenomena and Stochastic Processes (Light Scattering by Semi-stiff Chain Molecules), 510
Stolk, Prof A Effect of Thiouracil and Thyroxine on Development and Growth of Cutaneous Melanoma in Killifish Hybrids, 562
  Glaucoma Species in the Central Nervous System of the Carp, 1737
  Development of the Yolk Nucleus in the Oocytes of some Fishes, 1746
Stolpe, C v d (Kroon, D J, and) Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 158
Stomach Contents of Spawning Quinnat Salmon (J S Bullivant), 71
Stomoxys Control in Uganda, East Africa (H C M Parr), 829
Stone, Dr F S Heterogeneous Catalysis, *review*, 1974
Stone, Dr F S (edited by D H Everett and) The Structure and Properties of Porous Materials—Proceedings of the Tenth Symposium of the Colston Research Society held in the University of Bristol, 1958, *review*, 1525
Stone Implements from Western Nigeria (E L Kostick, C N Williams and S A Williams), 124
Stonehill, Prof H I Visual Illustration of University Lectures (Use of Television as a Medium of Instruction at College- and University-level in the United States), 516
Stoner, Prof E C Aspects of Solid State Physics, *review*, 1753
Storage of Peas A Chemical Effect of Ethylene during the (Prof Frank A Lee), 462
Storage (Food) Infestation Control, a Service to Agriculture and (Ministry of Agriculture, Fisheries and Food), 941
Storage (Vitamin A), in the White Rat Effect of 'Amino-Acid Imbalance' on Growth and (M Rechcigl, jun, S Berger, J K Loosli and H H Williams), 1404
Storey D J Appointed lecturer in electrical engineering at the University of Bristol, 1613
Storm (Cosmic-Ray), of February 11, 1958 North-South Anisotropy and Anticipatory Increase of Intensity associated with the (Dr V Sarabhai and R Palmeira), 1204
Storvick, T M Thermodynamics (Phase Changes in Condensed Systems), 1609
Story of Flight The (Victor Wall), 1535
Stothert Research Fellowships of the Royal Society awarded to W D Butt, R A Webster and to J A Hunt), 595
Stott, Alderman F J At the Annual Conference of the Library Association (The Public Library as a Major Instrument of Education), 1456
Stout, J W Thermodynamics (Phase Changes in Condensed Systems), 1609
Stover, Dr R H A Rapid and Simple Pathogenicity Test for Detecting Virulent Clones of *Fusarium oxysporum* f *cubense* using Seedlings of *Musa balbisiana*, 1591
Stow, R L Titanium as a Gettering Material, 542
Strain, Harold H and others Chloroplast Pigments of Deuterated Green Algae, 730
Strain (An Attenuated), of Canine Distemper Virus in Tissue Culture (Prof Gunnar Rockborn), 822
Strain (Non-Gummy Chromogenic), of *Azotobacter vinelandii* (J A Bush and Prof P W Wilson), 381
Straining Clays Swelling Forces in (E L Greacon), 1695
Strains of *Brucella* Organisms Bacteriophage Typing applied to (Prof G C van Drimmelen), 1079
Strains (Low- and High-Temperature), of *Chlorella* Tabular Comparative Data for the (Dr Constantine Sorokin), 613
Strains (Sensitive), of the Blue Tick, *Boophilus decoloratus* Contents of Cystine-Cysteine, Glutathione and Total Free Sulphydryl in Arsenic-resistant and (Dr J S Harington), 1739
Strains (*Streptomyces erythreus*) An Electron-Microscopic Study of Spores of Morphological Variants of (L Dolezilova, Z Vanek and O Kralik), 1888
Strains (Tomato and Banana), of *Pseudomonas solanacearum* Comparison of Slime from (Dr W F Dudman), 1969
Strange, R E (Powell, the late Joan F, and) Synthesis of Dipicolinic Acid from *αε*-Diketopimelic Acid, 878
Strangways-Dixon, J Hormonal Control of Selective Feeding in Female *Calliphora erythrocephala* Meig, 2040
Stranks, Dr D R (Grossbard, Dr Erna, and) Translocation of Cobalt-60 and Caesium-137 by Fungi in Agar and Soil Cultures, 310
Strategy of Chemotherapy—Eighth Symposium of the Society for General Microbiology, 1958 (edited by S T Cowan and E Rowatt), *review* by Prof H Berry 133
Stratigraphy Tanganyikan, 1688
Stratton, Dr F, and Renton, Dr P H Practical Blood Grouping, *review* by Dr R A Zeitlin, 130
Strawberries Chemical Control of Eelworms in (R S Pitcher), 25
Strawberry Effect of Gibberellic Acid on the Initiation of Flowers and Runners in the (P A Thompson and C G Guttridge), B A 72
Strawberry Plants Transmission of a Virus to, by a Nematode (*Xiphinema* sp), (Asharfi Jha and Dr A F Posnette), 962, *erratum*, 1192
Streams (Photon) Fluctuations in (Dr Peter Fellgett, Dr R Clark Jones and Dr R Q Twiss), 967, (Dr C W McCombie), 969
Street, Prof H E (Vaidyanathan, C S, and) A Non-Dialysable Inhibitor of Glutamo-Transferase present in Excised Tomato Roots, 347
  Nitrate Reduction by Aqueous Extracts of Excised Tomato Roots 531
Streeter, D T Awarded a Nature Conservancy Research Studentship for postgraduate training in ecology (botany), 156
Streitfeld, Prof Murray M, and others Staphylocoagulase Inhibition by Pooled Human Gamma-Globulin, 1665
Strength of a Grooved Stud (D C Herbert), 897
Strength of Glass Fibres (J G Morley), 1560
Strength (Acid), of Propionate Side-Chains of Haematin Decrease in, on Reduction to Haem (Dr J E O'Hagan), 1808
Strength Impairment Mechanism of Glass in Aqueous Systems (Frederick J Radd and Donald H Oertle), 976
Streptococcal Protoplasts Formation of Streptolysis S by (Dr Yoshiharu Maruyama, Sadaka Sugai and Prof Fugio Egami), 832
Streptococci (Group D) Group and Typespecific Polysaccharides of (Dr S D Elliott), 1342
Streptococcus bovis Formation of Leucrose in Dextran-producing Cultures of (R W Bailey and Prof E J Bourne), 904
Streptolysin S Formation of, by Streptococcal Protoplasts (Dr Yoshiharu Maruyama, Sadako Sugai and Prof Fugio Egami), 832
Streptomyces Cytochrome System of (Dr D J Niederpruem and Dr D P Hackett) 1954
Streptomyces erythreus Strains An Electron-Microscopic Study of Spores of Morphological Variants of (L Dolezilova, Z Vanek and O Kralik), 1888
Streptomycin Solutions Influence of, on the Interaction between the Agglutinating Sera and the Corresponding Red Blood Cell Receptors (Dr M Kout and Dr Z Kubickova), 639
Streptomycin and Dihydrostreptomycin Interaction of, with Apo- and Co-dehydrogenases (Prof K Michalska), 987
Stretton, A O W (Ingram, Prof V M, and) Genetic Basis of the Thalassaemia Diseases, 1903
Striated Muscle A Peripheral Effect of the Bromide Ion on the Contraction of (Dr D K de Jongh and H A Linnewiel), 1240
Strickland, A H Biological Problems arising from the Control of Pests and Diseases, 1101
Strickland, Dr J D H (Parsons, Dr T R, and) Proximate Analysis of Marine Standing Crops, 2038
Striga An Insect attacking (C N Williams and G H Caswell), 1668
Striga Seedlings Action of Inhibitor-*β* on the Growth of (C N Williams), 1577

Stringer, J D Appointed a lecturer in mechanical engineering at the University of Sheffield, 684
Strnad, R (Bridges, T, and) Electron Bombardment Floating-zone Melting and Allied Electron Bombardment Techniques (Zone Melting of Single-crystal Sapphire Rod 0 1 in in Diameter), 692
Stroma Role of, in Haemoglobin Synthesis—Experiments on Duck Red Cells *in vitro* (A Breccia, A L Fantola, E Lazzarini and A Giustina), 1878
Strong, Dr H M, and others Preparation of Diamond, 1094
Strong, Dr John Concepts of Classical Optics, *review* by Dr J E Geake, 130
Strong Pulses of Ionic Current Effects of the Energy of, on Micro-organisms in Suspension (B S Gossling), 1881
Strontium' (Anomalous 'Common), in Granite (W Compston and Dr P M Jeffery), 1792
Strontium-90 in the Australian Environment, 1957-58 (Dr F J Bryant, L J Dwyer, Dr J H Martin and Prof E W Titterton), 755
Strontium-90 in Human Diet in the United Kingdom (Agricultural Research Council), 1111
Strontium-90 in Rats Attempts to Modify the Normal Metabolism of (Dr V Volf), 1401
Strontium and Caesium Removal of, from Milk (Dr B B Migicovsky), 374
Strontium-90, Strontium-89 and Caesium-137 Levels in Milk Current Trends of (W Anderson, L K Burton and J O Crookall), 89
Strontium Content of Milk Implications of Restricting Cows to a Clover-free Diet in order to Reduce the (Dr David Purves), 1408
Stross, Dr Barnett Museums and Finance, 598
Stross, F H, and others Carrier Gas and Sensitivity in Gas Chromatography, B A 54
Structural Effects of Kinetic Heating (Royal Aeronautical Society Discussion on), 30
Strovilas, N G, and others Effect of the Potassium Salt of Gibberellic Acid on the Growth and Reproduction Rate of *Paramecium multimicronucleatum*, 1405
Structural Analysis Linear (Prof P B Morice), *review* by R K Livesley, 1600
  Matrix Algebra in, *review* by R K Livesley, 1600
Structural Defects in Fused and Crystalline Silica (Dr W C Levengood), 1476
Structural Elements of the Bacterial Cell Affinity of Lysozyme to, studied with Enzyme Labelled with Radioactive Iodine (Prof C Weibull, B Zacharias and H Beckman), 1744
Structural Model for Monatomic Liquids including Metallic Liquids (Dr Kazuo Furukawa), 1209
Structural Relations Estimation of Linear and Non-Linear (D E Barton and C L Mallows), 1086
Structure of Bituminous Coals—Evidence from Distribution of Hydrogen (Dr P H Given), 980
Structure of British Industry, a Symposium (edited by Duncan Burn), *review* by Prof A J Brown, 1089
Structure of Cellobiose (Robert A Jacobson Jeffrey A Wunderlich and Prof William N Lipscomb), 1719
Structure of Glass—Proceedings of a Conference held at Leningrad, 1953 (translated from the Russian by E B Uvaroc), *review* by Prof R W Douglas, 134
Structure of α-Hydroxyacetylene Complexes of Platinum (II), (Dr J Chatt, L A Duncanson and R G Guy), 526
Structure of a Melanocyte-stimulating Hormone from the Human Pituitary Gland (Dr J Ieuan Harris), 167
Structure of Precipitated Cadmium Sulphide as studied by Single-Crystal Electron Diffraction Pattern (Dr Ryoitiro Sato), 2005
Structure of Ribonucleic Acid Inactivation of some Animal Viruses by Hydroxylamine and the (Dr Richard M Franklin and Dr Eberhard Wecker), 343
Structure of Science (Wistar Institute of Anatomy and Biology Symposium on), B A 6
Structure of Teichoic Acid from the Walls of *Bacillus subtilis* (Teichoic Acids from Bacterial Walls), (J J Armstrong, Prof J Baddiley and Dr J G Buchanan), 248
Structure of Thymine Hydroperoxide produced by X-Irradiation (B Ekert and R Monier), B A 58
Structure (Crystal), of L-Serine Phosphate (G H McCallum, Prof J Monteath Robertson and Dr G A Sim), 1863
Structure (Dense Laminar), found in Conjection with Cell Membranes in the Anterior Pituitary Gland (Barbara G Barnes), 651
Structure (Electron-Microscopic), of the Sensory Hairs in the Cristae of the Elasmobranch *Raja clavata* A Functional Interpretation of the, in Terms of Directional Sensitivity (Prof O Lowenstein and J Wersall), 1807
Structure (Electron Microscopical) of the Wall of Small Blood Vessels in Human Multiform Glioblastoma (Dr S H M Nystrom), 65
Structure (Financial), of the Colonial Development Corporation Report of the Committee of Enquiry into the 1520
Structure (Fine), in Cells of Pea and Wheat Embryos (G Setterfield, H Stern and F B Johnston), 505
Structure (Fine), of Enhanced Solar Radio Radiation Observations of the, with a Narrow-Band Spectrum Analyser (Oystein Elgaroy), 887
Structure (Fine), in Muscle Ionic Partition and (Dr Shirley E Simon), 1978
Structure (Mitochondrial) Cytochemical Study of (Prof C H Chopra), 656
Structure (Nuclear), of Growing Naked Protoplasts of Yeast (Dr O Nečas), 1664
Structure (Possible Simplified), of Deoxyribonucleic Acid (Dr M H Silk and A O Hawtrey), 1484
Structure (Secondary), in Proteins exposed to Ionizing Radiations in the Solid State Disorganization of the (Dr Peter Alexander, L D G Hamilton and Dr K A Stacey), 226
Structure (Secondary), of Ribonucleic Acid in Solution (Dr R A Cox and Dr U Z Littauer), 818
Structure (Ultra-) Comparative Studies in (Linnean Society of London Symposium on), 1445
Structure (Ultra-), of the Myoneural Junction in Myasthenia Gravis (E R Bickerstaff, J V Evans and A L Woolf), 1500
Structure and Age of the Stars (C B Haselgrove and F Hoyle), 1986
Structure and Chemistry of Proteins (Commonwealth Scientific and Industrial Research Organization Symposium on), 1275
Structure and Physical Properties of Materials Relationship between (Non-Destructive Testing Group of the Institute of Physics and the Societe Française de Metallurgie Discussion on), 1688
Structure and Properties of Porous Materials—Proceedings of the Tenth Symposium of the Colston Research Society held in the University of Bristol, 1958 (edited by D H Everett and F S Stone), *review*, 1525
Structure Analysis and Experimental Techniques (Institute of Physics Conference on), 857
Structure Discontinuity (Weld) Crack Behaviour at a (F J Radd), 543
Structures of Metals and Alloys A Handbook of Lattice Spacings and (Dr W B Pearson) *review* by Dr J A Catterall, 841
Structures (Embryo Sac-like), in the Microsporangia of *Leptomeria billardierii* R Br Occurrence of (Dr Manasi Ram), 914
Structures (Welded) Fatigue of (British Welding Research Association and the Engineering Department of the University of Cambridge Symposium on), 1915
Struve, Prof Otto Appointed the first director of the United States National Radio Astronomy Observatory, B A 14, work of, B A 14
Stuart, Dr A E Awarded a grant by the Lady Tata Memorial Trust, for research on Leukaemia and allied Diseases, 507
Stud (Grooved) Strength of a (D C Herbert), 897
Students, National Union of 1959 Grants Year Book, 770
Studentship (Postgraduate Research) founded by the Phillips Petroleum Co at University College of North Staffordshire, 322
Studentship (a second Postgraduate Research) founded by the United States Rubber Co at University College of North Staffordshire, 322
Studentships (Research), for postgraduate training in Ecology (Nature Conservancy Awards for 1959), 156
Studentships and Scholarships (Royal Commission for the Exhibition of 1851 Awards), 409
Studies New Floristic, 409
  Nuclear (Science Department of the British Council third list of), 235
Studies of Coal (Staff of the British Coal Utilisation Research Association) —Carbonization of Coals in the Presence of Activated Charcoal (R L Bond, A M Godridge, A R Murnaghan, D H Napier and D J Williams), 425 Smoke Emission from Coal and Low-Temperature Chars (D Finch), 426
Studies on Fertility, including Papers read at the Conference of the Society for the Study of Fertility, London 1958 (edited by Prof R G Harrison), *review* by Dr T Mann, 1434
Studies in the History and Methods of the Sciences (Prof Arthur David Ritchie), *review* by Prof A V Hill, 4
Studies in Invertebrate Morphology, in honor of Dr Robert Evans Snodgrass on the occasion of his eighty-fourth Birthday (Smithsonian Institution, Miscellaneous Collections Vol 137), 591
Studies of Noise Problems Recent (Acoustics Group of the Physical Society Symposium on), 414
Studies in Recreation, 1034
Studies on Social Groupings in Fishes (Dr C M Breder, Jr), 865
Studies of its Surface Properties Evidence for a Hydrate of Cellulose from (Dr J M Joubert, Dr G J R Krige and Dr K Borgin), 1561
Studies (Comparative), in Ultrastructure (Linnean Society of London Symposium on), 1445
Studies (Crystallographic), of the Biuret Reaction (Dr H C Freeman, J E W L Smith and J C Taylor), 707
Studies (Dielectric), on Deoxyribonucleic Acid (H G Jerrard and B A W Simmons), 1715
Studies (Five), in the Efficient Communication of Skills New Developments in Training— (edited by Frank A Heller), 421
Studies (Graduate) A University of (Dr Detlev W Bronk), 86
Studies (Immunochemical) of Polypeptidyl Proteins and Synthetic Polypeptides (Prof M A Stahmann, D J Buchanan-Davidson, Dr C Lapresel and Dr P Grabar), 549
Studies (Metabolic and Chemical), of 'Myleran'—Formation of 3-Hydroxytetrahydrothiophene-1,1-dioxide *in vivo*, and Reactions with Thiols *in vitro* (Dr J J Roberts and Dr G P Warwick), 1288
Studies (Palaeomagnetic), of Cenozoic Volcanic Rocks in New Zealand (Dr D S Coombs and Dr T Hatherton), 883
Studies (Rocket), of Emissions caused by Solar Flares (United States National Science Foundation Grant), 406
Study of Corrosion, 1023
Study of Fertility, Society for the Proceedings, Vol 10, Studies on Fertility, including papers read at the Conference, London 1958 (edited by Prof R G Harrison), *review* by Dr T Mann, 1434
Study of Fungal Spore Morphology 'LO-Analysis' as an Aid in the (Dr M M Payak) 738
Study of Man, B A 1
Study based on Mortality Rate and Tumour Incidence Latent Period of X-Ray Induced Ageing—a (Dr H I Kohn and Dr P H Guttman), 735
Study of Organic Reactions Tracer Applications for the (John G Burr, Jr), *review* by Dr A I Scott, 1902
Study of Population (edited by Philip M Hauser and Otis Dudley Duncan), *review* by Dr B Benjamin, 1521
Study of the Preservation and Restoration of Cultural Property, International Centre for the Inauguration of the, 504
  Appointment of Dr H J Plenderleith as first director, 504
Study of Rat Adrenal Lipids Use of Porter–Silber and Schiff Reactions as Spot Tests for Steroids applied on Paper and their Application to the (Dr Marion K Birmingham), B A 67
Study of the Solubility of Water in Hydrocarbons Use of Tritium to (B D Caddock and P L Davies), 2011
Study in Statistics Awards for (University of Chicago), 772
Study (Cytochemical), of Mitochondrial Structure (Prof C H Chopra), 656
Study (Electron-Microscopic), of Spores of Morphological Variants of *Streptomyces* erythreus Strains (L Dolezilova, Z Vanek and O Kralik), 1888
Study (Histochemical), of Monoamine Oxidase in the Developing Rat Brain (Nobuo Shimizu and Nogaaki Morikawa), 650
Study (*In vitro*), of the Anthelminthic Property of *Artemesia monosperma* grown in Egypt (A Sharaf, Z F Ahmed and F Abdel Moneim), 647
Study (Kinetic), of Dextransucrase based on the Langmuir Adsorption Isotherm (W Brock Neely and C F Thompson), B A 64
Study (Mineralogical), on Clays of Japan (Dr Toshio Sudo), *review* by Dr D M C MacEwan 1439

Study (The Proper) of Mankind is Man (Sir James Gray), B A 35
Study (Quantitative), of the Surface Precipitation Reaction A Method for the (Francis T Ashton), 1735
Study (Radiochemical Tracer), of the Relative Stability of the Halogenoplatinates (A J Poe and M S Vaidya), 1139
Study (Solid State Rheological), of the Mechanism of Paraffin-Detergent Interactions in Aqueous Systems (F J Radd and L H Crowder), 443
Study (X-Ray), of Rigid-Body and Internal Vibrations of Organic Molecules (Dame Kathleen Lonsdale and Dr H Judith Milledge), 1545
Studying the Functioning of the Lungs A New Method for (Helge Colldahl, T Alväger and J Uhler), 372
Studying Tumour Blood Supply A Rapid Method for, using Systemic Dyes (Dr R J Goldacre and Dr B Sylven), 63
Stull, D R Thermodynamics (Phase Changes in Condensed Systems), 1609
Stumpf, Dr Paul K (Neilands, Dr J B, and) Outlines of Enzyme Chemistry, second edition, *review* by Dr Edwin C Webb, 1759
Sturge, Ltd, John and E, Birmingham New Research Laboratories of, 1985
Styles, Edward C C (Blain, Dr John A, and) A Lipoperoxidase Factor in Soya Extracts, 1141
Subcellular Fractions Distribution of Enzyme Systems responsible for Steroid Metabolism in Different Tissues and (Virendra B Mahesh and Frank Ulrich), 1147
Subcutaneous Absorption of Urethane in Dehydrated and Fasted Mice (Eigill Hvidberg and Jens Schou), 646
Subcutaneous Thymus Grafts in Thymectomized Mice Inoculated with Leukaemic Filtrate Fate of (J F A P Miller), 1809
Subdivision (Population) Genetical Effects of (P A P Moran), 505
Sub-Genic Mutants in the *r*-Locus of *Drosophila melanogaster* Complementation among the (Dr O G Fahmy and Dr Myrtle J Fahmy), 1927
Subjective Light Pattern Spectroscopy in the Encephalographic Frequency Range (Prof M Knoll and J Kugler), 1823
Subjective Phenomena (Some New), apparently due to Interocular Transfer (Ian P Howard), 1516
Sub-Lethal Doses (Lethal and), of Cottonmouth Moccasin Venom labelled with Iodine-131 Distribution in the Mouse of (Prof J F Gennaro, jun, and H W Ramsey), 1244
Sub-Micro Titration of Derivatives containing Nitro Groups Quantitative Paper Chromatography based on the (L Blom and J Caris), 1313
Sub-Micron Multiple Fibres High-Resolution Fibre Optics using (Dr N S Kapany), 881
Subramanyan, M K Biochemical Research in India (Studies on the Cytology of Yeast), 1367
Subrahmanyan, Dr V Biochemical Research in India, 1367
Subrahmanyan, Dr V, and others Insecticidal Effects of Activated Charcoal and Clays, 1165
Subramaniam, A P A Re-Interpretation of Charnockites, 321
Subsequent Specific Infection of Mice Immunization with Biologically Active Fractions of Deoxyribonucleic Acid and (Dr M Kohoutova), 1965
Substance and Shadow, *review* by Prof R V Jones, 1752
Substance (Antifungal), 6-Methoxybenzoxazolinone Isolation of the, from Field Corn (*Zea mays* L) in Canada (N J Whitney and C G Mortimore), 1320
Substances Plant Growth (Prof L J Audus), second edition, *review* by Prof R L Wain, 925
Substances Inhibiting the Oxidation of Ascorbic Acid Presence in Rose Hips of (Dr G A D Jackson and R B Wood), 902
Substances (Added) Effect of, on the Rate of Reductive Photo-bleaching (Reductive Photo-bleaching of Eosine), (Kengo Uchida, Shunji Kato and Masao Koizumi), 1620
Substances (Antibacterial), of Coniferous Seedlings at Different Stages of their Development (R Vamos and L Vida), 915
Substances (Antigenic) Coating of Red Blood Cells with (Dr K Deutsch) 278
Substances (Interfering), in the Determination of Glucosamine Synthesis (Dr Fiorenzo Paronetto), 1317
Substances (Plant-Growth), and the Copper Chelating Theory of their Mode of Action (Dr C H Fawcett), 796
N-Substituted 7-Methoxy-8-Aminomethylchromones and Flavones—New Brain-Stem Stimulants (P Da Re, L Verlicchi, Dr I Setnikar, W Murmann and M J Magistretti), 362
2-Substituted Thiadiazoles Reversal of Effects of, by Nicotinamide Analogues and Precursors (Dr Irwin H Krakoff, Corrine R Lacon and Dr David A Karnofsky), 1805
Substituents (Borazole) Intermolecular Distances and Diamagnetic Anisotropy in Crystals as Measures of the Polarity of Benzene and (Dame Kathleen Lonsdale), 1060
Substituted Human Serum Proteins Modifications in Immunological Behaviour, Electrophoretic Mobility and Colourability of (M Steinbuch, Dr J M Fine and A Battistini), 1571
Substituted Phenoxy-Compounds and other Translocated Herbicides Effects of, on the Rhizome of Bracken (Dr Elsie Conway and J A Forrest), 1416
Substitution Aromatic—Nitration and Halogenation (Dr P B D de la Mare and J H Ridd), *review* by Prof M J S Dewar, 925
Substitution at Elements other than Carbon (Sir Christopher Ingold), *review* by Dr R I Reed, 1262
Substrate (Polyphenoloxidase), of the Banana Detection and Identification of the (Dr L A Griffiths), 58
Substrate Damage in Film Thickness Measurement by Beam Interferometry (Prof G David Scott), 354
Substrates (Agar) Maintenance of Parathyroid Tissue Fragments on (Dr John H Wallace, Dr George J Hill, Jean M McCarthy and Dr John R Brooks), 1734
Substrates (O-Phosphorylated and Unphosphorylated Peptide-), suitable for Tryptic Action (Dr D Theodoropoulos, H Bennich and Prof O Mellander), 270
Subudhi, M, and others Propagation of Ultrasonic Waves in Liquids, 352
Succinooxidase (Lung) Effect of Cell-Free Extracts of *Mycobacterium tuberculosis* $H_{37}Rv$ on (Dr A Bekierkunst and M Artman), 458
Sucrose Biosynthesis of some Amino-Acids from, by Germinating Uredospores of Wheat Stem Rust, Race 15*B* (B Kasting, A J McGinnis and W C Broadfoot), 1943
Sucrose Stearate Interaction of, with Starch (Prof E J Bourne, A I Tiffin and Dr H Weigel), 110
Suddaby, Dr A Fluctuation Phenomena and Stochastic Processes (Relation between the Microscopic Theories of Transport Processes developed by Kirkwood and the Macroscopic Theory of Brownian Movement), 511
Sudo, Dr Toshio Mineralogical Study on Clays of Japan, *review* by Dr D M C MacEwan, 1439
Sudperus (Andenabhang) Ein neuer *Asthenes* (Aves Furnariidae) von der Kuste und dem westlichen (Maria Koepcke), (Beitrage zur Neotropischen Fauna), *review* by Dr F A Turk, 1177
Sugai, Sadako, and others Formation of Streptolysin *S* by Streptococcal Protoplasts, 832
'Sugar' Cataract Formation of Polyols by the Lens of the Rat with (Dr Ruth van Heyningen), 194
Sugar Phosphates Periodate Technique for the Identification of (Eugene A Davidson), 1395
Sugar (Blood), and Liver Glycogen Level of Normal and Adrenalectomized Mice Effect of Diet on the (B P Block and Dr G S Cox), 721
Sugars Discrimination of Xylose from Arabinose and some other (B Drozdz), 1395
Sugars of the Glycoside of the Root of *Marsdenia erecta* R Br (Dr T Baytop, Dr M Tanker, Dr N Oner and Dr S Tekman), 1319
Sugars' ('Unnatural) Specific Inhibition of Anti-Rh Serum of (Dr William C Boyd, Marjorie H McMaster and Eugenia Waszczenko-Zacharczenko), 989
Sugawara, Prof K Position and Activities of the Japanese Geochemical Society, 1193
Sugden, Dr T M Reaction Kinetics, *review*, 299
  Free Radicals, *review*, 1259
Suggestions to Authors of the Reports of the United States Geological Survey, fifth edition, *review* by Prof C F Davidson, 390
Sukanya, N K, and Vaidyanathan, C S Biochemical Research in India (Purification and Properties of a Naturally Occurring Inhibitor of Glutamine Synthesis present in *Pongamia* Galls), 1368
Sulebele, G A, and others Pantothenic Acid Deficiency and Ubiquinone Levels in Rat Liver Mitochondria, 1867
Sulkowski, E, and others Cytoplasmic Nucleopeptides in Guinea Pig Liver, 1940
Sullivan, J V At the Second Australian Spectroscopy Conference (Vacuum Spectroscopic Technique—a Double-beam Photoelectric 1m Grating Spectrometer), 1196
Sullivan, Margaret, and others Distribution of 5-Carboxymethylhydantoinase, 1314
Sullivan, R M E (Rose, Dr H E, and) Rapid Estimation of the Specific Surface of a Powder, 46
Sullivan, T, and others A Virus Disease of *Meloidogyne incognita incognita*, the Southern Root Knot Nematode, 1896
Sulphanilamide Effect of, on Citric Acid Production by *Aspergillus niger* (K V Rajagopalan, R Radhakrishnamurthy and P S Sarma), 461
Sulphate Esters (Carbohydrate) Infra-Red Spectra of (Dr G A Lloyd and K S Dodgson), 548
Sulphate (Calcium) Hemihydrate Transition of, to Insoluble Anhydrite (Chikara Mitsuki and Masayoshi Kita), 1481
Sulphates (Chondroitin) Biosynthesis of (J B Adams), 274
Sulphide (Cadmium) Structure of Precipitated, as studied by Single-Crystal Electron Diffraction Pattern (Dr Ryoitiro Sato), 2005
Sulphonamides Effect of, on the Phagocytic Activity of the Reticulo-Endothelial System (Prof T Nicol and I A Sewell), 1241
Sulphonamides with Diuretic Activity (Dr W Logemann, Dr P N Giraldi and Dr M A Parenti), 1711
Sulphonamides (Saluretic) An Antimineralocorticoid Action of some (Dr G C Kennedy and Dr J D Crawford), 1492
Sulphonate (Ethyl Methane) Mutation of Bacteria at High Levels of Survival by (Anthony Loveless and Sheila Howarth), 1780
Sulphonic Acid Stability of Metal complexes of Oxine and its (Prof Adrien Albert and Prof Reino Nasanen), 449
Sulphosuccinate (Dioctyl Sodium) Registration of the Spermicidal Effects of (Prof Per Eric Lindahl and Kjell Wedin), 1289
Sulphur-35 Measurement of the Rate of Growth of Wool using Cystine labelled with (A M Downes and A G Lyne), 1884
Sulphur Bacteria (Red) Amino-Acids of (H Mukherjee), 1742
Sulphur Dioxide Inhalation Influence of, on the Phagocytic Activity of the Macrophage System (Prof D L J Bilbey and Dr H Salem), 722
Sulphydryl (Cystine-Cysteine, Glutathione and Total Free) Contents of in Arsenic-resistant and Sensitive Strains of the Blue Tick, *Boophilus decoloratus* (Dr J S Harington), 1739
Sulphydryl Group in D-Amino-Acid Oxidase Apo-Protein Binding of the, with Flavin Adenine Dinucleotide (Dr Kunio Yagi and Takayuki Ozawa), 1227
Sumatra *Rafflesia arnoldi* in (W Meijer), 506
Sumiki, Yusuke Plant Growth Regulation (Recent Work with the Gibberellins), 600
Summation Visual Spatial and Temporal (Dr Ernest Baumgardt), 1951
Summer School for Science Teachers (Australian Nuclear Research Foundation), 1108
Summer Tanager observed on Bardsey Island, 236
Sumner, Dr W L Science and Literature, *review*, 5
  Stars and Man, *review*, B A 3
  Inside the Living Cell, *review*, 134
  The Two Cultures and the Scientific Revolution, 411
  Science Education, *review*, 923
Sun Lyman-Alpha Photographs of the (J D Purcell, Dr D M Packer and Dr R Tousey), 8
Sunagawa, Dr I Twinning of Crystals (Growth and Natural Etch Patterns observed with a Phase-Contrast Microscope on the Boundaries of Hematite Crystals forming Contact Twins after $(10\bar{1}0)$), 1911
Sundahl, William P (Hellmers, Henry, and) Response of *Sequoia sepervirens* (D Don) Endl and *Pseudotsuga menziesii* (Mirb) Franco Seedlings to Temperature, 1247
Sunigawa, Dr I (Tolansky, Prof S, and) Spiral and other Growth Forms of Synthetic Diamonds—a Distinction between Natural and Synthetic Diamond, 1526
Sunner, S Thermodynamics (Experimental Thermochemistry), 1607

Sunspot Numbers Prediction of, until the End of the Present Cycle (Dr P Herrinck), 51
  Prediction of, for Cycle 20 (Dr W B Chadwick), 1787
Sunspots and Enhanced Radiation on 200 Mc /s Correlation between the Intensity of the Umbra of (Per Maltby), 1391
Sunvic Controls, Ltd To combine with the Instrument and Meter, Scientific Apparatus and X-Ray Departments of Metropolitan-Vickers Electrical Co , Ltd , to form the Instrumentation Division of Associated Electrical Industries, Ltd , 1535
Suolo, Carta della Utilizzazione del Sheets 19 and 20, Calabria (Ferdinando Milone) , Sheets 21, 22 and 23, Sicily (Ferdinando Milone), (Consiglio Nazionale della Richerche, Napoli), 27
Superannuation Difficulties in the Present Systems of, 503
'Supercarbia' in the Anaesthetized Dog (Dr G R Graham, D W Hill and J F Nunn), 1071
Supercontraction and Urea-Bisulphite Solubility Permanent Set,—the Proton-Transfer Nature of some Changes in Keratin and the Analogy with Muscle Contraction (Dr P T Speakman), 339
Supercooling of Water Droplets (P G Fox), 546
Superposition of Crystal Plates between Crossed Polars A Special Case of the, and its Bearing on the Microscopy of Cellulosic Fibres (Dr N H Hartshorne), 179
Supervisors and Managers Management Development, a Systematic Approach to the Provision of (F I de la P Garforth), 319
Supply of Potassium, Calcium and Magnesium Effect on the Groundnut of Variations in (Dr R Comber), 1003
Supply, Ministry of Resignation of Sir Owen Wansbrough-Jones as chief scientist, B A 13
  Promotion of Dr N J L Megson to Deputy Chief Scientific Officer and appointed director of Materials Research and Development (Air), 232
  Promotion of Dr B G Dickins to Chief Scientific Officer and appointed director general of atomic weapons, 232
  Promotion of P A Hufton to Chief Scientific Officer and appointed head of the Aerodynamics Department of the Royal Aircraft Establishment, 233
  Retirement of Dr H Sutton as director of Materials Research and Development (Air), 769
  Appointment of Dr R Cockburn as chief scientist, 938
  Grant not exceeding £1,175 to the University of Oxford, for the continuation of an investigation of fluorocarbohydrates, 943, 1273
  Grant of £1,150 to the Department of Electrical Engineering in the University of Bristol, for research on noise generation in inductors with ferromagnetic cores (continuation of grant), 1613
Supply and Demand (Water), in Great Britain (Prof W G V Balchin), B A 18
Suppression (Immunological) Tumour Specificity and (Elaine Levi, A M Schechtman, Richard S Sherins and Stanley Tobias), 563
Suppression (Pharmacological), of Increased Capillary Permeability following Irradiation of the Intestine of Rats (Dr D A Willoughby), 1156
Surface of the Ocean as a Source of Air-borne Nitrogenous Material and other Plant Nutrients (Dr A T Wilson), 99
Surface (Specific), of a Powder Rapid Estimation of the (Dr H E Rose and R M E Sullivan), 46
Surface-Hardened by Carbo-Nitriding Identification of the High-Temperature Constituent in Mild Steel (M A H Howes, G T F Jay, K Sachs and D Wilkinson), 1312
'Surface Membrane Complex' Dissociation of the, in Atrophic Muscle Fibres (Dr R Birks, Prof B Katz and Dr R Miledi), 1507
Surface Precipitation Reaction A Method for the Quantitative Study of the (Francis T Ashton), 1735
Surface Properties Evidence for a Hydrate of Cellulose from Studies of its (Dr J M Joubert, Dr G J R Krige and Dr K Borgin), 1561
Surface Topography of the Antarctic Ice Sheet (Dr J F Nye), 786
Surface Replication (Fibre), by Rolling (J Mølgaard), 264, 1478 , (H J Woods), 1478
Surface-Water Resources Techniques for Surveying (Prof Ray K Linsley), (World Meteorological Organization, Technical Note No 26), 96, *erratum*, 684
Surfaces Semiconductor (United States Office of Naval Research Second Conference on), 1192
Surfaces (Cathode) Insulating Particles on—their Effect upon Electrical Discharges (L B Griffiths and P C L Pfeil), 1475
Surfaces (Polished Metal) The Nature of (L E Samuels), 1280
Surgery in World War II Neurosurgery, Vol 1 (Colonel John Boyd Coates, editor-in-chief), *review* by J E A O'Connell, 1676
Survey Water-Resources and Water-Use (Dr Alice Garnett), 96, *erratum*, 684
Survey of American and European Working Conditions in Industry Fitting the Job to the Worker—a (European Productivity Agency of the Organization for European Economic Co-operation, Project 335), 422
Survey of Soils in the Kongwa and Nachingwea Districts of Tanganyika (B Anderson), *review* by Dr R M S Perrin, 1901
Survey (Oceanographic), of the Ross Sea (J S Bullivant), 422
Survey (Zoological), of Madagascar (Dr Renaud Paulian), 1387
Surveying Surface-Water Resources Techniques for (Prof Ray K Linsley), (World Meteorological Organization, Technical Note No 26), 96, *erratum*, 684
Surveys in 'Applied' Mathematics, *review* by D G Kendall, 214
Surveys (Air), and the Social Scientist (Leo Silberman), 244
Survival Mutation of Bacteria at High Levels of, by Ethyl Methane Sulphonate (Anthony Loveless and Sheila Howarth), 1780
Survival after a Disaster Food for (Dr R C Hutchinson), *review* by M W Grant, 841
Survival from Experimental Diphtheric Intoxication Effect of Tranquillizing Drugs on (Prof Leo Greenberg and Dr James W Ingalls), 1721
Survival of Frozen Fat Body Cells in an Insect (R W Salt), 1426
Survival of Grasshopper Eggs kept for Long Periods in Mineral Oil (Prof Eleanor H Slifer), 1424
Survival in Intraperitoneal Infections of Mice Opsonins as Determinants of (Dr C R Jenkin and Prof D Rowley), 474
Survival of Spermatozoa following Drying (Dr Harold T Meryman and Emanuel Kafig), 470
Survival of Yeast in Dry and Wet Conditions Effect of X-Radiation on the (A Mookerjee), 1502
Survival (Prolonged), of Dystrophic Mice treated with 17α-Ethyl-19-Nortestosterone (Dr Robert M Dowben), 1966
Susceptibility (Tumour-) Factor in Eggs Differentiation between a Growth-Promoting Factor and a (Charles H Hill and Henry W Garren), 824
Suspected Virus Disease of the Citrus Red Mite *Panonychus citri* (McG), (Dr Kenneth M Smith, G J Hills, F Munger and J E Gilmore), 70
Suspension Effects of the Energy of Strong Pulses of Ionic Current on Micro-organisms in (B S Gossling), 1881
Suspension Stability of Red Blood Corpuscles Effect of Polyphloretin Phosphate on the (Dr Bengt Fries), 62
Suspensions of Parenchymatous Liver Cells Some Enzymatic Properties of (Dr Keith S Henley, Ole Sorensen and H Marvin Pollard), 1400
Sutcliffe, Ltd , Richard Grant of £1,000 to the University of Leeds, for research in mining, 1108
Sutton, Dr D A Appointed director of research of the British Gelatine and Glue Research Association, 318 , work of, 318
Sutton, Dr H Retirement as director of Materials Research and Development (Air) in the Ministry of Supply, 769 , work of, 769
Sutton, Harriet (Elkind, M M , and) X-Ray Damage and Recovery in Mammalian Cells in Culture, 1293
Sutton, Dr Philip R N Association between Colour of the Iris of the Eye and Reaction to Dental Pain, 122
Svet-Moldavskaya, I A , and others Various Types of Acquired Resistance to Experimental 'Allergic' Encephalomyelitis, 1552
Svet-Moldavsky, G J , and others Various Types of Acquired Resistance to Experimental 'Allergic' Encephalomyelitis, 1552
Swainbank, I G , and others Atomic Weight of Silver, 358
Swamp Soil (Uganda) Nitrogen Fixation in a (E A Calder), 746
Swan, J M (Leach, S J , and) Structure and Chemistry of Proteins (Chemistry of Thiols and Disulphides), 1277
Swarming in Bees Electronic Prediction of (E F Woods), 842
Sweat Glands (Cholinergically Innervated) Response of, to Adrenaline and Noradrenaline (Dr David P C Lloyd), 277
Swedenborg Blood Grouping of the Remains of (Madeleine Smith), 867
Swedes Fodder Beet, Mangels and (National Institute of Agricultural Botany Leaflets on), 1777
Sweet, Dr P A Appointed professor of astronomy in the University of Glasgow, 23 , work of, 23
Sweet Cherries (Sour and) Occurrence of Leuco-Anthocyanin in (Dr Kuang C Li), 1935
Sweet Potato Effect of Indole Acetic Acid and α-Naphthalene Acetic Acid on the Growth, Flowering and Fruit Set in (G Satyanarayana and Dr G Rangaswami), B A 73
Swelling of Isolated Mitochondria Effect of Reduced Diphosphopyridine Nucleotide on the (Dr G Di Sabato), *erratum*, 95
Swelling Forces in Straining Clays (E L Greacen), 1695
Swellings on the Shoots of Cacao Plants Deficient in Copper (Dr R G Lockard, P Vamathevan and S Thamboo), 75
Swettenham, Brig N A M (McKenzie, D S , and) Biomechanics (Provision of Workable Substitutes for Missing or Defective Limbs), 513
Swinton, Dr W E Presidential Address at the sixty-fifth Annual Conference of the Museums Association, 597
  Re-elected president of the Museums Association, 598
Swinton, Dr W E , and Allen, Sir George To represent the British Association for the Advancement of Science in a visit to the U S S R , 1271
Swiss Society for Natural Sciences 139th Annual Meeting (Dr R C H Tanner), 1454
  Presidential Address, La science, le savant et le pharmacien (Prof A Girardet), 1454
Sydney (County of Cumberland), New South Wales The Birds of (K A Hindwood and A R. McGill), *review* by Dr A J Marshall, 841
Sykes, Dr J Appointed lecturer in biochemistry at the University of Sheffield, 684
Sykes, Dr M F Fluctuation Phenomena and Stochastic Processes (Methods for the Practical Determination of Parameters in Self-avoiding Walks), 510
Sylven, Dr B (Goldacre, Dr R J , and) A Rapid Method for Studying Tumour Blood Supply using Systemic Dyes, 63
Symbiotic Nitrogen Fixation of Legumes Influence of Temperature on the (the late Prof Margaretha G Mes), 2032
Syme (David) Research Prize of the University of Melbourne awarded to Dr J H Piddington, B A 16
Syme, Ronald Elected an Honorary Member of the American Academy of Arts and Sciences, 410
Symington, Dr Janey, and others Replication of Tobacco Mosaic Virus—Kinetics of Virus Protein and Ribonucleic Acid Biosynthesis, 1992
Symington, R B Light Regulation of Coat-Shedding in a Tropical Breed of Hair Sheep, 1076
Symmons, P M (Gunn, Dr D L , and) Forecasting Locust Outbreaks, 1425
Symmons, Dr S (de Kock, Dr L L , and) A Ligament in the Dorsal Aorta of certain Fishes, 194
Sympathetic Postganglionic Mechanism (Prof J H Burn and M J Rand), 163
Synaptic Function Enhanced, due to Excess Use (Dr Rosamond M Eccles and Dr R A Westerman), 460
Syncarid Crustacea, 1914
Synchrotron Zero Gradient (Argonne National Laboratory), 503
Synchrotron, *Nimrod* (7,000-MeV Proton) Contracts for work on the (National Institute for Research in Nuclear Science), B A 14
Syndrome The Acute Radiation—a Medical Report on the Y-12 Accident, 1958 (compiled by Dr Marshall Brucer), (United States Atomic Energy Commission, Report ORINS-25), 1022
Synge, Dr R L M Awarded a John Price Wetherill Medal of the Franklin Institute, 857
  Structure and Chemistry of Proteins (Naturally Occurring Peptides and their Biological Significance), 1277
Synge, Dr R L M (Carnegie, P R , and) Structure and Chemistry of Proteins (Electrophoretic Behaviour of Cupric Complexes of Oligopeptides), 1277
Syntheses Organic, Vol 37, 1957 (edited by James Cason) , Vol 38, 1958 (edited by John C Sheehan), *review* by Prof John Read, 134
Syntheses (Organic) Use of Isotopes in, *review* by Dr G Eglinton, 1830

Syntheses (Organic), with Isotopes (Arthur Murray, III, and D Lloyd Williams), Part 2, Organic Compounds labelled with Isotopes of the Halogens, Hydrogen, Nitrogen, Oxygen, Phosphorus and Sulfur, *review* by Dr G Eglinton, 1830
Synthesis Protein (Dr P M Bhargava), 1368
Synthesis of *T5* and *T7* Bacteriophages Effects of Deuterium Oxide on the (E L Rothstein, L A Manson, R Hartzell, jun , and David Kritchevsky), 1167
Synthesis of Boron Phosphide and Nitride (Dr R C Vickery), 268
Synthesis of Deoxyribonucleic Acid in Adult *Drosophila* (Per Oftedal), 1961
Synthesis of Diphosphopyridine Nucleotide from Nicotinamide by Slices of Liver (C J Threlfall), 60
Synthesis of Dipicolinic Acid from $\alpha\epsilon$-Diketopimelic Acid (the late Joan F Powell and R E Strange), 878
Synthesis of I-Glycerl-2-*myo*-inositol Phosphate (Synthesis and Properties of I-Glyceryl-2-*myo*-inositol Phosphate), (J H Davies and Dr T Malkin), 789
Synthesis of Haem by Circulating Blood Cells (Peggy Clark and Dr R J Walsh), 1730
Synthesis of Linear Communication Networks (Wilhelm Cauer), second edition edited by Wilhelm Klein and Franz M Pelz (translated from the German by G E Knausenberger), *review*, 1525
Synthesis of Methanol over Zinc Oxide Effect of Gamma-Radiation on the (T I Barry and R Roberts), 1061
Synthesis of a Protected Heptapeptide related to the Histidine Analogue of Hypertensin II (Dr Dimitrios Theodoropoulos), 1634
Synthesis of Proteins in *Escherichia coli* Influence of DL-beta-Phenylserine on the (J Janeček, J Chaloupka, K Vereš and M Havranek), 1895
Synthesis (Actinomycin) Inhibition of, by D-Valine (Prof Edward Katz), 1666
Synthesis (Alternative), and Behaviour on Hydrolysis I-Glyceryl-2-*myo*-inositol Phosphate— (Synthesis and Properties of I-Glyceryl-2-*myo*-inositol Phosphate), (R B Ellis and J N Hawthorne), 790
Synthesis (Chromosomal), of Ribonucleic Acid as shown by Incorporation of Uridine labelled with Tritium (G Pelling), 655
Synthesis (Colour-Image), with Two Unorthodox Primaries (Arthur Karp), 710
Synthesis (Deoxyribonucleic Acid) in *Escherichia coli* 15$_T$ Influence of Unbalanced Growth on subsequent X-Ray Induced Inhibition of (Daniel Billen), 174
Synthesis (Glucosamine) Interfering Substances in the Determination of (Dr Fiorenzo Paronetto), 1317
Synthesis (Haemoglobin) Role of Stroma in—Experiments on Duck Red Cells *in vitro* (A Breccia, A L Fantola, E Lazzarini and A Giustina), 1878
Synthesis (Haemoglobin), in De-embryonated Chick Blastoderm 8-Azaguanine Inhibition of (B R A O'Brien), 376
Synthesis (*in vitro*) of Acetylcholine Effect of Pempidine on the (Joan Parkinson), 554
Synthesis (Introductory), of Zoogeography, Phytogeography and Geology Panbiogeography, or an (Dr Léon Croizat), Vol 1, The New World , Vol 2a, The Old World , Vol 2b, The Old World (continuation), *review* by Prof Ronald Good, 924
Synthesis (Macromolecular), in Bacterial Recovery from Ultra-violet Light (C O Doudney), 189
Synthesis (Protein) Effect of Protein Depletion on the Distribution of (Dr John Waterlow), 1875
Synthesis (Protein), in Macrophages containing *Eimeria tenella* (Dr G A Gresham and J G Cruickshank), 1153
Synthesis (Protein), in *Mycobacterium smegmatis* Effect of Iron and Zinc on Nucleic Acid and (Frank Winder and Joan M Denneny), 742
Synthesis (Ribonucleic Acid), in *Staphylococcus aureus* Selective Inhibition of, by Vancomycin (Prof D C Jordan and W E Inniss), 1894
Synthesis and Properties of I-Glyceryl-2-*myo*-inositol Phosphate (Dr T Malkin), 789 , Synthesis of I-Glyceryl-2-*myo*-inositol Phosphate (J H Davies and Dr T Malkin), 789 , I-Glyceryl-2-*myo*-inositol Phosphate—Alternative Synthesis and Behaviour on Hydrolysis (R B Ellis and J N Hawthorne), 790
Synthesize Adrenocorticosteroids *in vitro* Failure of Corpuscles of Stannius from Winter Flounder (*Pseudopleuronectes americanus*) to (Dr J G Phillips and Dr P J Mulrow), 558
Synthesize Deoxyribonucleic Acid Cells which, in Guinea Pig Bone Marrow during Recovery from Whole-Body γ-Irradiation (P F Harris and J H Kugler), 1883
Synthetic Diamond (Natural and) Spiral and other Growth Forms of Synthetic Diamonds—a Distinction between (Prof S Tolansky and Dr I Sunagawa), 1526
Synthetic Diamonds Spiral and other Growth Forms of—a Distinction between Natural and Synthetic Diamond (Prof S Tolansky and Dr I Sunagawa), 1526
Synthetic Drugs Chemistry of (May's), revised and rewritten by Dr G Malcolm Dyson, in consultation with Dr Percy May, fifth edition, *review* by F R Batchelor, 1597
Synthetic Medium *In vitro* Cultivation of Blood Cells of *Drosophila melanogaster* in a (Dr Masakatsu Horikawa and Dr Yukiaki Kuroda), 2017
Synthetic Polyglucoses Reduction of Toxicity of Cationic Macromolecules by Complexing with Anionic Derivatives of (P T Mora, B G Young anf M J Shear), 431
Synthetic Polypeptides Immunochemical Studies of Polypeptidyl Proteins and (Prof M A Stahmann, D J Buchanan-Davidson, Dr C Lapresel and Dr P Grabar), 549
Syrett, P J Title of reader in botany in the University of London (at University College) conferred on, 1451
System bringing about Oxidative Phosphorylation in *Azotobacter vinelandii* Fractionation of the (H G Hovenkamp), 471
System (Blood Coagulating), and the Physiological Anticoagulating System Interrelations between the (Prof P A Kudrjashov), 454
System (Cytochrome), of *Streptomyces* (Dr E Niederpruem and Dr D P Hackett), 1954
System (Macrophage) Assessment of the Phagocytic Activity of the (Prof D L J Bilbey and Dr H Salem), 992
  influence of Sulphur Dioxide Inhalation on the Phagocytic Activity of the (Prof D L J Bilbey and Dr H Salem), 722
System (Near Infra-Red), of Nitrogen (Dr P K Carroll and Dr H E Rubalcava), 119
System (Nickel–Oxygen) 'Thermal Regeneration' in the (Prof J S Anderson and D F Klemperer), 899
System (Physiological Anticoagulating) Interrelations between the Blood Coagulating System and the (Prof P A Kudrjashov), 454
System (Tryptophan Peroxidase-Oxidase Enzyme) Specificity of the (Dr R H Marchant), 1711
System (Two-Dimensional), for the Separation of Amino-Acids and Peptides on Paper (Virginia Richmond and Brian S. Hartley), 1869
Systematic Mineralogy of Uranium and Thorium (Prof Clifford Frondel), *review* by Prof C F Davidson, 576
Systematic Pragmatics Toward a (R M Martin), *review* by F I G Rawlins, 754
Systematics Applications of Paper Chromatography to—Recombination of Parental Biochemical Components in a *Baptisia* Hybrid Population (Dr R E Alston and Dr B L Turner), 285
Systeme du Monde Le—Histoire des Doctrines Cosmologiques de Platon a Copernic (Prof Pierre Duhem), Tome 10, *review* by Prof E J Dijksterhuis, 836
Systemic Dyes A Rapid Method for Studying Tumour Blood Supply using (Dr R J Goldacre and Dr B Sylven) 63
Systems (*d*-Amino-Acid Oxidase) Effect of Chlorpromazine upon Isolated (Dr Andrew Lasslo and Anne L Meyer), 1922
Systems (Aqueous) Solid State Rheological Study of the Mechanism of Paraffin-Detergent Interactions in (F J Radd and L H Crowder), 443
  Strength Impairment Mechanism of Glass in (Frederick J Radd and Donald H Oertle), 976
Systems (Aqueous Polymer Phase) Counter-Current Distribution of Proteins in (Per Åke Albertsson and Ed Jacques Nyns), 1465, *erratum*, 1688
Systems (Binary) Estimation of the Interchange Energy for, from Mutual Solubility Data (Kiyoharu Ishida), 814
Systems (Biochemical Assay), involving Nitrite Estimation by Diazotization Measurement of Inhibition by Azide in (Dr E J Hewitt and D G Hallas), 1485
Systems (Biological) Energy Transfer with special reference to (Faraday Society Discussion on), 688
  Flow Properties of (Colloid and Biophysics Committee of the Faraday Society and the British Society of Rheology Discussion on), 1539
Systems (Biological Assay) Interference by Azide with Diazotization Procedures used in (J R Villanueva), 549
Systems (Conjugated) Steric Effects in—Proceedings of a Symposium held at the University, Hull, 1958, by the Chemical Society (edited by Dr G W Gray), *review* by Dr G Eglinton, 1522
Systems (Dispersed) Dielectric Absorption in (G A Johnson and Dr S A Neale), 898
Systems (Gas–Liquid) Droplet Circulation and Interfacial Disturbances in (Dr C Ramshaw and Dr J D Thornton), 719
Systems (Haematin) in Cheese Fat Oxidation and (Tallowy Discoloration in Cheddar Cheese), (C G Rammell), 1296
Systems (Liquid Crystal), from Fibrillar Polysaccharides (R H Marchessault, F F Morehead and N M Walter), 632
Systems (Living) Self-Regulation in (Second Ottawa Symposium on), 239
Systems (Mitochondrial Enzyme) Effect of some Neuromuscular Blocking Agents on (Dr J H Koch and Dr C H Gallagher), 1039
Systems (Present), of Superannuation Difficulties in the, 503
Systems (Suitable Buffer), for Counter-current Distribution A Paper-Chromatographic Method for the Determination of (Andrzej Waksmundzki and Edward Soczewinski), 977
Szabolcsi, G (Elodi, P , and) Role of the Co-enzyme in the Stabilization of Glyceraldehyde-3-phosphate Dehydrogenase, 56
Szafranski, P , and others Cytoplasmic Nucleopeptides in Guinea Pig Liver, 1940
Szczepkowski, Tadeusz W and others Thiosulphate Metabolism in the Animal Organism, 994
Szegvari, Gy , and others Thermoregulatory Heat Production in the Brain, 993
Szekacs, Dr I (Ladik, J , and) A Micro-method for the Polarographic Determination of Serine, 188
Széll, Dr T , and Furka, A A New Method for Working up Processing Mixtures containing Anhydrous Aluminium Chloride, 117, *erratum*, 595
Szent-Gyorgyi, Dr A Energy Transfer with special reference to Biological Systems (Energy Migration in Biological Systems), 689
Szentirmai, A (Horvath Dr I , and) Inhibitory Effect of Fungistatic Antibiotics on the Production of Amylase by *Penicillium chrysogenum*, 57
Szentirmai, A , and others A New Trichothecin-like Antifungal Antibiotic, 908
Szewczyk, J (Durie, R A , and) Coal Science (Spectroscopy of Coals—Light Spectroscopy), 413
Szigeti, B Molecular and Atomic Motions in Liquids and Solids by Radiofrequency Methods, 157
Szilard, Prof Leo A Theory of Ageing, 957
Szilard-Chalmers Process in Solids Influence of Crystal Defects on the (Dr A G Maddock and J I Vargas), 1931
Szilard-Chalmers Reaction in Lithium Permanganate (J R Bolton and Prof K J McCallum), 1717
Szwarc, M Macromolecules (Anionic Polymerization), 1689

TABLES (Thermodynamic) Polynomial Representation of (Prof C J Pings), 444
Tabor, Dr D , and others Friction in Textiles, *review*, 1765
Tabular Comparative Data for the Low- and High-Temperature Strains of *Chlorella* (Dr Constantine Sorokin), 613
Taeschler, Dr M , and Cerletti, Dr A Differential Analysis of the Effects of Phenothiazine-Tranquillizers on Emotional and Motor Behaviour in Experimental Animals, 823
Taft's Constants σ^* An Attempt at Calculating the (Rudolf Zahradnik), 1865
Taggart, Nan, and Hytten, Dr F E Saliva-Serum Ratios of Deuterium Oxide after Administration of Heavy Water, 457
Tail Tendon Collagen (Rat) Chromatographic Fractionation of (Alexander Kessler, Hyman Rosen and Dr Stanley M Levenson), 1640

Tait, Dr J B, and Martin, J H A Polar Front Survey (Hydrography—Volume Transport through the Faroe-Shetland Channel), 1181
Tait, Dr J F, and others 3,4,ω-Tri-hydroxyacetophenone 3-methyl Ether in Adrenal Extracts, 268
Tait, P J T Awarded a General Fellowship in Chemistry for 1959-60 by the Ramsay Memorial Fellowships Trustees, B A 16
Tait, Dr S A S, and others 3,4,ω-Tri-hydroxyacetophenone 3-methyl Ether in Adrenal Extracts, 268
Takagi, Dr S F, and Shibuya, Dr T 'On'-and 'Off'-Responses of the Olfactory Epithelium, 60
Takagi, Dr Yasuyuki, and others Induction of Phage Formation in the Lysogenic *Escherichia coli* K-12 by Mitomycin C, 1079
Takeo, K, and others Proof of the Formation of Enzyme-Substrate Complex by 'Crossing-Paper Electrophoresis', 638
Talanta Medal for outstanding contributions to analytical chemistry, 856
Talbot, Dr A Modern Network Theory in Electrical Engineering (Use of Tchebyscheffian Approximations in Network Synthesis), 1692
Tallowy Discoloration in Cheddar Cheese—Fat Oxidation and Trace Metals in Cheese (F Bishop), 1295, Fat Oxidation and Haematin Systems in Cheese (C G Rammell), 1296
Tamaoki, Taiki, and others Oxidative and Phosphorylative Activities of Cytoplasmic Particles from Plant Tissue Cultures, 1491
Tamarind A New Enzyme System in the (D Mukherjee and N A Khan), 1140
Tamaulipas (Sierra de), Mexico Preliminary Archaeological Investigations in the (Dr Richard S MacNeish), 593
Tamm, K Fast Chemical Reactions in Solution (Use of the Sonic Relaxation Method for Rate Measurements in Water Solutions), 1453
Tanager (Summer), observed on Bardsey Island, 236
Tandem Generators of the United Kingdom Atomic Energy Authority (K W Allen, F A Julian, W D Allen, A E Pyrah and J Blears), 303
Tandon, Dr S L, and Mzalik, C P Intraspecific Polyploidy and Evolution of Diverse Morphological Forms in *Convolvulus pluricaulis* Chois, 481
Tanganyika Soils of, *review* by Dr R M S Perrin, 1901
  Summary of the Geology of, Part 1, Introduction and Stratigraphy (A M Quennell, A C M McKinlay and W G Aitken), 1688
  A Survey of Soils in the Kongwa and Nachingwea Districts of (B Anderson), *review* by Dr R M S Perrin, 1901
Tanganyika Expedition University of Oxford Second (R Davis), 1543
Tanganyika Geological Survey Memoir No 1, Summary of the Geology of Tanganyika, Part 1, Introduction and Stratigraphy (A M Quennell, A C M McKinlay and W G Aitken), 1688
Tanker, Dr M, and others Sugars of the Glycoside of the Root of *Marsdenia erecta* R Br, 1319
Tanned Erythrocytes in the Rabbit Production of an Agglutinating Auto-Antibody (Panagglutinin) Active upon (P O Hubinont, P Ghysdael and O Thys), 1250
Tanner, Dr R C H Swiss Society for Natural Sciences, 1454
Tanner, R I Biomechanics (Tests on 'Fluon' as a Material for Artificial Animal Joints), 513
Tannin Effect of Ultrasound on the Protein of Human Serum Denatured with (Dr Wizold Mizgalski and Irena Zygmunt), 1486
Tannins (Vegetable) The Chemistry of—Being the Papers presented at a Symposium held in the University, Cambridge, 1956, under the auspices of the Society of Leather Trades' Chemists, *review* by Dr A I Scott, 1832
Tape From Tinfoil to—the History of the Gramophone (John Cain), 1535
Tardif, H P, and Chollet, P Dynamic and Static Deformation of Armco Iron, 1917
Target Volume of Enzyme Induction X-Ray Sensitivity and (Dr Helmut Pauly), 1570
Tarkowski, Dr Andrzej K Experiments on the Development of Isolated Blastomeres of Mouse Eggs, 1286
Tarnoky, Dr A L Clinical Biochemical Method, *review* by Dr D S H W Nicol, 576
Tasaki, Dr I Resting and Action Potentials of Reversed Polarity in Frog Nerve Cells, 1574
Tasmania and Macquarie Island Transport of Driftwood from South America to (Prof H N Barber, Dr H E Dadswell and H D Ingle), 203
Tata, Sir Dorabji Jamsetji (1859-1932), 591
Tata Memorial Trust Awards for Research on Leukaemia and allied Diseases, 507
Tau-Meson Decay of a, Underground (A M Short), 893
Taverne, Janice, and Wildy, Peter Purification of Herpes Simplex Virus by Chromatography of Calcium Phosphate, 1655
Tavernier, P, and Boisson, J Chemistry of Propellants (Solid Propellants—Composite Forms), 779
Taxation of Learned and Professional Societies in Britain, 1343
Taxonomic Position of *Arthrobacter* (Dr C S Cummins and Dr H Harris), 831
Taxonomic Revision of the Spotted Skunks of the Genus *Spilogale* (R G Van Gelder), 1024
Taxonomy in the Dipterocarpaceae Chemistry and (Dr E C Bate-Smith and Dr T C Whitmore), 795
Taxonomy of Eucalyptus Floral Morphology and the (Dr D J Carr and S G M Carr), 1549
Taxonomy and Genetics of *Oenothera* (Prof R Ruggles Gates), *review* by Dr W B Turrill, 1974
Tayler, J C A Relationship between Weight of Internal Fat, 'Fill', and the Herbage Intake of Grazing Cattle, 2021
Tayler, R J Thermonuclear Research, 1017
Taylor, Prof Angus E Introduction to Functional Analysis, *review* by Prof T A A Broadbent, 666
Taylor, Dr D M Behaviour of Zinc and Radiozinc in Tumour-bearing Rats, 1649
Taylor, E Openshaw (edited by) Nuclear Reactors for Power Generation, *review* by R Vaux, 301
Taylor, Dr George (edited by) Index Kewensis, Supplementum Duodecimum, 1951-1955, *review* by Prof T G Tutin, 129
Taylor, G N (Evans, J V, and) Radio Echo Observations of Venus, 1358
Taylor, H F, and Wain, Prof R L α-Oxidation of Indoleacetonitrile, 1142
Taylor, Dr J Elected an honorary member of the Institution of Mining Engineers, 1845
Taylor, J C, and others Crystallographic Studies of the Biuret Reaction, 707
Taylor, Dr J C M A New Introduction to Geology, *review*, 1175
  Précis de Pétrographie, *review* 1677
Taylor, Monica Biology of *Amoeba*, 1371
Taylor, R H Age Determination in Wild Rabbits, 1158
Taylor, Dr T H C *Obituary* of J T Davey, 1104, *obituary* of H J Morris, 1104
Taylor Electrical Instruments, Ltd 'Taylormeter Model 100A', a New Multi-range Voltmeter, 1026
'Taylormeter Model 100A', a New Multi-range Voltmeter (Taylor Electrical Instruments, Ltd), 1026
Tea (Cultivated) Top Growth of (Dr D N Barua), 1424
Teachers (Science) Summer School for (Australian Nuclear Research Foundation), 1108
Teaching (Science) French Journal of, 593
Teaching (Statistics) Trends in, *review* by J Durbin, 1008
Teaching Technologists and Technicians Sandwich Courses for (Dr P F R Venables), *review*, 1437
Teale, F J W (Weber, Dr G, and) Energy Transfer with special reference to Biological Systems (Energy Transfer in the Haem Proteins), 689
Tecce Giorgio (Frontali, Laura, and) Enzymic Conversion of L-Rhamnulose to L-Fuculose in *Escherichia coli*, 1315
Technical Books Recent Scientific and, Supp v, July 25, Supp iv, August 29, Supp v, September 26, Supp iv, October 31, Supp vi, November 28, Supp iv, December 26
Technical Books sponsored by the United States Atomic Energy Commission, 407
Technical Colleges Relationship between Industry and (Liverpool District of the Federation of British Industries Conference on), 1690
Technical Co-operation Partnership for Progress—International (Annals of the American Academy of Political and Social Science, May 1959), *review* by R Brightman, 1673
Technical Digests Publication of to be resumed by the Department of Scientific and Industrial Research, 410
Technical Organization Industrial (Institute of the Rubber Industry Conference on), 322
Technical Personnel Scientific and (United States National Science Foundation to establish and maintain a Programme of National Information on), 592
Technical Persons (Scientific and) Registration of (1958), 854
Technical Research (Scientific and), in Britain Organization of, 1255
Technical Writer (J W Godfrey and G Parr), *review* by A L Bacharach, 1749
Technical and Vocational Education in the U S S R (M I Movšovič), 504
Technicians Sandwich Courses for Teaching Technologists and (Dr P F R Venables), *review* 1437
  Technologists and, *review*, 1437
Technicians (Laboratory) Regional Training Course for (University Institute of Chemistry, Lahore), 857
Technique A Fractional Micro-sublimation (W H Melhuish), 1933
  Histochemical (Dr W G Bruce Casselman), *review* by Dr T Kerr, 752
Technique of Lysimetry Effects of Forest Areas on Water Resources, and the—Water and Woodlands (Dr L Leyton), 1184, Lysimeters (F W Green), 1186
Technique (Flash) Primary Processes indicated by the (Reductive Photobleaching of Eosine) (Shunji Kato and Masao Koizumi), 1620
Technique (Humane Experimental) The Principles of (Dr W M S Russell and R L Burch), *review* by Prof M Weatherall, 1675
Technique (Improved), for Intravenous Injection of Newborn Rats and Mice (N F Anderson, E J Delorme, Prof M F A Woodruff and D C Simpson), 1952
Technique (New), for Isolating and Cloning Cells of Higher Plants (Ludwig Bergmann), 648
Technique (Periodate), for the Identification of Sugar Phosphates (Eugene A Davidson), 1395
Technique (Rapid Infra-Red) Over-Exposure Analysis of Organic Compounds in the Blood by a (Dr R D Stewart, D S Erley, T R Torkelson and C L Hake), 192
Technique (Simple Observational) Value of a, for Determining the Fat Content of Algal Cells (Dr J H Evans), 1737
Techniques Blood Group Methods and, *review* by Dr R A Zeitlin, 130
Techniques for Surveying Surface-Water Resources (Prof Ray K Linsley), (World Meteorological Organization, Technical Note No 26), 96, *erratum*, 684
Techniques (Electron Bombardment) Electron Bombardment Floating-zone Melting and allied (Services Electronics Research Laboratory Symposium on), 690
Techniques (Experimental) Structure Analysis and (Institute of Physics Conference on), 857
Techniques (Experimental), in Low-Temperature Physics (Guy Kendall White), *review* by Prof J F Allen, 1260
Techniques (New), in the Analysis of Noise and Vibration (Acoustics Group of the Physical Society and the Institute of Physics Symposium on), 415
Techniques (New), in High Polymer Chemistry (Bradford Institute of Technology Course in), 1845
Techniques (New), in Packaging, *review* by Dr V G W Harrison, 1437
Techniques (Statistical) Principles of (P G Moore), *review* by W J Langford, 1523
Technological Change Personnel Management and (Institute of Personnel Management Annual Conference), 1614
Technological Education in Britain, 94
Technological Education, London and Home Counties Regional Advisory Council for Tenth Annual Report, 94
Technologists The Education of (Prof A J Murphy), 514
Technologists and Technicians, *review*, 1437
  Sandwich Course for Teaching (Dr P F R Venables), *review*, 1437
Technology Electron, *review* by Dr D A Bell, 83
  Electron Physics and (Dr J Thomson and E B Callick), *review* by Dr D A Bell, 83
  A History of (edited by Dr Charles Singer, Dr E J Holmyard, Dr A R Hall and Trevor I Williams), Vol 5, The Late Nineteenth Century, *review* by Dr Leonard Carmichael, B A 5
  Impact of Science and, on Humanism, 1595
  Parliamentary Responsibility for Science and, 1190

Technology Glass (Society of Glass Technology), 855
Technology (Glass), at Sheffield, 1271
Technology (Iron and Steel), in China The Development of (Dr Joseph Needham), *review* by Prof F C Thompson, 1830
Technology (Nuclear), and the Scholarly Tradition, *review* by Dr J Walker, 1973
Technology (Nuclear Reaction) Analytical Chemistry in (Third Conference on), 26
Technology (Rubber) Annual Report on the Progress of (edited by Dr T J Drakeley), (Institution of the Rubber Industry), 854
Technology (Science and), National Lending Library for Appointment of a Consultative Committee, 1449
Technology (*Soviet*), *Digest of*, No I (Engineering Information Services, Ltd), 320
Technology (Vacuum Science and), Joint British Committee for Formation of a, 1191
Technology (Western) A History of (Friedrich Klemm), translated from the German by Dorothea Waley Singer, *review* by K R Gilbert, 1601
Technology and Engineering Man the Maker—a History of (Prof R J Forbes), *review* by Dr A R Hall, 921
Tectonics in the U S S R , 942
Teeth (Incisor), of Rats deficient in Vitamin E Curative Effect of Selenium upon the (Prof J T Irving), 645
Teeth (Sheeps') Cause of Wear in (Dr G Baker, Dr L H P Jones and I D Wardrop), 1583
Tegart, W J M Appointed a lecturer in metallurgy at the University of Sheffield, 684
Tegmental Nuclei A Heat-Loss Mechanism involving the Habenular, Interpeduncular and Dorsal (B G Cragg), 1724
Teichoic Acid from the Walls of *Bacillus subtilis* Structure of (Teichoic Acids from Bacterial Walls), (J J Armstrong, Prof J Baddiley and Dr J G Buchanan), 248
Teichoic Acids from Bacterial Walls—Composition of Teichoic Acids from a Number of Bacterial Walls (J J Armstrong, Prof J Baddiley, Dr J G Buchanan, A L Davison, M V Kelemen and F C Neuhaus), 247 , Structure of Teichoic Acid from the Walls of *Bacillus subtilis* (J J Armstrong, Prof J Baddiley and Dr J G Buchanan), 248
Teichoic Acids from a Number of Bacterial Walls Composition of (Teichoic Acids from Bacterial Walls), (J J Armstrong, Prof J Baddiley, Dr J G Buchanan, A L Davison, M V Kelemen and F C Neuhaus), 247
Teitel, P , and others Loss of Plasticity of Erythrocytes coated with Incomplete Antibodies, 1808
Tekman, Dr S , and others Sugars of the Glycoside of the Root of *Marsdenia erecta* R Br , 1319
Telegraph Service (Inland), Advisory Committee on the Report of the, 1191
Telemetry (Radio-) of Nerve Action Potentials Amplitude-Modulation (Roger M Morrell), 1129
Telescope (Radio) The Ohio State University 360-ft (Prof John D Kraus), 669
Telescope (Radio), for Australia, 93
Television Colour (G G Gouriet), 1535
  Future of Broadcasting and, 1747
Telluric Origin of the Whistler Medium (Dr Francis S Johnson), 1787
Telluride (Bismuth), and related Compounds Stoichiometry of (G Offergeld and J van Cakenberghe), 185
Tellurium in Bismuth Some Semiconductive Properties of Dilute Binary Solid Solutions of Bismuth in Tellurium and (Dr Tomasz R Piwkowski), 355
Temperature Effect of, on the Rate of Setting of Gypsum Plaster (M J Ridge), 47
  Influence of, on the Symbiotic Nitrogen Fixation of Legumes (the late Prof Margaretha G Mes), 2032
  Response of *Sequoia sepervirens* (D Don) Endl and *Pseudotsuga menziesii* (Mirb) Franco Seedlings to (Henry Hellmers and William P Sundahl), 1247
  Spin (Prof A Abragam), 954
Temperature required for Nuclear Reactions in Cosmical Electrical Discharges (Dr C E R Bruce), 2004
Temperature (Body), in Hibernating Bats Endogenous Rhythms of (Prof Michael Menaker), 1251
Temperature (Extremely Low) Prefreezing as a Method enabling Animals to survive Freezing at an (Eizo Asahina), 1003
Temperature (High-) Constituent in Mild Steel Surface-Hardened by Carbo-Nitriding Identification of the (M A H Howes, G T F Jay, K Sachs and D Wilkinson), 1312
Temperature (High-) Gas Jet Blunt-Nosed Bodies in a (F R Sedlund and Prof C C Chang), 812
Temperature (Low), in Rice Plants Quantitative Changes in γ-Aminobutyric Acid induced by (F Zsoldos), 280
Temperature (Low-) Autoradiography for the Detection of Tritium in Tissue, with Removal of Luminescence induced by Tritium (P Pellerin, P Fallot, M Laine-Boszormenyi and F Serrel), 1385
Temperature (Low-) Chars Smoke Emission from Coal and (Studies of Coal), (D Finch), 426
Temperature (Low-) Engineering, *review* by Dr G G Haselden, 1174
Temperature (Low-) Physics Experimental Techniques in (Guy Kendall White), *review* by Prof J F Allen, 1260
Temperature (Low- and High-), Strains of *Chlorella* Tabular Comparative Data for the (Dr Constantine Sorokin), 613
Temperature (Room) Paper Chromatography of Corticosteroids at (J Tuzson), 1937
Temperature Variation of the Principal Magnetic Moments of the Co^{++} Ions and the Asymmetry of the Crystalline Electric Field in Cobalt Acetate Tetrahydrate (Dr Bhagawati Charan Guha), 50
Temperatures Extremely High (Electronics Research Directorate of the United States Air Force Cambridge Research Center Conference on, Boston, 1958), (edited by Dr Heinz Fischer and Lawrence C Mansur), *review* by Dr T E Allibone, 83
Temperatures of Ancient Seas Determination of, by the Measurement of the Oxygen Isotopes Ratio in Fossil Calcareous Organism, (Y A Birstein), 1025
Temperatures in Polar Ice Caps (Dr Uwe Radok), 1056
Temperatures (Low) Photochemical and Stereochemical Properties of Carotenoids at (Staff of the Biological Laboratories of Harvard University)—Photochemical Behaviour of Retinene (Dr Lawrence Jurkowitz), 614 , *Cis-trors* Isomerism and Steric Hindrance (John N Loeb, Paul K Brown and Prof George Wald), 617 , Discussion (Prof George Wald), 620
Tempering The Phenomena occurring in Steels during Quenching and (Academician G V Kurdjumov), 1460
Temple, Prof G Turning Points in Physics (From the Relative to the Absolute), *review* by G R Noakes, 1090
Templeton, W L (Saddington, K , and) Disposal of Radioactive Waste, *review*, 301
Temporal Adaptation to Spatial Detail Vision Measurements of (A J Seyler and Z L Budrikis), 1215
Temporal Summation Visual Spatial and (Dr Ernest Baumgardt), 1951
Ten Years of Ergonomics (Alec Rodger), B A 20
Tendon Collagen (Rat Tail) Chromatographic Fractionation of (Alexander Kessler, Hyman Rosen and Dr Stanley M Levenson), 1640
Tenenbaum, Dr Esther Appearance of Crystalline Needles in Monkey Kidney Cell Cultures infected with Poliomyelitis Virus and Incubated at 22°-30°C , 1657
Tennent, Dr R M Theoretical Physics, *review* 1832
Tension in a Ligament Does an Increase in the, elicit Reflex Muscular Responses? (Dr Bertil Stener), 1495
Tension (Oxygen) Effect of on Haem and Porphyrin Biosynthesis (J E Falk, R J Porra, Ann Brown, F Moss and Helen E Larminie), 1217
ter Haar, Dr D Turning Points in Physics (The Quantum Nature of Matter and Radiation), *review* by G R Noakes, 1090
ter Horst, D Th J , and others Ionization Phenomena in Gases (Post-arc Behaviour of two Practical Circuit Breakers), 1355
Terayama, Prof Hiroshi, and others Incorporation of N-Methyl Carbon of Monoethylaminoazobenzene into Polar Dyes, 1460
Terenin Prof A , and others Energy Transfer with special reference to Biological Systems (Properties of Isolated Chlorophyll), 690
Term Retentate, a New Scientific (E G Turner and J G Feinberg), 1139
Terminal Peptide Sequence of Human Haemoglobin ? (Dr J A Hunt and Dr V M Ingram), 640
N-Terminal Amino-Acids of α-Casein (Dr W Manson), 1393
Termite Fauna (Indian) New Neotropical Element (*Anoplotermes*) in (Dr M L Roonwal and O B Chhotani), 1967
Terpenes The (the late Sir John Simonsen and Dr W C J Ross), Vol 5, The Triterpenes and their Derivatives, *review* by Prof A J Birch, 302
Terpenoids The Higher (P de Mayo), (The Chemistry of Natural Products, Vol 3), *review* by Prof A J Birch, 754
Territories (Underdeveloped) Management and (Political and Economic Planning, Broadsheet No 434), 483
Territories (Under-developed), and their Problems, 1519
Teskey, Dr Benjamin J E (Shoemaker, Dr James S , and) Tree Fruit Production, *review* by Prof H W Miles, 487
Tessari, L , and Parrini, L Glutamic-Pyruvic Transaminase in Rabbit's Long Bones, 904
Test (New Experimental), of Special Relativity (J P Cedarholm and Prof C H Townes), 1350
Test (Rapid and Simple Pathogenicity), for Detecting Virulent Clones of *Fusarium oxysporum* f *cubense* using Seedlings of *Musa balbisiana* (Dr R H Stover), 1591
Test Explosions in Britain Underground, 1532
Test Method (Soil Block), for Timber Limitations Imposed by some Water-borne Preservatives on the (A J McQuire), 1430
Testament (Old) The Value of π and the (Dr J Heading), 78
Testing (Non-Destructive) International Conference on, 1107
Tests (Atomic) Effect of, on Radio Noise (C A Samson), 538
Tests (Creep), on Antarctic Glacier Ice (Malcolm Mellor), 717
Tests (Experimental), of Quantum Electrodynamics (Prof W E Lamb), 954
Tests (Nuclear Weapon), and the Accident at Windscale Accumulation of Radioactive Iodine in Thyroid Glands subsequent to (Dr Hamish A Robertson and Ian R Falconer), 1699
Tests (Spot), for Steroids applied on Paper Use of Porter–Silber and Schiff Reagents as, and their Application to the Study of Rat Adrenal Lipids (Dr Marion K Birmingham), B A 67
Tetra-acetate (Ethylenediamine) Effect of, on Vitamin B_{12} Absorption in the Rat (Edward G Rice, Dr Samuel M Greenberg, John F Herndon and E J Van Loon), 1948
Tetrachloride (Carbon) Effects of, on Kidney and Liver Function in the Sheep (Dr B P Setchell), 1242
  Prophylaxis of Poisoning by (C H Gallagher and R A Simmonds), 1407
Tetracycline Inhibition of Skeletal Formation in the Chick Embryo following Administration of (Gerrit Bevelander, Hiroshi Nakahara and Gloria K Rolle), 728
Tetrahydrate (Cobalt Acetate) Temperature Variation of the Principal Magnetic Moments of Co^{++} Ions and the Asymmetry of the Crystalline Electric Field in (Dr Bhagawati Charan Guha), 50
Tetrahydro-1-naphthoic Acids (5- and 8-Halogeno- Dihydro- and) Plant Growth Activities of (Toshio Fujita, Sadao Imai, Koichi Koshimizu, Tetsuo Mitsui and Jiro Kato), 1415
Tetrapyrrole Side-Chains Selective Oxidation of (J Barrett and P Clezy), 1988
Texas Instruments, Inc Appointment of Dr F Kenneth Brasted as administrative director of the Central Research Laboratory, 26
Textile Chemistry Recent Developments in (Bradford Institute of Technology, the Bradford Chemical Society and the Yorkshire Council for Further Education Symposium on), 1845
Textile Industry's Research Association (Ahmedabad 160
  Proceedings of the Fifth Management Conference (1959), 1913
Textile Institute Warner Medal awarded to Dr Margaret Hannah, 26
  Service Medals awarded to Walter Garner and Dr A R Urquhart, 156
Textile Institute (Physics Group) Inaugural Meeting and Conference, B A 16
Textile Institute (Quality Control Group) Conference on Quality Control, B A 16
Textiles Friction in (Dr H G Howell, K W Mieszkis and Dr D Tabor), *review*, 1765
Textiles and Dyes at the University of Leeds, 155
Thalassaemia Diseases Genetic Basis of the (Prof V M Ingram and A O W Stretton), 1903

Thamboo, S , and others Swellings on the Shoots on Cacao Plants Deficient in Copper, 75
Theobroma cacao L in Ghana New Pests of Cocoa, following Applications of Insecticides (P F Entwistle C G Johnson and E Dunn), 2040
Theodoropoulos, Dr D Synthesis of a Protected Heptapeptide related to the Histidine Analogue of Hypertensin II, 1634
Theodoropoulos, Dr D , and others Action of Trypsin on α-Carbethoxy-L-lysyl-L-serylglycine and its O-Phosphorylated Analogue, 187
O-Phosphorylated and Unphosphorylated Peptide-Substrates suitable for Tryptic Action, 270
Theoretical Confusion Function A Mathematical Model for Perception and a (M Hammerton), 1668
Theoretical Mechanics at Southampton, 590
Theoretical Physics (Prof F Woodbridge Constant), *review* by Dr R M Tennent, 1832
Theoretical Physics at Cambridge Applied Mathematics and, 686
Theoretical Physics at Sydney, 1447
Theoretical and Applied Mechanics (Indian Society of Theoretical and Applied Mechanics Fifth Congress on), 1192
Theoretical and Applied Mechanics, Indian Society of Fifth Congress on Theoretical and Applied Mechanics, 1192
Theorie der Phanomenologischen Reduktion (Erste Philosophie, 1923-24 (Edmund Husserl), Teil 2), herausgegeben von Rudolf Boehm (Husserliana, Band 8), *review* by F I G Rawlins, 1751
Theories A Re-examination of (Replication of Tobacco Mosaic Virus), (Prof Barry Commoner), 1998
Theory Axiomatic Set (Prof Paul Bernays), *review* by Dr L S Goddard, 1178
Theory of the Abrasion of Solids such as Metals (J Goddard, H J Harker and H Wilman), 333
Theory of Ageing (J Maynard Smith), 956 ; (Prof Leo Szilard), 957
Theory of Beams (T Iwinski), translated from the Polish by E P Bernat, *review* by T M Charlton, 1976
Theory of Integration An Introduction to the (Prof Adriaan C Zaanen), *review*, 574
Theory of the Ionosphere Recent Trends in the (J A Ratcliffe), 419
Theory (Analytic), of Numbers Some Recent Progress in the (Prof H Davenport), 1533
Theory (Clonal Selection), of Acquired Immunity (Sir Macfarlane Burnet), *review* by Dr J H Humphrey, 753
Theory (Copper Chelating), of their Mode of Action Plant-Growth Substances and the (Dr C H Fawcett), 796
Theory (Mathematical), of Compressible Fluid Flow (Richard von Mises), (completed by Hilda Geiringer and G S S Ludford), *review* by Dr W P Jones, 485
Theory (Modern), of the Integral, *review*, 574
Theory (Modern Network), in Electrical Engineering (University of Birmingham Conference on), 1691
Theory (Physical), of Neutron Chain Reactors (Alvin M Weinberg and Eugene P Wigner), *review* by Dr J Walker, 1973
Theory (Set) Foundations of (Prof Abraham A Fraenkel and Prof Yehoshua Bar-Hillel), *review* by Dr L S Goddard, 1178
Theory and Practice Electrophoresis in, *review* by Dr R Consden, 84
Theory and Practice of Semiconductors An Introduction to the (Dr A A Shepherd), *review* by Dr R A Hyman, 1754
Therapy (Bone Marrow) Interstrain Ovarian Transplantation in Lethally Irradiated Mice after (Prof W St Amand and L H Smith), 1503
Thermal Conductivity of Binary Gas Mixtures Sensitivity of Catharometers in Gas Chromatography and the (A B Littlewood), 1631
Thermal Decarboxylation of some Keto-Acid Hydrazones (Ambrose M Tokushige and Prof Elton S Cook), 267
Thermal Decomposition of Irradiated Lead Oxalate (P J Herley and E G Prout), 445
Thermal Equilibrium Influence of the Thomson Effect on the θ-φ Relationship for a Constrictive Resistance in (Dr W Davies), 975
Thermal Precipitator (Long-Running) Measurement of Asbestos Dust Concentrations with the (Dr C C Addingley and Dr R Gaze), 715
Thermal Reactor British Neutron Source, 1533
'Thermal Regeneration' in the Nickel–Oxygen System (Prof J S Anderson and D F Klemperer), 899
Thermochemistry Metallurgical (Dr O Kubaschewski and E Ll Evans), *review* by Dr F C Thompson, 1765
Thermodynamic Properties of Organic Compounds Some Remarks on the (Prof George S Parks), 1194
Thermodynamic Tables Polynomial Representation of (Prof C J Pings), 444
Thermodynamics (Deutsche Bunsengesellschaft fur Physikalische Chemie and the International Union of Pure and Applied Chemistry Symposium on), 1606
Developments in (Dr H A Skinner, K Schäfer and Dr J S Rowlinson), 1606
Thermo-Nuclear Physics at Sydney, 1447
Thermonuclear Processes (Institution of Electrical Engineers and the British Nuclear Energy Conference Convention on), 240
Thermonuclear Research (Physical Society Conference on), 1015
Thermoregulatory Heat Production in the Brain (Prof Sz Donhoffer, Gy Szegvari, I Jarai and M Farkas), 993
Thermo-Remanent Magnetism (Reverse) Exchange Interaction as a Cause of (T Nagata and S Uyeda), 890
Theron Mountains and Whichaway Nunataks, Antarctica Palaeomagnetism of some Dolerite Intrusions from the (D J Blundell and P J Stephenson), 1860
Thew, M T Appointed Volkes Research Fellow in mechanical engineering in the University of Southampton, 1915
Thiadiazoles (2-Substituted) Reversal of Effects of, by Nicotinamide Analogues and Precursors (Dr Irwin H Krakoff, Corrine R Lacon and Dr David A Karnofsky), 1805
Thiamine-sparing Action of Sorbitol in Rats and Mice (Dr T B Morgan and Prof John Yudkin), 909
Thibault, Dr Pierre, and others Statement on Biological and Chemical Warfare, 1018
Thickness of the Helium Film Measurement of the (Prof L C Jackson), 954
Thickness Measurement (Film), by Beam Interferometry Substrate Damage in (Prof G David Scott), 354
Thiessen, Clara P (Bentley, Prof Ronald, and) Tropolone Biosynthesis—the Enzymatic Decarboxylation of Stipitatonic and Puberulonic Acids, 552
Thilo, E Macromolecules (Inorganic and Organic/Inorganic Polymers), 1690
Thimann, Prof K V Plant Growth Regulation (Relation between Structure and Auxin Activity) 600
Things Are The Way (Prof P W Bridgman), *review* by Prof C K Grant, 1975
Thioctic Acid Effect of, on Gain in Body-Weight by Turkey Poults (J R Jowsey, R M Blakeley and H I MacGregor), 1323
Thioctic Acid (Intracellular), and Coenzyme A following Vanadium Treatment (E Mascitelli-Coriandoli and Dr C Citterio), 1641
Thiol Groups and Morphogenesis (Prof J Brachet), 1074
Thiols *in vitro* Metabolic and Chemical Studies of 'Myleran'—Formation of 3-Hydroxytetrahydrothiophene-1,1-dioxide *in vivo*, and Reactions with (Dr J J Roberts and Dr G P Warwick), 1288
Thionine in Rigid Medium Photolysis of—Measurement by Spectrofluorimetry (Dr C A Parker and W T Rees), 1223
Thiosulphate Metabolism in the Animal Organism (Prof Boleslaw Skarzynski, Tadeusz W Szczepkowski and Miroslawa Weber), 994
Thiotaurine Degradation of, by Ionizing Radiations (D Cavallini, B Mondovi, B Giovanella and C De Marco), B A 61
Thiouracil and Thyroxine Effect of, on Development and Growth of Cutaneous Melanoma in Killifish Hybrids (Prof A Stolk), 562
Thiourea and Insect Polyphenoloxidase Interaction between (Wanda Chmurzynska and Lech Wojtczak), 1941
Third Sex-linked Allelomorph of Silver and Gold in the Fowl Semi-Albino, a (W F Werret, A J Candy, J O L King and Dr P M Sheppard), 480
Thirst for Bile in Rats with Bile Fistulae (Dr Albert J Bertinchamps, James J Greenough and George C Cotzias), 1405
Thirtle, John R , and others (C F H Allen, in collaboration with) Six-Membered Heterocyclic Nitrogen Compounds with Three Condensed Rings, *review* by Dr F G Mann, 216
Thirumalachar, Dr M J (Desai, Dr V M , and) Floral Malformation in *Panicum antidotale* caused by a Species of *Eriophyses* 1586
Thoday, Prof J M Genetics and the Origin of Species, 588
Appointed to the Arthur Balfour chair of genetics in the University of Cambridge, 1189 , work of, 1189
Thoday, Prof J M (Gibson, J B , and) Recombinational Lethals in a Polymorphic Population 1593
Thomas, Dr A F Appointed lecturer in the Department of Organic Chemistry in the University of Leeds, 1534
Thomas, D W Appointed National Coal Board Research Fellow in physical chemistry in the University of Birmingham, 1915
Thomas, Glenys Appointed map curator and cartographer in the Department of Geography in the University College of Swansea, 156
Thomas, Dr G M Photography in the International Geophysical Year (Study of Aurorae by All-Sky Cameras), 1032
Thomas, Prof G W Salt Desorption from Halloysite, 1746
Thomas, Dr H A The Chemistry of Clothing (Recent Advances in the Application of Cellulosic Man-made Fibres to Clothing), 849
Thomas, Prof Henry C (Meites, Prof Louis, and) Advanced Analytical Chemistry, *review* by W I Stephen, 1525
Thomas, Dr J O , and Vickers, M D Conversion of Ionospheric Virtual Height-Frequency Curves to Electron Density-Height Profiles (Radio Research Board, Special Report No 28), 1024
Thomas, Dr J O , and others Two Anomalies in the Behaviour of the F2 Layer of the Ionosphere, 2003
Thomason, D , and Schofield, R Heparin and Cellular Calcium, 1712
Thome, P Electron Bombardment Floating-zone Melting and Allied Electron Bombardment Techniques (Welding by Electron Bombardment Heating), 693
Thompson, A B The Chemistry of Clothing (The Use of Synthetic Hydrophobic Fibres in Clothing), 850
Thompson, C F (Neely, W Brock, and) Kinetic Study of Dextransucrase based on the Langmuir Adsorption Isotherm, B A 64
Thompson, D C , and Macdonald, W J P Radiation Balance at Scott Base, 541
Thompson, Dr E O P Structure and Chemistry of Proteins—Symposium on Proteins at Parkville, Australia, 1276
Thompson, Dr E O P , and others Structure and Chemistry of Proteins (Methods of Splitting Disulphide Bonds and their Application in the Extraction of Soluble Proteins from Wool), 1277
Thompson, Prof F C Advancements in Metallurgy, *review*, 1765
A History of Iron and Steel in China, *review*, 1830
Thompson, H V At the Conference of the Mammal Society of the British Isles (Erosion caused by the Rabbit in Australia and New Zealand), 30
Thompson, H V , and others Myxomatosis—Present Position and Future Prospects in Great Britain 1179
Thompson, Dr N Atomic Mechanisms of Fracture, 325
Thompson, P A , and Guttridge, C G Effect of Gibberellic Acid on the Initiation of Flowers and Runners in the Strawberry, B A 72
Thompson, R E M Appointed reader in bacteriology at Middlesex Hospital Medical School, London, 322
Thompson, R J Chemistry of Propellants (Theoretical Performance Evaluation), 778
Thompson, R T The Weevils of France, *review*, 573
Thompson, Dr T E Development of the Aplacophorous Mollusc *Neomenia carinata* Tullberg, 122
Defensive Acid-Secretion in some Marine Gastropods, 1162
Thompson, Dr W B Promoted to Deputy Chief Scientific Officer in the Scientific Civil Service, 859 , work of, 859
Thermonuclear Research, 1017
Ionization Phenomena in Gases (Fine-scale Magneto-hydrodynamic Behaviour in Plasmas) 1356
Thompson (Boyce) Institute for Plant Research, and others Fourth International Conference on Plant Growth Regulation, 599
Thomson, Dr Andrew Retirement as director of the Meteorological Branch of the Canadian Department of Transport, 1105 , work of, 1105
Thomson, Dr A P D Appointed acting director of the Department of Anatomy in the University of Birmingham, 1915

Thomson, Sir George Elected president for 1960 of the British Association for the Advancement of Science, 151 , work of, 151
  Thermonuclear Processes, 241
  Elected president of the Institute of Physics, 604
Thomson, G G , and others Growth Responses to Selenium in Lambs, 251
Thomson, Dr J , and Callick, E B Electron Physics and Technology, *review* by Dr D A Bell, 83
Thomson, Sir Landsborough The Birds of the Palearctic Fauna, *review*, 666
  Birds of Prey, *review*, 1435
Thomson, R A M , and others A Modified Rotating-Sector Method of Measuring Kinetic Chain Lifetimes, 266
Thomson Effect Influence of the, on the θ-φ Relationship for a Constrictive Resistance in Thermal Equilibrium (Dr W Davies), 975
Thontadarya, T S , and Basavanna, G P Channa Mode of Egg Laying in Tingidae (Hemiptera), 289
Thorell, Dr Bo, and Chance, Prof Britton Localization and Assay of Respiratory Enzymes in Single Living Cells—Absorbancy Measurements on Liver and Kidney Cells, 934
Thorell, Dr Bo (Chance, Prof Britton, and) Localization and Assay of Respiratory Enzymes in Single Living Cells—Fluorescence Measurements of Mitochondrial Pyridine Nucleotide in Aerobiosis and Anaerobiosis, 931
Thorell, Dr Bo, and others Localization and Assay of Respiratory Enzymes in Single Living Cells—Absorbancy Measurements on the *Neberkern*, 929
Thorium Systematic Mineralogy of Uranium and (Prof Clifford Frondel), *review* by Prof C F Davidson, 576
Thorium Alloys (Uranium and) Constitutional Diagrams of (Frank A Rough and Arthur A Bauer), *review* by Dr R E D Hughes, 925
Thorndike, Prof Lynn A History of Magic and Experimental Science, Vols 7 and 8, The Seventeenth Century, *review* by Dr V A Eyles, 1899
Thornton, Charles S (edited by) Regeneration in Vertebrates (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Thornton, Dr J D (Ramshaw, Dr C , and) Droplet Circulation and Interfacial Disturbances in Gas–Liquid Systems, 719
Thornton, R H , and Sinclair, D P *Sporidesmium bakeri* and Facial Eczema of Sheep in the Field, 1327
Thorpe, Dr W H Knowing and Being, 1194
  Evolution of Behaviour, *review*, 1762
Thorpe, Dr W V Appointed chairman of the Editorial Board of the *Biochemical Journal*, 508
Thought (Western) The History of, *review* by Gerd Buchdahl, 1829
Threats to Broadcasting Two—Political and Commercial Control (H Carleton Greene), 661
Threlfall, C J Synthesis of Diphosphopyridine Nucleotide from Nicotinamide by Slices of Liver, 60
Thresher, Dr J J Nuclear Forces and the Few-Nucleon Problem (The Primary Two-Nucleon Interaction), 1113
Threshold of Space—the Proceedings of the Conference on Chemical Aeronomy, sponsored by the Geophysics Research Directorate, Air Force Cambridge Research Center, Cambridge, Mass , 1956 (edited by M Zelikoff), *review*, 1011
Thrombins Rivanol, Resin and the Isolation of (Dr Kent D Miller), 450
Thrombocytes (Human) Extraction of an Actomyosin-like Protein from (M Bettex-Galland and Dr E F Luscher), 276
Thromexane (the Anti-coagulant Drug Pelentane or) Isomeric O-Methyl Ethers of Ethyl di-(4-hydroxycoumarinyl-3)-Acetate (Dr Eduard Knobloch), 1568
Thurlow, S J (Moreland, Dr J D , and) Biomechanics (Problems connected with Road Crash Injuries), 513
Thurstone, Prof L L The Measurement of Values, *review* by Prof Ll Wynn Jones, 1010
Thwaites, Dr B Appointed to a third chair of mathematics, with special reference to fluid mechanics, in the University of Southampton, 590 , work of, 590
Thymectomized Mice Inoculated with Leukaemic Filtrate Fate of Subcutaneous Thymus Grafts in (J F A P Miller), 1809
Thymine Hydroperoxide produced by X-Irradiation Structure of (B Ekert and R Monier), B A 58
Thymus Influence of the, upon the Egg-White Allergy in the Rat (Dr J Comsa), 1726
Thymus in the Rat Effect of Adrenalectomy on the Hormone Content of the (Dr J Comsa), 279
Thymus (Calf) High Molecular Weight Ribonucleic Acids from the Nuclei of (Dr Ping-yao Cheng), 190
Thymus Grafts (Subcutaneous), in Thymectomized Mice Inoculated with Leukaemic Filtrate Fate of (J F A P Miller), 1809
Thymus Nuclei (Isolated) Monovalent Cations and the Incorporation of Metabolites by (Dr Theodore R Breitman and Dr George C Webster), 637
Thyroid Administration (Prolonged) Effect of, on Male Aged Rats (Prof John F Lhotka Lloyd Glenn McArthur and Arthur A Hellbaum) 1149
Thyroid Antibodies Detection of, using Bentonite Particles (Dr J A M Ager, Dr M S R Hutt and G Smith) 478
Thyroid Glands Accumulation of Radioactive Iodine in, subsequent to Nuclear Weapon Tests and the Accident at Windscale (Dr Hamish A Robertson and Ian R Falconer), 1699
Thyroid-stimulating Hormone (Fluorescent), in Rat Tissues Histological Localization of (Dr E E Mancini, O Vilar, J M Dellacha, A Gimeno and A Castro) 1733
Thyroidectomy Effects of Methylthiouracil or, on Activation of Pituitary Acid Phosphatases *in vitro* by Whole Hypothalamic Extract (Dr V Schreiber and Dr V Kmentova), 728
Thyroxine Effect of Thiouracil and, on Development and Growth of Cutaneous Melanoma in Killifish Hybrids (Prof A Stolk), 562
  Reversal by Acetylcholine of the Inhibition by of Oxidative Phosphorylation in Guinea Pig Heart Sarcosomes (Heitor Medina and Metry Bacila), 1066
Thys, O and others Production of an Agglutinating Auto-Antibody (Panagglutinin) Active upon Tanned Erythrocytes in the Rabbit, 1250
Thysanoessa raschii Spectral Composition of the Luminescence of the Euphausiid (Dr Brian P Boden and Dr Elizabeth M Kampa), 1321
Tick (Blue) Pyrethrum Resistance conferred by Resistance to DDT in the (G B Whitehead), 378
Tick (Blue), *Boophilus decoloratus* Contents of Cystine-Cysteine, Glutathione and Total Free Sulphydryl in Arsenic-resistant and Sensitive Strains of the (Dr J S Harington), 1739
Tick (Brown Ear), *Rhipicephalus appendiculatus* Neumann New Cell Types in the Salivary Glands of the (Dr W M Till), 1078
Tick-borne Encephalitis Virus Infectious Ribonucleic Acid from Mouse Brains infected with (F Sokol, H Libikova and J Zemla), 1581
Tide (Ebb and Flood) Discrimination between in Migrating Elvers (*Anguilla vulgaris* Turt) by means of Olfactory Perception (F Creutzberg), 1961
Tides in the F_2 Ionospheric Layer (Dr P Herrinck), 1055
Tiere Die Banderschnecken, eine Studie zur Evolution der (Prof Dr F A Schilder und Dr Maria Schilder), *review* by Dr A J Cain, 390
Tiffin, A I , and others Interaction of Sucrose Stearate with Starch, 110
  Interaction of Anti-Staling Agents with Starch, 547
Tilak, B D , and others Inhibition of Tumour Growth with 2 5-Dicarbethoxy-3 4-Dihydroxy-Thiophene, 201
Tilapia nigra Feeding Mechanism of (Peter J Whitehead), 1509
Tilapia nilotica x *T galilea* Hybrids of (A Yashouv and J Chervinsky), 1739
Till, Dr W M New Cell Types in the Salivary Glands of the Brown Ear Tick, *Rhipicephalus appendiculatus* Neumann, 1078
Tilley, Dr J M A Strontium-90 in Human Diet, 1111
Tillman, Dr J R Advances in Electronics and Electron Physics, *review*, 1601
  Rochester Conference on Semiconductors, *review*, 1674
Tillotson, E Yellowstone Park Earthquake, 955
Timber Limitations Imposed by some Water-borne Preservatives on the Soil Block Test Method for (A J McQuire), 1430
Time An Absolute Scale of (Sir John Carroll), 260
Time Ball at Greenwich, 318
Time Effects (Polarization and Resolving), in Photon Correlations (Dr E Brannen and Prof W Wehlau), 263
Time Relations of Humorally Co-ordinated Chromatic Responses Significance of the (Dr A K Kent), 2027
Time-Scale The Geological (Prof J Laurence Kulp, James C Cobb, Leon E Long and Donald S Miller), B A 62 , (Prof C F Davidson), 1310, 1473
Time Standard An Improved Caesium Frequency and (Dr L Essen and J V L Parry), 1791
Times (The Life and), of Sir Charles Hastings Founder of the British Medical Association (Dr William H McMenemey), *review* by Dr W R Bett, 923
Times (Renewal), of some Squamous Epithelia in the Guinea Pig (H Platt), 1654
Timmis, G M , and Epstein, Dr S S New Antimetabolites from Vitamin B_{12}, 1383
Timon, Vivian Awarded a junior postgraduate agricultural research scholarship by An Foras Taluntais (the Agricultural Institute of Ireland), 1612
Tineola bisselliella (Humm) A Reduced Triphosphopyridine Nucleotide-linked Cystine Reductase in the Clothes Moth (R F Powning and H Irzykiewicz), 1230
Tinfoil to Tape From—the History of the Gramophone (John Cain), 1535
Tingidae (Hemiptera) Mode of Egg Laying in (T S Thontadarya and G P Channa Basavanna), 289
Tingwaldt, C Thermodynamics (Physical Constants), 1608
Tipper, Dr D J , and others Some Observations on certain Mucoproteins containing Neuraminic Acid B A 68
  N-Methylation of Methyl 2-Acetamido-2-Deoxy-α-D-Glucopyranoside, 1718
Tipson, R Stuart (edited by Melville L Wolfrom in association with) Advances in Carbohydrate Chemistry, Vol 13, *review* by Dr Alfred Gottschalk, 662
Tissue Low-Temperature Autoradiography for the Detection of Tritium in, with Removal of Luminescence induced by Tritium (P Pellerin, P Fallor, M Laine-Boszormenyi and F Serrel), 1385
Tissue (Adipose) in Normal and Diabetic Rats Release of Non-Esterified Fatty Acids from (Dr J Wendeova and Dr J Pav), 1147
Tissue (Apple) Oxidation of Krebs Cycle Acids by (M D Hatch, J A Pearson, A Millerd and R N Robertson), 506
Tissue (Brain) Presence of certain Onium Compounds in, following Intravenous Administration to Rats (Prof Ruth R Levine), 1412
Tissue (Brown and Yellow Adipose), of the Bat Lipase Activity in the (Prof J C George and J Eapen), 59
Tissue (Chick Mesenchymal) Production of Serum Albumin and of Globulins by, and by HeLa Tumour Tissue in Culture (Y Abdel-Samie, Prof E Broda, G Kellner and W Zischka), 361, *erratum*, 943
Tissue (Connective) Diaphragms for Analysing the Development of (Prof Hans Selye), 701
Tissue (HeLa Tumour) Production of Serum Albumin and of Globulins by Chick Mesenchymal Tissue and by, in Culture (Y Abdel-Samie, Prof E Broda, G Kellner and W Zischka), 361, *erratum*, 943
Tissue (Lymphomatous Mouse) Partial Identification of Lysins and Agglutinins in (Dr Eric Ponder and Ruth V Ponder) 819
Tissue (Rat Oral) Effect of Vitamin D on the Respiration of (L Zar and Prof J T Irving), 1410
Tissue Culture An Attenuated Strain of Canine Distemper Virus in (Prof Gunnar Rockborn), 822
  Cell and (Dr John Paul), *review* by Dr I Leslie, 1009
  Transformations of Myxoma into Vaccinia or Ectromelia Virus in (Hidesaburô Hanafusa, Teruko Hanafusa and Juntarô Kamahora), 1152
Tissue Culture (Tsetse Fly) Development of *Trypanosoma vivax* to the Infective Stage in (Dr William Trager), B A 30
Tissue Culture Cells (Human) Cellular Uptake of Deoxyribonucleic Acid by (Dr Stanley M Gartler), 1505
Tissue Culture Monolayers (Pig Kidney) Effect of Proflavine on the Formation of the Virus of Foot-and-Mouth Disease and its Infective Ribonucleic Acid in (F Brown and Doreen L Stewart), B A 74
Tissue Cultures (Plant) Oxidative and Phosphorylative Activities of Cytoplasmic Particles from (Taiki Tamaoki, Prof A C Hildebrandt, A J Riker, R H Burris and Bunji Hagihara), 1491
Tissue Cultures (Roller Tube) Use of Transparent Cellular Film for (John A Sharp), 1508

Tissue Extracts (Animal) Occurrence and Quantitative Determination of 2-Dimethylaminoethanol in (Dr Conrad G Honegger and Ruth Honegger), 550, *erratum*, 1986
Tissue Extracts (Tomato Crown-Gall) Occurrence of 3-Indolylacetic and 3-Indolecarboxylic Acids in (G Clarke, M H Dye and Prof R L Wain), 825
Tissue Fragments (Parathyroid) Maintenance of, on Agar Substrates (Dr John H Wallace, Dr George J Hill, Jean M McCarthy and Dr John R Brooks), 1734
Tissue Mucoproteins Determination of (Luiz A Abreu and R Raposo Abreu), 2016
Tissue Repair Wound Healing and (edited by W Bradford Patterson), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Newth, 839
Tissue Slices Application of Warburg's Equation to (Dr I S Longmuir and Dr Ann Bourke), 634
Tissues Mast Cell Population of Lung of the Guinea Pig and other (Dr W G Smith), 1154
Tissues Deficient in Vitamin E An Effect of Selenium and Cystine on Lipide Peroxidation in (Dr John G Bieri), 1148
Tissues of the Foetal and Adult Sheep Inositol Concentration in the Cerebrospinal and Ocular Fluids and (D A Nixon), 906
Tissues (Adult Lymphoid) Influence of, on Polyoma-induced Tumours (Dr V Defendi and Dr H Koprowski), 1579
Tissues (Cultured Human) Sex Chromatin in (Dr Charles P Miles), 477
Tissues (Different), and Subcellular Fractions Distribution of Enzyme Systems responsible for Steroid Metabolism in (Virendra B Mahesh and Frank Ulrich), 1147
Tissues (Eye) Distribution of Radioactive Barium in (R J Garner), 733
Tissues (Liver, Kidney and adjacent) Tumourigenesis in Ovaries of Mice transplanted to the (Dr Mary J Guthrie), 916
Tissues (Mouse) Ribonucleases of, and of the Ehrlich Ascites Tumour (K A O Ellem, J S Colter and Jeanne Kuhn), 984
Tissues (Muscle) Determination of Chlorine in, by Neutron Activation Analysis (Dr Jonas Bergstrom), 1504
Tissues (Plant) Biochemical Mechanism of Lesion Formation in Virus-infected (Dr F Solymosy, Dr G L Farkas and Dr Z Kiraly), 706
Tissues (Proliferating) Dynamics of (edited by Dorothy Price), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council) *review* by Dr D R Newth, 839
Tissues (Rat) Histological Localization of Fluorescent Thyroid-stimulating Hormone in (Dr E E Mancini, O Vilar, J M Dellacha, A Gimeno and A Castro), 1733
Tissues (Rinderpest-infected Bovine) Heat Inactivation of (Dr G R Scott), 1948
Titanium as a Gettering Material (R L Scow), 542
Titanium Dioxide Pigment Particles Forces between (James E Latty and Dr W C Clark), 49
Titchen, Dr D A (Sellers, Prof A F, and) Responses to Localized Distension of the Oesophagus in Decerebrate Sheep, 645
Titration (Sub-Micro), of Derivatives containing Nitro Groups Quantitative Paper Chromatography based on the (L Blom and J Caris), 1313
Titration Curves of Soil Organic Matter (R S Beckwith), 745
Titrimetric Analysis Nomenclature in (Committee of the Analytical Chemistry Section of the International Union of Pure and Applied Chemistry), 1686
Titschack, Prof Dr Erich, und Koepcke, Dr Hans-Wilhelm (herausgegeben von) Beitrage zur Neotropischen Fauna, Band I, Heft 3, Zur Kenntnis der Pseudoscorpioniden-Fauna des Andengebietes (Max Beier), Kritische Untersuchungen der Newportia-Arten (Wolfgand Bucherl), Ein neuer *Asthenes* (Aves, Furnariidae) von der Kuste und dem westlichen Andenabhang Sudperus (Maria Koepcke), Beitrage zur Kenntnis der Fische Perus, II (Hans-Wilhelm Koepcke), *review* by Dr F A Turk, 1177
Titterton, Prof E W, and others Strontium-90 in the Australian Environment, 1957-58, 755
Tjebbes, J Thermodynamics (Experimental Thermochemistry), 1607
Tobacco (Maryland Mammoth) Isolation of Fatty Alcohols with Plant-Growth Promoting Activity from (Dr A J Vlitos and Dr D G Crosby), 462
Tobacco Hornworm, *Protoparce sexta* (Johan) and the Colorado Potato Beetle, *Leptinotarsa decemlineata* (Say) Common Attractant for the (Dr Robert T Yamamoto and Prof G Fraenkel), 206
Tobacco Leaf and Tobacco Smoke Composition of a Paraffin Wax Fraction from (Dr W Carruthers and Dr R A W Johnstone), 1131
Tobacco Leaf Cells capable of Supporting Virus Multiplication Isolation of (Prof Milton Zaitlin), 1002
Tobacco Mosaic Virus Effect of Nitrous Acid on—Mutation or Selection? (F C Bawden), B A 27
  Replication of—Kinetics of Virus Protein and Ribonucleic Acid Biosynthesis (Prof Barry Commoner, Dr James A Lippincott and Dr Janey Symington), 1992, A Re-examination of Theories (Prof Barry Commoner), 1998
  Rotational Friction Coefficients of Models of and the Size of the Virus Particle (Dr A J Haltner and Dr B H Zimm), 265
Tobacco Mosaic Virus inactivated by Antibody Recovery of Infectious Nucleic Acid from (Dr Irving Rappaport), 1732
Tobacco Smoke (Tobacco Leaf and) Composition of a Paraffin Wax Fraction from (Dr W Carruthers and Dr R A W Johnstone), 1131
Tobias, Cornelius A, and Lawrence, John H (edited by) Advances in Biological and Medical Physics, Vol 6, *review* by Dr N M Blackett, 1766
Tobias, Stanley, and others Tumour Specificity and Immunological Suppression, 563
Tobias, Dr S A Appointed to the Chance chair of mechanical engineering in the University of Birmingham, 502, work of, 502
Tocopherols in Micro-organisms (J Green, S A Price and L Gare), 1339
Todorov, Y, and others Agar Electrophoresis of Normal Soluble Proteins in Guinea Pig Liver, B A 64
Tokushige, Ambrose M, and Cook, Prof Elton S Thermal Decarboxylation of some Keto-Acid Hydrazones, 267
Tolansky, Prof S, and Sunigawa, Dr I Spiral and other Growth Forms of Synthetic Diamonds—a Distinction between Natural and Synthetic Diamond, 1526
Tolerance to Skin Homografts of Adult Mice after Parabiosis (Dr B A Rubin), 205
Tolerance (Ethanol), of Rats Sex Difference in (Henrik Wallgren), 726
Tolerance (Heat), Exhibited by *Bos taurus* and *Bos indicus* Beef Cattle A Possible Explanation for Part of the Difference in (H P Ledger), 1405
Tolerance (Induced), to D-Tubocurarine Chloride in the Cat (Fiona Acheson and Dr R J M Fry) 1409
Tolley, Dr G Personnel Management and Technological Change (Progress of Technological Education in the United States, the U S S R and Great Britain), 1614
Tolmatchev, A Origin and Dispersal of Flowering Plants (Arctic Flora first formed in the Pliocene–Pleistocene), 1200
Toluidines Separation of the *Meta-* and *Para-*Isomers of the Xylenes Cresols and, by Gas Solid Chromatography (M A Hughes, D White and Prof A L Roberts), 1796
Tomaschek, Prof R Great Earthquakes and the Astronomical Positions of Uranus, 177
Tomato Crown-Gall Tissue Extracts Occurrence of 3-Indolylacetic and 3-Indolecarboxylic Acids in (G Clarke, M H Dye and Prof R L Wain), 825
Tomato Roots (Excised) Nitrate Reduction by Aqueous Extracts of (C S. Vaidyanathan and Prof H E Street), 531
  A Non-Dialysable Inhibitor of Glutamo-Transferase present in (C S Vaidyanathan and Prof H E Street), 347
Tomato and Banana Strains of *Pseudomonas solanacearum* Comparison of Slime from (Dr W F Dudman), 1969
Tomatoes Production of Ethylene by Mitochondria from (Prof Mary S Spencer), 1231
Tomchick, Dr Robert (Axelrod, Dr Julius, and) Activation and Inhibition of Adrenaline Metabolism, 2027
Tomich, E G, and others Spectrophotofluorometric Assay of Griseofulvin, 364
Tomkeieff, Prof S I The Periodic Law, *review*, 1598
  Metallogenic Maps, 1693
Tomlinson, T E (Homer, R F, and) Redox Properties of some Dipyridyl Quaternary Salts, 2012
Tompkins, Dr F C Title of professor of physical chemistry in the University of London (at the Imperial College of Science and Technology) conferred on, 1273
Tong, E H Looking for Animals in East Africa (Christmas Lecture at the Zoological Society of London), 1535
Tonic Smooth Muscles of Lamellibranch Molluscs Evidence for a Sliding Filament Contractile Mechanism in (Dr Jean Hanson and Dr J Lowy), 286
Tool in Clinical Metabolic Research Enzymic Activities of Human Skeletal Muscle Mitochondria—a (Dr L Ernster, Dr D Ikkos and Dr R Luft), 1851
Tool for Industry Radiation, a (National Industrial Conference Board, Inc seventh Annual Conference on Atomic Energy in Industry), 506
Toovey, F W Glasshouse Crops Research Institute—Open Day, 1033
Top Growth of Cultivated Tea (Dr D N Barua), 1424
Topchiev, A V Nitration of Hydrocarbons and other Organic Compounds (translated from the Russian by Catherine Matthews), *review* by Prof M J S Dewar, 577
Topography (Surface), of the Antarctic Ice Sheet (Dr J F Nye), 786
Toriyama, Hideo Changes in the Lacunal Parenchyma of *Mimosa pudica* in Diurnal and Nocturnal Conditions, 737
Torkelson, T R, and others Post-Exposure Analysis of Organic Compounds in the Blood by a Rapid Infra-red Technique, 192
Torry Research Station, Aberdeen Open Days (Dr G H O Burgess), 863
Torulopsis utilis Glycolaldehyde Trapped from Aerobic Oxidation of D-Xylose by (V Bolcato and G Leggiero), 1318
Total Free Sulphydryl (Cystine-Cysteine, Glutathione and) Contents of, in Arsenic-resistant and Sensitive Strains of the Blue Tick, *Boophilus decoloratus* (Dr J S Harington), 1739
Total Mammary Glands of the Mouse Organ Cultures of (Dr F J A Prop), 379
Total Protein from Wheaten Flour Extraction of the, in the Form of Soluble Derivatives (E E McDermott and Dr J Pace), 546
Tousey, Dr R, and others Lyman-Alpha Photographs of the Sun, 8
Touster, Prof Oscar (Bozian, Dr R C, and) Essential Pentosuria—Renal or Enzymic Disorder, 463
Tove, Prof S B Production of Odd-Numbered Carbon Fatty Acids from Propionate by Mice, 1647
Toward a Systematic Pragmatics (R M Martin), *review* by F I G Rawlins, 754
Townes, Prof C H (Cedarholm, J P, and) A New Experimental Test of Special Relativity, 1350
Towers, Prof G H N (Ibrahim, Dr Ragai K, and) Conversion of Salicylic Acid to Gentisic Acid and *o*-Pyrocatechuic Acid, all Labelled with Carbon-14, in Plants, 1803
Towns (Two) After Work—Leisure and Learning in (R Ruddock and Dr A Wilson), 1034
Townsley, J D, and others Effect of Steroids and related Compounds on the Growth of Dermatophytes, 1731
Toxaemia after Burning, *review* by Dr S Sevitt, 5
Toxicity of Cationic Macromolecules Reduction of, by Complexing with Anionic Derivatives of Synthetic Polyglucoses (P T Mora, B G Young and M J Shear), 431
Toxoid of Histamine Sensitizing Factor Formation of the, in *Bordetella pertussis* (Prof Toshitaka Matsui and Yoshio Kuwajima), 199
Toxoplasmosis Ovine Abortion due to (Dr J K A Beverley and W A Watson), 2041
Trace Elements in Basic Magma Deposition of (R J P Williams), 44
Trace Elements in Marine Biological Ashes Some Activation Analysis of Six (R Fukai and Prof W W Meinke), 815
Trace Metals in Cheese Fat Oxidation and (Tallowy Discoloration in Cheddar Cheese), (F Bishop), 1295
Tracer Applications for the Study of Organic Reactions (John G Burr, Jr), *review* by Dr A I Scott, 1902
Tracer Study (A Radiochemical), of the Relative Stability of the Halogenoplatinates (A J Poe and M S Vaidya), 1139
Trachysaurus rugosus (Gray) Effects of Elevated Plasma Sodium Concentration on Sodium and Potassium in the Erythrocyte of the Lizard (P J Bentley), 1403

Tracks (Low-Energy Particle) Bubble Counting on (I R Birss), 1474
Trackways (Prehistoric Wooden) Radiocarbon Dating of (Dr H Godwin and Dr E H Willis), 490
Trade (Free), in Land in the Victorian Period (O R McGregor), 1916
Trade Waste Treatment River Pollution Sewage Disposal and (Department of Civil Engineering and the Department of Extra-Mural Studies in the University of Birmingham Course on), 1451
Tradition (Scholarly) Nuclear Technology and the, *review* by Dr J Walker, 1973
Traffic Engineering (Highway and), at Birmingham, 939
Tragacanth (Powdered), Tragacanthae Pulvis B P Growth Inhibition of Mouse Ascites Tumour Cells by (Dr E M F Roe), 1891
Trager, Dr William Development of *Trypanosoma vivax* to the Infective Stage in Tsetse Fly Tissue Culture, B A 30
Train, Dr D Title of reader in pharmaceutics in the University of London (at the School of Pharmacy) conferred on, 1108
  Pharmaceutical Research in the U S S R , *review*, 1831
Training New Developments in—Five Studies in the Efficient Communication of Skills (edited by Frank A Heller), 421
Training (Post-Graduate), in the Public Health Aspects of Nuclear Energy (World Health Organization, Technical Report Series No 154), 33
Training Course (Regional), on Diagnosis, Improvement and Management of Salt-affected Soils (Unesco Middle East Science Co-operation Office), 1778
Training Course (Regional), for Laboratory Technicians (University Institute of Chemistry, Lahore), 857
Training Facilities in Britain Expansion of Educational and, 569
Training Scholarship (Research), of the Animal Health Trust awarded to W A G Charleston, 771
Tranquillizers (Phenothiazine-) Differential Analysis of the Effects of, on Emotional and Motor Behaviour in Experimental Animals (Dr M Taeschler and Dr A Cerletti) 823
Tranquillizing Drugs Effect of on Survival from Experimental Diphtheric Intoxication (Prof Leo Greenberg and Dr James W Ingalls), 1721
Transaminase (Glutamic-Pyruvic), in Rabbit's Long Bones (L Tessari and L Parrini), 904
Transaminases in *Shigellae* (Dr Ranjit Sen), 741
Transducers (Paste) Ultrasonic Barium Titanate Adhesion and (Dr A Lutsch), 1458
Transduction in *Pseudomonas aeruginosa* (Dr B W Holloway and Marilyn Monk), 1426
  Effect of Ultra-Violet Irradiation on (J S Loutit), 1960
Trans-Equatorial Migrant (the Short-tailed Shearwater *Puffinus tenuirostris*) Experimental Demonstration of an Internal Rhythm of Reproduction in a (Dr A J Marshall and Dr D L Serventy), 1704
Transfer (Energy), with special reference to Biological Systems (Faraday Society Discussion on), 688
Transfer (Interocular) Some New Subjective Phenomena apparently due to (Ian P Howard) 1516
Transfer Mechanisms of Electronic Excitation (Prof Th Forster), 688
Transferase (Glutamo-) A Non-Dialysable Inhibitor of, present in Excised Tomato Roots (C S Vaidyanathan and Prof H E Street), 347
Transferrin Variants Haptoglobin and, in Bushmen and some other South African Peoples (Dr N A Barnicot, J P Garlick, Ronald Singer and Dr J S Weiner), 2042
Transformation of Cubic Boron Nitride to a Graphitic Form of Hexagonal Boron Nitride (H Judith Milledge, E Nave and F H Weller), 715
Transformation (Microbiological), of a Cardiac Aglycone (Hayao Nawa, Masao Uchibayashi, Takaaki Kamiya, Togo Yamano, Hideo Arai and Matazo Abe), 469
Transformation Reaction of Pneumococci in the Absence of Serum Factor (Prof Takeshi Odaka and Tadashi Watanabe), 471
Transformations of Myxoma into Vaccinia or Ectromelia Virus in Tissue Culture (Hidesaburô Hanafusa, Teruko Hanafusa and Juntarô Kamahora), 1152
Transformations (Martensitic), in Metals and Alloys (Academician G V Kurdjumov), 1450
Transforming Principle of *Bacillus subtilis* Incorporation of 5-Bromouracil into, and its Biological Effects (Dr Erela Ephrati-Elizur and Prof Stephen Zamenhof), 472
Transistor Circuits Use of the Silicon Resistor in the d c Stabilization of (J T Zakrzewski and D H Mehrtens), 811
Transistor Convention and Exhibition (F F Roberts and H G Bassett), 693
Transistor Electronics, *review* by J W R Griffiths, 838
Transistor Electronics (Arthur W Lo, Richard O Endres, Jakob Zawels, Fred D Waldhauer and Chung-Chih Cheng), *review* by J W R Griffiths, 838
  Junction (Richard B Hurley), *review* by J W R Griffiths, 838
Transistor Exhibition International (Electronics and Communications Section of the Institution of Electrical Engineers), 693
Transistors and Associated Semiconductor Devices (Electronics and Communications Section of the Institution of Electrical Engineers International Conference on), 693
Transition of Calcium Sulphate Hemihydrate to Insoluble Anhydrite (Chikara Mitsuki and Masayoshi Kita), 1481
Transitions (Phase), in Interlamellar Films (Dr D M C MacEwan and Dr F Aragon de la Cruz), 1859
Translocation of Carbon-14-labelled Amino-Acids and Amides in the Stems of young Soya Bean Plants (C D Nelson and P R Gorham), 855
Translocation of Cobalt-60 and Caesium-137 by Fungi in Agar and Soil Cultures (Dr Erna Grossbard and Dr D R Stranks), 310
Transmission of Passive Immunity in an Insectivore (B Morris), 1151
Transmission of a Virus to Strawberry Plants by a Nematode (*Xiphinema* sp), (Asharfi Jha and Dr A F Posnette), 962, *erratum*, 1192
Transmission (Needle), of a New Maize Virus (Dr I Harpaz), B A 77
Transparent Cellulose Film Use of, for Roller Tube Tissue Cultures (John A Sharp), 1508
Transparent Sintered Alumina—'Lucalox' (General Electric Company of America), 1107
Transplantable Mouse Plasma-Cell Neoplasm Bence Jones Proteinuria associated with a (John L Fahey and Michael Potter), 654, *erratum* 1108
Transplantation (Interstrain Ovarian), in Lethally Irradiated Mice after Bone Marrow Therapy (Prof W St Amand and L H Smith), 1503
Transplantation Immunity—Separation of Antigenic Components from Isolated Nuclei (Andre Castermans and Andre Oth), 1224
Transplanted Tumours in the Mouse Effect of Bacillus Calmette-Guerin Infection on (Dr Lloyd J Old, Dr Donald Q Clarke and Dr Baruj Benacerraf), 291
Transport, Canadian Department of Retirement of Dr Andrew Thomson as director of the Meteorological Branch, 1105
  Appointment of Patrick D McTaggart-Cowan as director of the Meteorological Branch, 1105
Transport of Driftwood from South America to Tasmania and Macquarie Island (Prof H N Barber, Dr H E Dadswell and H D Ingle), 203
Transport of 3-Indole Acetic Acid in *Avena* Electrical Determination of (I A Newman), 1728
Transport and Communications The Critical Importance of (Sir Ewart Smith), B A 44
Transport (Active), of Uric Acid through the Human Erythrocyte Membrane (Dr Kay Overgaard-Hansen and Dr Ulrik V Lassen), 553
Transport (Hydrogen), of Phenolic Œstrogens Two Enzymic Mechanisms for (Dr H G Williams-Ashman, M Cassman and Margaret Klavins), 427
Transport (Monosaccharide), in Rat Diaphragm Muscle (F C Battaglia and P J Randle) 1713
Transportation (Weed) New Zealand Research on, 1361
Trans-Unsaturated Acids in the Depot Fats of Ruminants and Non-Ruminants (L Hartman and Dr F B Shorland), 2024
Transuranium Elements (Prof Glenn T Seaborg) *review* by Dr J K Dawson, 922
Travel Grants under the Fulbright Programme, 1273
Travelling Disturbances (Giant), and Sporadic *E* Ionization A Relation between (L H Heisler), 1788
Travelling Research Fellowships Carlsberg–Wellcome (Awards) 683
Trawl Fishery (Tropical) Prediction of Selection Factors in a (Alan R Longhurst), 1170
Treasury Control of Expenditure (Observations of the Treasury), (Seventh Special Report from the Select Committee on Estimates, Session 1958-59), 696
Treatment Nuclear Fuel, *review* by Dr J E Littlechild, 1346
Treatment by Arginase Inhibitor Uraemia and its (Dhruba K Sen), 459
Treatment of Kwashiorkor Changes in the Level of Serum Protein during (Dr Olumbe Bassir), 2019
Treatment (Heat) Electrical Resistivity Changes observed in a Semiconducting Diamond after (R E Mutch and Dr F A Raal) 1857
Treatment (Trade Waste) River Pollution Sewage Disposal and (Department of Civil Engineering and the Department of Extra-Mural Studies in the University of Birmingham Course on), 1451
Treatment (Vanadium) Intracellular Thioctic Acid and Coenzyme A following (E Mascitelli-Coriandoli and Dr C Citterio), 1641
Tree Fruit Production (Dr James S Shoemaker and Dr Benjamin J E Teskey), *review* by Prof H W Miles, 487
Tree (Forest-) Litter Extracts Factors in, affecting the Growth of Soil Micro Organisms (Dr Roger Knowles and Edward Laishley), 1169
Tregallas-Williams, Dr J At the Second Australian Spectroscopy Conference (A Fast-scanning Infra-red Spectrometer equipped with a Cooled Lead–Tellurium Detector), 1197
Treibs, Prof Wilhelm Elected a member of the Chemistry Section of the Leopoldina Academy of Natural Sciences, 595
Trends in Birth Rates in the United States since 1870 (Dr Bernard Okun), *review* 134
Trends in Genetic Analysis (Prof G Pontecorvo), *review* by J Maynard Smith, 752
Trends in Palaeontology Recent Developments and (Prof O M B Bulman), B A 42
Trends in Statistics Teaching, *review* by J Durbin, 1008
Trends in the Theory of the Ionosphere Recent (J A Ratcliffe), 419
Trends in Urban Expansion (Prof K C Edwards), B A 43
Trends (Current), of Strontium-90, Strontium-89 and Caesium-137 Levels in Milk (W Anderson, L K Burton and J O Crookall), 89
Trends (Development), in Australian Scientific Research, 1027
Trevelyan Scholarships Second awards of, 1845
Trew Microfilming, Ltd Microcard Adapter for 'Dagmar' Microfilm Reader, 941
Trials (Agricultural Variety) Influence of Site and Season on (A Sandison), 834
s-Triazines and Derivatives (edited by Edwin M Smolin and Lorence Rapoport), (Chemistry of Heterocyclic Compounds, Vol 13), *review* by Dr F G Mann, 1758
Trichostrongylus retortaeformis (Zeder, 1800) A Seasonal Sex Difference in the Infestation of Rabbits with the Nematode (P C Bull), 281
Trichosurus vulpecula (Brush-tailed Opossum), in New Zealand Bionomics of the (R I Kean), 1388
Trichothecin-like Antifungal Antibiotic A New (E T Glaz, Eszter Scheiber, J Gyimesi, I Horvath, Katalin Steczek, A Szentirmai and G Bohus), 908
Trifolium pratense L Floral Initiation and its Relationship to Growth-Stage in Red Clover (J L Stoddart), 559
Trifolium repens Separation by Gamma-Irradiation of Two Elements at the Vby Locus in (Dr D Roy Davies and E T Wall), 1957
Trigonometric Series (Prof A Zygmund), second edition, *review* by Prof T A A Broadbent, 1176
3,4,ω-Trihydroxyacetophenone 3-methyl Ether in Adrenal Extracts (J von Euw, Prof T Reichstein, R Neher, Dr A Wettstein, Dr J F Tait and Dr S A S Tait), 268
Triphosphate (Adenosine) Equilibrium Constant of the Galactokinase Reaction and Free Energy of Hydrolysis of (Dr M B Atkinson, Eleanor Johnson and Prof R K Morton), 1925
Triphosphate (Adenosine), and Serotonin Release of, from Injured Cellular Blood Elements in Extracorporeal Circuits (Dr H S S Sarajas, Dr R Kristoffersson and Dr M H Frick), 1127
Tri-phosphate (Adenosine Di- and) Concentrations Changes in, in the Early Stages of the Action of Yeast on Glucose (Dr J O Laws and Dr L H Stickland), 1246
Triphosphate (Cytidine) Positive Inotropic Activity of (Winifred G Nayler and Marian McCulloch), 67
Triphosphopyridine Nucleotide-linked Cystine Reductase A Reduced, in the Clothes Moth, *Tineola bisselliella* (Humm (R P Powning and H Irzykiewicz), 1230

Triple Fission of Uranium-235 , Two Cases of (J Catala J Casanova and V Domingo), 1057
Triterpenes and their Derivatives (The Terpenes, by the late Sir John Simonsen and Dr W J C Ross, Vol 5), *review* by Prof A J Birch, 302
Tritium Chromosomal Synthesis of Ribonucleic Acid as shown by Incorporation of Uridine labelled with (G Pelling), 655
  Fate of Injected Dextran Labelled with, in Mice (Å Hanngren, E Hansson, S Ullberg and Prof B Åberg), 373
  Low-Temperature Autoradiography for the Detection of Tritium in Tissue, with Removal of Luminescence induced by (P Pellerin, P Fallot, M Laine-Boszormenyi and F Serrel), 1385
  Use of, to Study the Solubility of Water in Hydrocarbons (B D Caddock and P L Davies), 2011
Tritium in Tissue Low-Temperature Autoradiography for the Detection of, with Removal of Luminescence induced by Tritium (P Pellerin, P Fallot, M Laine-Boszormenyi and F Serrel), 1385
Tritium Exchange *In vitro* Labelling of Antibody Globulin by (Dr P C Rajam and Anne-Louise Jackson), 375
Tritium-labelled Compounds Autoradiography of, on Paper Chromatograms (Dr A W Rogers), 721
Trivedi, T Pollen of *Acacia* from Tufaceous Limestone near Udaipur, 123
Tritton, D J Appointed Rutherford Scholar for 1959, 26
Tropical Africa The Insect Pests of Cotton in (E O Pearson, assisted by R C Maxwell Darling), *review* by Dr W E China, 1011
Tropical Breed of Hair Sheep Light Regulation of Coat-Shedding in a (R B Symington), 1076
Tropical Catchment Areas A Physical Basis for Land Use Policy in (Dr H C Pereira), 1768
Tropical East Africa Flora of—Leguminosae subfamily Mimosoideae (J P M Brenan), 409
Tropical Regions The Calculation of the Median Sky Wave Field Strength in (W R Piggott), 605
Tropical Trawl Fishery Prediction of Selection Factors in a (Alan R Longhurst), 1170
Tropics Radio Field-Strengths in the, 605
Tropolone Biosynthesis—the Enzymatic Decarboxylation of Stipitatonic and Puberulonic Acids (Prof Ronald Bentley and Clara P Thiessen), 552
Tropospheric Radio Propagation Inadequacy of Scatter Mechanisms in (P C M de Belatini), 1558
Tropylium Ion Isomerization to the, induced by Electron Impact and its Significance (Dr W Hanuš), 1796
Trotman-Dickenson, A F Free Radicals, an Introduction, *review* by Dr T M Sugden, 1259
Trotter, M D , and others Delayed Hypersensitivity ('Tuberculin-like' Reactions to Trichophytin in Guinea Pigs), 1030
Trounce, Dr J H Title of reader in therapeutics in the University of London (at Guy's Hospital Medical School) conferred on, 322
Trout (Rainbow) Changes in Purine Nucleotides of Red Lateral Muscle of (Tsuneyuki Saito, Ken-ichi Arai and Toshikatsu Yajima) 1415
Trowell, Dr O A Cell and Organ Culture (Principles and Practice of Organ Culture), 936
Tryhorn, Dr F G , and others Absorption of Zinc Phosphide Particles, 642
Trusts (Newspaper) The Work of (Political and Economic Planning, Broadsheet No 435), 1687
Trypanosoma vivax Development of, to the Infective Stage in Tsetse Fly Tissue Culture (Dr William Trager), B A 30
Trypanosomal Extracts Paper Electrophoresis of (Dr Robert S Desowitz), 986
Trypsin Action of, on α-Carbethoxy-L-lysyl-L-serylglycine and its O-Phosphorylated Analogue (Dr D Theodoropoulos H Bennich, G Folsch and Prof O Mellander), 187
  Electrophoretic Heterogeneity of (J C Perrone, L V Disitzer and A Iachan), 1225
Tryptic Action O-Phosphorylated and Unphosphorylated Peptide-Substrates suitable for (Dr D Theodoropoulos, H Bennich and Prof O Mellander), 270
Tryptophan-requiring Strain of *Escherichia coli* Effect of Purine and Pyrimidine Analogues on Reversion of a (C O Doudney and F L Haas), 114
Tryptophan Peroxidase-Oxidase in *Drosophila melanogaster* Genetic Control of (Corrado Baglioni), 1084
Tryptophan Peroxidase-Oxidase Enzyme System Specificity of the (Dr R H Marchant), 1711
Tschamler, H , and others Coal Science (Chemical Reactions of Coal—Acetylation), 412
Tschernezky, W Age of *Carcharodon megalodon*?, 1331
Tschoegl, N W Structure and Chemistry of Proteins (Surface Chemical Properties of various Cereal Proteins), 1277
Tsetse Fly Tissue Culture Development of *Trypanosoma vivax* to the Infective Stage in (Dr William Trager), B A 30
Tube (Roller) Tissue Cultures Use of Transparent Cellular Film for (John A Sharp), 1508
Tubercle Bacilli (Bovine Type) Nicotinamidase in *Mycobacteria*—a Method for Distinguishing, from other *Mycobacteria* (Dr Kiyoshi Konno, Dr Hideo Nagayama and Dr Sutemi Oka), 1743
Tubes (Narrow) The Flow of Blood through (Prof M Reiner and Dr G W Scott Blair), 354
Tubes (Pollen) Effect of Gibberellin on the Growth of (Nanda Bose), 1577
Tubing (Coated), as Columns for Gas Chromatography Use of (Prof Albert Zlatkis and H R Kaufman), 2010
d-Tubocurarine Chloride Increase by Chlorothiazide of the Paralysing Activity of (Prof W Ferrari, G L Gessa and G Sangiorgi), 1235
D-Tubocurarine Chloride Induced Tolerance to, in the Cat (Fiona Acheson and Dr R J M Fry), 1409
Tubules (Seminiferous), of the Rat Residual Bodies of (B V Kingsley Smith and Dr D Lacy), 249
Tuck, J L Ionization Phenomena in Gases (Recent Work on *Scylla*), 1355
Tucker, Prof D G Introductory Electronics, *review*, 751
  Modern Network Theory in Electrical Engineering (Networks with Parameters varying with Time), 1691
Tucker, Prof D G , and others Awarded the Brabazon Premium of the British Institution of Radio Engineers, 857
Tucker, Dr Den[illegible] W Eel Migration, 1281
Tuey, Dr G A P Gas Chromatography (Sale of Standardised Materials for Use as Stationary Phases), 328
Tufaceous Limestone near Udaipur Pollen of *Acacia* from (T Trivedi), 123
Tulecke, W J , and others Plant Growth Regulation (Isolation of a New Acid from Coconut Milk), 600
Tulpule, P G Biochemical Research in India (Species Specificity in the Mechanism of Pyridine Nucleotide Synthesis by Erythrocytes), 1368
Tumour (Ehrlich Ascites) Ribonucleases of Mouse Tissues and of the (K A O Ellem, J S Colter and Jeanne Kuhn), 984
Tumour Blood Supply A Rapid Method for studying, using Systemic Dyes (Dr R J Goldacre and Dr B Sylvén), 63
Tumour-Cell Cultures in Contact with Lysozyme Appearance of Granules in the Cytoplasm of (Dr Carlo Callerio), 202, *erratum*, 508
Tumour Cells induced by Polyoma Formation of Different Cell–Virus Relationships in (Dr Leo Sachs and Ernest Winocour), 1702
Tumour Cells (Intact Ascites) Efficiency of the Mitochondrial Oxidative Phosphorylations in (Dr P Emmelot and C J Bos), 2024
Tumour Cells (Mouse Ascites) Growth Inhibition of, by Powdered Tragacanth (Tragacanthae Pulvis, B P), (Dr E M F Roe), 1891
Tumour Growth Inhibition of, with 2 5-Dicarbethoxy-3 4-Dihydroxy-Thiophene (Dr M B Sahasrabudhe, M V Narurkar, L B Kotnis, B D Tilak and M D Bhavsar), 201
Tumour Incidence Latent Period of X-Ray Induced Ageing—a Study based on Mortality Rate and (Dr H I Kohn and Dr P H Guttman), 735
Tumour Induction (Crown Gall) A Possible Role of Indoleacetic Acid Oxidase in (Dr Jacques Lipetz), 1076
Tumour Production in Plants by Plant Extracts (Dr Archana Sharma), 1083
Tumour Specificity and Immunological Suppression (Elaine Levi, A M Schechtman, Richard S Sherins and Stanley Tobias), 563
Tumour-Susceptibility Factor in Eggs Differentiation between a Growth-Promoting Factor and a (Charles H Hill and Henry W Garren), 824
Tumour Tissue (HeLa) Production of Serum Albumin and of Globulins by Chick Mesenchymal Tissue and by, in Culture (Y Abdel-Samie, Prof. E Broda G Kellner and W Zischka), 361, *erratum*, 943
Tumour Virus (Parotid) (Polyoma Virus) Antibody Status of Mice and Response of their Litters to (Lloyd W Law, Clyde J Dawe, Wallace P Rowe and Janet W Hartley), 1420
Tumour-bearing Rats Behaviour of Zinc and Radiozinc in (Dr D M. Taylor), 1649
Tumourigenesis in Ovaries of Mice transplanted to the Liver, Kidney and Adjacent Tissues (Dr Mary J Guthrie), 916
Tumours (Bone) An Effect of Dose Fractionation on the Incidence of, using Radioactive Phosphorus (Dr N M Blackett), 565
Tumours (Polyoma-induced) Influence of Adult Lymphoid Tissues on (Dr V Defendi and Dr H Koprowski), 1579
Tumours (Transplanted), in the Mouse Effect of Bacillus Calmette-Guérin Infection on (Dr Lloyd J Old, Dr Donald A Clarke and Dr Baruj Benacerraf), 291
Tunisia Soil Salinity Course in (Prof W R van Wijk), 1778
Tunnel (Hypersonic Gun) Measurement of the Effects of Piston Mass and Bursting Pressure on the Motion of a Piston in a (B J Belcher), 1207
Tunnell, G A World Distribution of Atmospheric Water Vapour Pressure, B A 15
Turbulence A Spectrum of, at Very High Reynolds Number (H L Grant, A Moilliet and Prof R W Stewart), 808
Turian, Gilbert (Cantino, Prof Edward C , and) *Gamma* Particles, Nadi-Positive Mitochondria, and Development in the Water Fungi *Blastocladiella* and *Allomyces*, 1889
Turk, Dr F A Beitrage zur Neotropischen Fauna, *review*, 1177
Turkey Poults Effect of Thioctic Acid on Gain in Body-Weight by (J R Jowsey, R M Blakeley and H I MacGregor), 1323
Turkish-Cypriot Woman A Haemoglobin with Unusual Alkaline-denaturation Properties in a (Dr J E O'N Gillespie, Dr J C White, M J Ellis, Dr G H Beaven, W B Gratzer, Dr E M Shooter and R M E Parkhouse), 1876
Turnbull, A H , and others Atomic Weight of Silver, 358
Turnbull, David (edited by Frederick Seitz and) Solid State Physics, Vols 4, 5 and 6, *review* by Prof E C Stoner, 1753
Turnbull, Dr J H Energy Transfer with special reference to Biological Systems (Energy in the Biological Systems—Properties of Adenosine Triphosphate), 690
Turner, A (Clarke, Prof E , and) *Obituary* of Prof G O Sherrard, 1531
Turner, Dr B L (Alston, Dr R E and) Applications of Paper Chromatography to Systematics—Recombination of Parental Biochemical Components in a *Baptisia* Hybrid Population, 285
Turner, D W Gas Chromatography (New Detector employing changes of Dielectric Constant), 328
Turner, Prof E E Retirement as head of the Department of Chemistry at Bedford College, 1913 work of, 1913
Turner, E G , and Feinberg, J G Retentate, a New Scientific Term, 1139
Turner, Dr H D Robert Hooke and Boyle's Air Pump, 395
Turning Points in Physics, a Series of Lectures given at Oxford University in Trinity Term, 1958 (Dr R J Blin-Stoyle, Dr D ter Harr, Dr K. Mendelssohn, Prof G Temple, F Waismann and Prof D H Wilkinson), *review* by G R Noakes, 1090
Turnip Yellow Mosaic Virus Nucleoprotein Particles with Differing Biological and Physical Properties (R E F Matthews), 530
Turrill, Dr W B The Royal Botanic Gardens, Kew, *review* by Dr Richard A Howard, 1345
  The Genus *Oenothera*, *review*, 1974
Tutin, Prof T G Another Debt to Darwin, *review*, 129
  Hutchinson's 'Families', *review*, 1759
Tutin, Prof T G , and others Excursion Flora of the British Isles, *review* by P Falk, 1093
Tutin, Mrs T G (Dr W Pennington) Relict Fauna of Ennerdale Water —a Problem of Distribution, 1421
Tuzson, J Paper Chromatography of Corticosteroids at Room Temperature, 1937
Twinning of Crystals (International Mineralogical Association Symposium on), 1910
Twiss, Dr R Q , and others Fluctuations in Photon Streams, 967
Twitch Changes in Fluorescence in a Frog Sartorius Muscle following a (Prof Britton Chance and Frans Jobsis), 195
Two Cultures and the Scientific Revolution (Sir Charles Snow), 295 , (Dr W L Sumner), 411

Two-Dimensional High-Voltage Paper Electrophoresis of Amino- and other Organic Acids (Dr D Gross), 1298
Two-Dimensional Paper Chromatographic Method (A New), applied to the Separation of Amino-acids (C S Knight), 1486
Two-Dimensional System for the Separation of Amino-Acids and Peptides on Paper (Virginia Richmond and Brian S Hartley), 1869
Two Enzymic Mechanisms for Hydrogen Transport by Phenolic Œstrogens (Dr H G Williams-Ashman, M Cassman and Margaret Klavins), 427
Two Threats to Broadcasting—Political and Commercial Control (H Carleton Greene), 661
Two Unorthodox Primaries Colour-Image Synthesis with (Arthur Karp), 710
Tyas, J P I, and others Measurement of Cosmic Noise at Low Frequencies above the Ionosphere, 785
Tye, Arthur, and others Effect of the Potassium Salt of Gibberellic Acid on the Growth and Reproduction Rate of *Paramecium multimicronucleatum*, 1405
Tye, R P Special Ceramics (Measuring Thermal Conductivity), 116
Tyneside Association of Libraries for Industry and Commerce, 25
Type of Metabolism Importance of the, for the Radiosensitivity of Mice (Dr M Pospisil and Dr L Novak), 1814
Type-determining Phages of *Salmonella typhy* Mutation in the (E S Anderson), 1822
Type-specific Polysaccharides (Group and) of Group *D* Streptococci (Dr S D Elliott), 1342
Types of Seed A Quick Method for Extracting Plant Embryos from certain (M D Gwynne), 1588
Types and Formats (Printing) Effects of, on the Comprehension of Scientific Journals (E C Poulton), 1824
Types (Various), of Acquired Resistance to Experimental 'Allergic' Encephalomyelitis (G J Svet-Moldavsky, I A Svet-Moldavskaya and L I Raffkina), 1552
Typing (Bacteriophage), applied to Strains of *Brucella* Organisms (Prof G C van Drimmelen), 1079
Tyrrell, A C, and others Isotopic Composition of Boron, 185
Tyrrell, Dr D A J Interferon produced by Cultures of Calf Kidney Cells, 452
Tysarowski, Wieslaw, and Kwiek, Stanislaw Difference between the Catalases of Acid-fast Bacilli, 1513
Tyzzer's Disease of Mice Pure Culture of the Pathogenic Agent of (Dr K Kanazawa and A Imai), 1810
Tzevegmid, D The Mongolian Wild Horse, *Equus przewalskii*, 1025

UBBELOHDE, Prof A R Thermodynamics (Phase Changes in Condensed Systems), 1609
Übersfeld, J Coal Science (Spectroscopy of Coals—Interaction between Protons and Free Radicals in Coals of Low Rank, Exchange Interaction in Coals of High Rank), 413
Ubiquinone Levels in Rat Liver Mitochondria Pantothenic Acid Deficiency and (A S Aiyar, G A Sulebele, D V Rege and A Sreenivasan), 1867
Ubiquinone and Vitamin E (Dr Thomas Moore), 607
Uchibayashi, Masao, and others Microbiological Transformation of a Cardiac Aglycone, 469
Uchida, Kengo, and others Reductive Photo-bleaching of Eosine—Effect of Added Substances on the Rate of Reductive Photo-bleaching, 1620
Udagawa, S Clay Minerals (Relationship between the Mineralogical Constitution and the Firing Properties of Clays), 779
Udaipur Pollen of *Acacia* from Tufaceous Limestone near (T Trivedi), 123
Uemura, Prof Teijiro (Higuchi, Masataka, and) Release of Nucleotides from Yeast Cells 1381
Uganda, East Africa *Stomoxys* Control in (H C M Parr), 829
Uganda Swamp Soil Nitrogen Fixation in a (E A Calder), 746
Uhler, J, and others A New Method for Studying the Functioning of the Lungs, 372
Ullberg, S, and others Fate of Injected Dextran Labelled with Tritium in Mice, 373
Ulmer, R E, and others Relation of Ethanol Metabolism to Several Factors in the Rat, 1721
Ulothrix Effects of Auxin and Gibberellic Acid on Growth of (Dr Herbert Conrad, Dr Paul Saltman and Dr Richard Eppley), 556
Ulrich, Frank (Mahesh, Virendra B, and) Distribution of Enzyme Systems responsible for Steroid Metabolism in Different Tissues and Subcellular Fractions 1147
Ultracentrifugation and Staining of *Hevea* Latex (G F J Moir), 1626
Ultrasonic Absorption of Acetic Acid at 450 kc /s by the Calorimetric Method (S Parthasarathy and V N Bindal), 631
Ultrasonic Barium Titanate Adhesion and Paste Transducers (Dr A Lutsch), 1458
Ultrasonic Vibrations at 10,000 Megacycles (Dr E H Jacobsen), *erratum*, 27
Ultrasonic Waves in Liquids Propagation of (Prof A K Dutta, M Subudhi and K Samal), 352
Ultrasonically Dispersed Sodium (M W T Pratt and R Helsby), 1694
Ultrasound Effect of, on the Protein of Human Serum Denatured with Tannin (Dr Wizold Mizgalski and Irena Zygmunt), 1486
Ultrastructure Comparative Studies in (Linnean Society of London Symposium on), 1445
Ultra-structure of the Myoneural Junction in Myasthenia Gravis (E R Bickerstaff, J V Evans and A L Woolf), 1500
Ultra-violet Absorption of Deoxyribo- or Ribo-Nucleic Acids Comparative Effects of Heat on Chromatography and (Dr Saul Kit), 36
Ultra-Violet Absorption Maxima and the Electronegativity of the Adjacent Atoms in some Aliphatic Carbonyl Compounds A Correlation between the Shift in the (Dr P Borrell), 1932
Ultra-Violet Irradiation Effect of, on Transduction in *Pseudomonas aeroginosa* (J S Loutit), 1960
  Photoautomerization of Cytosine Derivatives on (Shih Yi Wang), 184
  Production of a Perfect Stage in a Nutritionally Deficient Mutant of Pathogenic *Fusarium oxysporum* after (E W Buxton), 1258
Ultra-violet Irradiation of 1,3,-Dimethylthymine (Shih Yi Wang), B A 59
Ultra-Violet Light Annealing of Recoil Damage by (R F C Claridge and Dr A G Maddock), 1932
  Macromolecular Synthesis in Bacterial Recovery from (C O Doudney), 189
Ultra-Violet Lights Application of, to Underwater Research (Richard G Woodbridge, III, and Dr Richard C Woodbridge), 259
Ulyatt, M J, and others Composition of some Fat-free Carcasses and Bodies of New Zealand Sheep, 1724
Umbra of Sunspots and Enhanced Radiation on 200 Mc /s Correlation between the Intensity of the (Per Maltby), 1391
Unanaesthetized Cat Evoked Potentials in Visual Cortex of the (Gabriel Horn and John Blundell), 173
Unbalanced Growth Influence of on Subsequent X-Ray Induced Inhibition of Deoxyribonucleic Acid Synthesis in *Escherichia coli* 15_T (Daniel Billen), 174
Under-developed Countries Assistance for, 1363
  Distribution of Scientific Publications in (Scientific Publications Council Discussion on), B A 22
  Management Problems in, 483
Underdeveloped Territories Management and (Political and Economic Planning, Broadsheet No 434), 483
Under-developed Territories and their Problems, 1519
Underground Decay of a Tau-Meson (A M Short), 893
Underground Test Explosions in Britain 1532
Understanding Concerning Human (Prof Nikunja Vihari Banerjee), *review* by Dr D J McCracken, 1571
Underwater Research Application of Ultra-Violet Lights to (Richard G Woodbridge, III, and Dr Richard C Woodbridge) 259
Unesco Vegetation Map of Malaysia, including New Guinea (compiled by C G G J van Steenis), 27
  Educational Studies and Documents No 30, Technical and Vocational Education in the U S S R (M I Movšovič), 504

United States Coast and Geodetic Survey To erect a Geodetic Marker at the South Pole, 1612
United States Embassy in India Appointment of Prof E C Watson as scientific attaché to the, 1686
United States Expenditure on Research and Development in 1957, 1022
United States Geological Survey Suggestions to Authors of the Reports of the, fifth edition, *review* by Prof C F Davidson, 390
  Bulletin 1064, Systematic Mineralogy of Uranium and Thorium (Prof Clifford Frondel), *review* by Prof C F Davidson, 675
United States National Academy of Sciences Election of foreign associates, 95
United States National Academy of Sciences—National Research Council Conference on the Atomic Mechanisms of Fracture, 324
  Report for 1957-58, 697
  Developmental Biology Conference Series, 1956—Cytodifferentiation (edited by Dorothea Rudnick) , Environmental Influences on Prenatal Development (edited by Beatrice Mintz) , Regeneration in Vertebrates (edited by Charles S Thornton) , Embryonic Nutrition (edited by Dorothea Rudnick) , Immunology and Development (edited by M V Edds, Jr) , Dynamics of Proliferating Tissues (edited by Dorothy Price) Wound Healing and Tissue Repair (edited by W Bradford Patterson), *review* by Dr D R Newth, 839
  Grants-in-aid for Research in Problems of Sex, 1107
United States National Academy of Sciences–National Research Council (Committee on Fire Research and the Fire Research Conference of the Division of Engineering and Industrial Research) Symposium on the Use of Models in Fire Research, 772
United States National Academy of Sciences and the Academy of Sciences of the U S S R Exchange visits by research scientists of each country, 680
United States National Bureau of Standards *Journal of Research* to be published in four separate Sections, 320
  Handbook 69, Maximum Permissible Body Burdens and Maximum Permissible Concentrations of Radionuclides in Air and in Water for Occupational Exposure, 939
United States National Institutes of Health Ninth Annual Instrument Symposium and Research Equipment Exhibit, 26
United States National Institutes of Health (Endocrinology Study Section) Free distribution of Pituitary Hormones, 1272
United States National Radio Astronomy Observatory Appointment of Prof Otto Struve as first director, B A 14
United States National Research Council (National Academy of Sciences) Conference on the Atomic Mechanisms of Fracture, 324
  Report for 1957-58, 697
  Developmental Biology Conference Series, 1956—Cytodifferentiation (edited by Dorothea Rudnick) , Environmental Influences on Prenatal Development (edited by Beatrice Mintz) , Regeneration in Vertebrates (edited by Charles S Thornton) , Embryonic Nutrition (edited by Dorothea Rudnick) , Immunology and Development (edited by M V Edds, Jr) , Dynamics of Proliferating Tissues (edited by Dorothy Price) , Wound Healing and Tissue Repair (edited by W Bradford Patterson), *review* by Dr D R Newth, 839
  Grants-in-aid for Research in Problems of Sex, 1107
United States National Research Council (Committee on Fire Research and the Fire Research Conference of the Division of Engineering and Industrial Research of the National Academy of Sciences) , Symposium on the Use of Models in Fire Research, 772
United States National Science Foundation Grant of 250,000 dollars to the United States Naval Research Laboratory, for rocket observations of ultra-violet and X-ray emissions from solar flares, 406
  Reviews of Data on Research and Development No 13, Research and Development and Economic Growth (Dr A T Waterman), 591
  To establish and maintain a Programme of National Information on Scientific and Technical Personnel, 592
  Resignation of Dr David D Keck as acting director of the New York Botanical Garden in order to remain permanently as programme director for systematic biology at the Foundation's Division of Biological and Medical Sciences, 680
  Grant of 250,000 dollars to the Woods Hole Oceanographic Institution, 683
  Grant of 171,600 dollars to the Bernice P Bishop Museum, Hawaii, 683
  Grant of 162,000 dollars to the Marine Laboratory, University of Miami, 683
  Grant of 155,000 dollars to the California Institute of Technology, 683
  Grant of 150,000 to the University of Chicago, 683
  Grant of 135,000 dollars to the Long Island Biological Association, 683
  Grant of 105,000 dollars to the Woods Hole Marine Biological Laboratory, 683
  Formation of an Advisory Panel on Atmospheric Sciences, 1022
  Reviews of Data on Research and Development, No 14, Funds for Research and Development Performance in American Industry, 1022
  Reviews of Data on Research and Development, No 15, Grants for Private Philanthropic Foundations during 1957, 1272
  Post-doctoral Fellowships, 1534
  Providing United States Scientists with Soviet Scientific Information, revised edition, 1611
  Appointment of Dr Bowen C Dees as assistant director for scientific personnel and education, 1686
  Grant of 3,000,000 dollars to the Woods Hole Oceanographic Institution, for a new Research Vessel, 1686
United States Naval Research Laboratory Grant of 250,000 dollars from the United States National Science Foundation, for rocket observations of ultra-violet and X-ray emissions from solar flares, 406
United States Office of Naval Research Second Conference on Semiconductor Surfaces, 1192
United States Public Health Service Grant of 14,160 dollars to the University of Oxford, for the continuation of research on vision and light quanta, 943, 1273
  Grant of 30,600 dollars to the University of Oxford, for research in the Department of Biochemistry, 1362
United States Rubber Co Foundation of a second postgraduate research studentship at University College of North Staffordshire, 322
United States Scientists Providing, with Soviet Scientific Information (United States National Science Foundation), revised edition, 1611
United States Scientists (Soviet and) Exchanges between, 680
United States Society of Protozoologists Election of Officers for 1959-60, 1272
United Steel Companies, Ltd Appointment of Dr K J Irvine as deputy research manager, 95
  Appointment of J D Murray as head of the Applied Metallurgy Section, 95
  Appointment of F B Pickering as head of the Physical Metallurgy Section, 95
Units Atomic (Prof H Shull and Dr G G Hall), 1559
U T $+\Delta T$ An Error in the Determination of ΔT from the Lunar Ephemeris and the Frequency of Caesium in Terms of (C A Murray), 441
Universe (The Steady-Rate), and the Deduction of Continual Creation of Matter (Prof V A Bailey), 537 , (Prof G Bondi), 537
Universities The—a Royal Commission ? (G C Moodie), 1432
Universities of the British Commonwealth, Association of Commonwealth Universities Yearbook, 1959, *review*, 577
Universities of the Commonwealth Report of Proceedings of the Eighth Congress, Montreal 1958, 1431
Universities (British) Scientific Research in, 1958-59 (British Council), 854
Universities (Expanding) Administrative Problems in (Home Universities Conference 1959), 1613
Universities Conference Home (1959), 1613
Universities Council for Adult Education Report for 1957-1958, 331
Universities Film Council (British), (Dr J Horne), 330
  Discussion on the Visual Illustration of University Lectures, 515
Universities Yearbook Commonwealth, 1959 (Association of Universities of the British Commonwealth), *review*, 577
University New (Prof Jack Simmons), *review* by Sir John Wolfenden, 1975
University of Birmingham The Graduate School in Mathematical Physics (Prof R E Peierls), 96
  Retirement of Prof G F Mucklow from the Chance chair of mechanical engineering, 502
  Appointment of Dr S A Tobias to the Chance chair of mechanical engineering, 502
  Appointment of Dr S V Perry as professor of biochemistry, 679
  Title of professor of analytical chemistry conferred on Dr Ronald Belcher, 679
  Title of professor of mathematical physics conferred on Dr G E Brown, 679
  Appointment of Prof J Heslop Harrison to the chair of botany, 684
  Appointment of Dr Brenda Manly and Dr J Cohen as lecturers in zoology, 684, 1362
  Appointment of K A Redish as lecturer in mathematical physics, 684, 1362
  Appointment of Dr N A Dyson as lecturer in physics, 684, 1362
  Appointment of Dr F J Wallace as lecturer in mechanical engineering, 684
  Appointment of Dr I R Smith as lecturer in electrical engineering, 684, 1362
  Appointment of Dr V G Jenson as lecturer in chemical engineering, 684, 1362
  Appointment of Dr W B Morgan as lecturer in geography, 684
  Appointment of R S Hall as Research Fellow in physics, 684
  Appointment of E A Howson as Research Fellow in electrical engineering, 684
  Appointment of R D Hartley as Research Fellow in mining, 684
  Appointment of E Whipp as G E C Hirst Fellow in the Department of Electrical Engineering, 684
  Appointment of A T Aldred as Research Fellow in physical metallurgy, 684
  Appointment of D W Jones as Research Fellow in physical metallurgy, 684
  Appointment of Dr J Kolbuszewski to the chair of highway and traffic engineering, 939
  Appointment of Dr M E Davies as lecturer in botany, 1026, 1362
  Appointment of Dr C R Sladden as lecturer in biology, 1026, 1362

  Appointment of Dr D J Blundell as lecturer in geology, 1026, 1362
  Appointment of K B Haley as lecturer in engineering production, 1026, 1362
  Appointment of Dr N A J Rogers as lecturer in chemistry, 1026, 1362
  Appointment of P W Dykes as lecturer in medical biochemistry and experimental pathology, 1026
  Third 'Joining of Metals' Conference (The Electric Arc in Welding), 1030
  Title of reader in mathematical physics conferred on Dr J G Valatin, 1362, 1688
  Appointment of Dr H B Griffiths as lecturer in pure mathematics, 1362, 1688
  Appointment of Dr J K Brown as lecturer in chemistry, 1362, 1688
  Appointment of Dr Nancy Montgomery as lecturer in botany, 1362
  Annual Lecture of the Institute of Education to be named 'The Raymond Priestley Lecture', 1362
  Plans for a building for highway and traffic engineering, 1362
  Appointment of Dr D A Bell and J T Allanson as joint acting heads of the Department of Electrical Engineering, 1688
  Joseph Lucas, Ltd , to finance a Fellowship in the field of metal joining in the Department of Industrial Metallurgy, 1688
  Research Fellowship in zoology awarded to Dr Florence J Pepper, 1688
  Research Fellowship in genetics awarded to Prof L P V Johnson, 1688
  Research Fellowship in physics awarded to M J Harrison, 1688
  Research Fellowship in biochemistry awarded to H Mueller, 1688
  Conference on Modern Network Theory in Electrical Engineering, 1691
  Appointment of Dr A P D Thomson as acting director of the Department of Anatomy, 1915
  Appointment of Dr D S Urch as lecturer in chemistry, 1915
  Appointment of J C Maltback as lecturer in mechanical engineering, 1915
  Appointment of G C-Y Hu as lecturer in highway and traffic engineering, 1915
  Appointment of G H J Bennett as lecturer in industrial metallurgy, 1915
  Appointment of Dr C G Wall as lecturer in chemical engineering, 1915
  Appointment of R H Jones as assistant lecturer in civil engineering, 1915
  Appointment of P J Waterton as Staff Fellow in physics, 1915
  Appointment of Dr V Knapp as Research Fellow in nuclear physics, 1915
  Appointment of Dr M Gage as Research Fellow in geology, 1915
  Appointment of M H B Hayes as I C I Fellow in chemistry, 1915
  Appointment of Dr J P Simons as Fellow in chemistry, 1915
  Appointment of D W Thomas as National Coal Board Research Fellow in physical chemistry, 1915
University of Birmingham (Department of Civil Engineering and the Department of Extra-Mural Studies) Course on River Pollution Sewage Disposal and Trade Waste Treatment, 1451
University of Bristol Appointment of Dr W M Shepherd to the chair of theoretical mechanics 322
  Appointment of P W Bothwell as lecturer in public health, 322
  Appointment of D R Coles as lecturer in medicine, 322
  Appointment of D G Osmond as lecturer in anatomy, 322
  Appointment of R Park as lecturer in civil engineering, 322
  Appointment of N G Sanerkin as lecturer in pathology, 322
  Appointment of Dr J T Martin to a readership in chemistry of insecticides and fungicides, 410
  Lectureship in inorganic chemistry conferred on Dr E W Abel, 410
  Lectureship in electrical engineering conferred on Dr R F Burbridge, 410
  Lectureship in chemical pathology (veterinary) conferred on R H C Penny, 410
  Appointment of Dr J W Barton as lecturer in organic chemistry, 1613
  Appointment of Dr D L Dineley as lecturer in geology, 1613
  Appointment of Dr K R Gough as Research Fellow in medicine, 1613
  Appointment of Dr S Griew as lecturer in psychology, 1613
  Appointment of Dr M A Hollingsworth as lecturer in mechanical engineering, 1613
  Appointment of B S Smith as lecturer in civil engineering, 1613
  Appointment of D J Storey as lecturer in electrical engineering, 1613
  Appointment of Dr C J Waddington as lecturer in physics, 1613
  Grants from the Department of Scientific and Industrial Research—£16,680 to the Department of Physics, for research in cosmic radiation with balloons, photon-induced cascades at different altitudes, and time variations in the primary cosmic radiation over Great Britain , £35 084 to the Department of Psychology, for research into the complexity of industrial tasks , to the Department of Geology, £5,000 for investigations of feldspars in the Connemara granite series and preferred orientation in rock-forming minerals, and £3,550 for investigations of the submarine geology of the continental shelf of the Western Approaches of the English Channel , £3,850 to the Department of Physical and Inorganic Chemistry, for equipment , and £2,880 to the Department of Zoology, for investigations of the physiological basis of behaviour in protozoa, 1613
  Grant of £1,150 from the National Coal Board to the Department of Physical and Inorganic Chemistry, for a study of carbon surfaces and surface complexes by infra-red spectroscopy, and £1,100 for a study of reactivity of carbon surfaces with oxygen, 1613
  Grant of £1,150 from the Ministry of Supply to the Department of Electrical Engineering, for research on noise generation in inductors with ferromagnetic cores (continuation of grant), 1613
University of Calcutta Hundred Years of the—Supplement, *review* by Dr R S Aitken, 218
University of California Establishment of a Department of Virology, 26
  Appointment of Dr Wendell M Stanley as chairman of the Department of Virology, 26
University of Cambridge Formation of a Department of Applied Mathematics and Theoretical Physics 686
  Appointment of Dr G K Batchelor as first head of the Department of Applied Mathematics and Theoretical Physics, 686
  Honorary degree of M A conferred on G R Crowe, 1108
  Appointment of Dr J M Thoday to the Arthur Balfour chair of genetics, 1189
University of Cambridge (Engineering Department), (British Welding Research Association and the) Symposium on Fatigue of Welded Structures, 1915
University of Cambridge Post-Graduate Medical School Symposium on Depression, 322
  Symposium on Haematology, 1192
University of Chicago Grant of 150,000 dollars from the United States National Science Foundation, 683
  Awards for Study in Statistics, 772
University of Dublin Appointment of Dr A L Kapoor as an I C I Fellow in chemistry at University College, 410
University of Durham Retirement of Prof J C Prescott from the chair of electrical engineering in King's College, Newcastle-upon-Tyne, 404
  Appointment of Dr R L Russell to the chair of electrical engineering in King's College, Newcastle-upon-Tyne, 404
  Appointment of Dr D A Wright as first professor of applied physics, 1022
University of Edinburgh Retirement of Prof A D Ritchie as professor of logic and metaphysics, 156
  Appointment of Prof E E Harris as acting head of the Department of Philosophy, 156
University of Glasgow Retirement of Prof W M Smart as regius professor of astronomy, 23
  Appointment of Dr P A Sweet as professor of astronomy, 23
  Report of the Appointments Committee for the Year 1958, 1026
  Election of Viscount Hailsham as Rector, 1915
  New Engineering Building inaugurated by Viscount Montgomery of Alamein, 1915
  Appointment of R E Azuma and W R Hogg as lecturers in experimental and theoretical physics, 1915
  Appointment of Helen S Dunsmore and G S Harris as lecturers in chemistry, 1915
  Appointment of W Graham Jardine as lecturer in geology, 1915
  Appointment of J Leech as lecturer in the computing laboratory, 1915
  Appointment of A Bhati, A C Day, W J McMaster and W Parker to research fellowships in chemistry, 1915
  Appointment of J D Roycroft to a research fellowship in solid state physics, 1915
  Appointment of Wm C Russell to a research fellowship in virology (first Lock fellowship), 1915
University of Graduate Studies (Dr Detlev W Bronk), 86
University of Hull Annual Report for 1957-58, 237
  Retirement of Prof R D'O Good from the chair of botany, 853
  Appointment of Dr N F Robertson to the chair of botany, 853
  Grant of £6,000 from the Department of Scientific and Industrial Research to the Department of Chemistry, towards the purchase of a mass spectrometer, 1273
  Grant of £4,900 from the Nature Conservancy to the Department of Geography, for an investigation into the coastal geomorphology of Holderness and Spurn Head, 1273
  Appointment of F J Bryant as lecturer in physics, 1273
  Appointment of I C Williams as lecturer in zoology, 1273
University of Leeds Eighty-fourth Report of the Textile Industries and Dyeing Advisory Committee on the work of the Departments of Textile Industries and Colour Chemistry and Dyeing (1957-58), 155
  Appointment of Dr J H Western to the chair of agricultural botany, 405
  Appointment of A W Chronowicz as lecturer in civil engineering, 684
  Appointment of Dr B F Salvage as lecturer in electrical engineering, 684
  Appointment of A L Yettram as lecturer in civil engineering, 684
  Appointment of Dr G G Haselden to the new chair of chemical engineering, 1106
  Grants from the Department of Scientific and Industrial Research—£1,835 to the Department of Physics, towards the cost of cosmic-ray research , £12,000 to the Department of Chemistry, for an investigation into high-pressure chemistry and geochemistry , £3,000 for research by Dr P Gray in physical chemistry , and £1,500 for research in high alumina cements, 1108
  Grant of 6,000 dollars for two years from W R Grace and Co , for a research fellowship in physical chemistry, 1108
  Grant of £1,422 from the Marine Biological Association, for research on the electron microscopy of marine flagellates, 1108
  Grant of £3,000 from the National Coal Board (North-Eastern Division), and a grant of £1,000 from Richard Sutcliffe, Ltd , for research in mining, 1108
  Grants of £1,893 from the Agricultural Research Council, for two research projects in the Department of Agriculture, and £2,807 to the Department of Anatomy, for research into the interpretation of fibre types in sheep, 1108
  Appointment of D I Davies as a lecturer in the Department of Organic Chemistry, 1108
  Appointment of A R J Gaskin as a lecturer in the Department of Geology, 1108
  Appointment of A N Hillas as a lecturer in the Department of Physics, 1108
  Appointment of M D Longfield as a lecturer in the Department of Mechanical Engineering, 1108
  Appointment of A R Mathieson as a lecturer in the chemistry of high polymers in the Department of Textile Industries, 1107
  Grant of £4,310 from the National Coal Board, for six research projects in mining, 1534
  Grant of £3,860 from the Central Electricity Generating Board, for research on the utilization of pulverized fuel ash, 1534
  Appointment of Dr A F Thomas as lecturer in the Department of Organic Chemistry, 1534
  Second Symposium on Coal Preparation, Department of Mining, 1957, *review* by Prof S G Ward, 1601
University of Leicester, *review* by Sir John Wolfenden, 1975
University of Leicester Appointment of Dr E W Parkes to the new chair of engineering, 938
University of Liverpool Appointment of Dr B Collinge as reader in physics, 410
  Appointment of Dr P M Sheppard as reader in genetics, 410

  Appointment of Dr A K Holliday to a senior lectureship in inorganic and physical chemistry, 410
  Appointment of Dr N S Jones to a senior lectureships in marine biology, 410
  Appointment of Dr T M Flett to a senior lectureship in pure mathematics, 410
  Appointment of Dr A Ashmore to a senior lectureship in physics, 410
  Appointment of Dr H D Parbrook to a senior lectureship in physics–acoustics, 410
  Appointment of Dr V H Leck to a senior lectureship in electronic engineering, 410
  Appointment of Dr R S Benson and Dr N G Calvert to senior lectureships in mechanical engineering, 410
  Appointment of Dr F T W Jordan to a senior lectureship in veterinary preventive medicine, 410
  Computer Laboratory at the, 1537
University of London The Sir John Atkins Laboratories at Queen Elizabeth College, 26
  Extension to the Chester Beatty Research Institute of the Institute of Cancer Research, Royal Cancer Hospital, B A 15
  Postgraduate Courses at the Imperial College of Science and Technology (1959-60), 235
  Appointment of Prof J L D'Silva to the Halliburton chair of physiology at King's College, 322, 405
  Appointment of A H J Rains to the chair of surgery at Charing Cross Hospital Medical School, 322
  Appointment of Dr G R Hilson as reader in bacteriology at St George's Hospital Medical School, 322
  Appointment of Dr D Dexter as reader in morbid anatomy at St George's Hospital Medical School, 322
  Appointment of J F Smith as reader in morbid anatomy at University College Hospital Medical School, 322
  Appointment of R E M Thompson as reader in bacteriology at Middlesex Hospital Medical School, 322
  Appointment of Dr P J Grant as reader in engineering science at the Imperial College of Science and Technology, 322
  Appointment of Dr B W Martin as reader in applied thermodynamics at the Imperial College of Science and Technology, 322
  Appointment of E M Rawstron as reader in geography at Queen Mary College, 322
  Title of reader in zoology in the University (at Birkbeck College) conferred on T E Hughes, 322
  Title of reader in psychology in the University (at Bedford College) conferred on Dr J Wynn Reeves, 322
  Title of reader in therapeutics in the University (at Guy's Hospital Medical School), conferred on Dr J H Trounce, 322
  Symposium at Queen Mary College on the Oxidation of Organic Compounds, 326
  Retirement of Prof R J S McDowall from the Halliburton chair of physiology in King's College, 405
  Appointment of Dr P Grootenhuis to the University readership in mechanical engineering at the Imperial College of Science and Technology, 508
  Title of reader in sociology in the University (at the London School of Economics and Political Science) conferred on T B Bottomore, 508
  Title of professor emeritus in the University conferred on Prof R J S McDowall, Prof Margaret M A Murray, Prof J H Woodger and Prof H J Collins, 508
  Appointment of Prof W R Niblett as dean of the Institute of Education with the title of professor of education in the University, 595
  Appointment of Dr D J Anderson to the University readership in physiology in relation to dentistry at Guy's Hospital Medical School, 595
  Appointment of Dr A Ashmore to the University readership in experimental physics at Queen Mary College, 595
  Appointment of Dr F Hobbiger to the University readership in pharmacology at Middlesex Hospital Medical School, 595
  Appointment of Dr M B Shapiro to the University readership in psychology at the Institute of Psychiatry, 595
  Appointment of J W Stewart to the University readership in haematology at Middlesex Hospital Medical School, 595
  Appointment of Dr D F Cheesman to the University readership in biochemistry at Bedford College, 595
  Appointment of Dr A P Millman to the University readership in mining geology at the Imperial College of Science and Technology, 595
  Title of professor of virology in the University (at the London School of Hygiene and Tropical Medicine) conferred on Dr Forrest Fulton, 1108
  Title of professor of epidemiology in the University (at the London School of Hygiene and Tropical Medicine) conferred on Dr D D Reid, 1108
  Title of reader in pharmaceutics in the University (at the School of Pharmacy) conferred on Dr D Train, 1108
  Title of professor of physics in the University (at the Imperial College of Science and Technology) conferred on Dr M Blackman, 1273
  Title of professor of physical chemistry in the University (at the Imperial College of Science and Technology) conferred on Dr F C Tompkins, 1273
  Title of reader in biochemistry in the University (at University College) conferred on S P Datta, 1273
  Title of reader in applied mathematics in the University (at King's College) conferred on Dr C W Kilmister 1273
  Appointment of Dr G Morton to the University readership in operational research at the London School of Economic and Political Science, 1451
  Title of professor of embryology (at University College), conferred on Michael Abercrombie, 1451
  Title of reader in chemistry (at University College) conferred on Dr D J Millen, 1451
  Title of reader in botany (at University College) conferred on P J Syrett, 1451
  Appointment of P R Bell to the University readership in botany at University College, 1535
  Appointment of A V Bradshaw to the University readership in extraction metallurgy at the Imperial College of Science and Technology, [illegible]35
  Title of professor of electrical engineering in the University (at King's College) conferred on Dr A H M Arnold, 1535
  Appointment of Dr P B D de la Mare to the University chair of chemistry at Bedford College, 1613, 1913
  Title of professor of experimental physics in the University (at King's College) conferred on Dr F C Champion, 1613
  Appointment of Dr D R Arthur as reader in zoology at King's College, 1613
  Appointment of Dr J B Hasted as reader in physics at University College, 1613
  Retirement of Prof E E Turner as head of the Department of Chemistry at Bedford College, 1913
University of London (Extra-Mural Department), (Association of Agriculture and the) Lectures on the Land of Britain—is it Used to the Best Agricultural Advantage ?, 1845
University of London Institute of Education Appointment of Prof W R Niblett as dean, with the title of professor of education in the University, 595
University of London Institute of Psychiatry Appointment of Dr M B Shapiro to the University readership in psychology, 595
University of London School of Pharmacy Title of reader in pharmaceutics in the University of London conferred on Dr D Train, 1108
University of Malaya in Kuala Lumpur (Prof R D Purchon) 306, 405
  Appointment of Prof G M Davies to the chair of agriculture, 306
  Appointment of Prof M E D Poore to the chair of botany, 306
  Appointment of Prof R A Robinson to the chair of chemistry 306, 405
  Appointment of Prof Robert Ho to the chair of geography, 307
  Appointment of Prof C J Eliezer to the chair of mathematics, 307
  Appointment of Prof J R Hendrickson to the chair of zoology, 307
  Appointment of Prof R S Huang to the chair of chemistry, 405
University of Manchester Appointment of Dr F Fairbrother as professor of inorganic chemistry, 1986
University of Melbourne David Syme Research Prize awarded to Dr J H Piddington, B A 16
University of Miami Grant of 162,000 dollars to the Marine Laboratory from the United States National Science Foundation, 683
University of Michigan Appointment of Dr Wray Smith as assistant director of the Willow Run Laboratories, 26
  Appointment of Prof Louis J Cutrona as head of the Willow Run Radar Laboratory, 26
University of Nottingham Appointment of Dr K J Standley to a readership in physics, 410
  Appointment of Dr G E Lamming to a readership in animal physiology, 410
  Appointment of Dr M Woodbine to a readership in agricultural microbiology, 410
  Meeting to discuss the formation of a Society for Forensic Science, 508
University of Nottingham (School of Agriculture) Sixth Easter School in Agricultural Science (The Measurement of Grassland Productivity), 154
University of Oxford Grant not exceeding £1,100 from the Medical Research Council for scientific assistance in a study of X-Ray analytical methods of insulin and related structures, 943, 1273
  Grant not exceeding £5,700 from the United Kingdom Atomic Energy Authority, for studies in interferometric spectroscopy, and a grant not exceeding £1,250, for work on the constitution of bismuth-rich alloys, 943, 1273
  Grant of 14,160 dollars from the United States Public Health Service, for the continuation of research of vision and light quanta, 943, 1273
  Grants from the Department of Scientific and Industrial Research—£1,000 for research on some natural products with biological activity, £1,500 for research into perceptual limitations in high-speed performance , £22,860 for an investigation of the geological age of rock series by methods based on natural radioactivity , £1,220 for equipment for research on the biochemical mechanism of cell division , £25,725 for an investigation of materials, using magnetic resonance and double resonance techniques , and £17,610 for an investigation of nuclear orientation and nuclear cooling in magnetic fields, 943, 1273
  Grant not exceeding £1,175 from the Ministry of Supply, for the continuation of an investigation of fluorocarbohydrates, 943, 1273
  The sum of £2,200 to be expended from the University General Fund on alterations to the Department of Zoology, 943
  Appointment of E F Jackson as director of the Institute of Statistics, 943
  Grant of £9,534 10s , from the Admiralty, for the continuation of research on centimetre waves and fundamental problems, 1273
  Grant of £1,200 from European Research Associates, Brussels, for research on acetylene chemistry, 1362
  Grant of £3,400 from the Department of Scientific and Industrial Research, for the maintenance of the 140 MeV synchrotron for nuclear physics research, 1362
  Grant of £2,500 for two years from the Colonial Medical Research Council, for the study of the sensory neurohistological changes in skin infected with leprosy, 1362
  Grant of £1,500 from the Smith, Kline and French Research Institute, for research on the electrophysiology and pharmacology of smooth muscle, 1362
  Grant of 30,600 dollars from the United States Public Health Service, for research in the Department of Biochemistry, 1362
  Grant of £35,900 from the Department of Scientific and Industrial Research, for research on high-energy phenomena using photographic plates, 1535
  Grant of £8,500 from the United Kingdom Atomic Energy Authority, for a study of polarized nuclear systems using resonance techniques, 1535
  Grant of £1,395 from the Ministry of Aviation, for research on the mechanisim of operation of the cryotron, 1535
  Second Tanganyika Expedition (R Davis), 1543
  Grant of £3,000 from British Petroleum Trading, Ltd , for the purpose of continuing a research fellowship in geochemistry, 1688, 1986
  Grant of 3,000 dollars from the du Pont Company, for the support of basic research in the field of theoretical chemistry, 1688, 1896

  - Grant of £8,000 from the Nuffield Foundation, for the continuation of research being carried out by H B Parry at the Nuffield Institute for Medical Research, 1986
- University of Reading Report for 1958 of the Museum of English Rural Life, 505
  - Annual Report for 1958 of the National Institute for Research in Dairying, 770
  - Grant of 89,348 dollars from the Population Council, Inc , New York, to the National Institute for Research in Dairying, in support of researches on cervical mucus, with particular reference to the control of fertility, 1362
- University of Rochester Advances in Semi-Conductor Science—Proceedings of the Third International Conference on Semi-Conductors, 1958 (edited by H Brooks), *review* by Dr J R Tillman, 1674
- University of St Andrews Appointment of Dr D Bijl as reader in natural philosophy at St Salvator's College, 684
  - Appointment of Dr A J O Cruickshank as reader in electrical engineering at Queen's College, 684
  - Appointment of Dr J L Copp as senior lecturer in chemistry at Queen's College, 684
  - Appointment of Dr F D Gunstone as senior lecturer in chemistry at St Salvator's College, 684
  - Appointment of W McNicoll as senior lecturer in civil and mechanical engineering at Queen's College, 684
  - Appointment of Dr A R Mitchell as senior lecturer in mathematics at St Salvator's College, 684
  - Appointment of Dr F Walker as senior lecturer in geology at Queen's College, 684
  - Retirement of Prof E F Freundlich from the directorship of the University Observatory, 768
  - Appointment of Dr D W N Stibbs to the Napier chair of astronomy, 768
- University of Sheffield Appointment of Dr H Kay to the chair of psychology, 93
  - Appointment of Dr S R Elsden to the chair of microbiology, 234
  - Appointment of Dr D E Bourne as lecturer in applied mathematics, 410
  - Appointment of Dr R S Duff as senior lecturer in medicine, 410
  - Appointment of I E Gillespie as lecturer in surgery, 410
  - Appointment of D W Warrell as lecturer in obstetrics and gynaecology, 410
  - Appointment of L Grimshaw as lecturer in psychiatry, 410
  - Appointment of P Chadwick as lecturer in applied mathematics, 684
  - Appointment of Dr J N Murrell as lecturer in chemistry, 684
  - Appointment of C E Blank as lecturer in medical genetics, 684
  - Appointment of Dr J Sykes as lecturer in biochemistry, 684
  - Appointment of Dr J M Hoskins as lecturer in bacteriology and virology, 684
  - Appointment of Dr J Allison and Dr A M Howatson as lecturers in electrical engineering, 684
  - Appointment of K Littlewood as lecturer in fuel technology and chemical engineering, 684
  - Appointment of Dr E W Lee as lecturer in physics, 684
  - Appointment of L Lehman as lecturer in dental mechanics and prosthetics, 684
  - Appointment of T B Ferguson and J D Stringer as lecturers in mechanical engineering, 684
  - Appointment of W J M Tegart and C W Hawarth as lecturers in metallurgy, 684
  - Appointment of Dr J F Wallace as senior Research Fellow in mechanical engineering, 684
  - Title of reader in geography conferred on Dr A Garnett, 684
  - Title of reader in applied mathematics conferred on Dr D R Davies, 684
  - Title of reader in organic chemistry conferred on Dr P L Pauson, 684
  - Appointment of Dr J A Roper to the new chair of genetics, 1189
  - Retirement of Michael Parkin from the Department of Glass Technology, 1271
  - Hatfield Memorial Lecture (Academician G V Kurdjumov), 1450
  - Appointment of E Litton as lecturer in civil engineering, 1451
  - Appointment of L G M Sparling as lecturer in mechanical engineering, 1451
  - Strength of Materials Laboratory in the Department of Mechanical Engineering to be named the F C Lea Laboratory, 1535
  - Research Colloquium on Alkali Ion Determinations by means of Glass Electrodes, 1616
- University of Southampton Appointment of Dr B Thwaites to a third chair of mathematics with special reference to fluid mechanics, 590
  - Appointment of Dr L G A Sims as professor of electrical engineering, 590
  - Title of professor emeritus conferred on Prof P Ford, 595
  - Appointment of R G Woods as deputy librarian, 595
  - Title of senior lecturer in chemistry conferred on Dr G W A Fowles, 595
  - Title of senior lecturer in aeronautical engineering conferred on Dr J P Jones, 595
  - Title of senior lecturer in geography conferred on Dr R A Pelham, 595
  - Appointment of Dr A N Clements as lecturer in physiology and biochemistry, 595
  - Appointment of Dr J Heading as lecturer in applied mathematics, 595
  - Appointment of R W Page as lecturer in mechanical engineering, 595
  - Appointment of Dr J R Rydzewski as lecturer in civil engineering, 595
  - Appointment of Dr R G Scurlock as lecturer in physics, 595
  - Appointment of Dr E V Vernon as lecturer in electronics, 595
  - Appointment of Dr E M Wilson as senior lecturer and director of computation, 1915
  - Appointment of P C Parks as lecturer in aeronautical engineering, 1915
  - Appointment of G G Bloodworth as lecturer in electronics, 1915
  - Appointment of J F Barrett as De Havilland Research Fellow in aeronautical engineering, 1915
  - Appointment of M T Thew as Volkes Research Fellow in mechanical engineering, 1915
- University of Sydney Appointment of C N Watson-Munro to the chair of physics in the field of thermonuclear physics, 1447, 1912
  - Appointment of Dr S T Butler to the chair of physics in the field of theoretical physics, 1447, 1911
  - School of Physics within the 1911
- University of Texas Grant of 1,482,480 dollars from the National Institutes of Health, for basic research in genetics and cell biology, 1108
- University of Texas (Anderson Hospital and Tumour Institute) Fourteenth Annual Symposium on Fundamental Cancer Research (Cell Physiology of Neoplasia), 1451
- University of Toronto New Medical-Surgical Building of the Ontario Veterinary College, 695
- University of Wageningen Conference on Enzymes, 687
- University of Wales Appointment of Dr J R Cross as superintendent o the Chemistry Laboratories in the University College of Swansea, 156
  - Appointment of Glenys Thomas as map curator and cartographer in the Department of Geography in the University College of Swansea, 156
  - Appointment of P W Davies as assistant lecturer in metallurgy at the University College of Swansea, 156
  - Appointment of Dr H E Evans as lecturer in engineering at the University College of Swansea, 156
  - Appointment of B W Preece as assistant lecturer in engineering at the University College of Swansea, 156
  - Retirement of Prof R O Davies from the chair of agricultural chemistry in the University College, Aberystwyth, 317
  - Appointment of Prof T W Goodwin to the chair of agricultural chemistry in the University College, Aberystwyth, 318
  - Appointment of Prof F Llewellyn Jones as acting principal of the University College of Swansea, 410
  - Retirement of Prof Alun Roberts from the chair of agricultural botany in the University College, Bangor, 502
  - Appointment of Dr J L Harper to the chair of agricultural botany in the University College, Bangor, 503
  - Appointment of Dr P T Landsberg to the newly created chair of applied mathematics in University College, Cardiff, 591
- University of Western Australia Appointment of Dr A R Billings as professor of electrical engineering, 93
- University of Witwatersrand Appointment of Dr J P F Sellschop to the chair of nuclear physics, 233
- University College, Aberystwyth Retirement of Prof R O Davies from the chair of agricultural chemistry, 317
  - Appointment of Prof T W Goodwin to the chair of agricultural chemistry, 318
- University College, Bangor Retirement of Prof Alun Roberts from the chair of agricultural botany, 502
  - Appointment of Dr J L Harper to the chair of agricultural botany, 503
- University College, Cardiff Appointment of Dr P T Landsberg to the newly created chair of applied mathematics, 591
- University College, Dublin Appointment of Dr A L Kapoor as an I C I. Fellow in chemistry, 410
- University College of Ghana, Achimota Appointment of Prof F W Sansome as professor of botany, 26
- University College, Ibadan Appointment of Dr E Njoku as professor of botany, 26
- University College, London Title of reader in biochemistry in the University of London conferred on S P Datta, 1273
  - Title of professor of embryology in the University of London conferred on Michael Abercrombie, 1451
  - Title of reader in chemistry in the University of London conferred on Dr D J Millen, 1451
  - Title of reader in botany in the University of London conferred on P J Syrett, 1451
  - Appointment of P R Bell to the University of London readership in botany, 1535
  - Appointment of Dr J B Hasted as reader in physics, 1613
- University College of North Staffordshire A second postgraduate research studentship founded by the U S Rubber Co , 322
  - Appointment of J Penfold and J Beard to the U S Rubber Co 's studentships, 322
  - Postgraduate research studentship founded by the Phillips Petroleum Co , 322
  - Appointment of C J Panton to the Phillips Petroleum Co 's studentship, 322
  - Appointment of Dr D J E Ingram as professor of physics, 410, 590
- University College of Rhodesia and Nyasaland Appointment of W Lloyd Jenkins as lecturer in the Department of Chemistry, with responsibility for teaching agricultural chemistry, 508
- University College of Swansea Appointment of Dr J R Cross as superintendent of the Chemistry Laboratories, 156
  - Appointment of Glenys Thomas as map curator and cartographer in the Department of Geography, 156
  - Appointment of P W Davies as assistant lecturer in metallurgy, 156
  - Appointment of Dr H E Evans as lecturer in engineering, 156
  - Appointment of B W Preece as assistant lecturer in engineering, 156
  - Appointment of Prof F Llewellyn Jones as acting principal, 410
- University College Hospital Medical School, London Appointment of J F Smith as reader in morbid anatomy, 322
- University Co-operation in the Commonwealth (Home Universities Conference 1959), 1613
- University Education in Britain Expansion of, 1431
- University Entrance Requirements Latin in, 297
- University Foundation of Belgium Annual Report for 1957-58, 939
- University Graduates A Career in Education for (Ministry of Education), revised edition, 1777
- University Grants Committee Returns from Universities and Colleges in receipt of Treasury Grant, Academic Year 1957-58, 1118
- University Institute of Chemistry, Lahore, and the Unesco South Asia Science Co-operation Office Regional Training Course for Laboratory Technicians, 857
- University Lectures Visual Illustration of (British Universities Film Council Discussion on), 515
- University Libraries (Home Universities Conference 1959), 1613
- Unknown The Brink of the (Lord Verulam), 1688
- 'Unnatural' Sugars Specific Inhibition of Anti-Rh Serum by (Dr William C Boyd, Marjorie H McMaster and Eugenia Wa[illegible]zenko-Zacharczenko), 989

Unorthodox Primaries Colour-Image Synthesis with Two (Arthur Karp), 710

Unphosphorylated Peptide-Substrates (O-Phosphorylated and), suitable for Tryptic Action (Dr D Theodoropoulos, H Bennich and Prof O Mellander), 270

Unresponsiveness Specific Inhibition of Antibody Formation during Immunological Paralysis and (Dr E Sercarz and Dr A H Coons), 1080

Unresponsiveness (Immunological) Mechanism of (Prof Charles F Crampton, Fred R Frankel and J L Rodeheaver), 873

Unsaponifiable Fraction of Crude Vegetable Oils Chromatographic Identification of the Antilipaemic X Factor of the (Prof M C Nath, A Saikia and B I Uppin), 1635

Unsaturated (Trans-) Acids in the Depot Fat of Ruminants and Non-Ruminants (L Hartman and Dr F B Shorland), 2024

Unsusceptible Cell Lines Infectivity of Polio Virus Ribonucleic Acid for Embryonated Eggs and (P De Somer, Dr A Prinzie and E Schonne), 652

Unusual Alkaline-denaturation Properties A Haemoglobin with, in a Turkish-Cypriot Woman (Dr J E O'N Gillespie, Dr J C White, M J Ellis, Dr G H Beaven, W B Gratzer, Dr E M Shooter and R M E Parkhouse), 1876

Unusual Breeding Habitat of the Linnet (N W Orford), 650

Unusual Diatom from the Antarctic (E J Ferguson Wood), 1962

Up to Date with Chromatography Keeping, *review* by Dr R Consden, 1436

Upper Atmosphere Air Density in the, from Satellite Orbit Observations (Dr G V Groves), 178

Density of the, from Analysis of Satellite Orbits—Further Results (D G King-Hele), 1267

Upper Atmosphere Density Variations due to Hydromagnetic Heating (Dr A J Dessler), 261

Upper Boundary of the Van Allen Radiation Belts (Dr Conway W Snyder), 439

Upper Form Science by the (British Association for the Advancement of Science, Section X (Assembly of Corresponding Societies), Meeting on), 596

Uppin, B I, and others Chromatographic Identification of the Antilipaemic X Factor of the Unsaponifiable Fraction of Crude Vegetable Oils, 1635

Uptake (Cellular), of Deoxyribonucleic Acid by Human Tissue Culture Cells (Dr Stanley M Gartler), 1505

Uptake (Magnesium), from Foliar Applications of its Salts on Apple Role of the Anion in (M Allen), 995

Uptake (Oxygen), of Glycerol-extracted Muscle Fibres (James A Wilson, Paul R Elliott, Prof Karl F Guthe and David G Shappirio), 1947

Uptake and Retention (Mineral), in Cotton-Grass (*Eriophorum vaginatum* L), (Gordon T Goodmand and Donald F Perkins), 467, *erratum* 1845

Uraemia and its Treatment by Arginase Inhibitor (Dhruba K Sen), 459

Uranium as Fuel, 318

Uranium-235 Two Cases of Triple Fission of (J Catala, J Casanova and V Domingo), 1057

Uranium and Thorium Systematic Mineralogy of (Prof Clifford Frondel), *review* by Prof C F Davidson, 576

Uranium and Thorium Alloys Constitutional Diagrams of (Frank A Rough and Arthur A Bauer), *review* by Dr R E D Hughes, 925

Uranus Great Earthquakes and the Astronomical Positions of (Prof A Tomaschek), 177

Urban Expansion Trends in (Prof K C Edwards), B A 43

Urch, Dr D S Appointed lecturer in chemistry at the University of Birmingham, 1915

Urea Promoting Effect of, on the *in vitro* Passive Sensitization of Isolated Plain Muscles with Precipitating Antibody (R Binaghi, Dr B N Halpern, P Liacopoulos and T Neveu), 1805

Urea-Bisulphite Solubility Permanent Set, Supercontraction and—the Proton-Transfer Nature of some Changes in Keratin and the Analogy with Muscle Contraction (Dr P T Speakman), 339

Urea Solutions (Concentrated) Effect of, on the Infectivity and Haemagglutinin of Vaccinia Virus (Prof J F McCrea and Jean O'Loughlin), 1497

Urease Inhibition of, by Alloxan and Alloxanic Acid (Dr Clarke T Gray, Marcus S Brooke and John C Gerhart), 1936

Uredospores (Germinating), of Wheat Stem Rust, Race 15B Biosynthesis of some Amino-Acids from Sucrose by (B Kasting, A J McGinnis and W C Broadfoot), 1943

Urethane as a Carcinogen and as an Anaesthetic for Fishes (Dr J N Ball and Prof P N Cowen), 370

Urethane in Dehydrated and Fasted Mice Subcutaneous Absorption of (Eigill Hvidberg and Jens Schou), 646

Uric Acid Active Transport of, through the Human Erythrocyte Membrane (Dr Kay Overgaard-Hansen and Dr Ulrik V Lassen), 553

Uridine labelled with Tritium Chromosomal Synthesis of Ribonucleic Acid as shown by Incorporation of (G Pelling), 655

Urinary Excretion of β-Amino-*iso*butyric Acid in Mongolism (Dr Thomas L Perry, Dr Kenneth N F Shaw and Dr Dorothy Walker), 1970

Urinary Excretion of some B Vitamins in Man Effect of Sorbitol on the (J D Watson and Prof John Yudkin), 911, *errata*, 1362

Urinary β-Glucuronidase Activity in Patients with Bone Fractures (F J W Lewis and Dr Constance H J Plaice), 1249

Urinary Gonadotrophin Preparation of a Highly Purified Sample of the (Roland Bourrillon, Rene Got and René Marcy), 983

Urinary Histamine in Adrenalectomized Rats Sodium Chloride Intake and (Dr T Bjuro and Dr H Westling), 1241

Urine α-Ketoglutaric Acid and Pyruvic Acid in Blood, Cerebrospinal Fluid and (Dr E Zelnicek), 727

Urine of Pyridoxine-deficient Rats 8-Hydroxyquinaldic Acid, the Red Fluorescent Substance in the (Dr J K Roy, Dr R R Brown and Prof J M Price), 1573

d-Urobilin Optical Activity of Stercobilin and (Prof C H Gray, P M Jones, Dr W Klyne and Dr D C Nicholson), 41

Urokinase-Induced Fibrinolysis of Human Standard Clots (Dr Kuro N von Kaulla), 1320

Urquhart, Dr A R Awarded the Service Medal of the Textile Institute, 156

Use of Atomic Energy The Release and (Dr T E Allibone), 1613

Use of Coated Tubing as Columns for Gas Chromatography (Prof Albert Zlatkis and H R Kaufman), 2010

Use of Coke in Ironmaking Successful (Meeting of the Iron and Steel Institute at the University of Birmingham and at Coalbrookdale to celebrate the 250th anniversary of the), 322

Use of Ground-Based Radar in Meteorology (excluding Upper-Wind Measurements), (World Meteorological Organization, Technical Note No 27), 942

Use of Isotopes in Organic Syntheses, *review* by Dr G Eglinton, 1830

Use of Models in Fire Research (Committee on Fire Research and the Fire Research Conference of the Division of Engineering and Industrial Research of the United States National Academy of Sciences–National Research Council Symposium on), 772

Use of Plant Haemagglutinins (Lectins) A Method for Distinguishing between α- and β-Glycosides by the (Dr O Makela), 111

Use of Porter-Silber and Schiff Reagents as Spot Tests for Steroids applied on Paper and their Application to the Study of Rat Adrenal Lipids (Dr Marion K Birmingham), B A 67

Use of Radioisotopes in Agricultural Research (Ministry of Food and Agriculture of the Government of India, Food and Agriculture Organization of the United Nations, International Atomic Energy Agency and Unesco South East Asia Science Co-operation Office Course on), 1451

Use of the Silicon Resistor in the d c Stabilization of Transistor Circuits (J T Zakrzewski and D H Mehrtens), 811

Use of Solar Energy Transactions of the International Conference on the—The Scientific Basis (Tucson, 1955) , Vol 1, The Available Energy, Measurement of Radiation , Vol 2, Thermal Processes, Part 1, Section A, Flat Plate Collectors , Vol 2, Thermal Processes, Part 1, Section B, High-Temperature Solar Furnaces, Solar Power , Vol 3, Thermal Processes Part 2, Solar House Heating, Solar Water Heating, Solar Stoves, Solar Distillation , Vol 4, Photochemical Processes , Vol 5, Electrical Processes, *review* by Dr H Heywood, 217

Use of Transparent Cellulose Film for Roller Tube Tissue Cultures (John A Sharp), 1508

Use of Tritium to Study the Solubility of Water in Hydrocarbons (B D Caddock and P L Davies), 2011

Use (Combined), of Polymyxin and Acetone to obtain Cell-free Enzymes (J R Villanueva), 1565

Use (Efficient), of Man-power in Industry (Report of an inquiry by the National Joint Advisory Council), 25

Use (Excess) Enhanced Synaptic Function due to (Dr Rosamond M Eccles and Dr R A Westerman), 460

Use (Histochemical), of the Cyanocarbon Organic Compounds (Prof John F Lhotka), 1153

Use (Practical), of the Microscope (George Herbert Needham), *review* by Dr S Bradbury, 1174

Use (Water-) Survey Water-Resources and (Dr Alice Garnett), 96, *erratum*, 684

Usmanov, S R Macromolecules (Physics of Polymers), 1689

U S S R British Association for the Advancement of Science to send two representatives (Dr W E Swinton and Sir George Allen) to the, 1271

Higher Education in the, 504

Pharmaceutical Research in the, *review* by Dr D Train, 1831

Technical and Vocational Education in the (M I Movšovič), 504

Tectonics in the, 942

Uterine Wall of the Pig during the Sexual Cycle Periodic Acid-Schiff-Positive Material and Alkaline Phosphatase in the (Rolv Austad and Dr Otto Garm), 999

Uterus (Isolated Rat) Some Pharmacological Effects of Staphylolysin on the (Dr B Wiegershausen), 2017

Utilizzazione del Suolo, Carta della Sheets 19 and 20, Calabria (Ferdinando Milone) , Sheets 21, 22 and 23, Sicily (Ferdinano Milone), (Consiglio Nazionale della Ricerche, Napoli), 27

Variants (Foetal), in Singapore Heterogeneity of Human Foetal Haemoglobin—Incidence of (Dr F Vella), 272

Variants (Morphological), of *Streptomyces erythreus* Strains An Electron-Microscopic Study of Spores of (L Dolezilova, Z Vanek and O Kralik), 1888

Variants (Transferrin) Haptoglobin and, in Bushmen and some other South African Peoples (Dr N A Barnicot, J P Garlick, Ronald Singer and Dr J S Weiner), 2042

Variation Virus Growth and—Ninth Symposium of the Society for General Microbiology, London, 1959 (edited by A Isaacs and B W Lacey), *review* by N W Pirie, 920

Variation in Lizards of the *Leiocephalus cubensis* Complex in Cuba and the Isla de Pinos (Albert Schwartz), 1107

Variation (Diurnal), of Aurora and Geomagnetic Disturbance at New Zealand Antarctic Stations (Dr T Hatherton and G G Midwinter), 889

Variation (Temperature), of the Principal Magnetic Moments of Co^{++} Ions and the Asymmetry of the Crystalline Electric Field in Cobalt Acetate Tetrahydrate (Dr Bhagawati Charan Guha), 50

Variations in Early Cleavage of the Zebra Fish (A W Marrable), 1160

Variations in the Supply of Potassium, Calcium and Magnesium Effect on the Groundnut of (Dr R Comber), 1003

Variations (Oxygen Isotope), in Antarctic Snow Samples (Dr R Gonfiantini and Prof E Picciotto), 1557

Variations (Upper Atmosphere Density), due to Hydromagnetic Heating (Dr A J Dessler), 261

Variety Trials (Agricultural) Influence of Site and Season on (A Sandison), 834

Varley, Prof G C Evolution of Host–Parasite Relationships (Host Specificity), 763
  Animal Clocks, 764
  A Controversial Equation in Population Ecology, 1583

Vascular Beds Resistance to Flow in (Harris S Burry), 453

Vascular Plants Comparative Morphology of (Adriance S Foster and Ernest M Gifford, Jr), *review* by Dr S Williams, 84

Vasicinone (A Bronchodilator Alkaloid), from *Adhatoda vasica* Nees (A H Amin and D R Mehta), 1317

Vasopressin Gel Filtration as a Method for Purification of Protein-bound Peptides as exemplified by Oxytocin and (E B Lindner, Dr A Elmqvist and Dr J Porath), 1565
  Mechanism of the Antidiuretic Effect of (Dr Tsutomu Kashiwagi), 991

Vasopressin and Oxytocin Specific and Sensitive Assay Method for, using Glass-Paper Chromatography (Akira Arimura and Prof Joseph F Dingman), 1874

Vasotocin Arginine (Active Principles for the Neurohypophysis of Cold-blooded Vertebrates), (Panayotis G Katsoyannis and Prof Vincent du Vigneaud), 1465

Vasotocin (Arginine), and Oxytocin in Neurohypophysial Extracts from Cold-blooded Vertebrates Pharmacological Evidence for the Presence of (Active Principles for the Neurohypophysis of Cold-blooded Vertebrates), (Wilbur H Sawyer, Robert A Munsick and Prof H B van Dyke), 1464

Vaughan, D J (Langford, W J, and) Separation of Polyvinyl Chloride and Polyvinyl Acetate by Chromatographic Methods, 116

Vaughan, F Clay Minerals (Dehydration Products of Kaolinite), 780

Vaurie, Dr Charles The Birds of the Palearctic Fauna—Order Passeriformes, *review* by Sir Landsborough Thomson, 666

Vaux, R Nuclear Reactors for Power Generation, *review*, 301

Večeřikova, V (Kessler, M F, and) Coal Science (Physical and Physicochemical Measurements on Cokes) 414

Vegetable Oils (Crude) Chromatographic Identification of the Antilipaemic X Factor of the Unsaponifiable Fraction of (Prof M C Nath, A Saikia and B I Uppin), 1635

Vegetable Research Station, National New Laboratory Building (J A Nelder), 1368

Vegetable Tannins The Chemistry of—Being the Papers presented at a Symposium held in the University, Cambridge, 1956, under the auspices of the Society of Leather Trades' Chemists), *review* by Dr A I Scott, 1832

Vegetation Mapping (International Society for Plant Geography and Ecology International Symposium on), B A 23

Vegetation du Congo Belge et du Ruanda-Urundi Carte des Sols et de la —6, Yangambi, Planchette 3, Lilanda, A, Sols, B, Vegetation (Notice explicative par P Gilson, P Jongen, A Van Wambeke et L Liben), (Institut National pour l'Étude Agronomique du Congo Belge), 27

Vegetation on Mars (W M Sinton), 1612

Vegetation Map of Africa (Explanatory notes by R W J Keay, with a French translation by A Aubreville), 594

Vegetation Map of Malaysia, including New Guinea (compiled by C G G J van Steenis), (Unesco), 27

Vegetative Period Redox Potentials in Soybean Nodul[illegible] during the (Dr Helena Ebertova), 1046

Vein Anastomoses in the Leaves of Long Shoots of *Ginkgo biloba* (Dr Howard J Arnott), 1336
Velardo, Prof Joseph Thomas (edited by) The Endocrinology of Reproduction, *review* by Dr T Mann, 1434
  Essentials of Human Reproduction, *review* by Dr T Mann, 1434
Vella, Dr F Heterogeneity of Human Foetal Haemoglobin—Incidence of Foetal Variants in Singapore, 272
Vellela and *Physalia* Dimorphism and Size Distribution in (Prof Robert Bieri), 1333
Velocity of Slow-Drift Solar Radio Bursts Geomagnetic Disturbance and (M B Wood and C S Warwick), 1471
Velocity of Sound in Relaxing Gases (H J Wintle), 2007
Velocity Patterns (Blood) Intravascular and Intracardiac, recorded by means of *NTC* Resistors (Dr W G Zijlstra, J R Brunsting and L B v d Slikke), 991
Venables, Dr P F R Sandwich Courses for Teaching Technologists and Technicians, *review*, 1437
Venom (Cottonmouth Moccasin), labelled with Iodine-131 Distribution in the Mouse of Lethal and Sub-Lethal Doses of (Prof J F Gennaro, jun , and H W Ramsey), 1244
Venous Anastomosis Establishment of Parenchymatous Spleno-Pulmonary (Dr George R Walker, Dr Paul Field and Dr Patrick E Conen), 703
Ventilation Heating and (British Occupational Hygiene Society Conference on), 1987
Ventricle Preparation (Rat) Potentiation of Contractions after Rest in the Isolated (Dr R L Speirs), 66
Venus Radio Echo Observations of (J V Evans and G N Taylor), 1358
Verco Medal of the Royal Society of South Australia awarded to Dr C G Stephens, 1611
Verdier, M , and others Maternal Control of Ovariole Number in the Progeny of the Migratory Locust, 103
Vereš, K , and others Influence of DL-beta-Phenylserine on the Synthesis of Proteins in *Escherichia coli*, 1895
Verlicchi, L , and others N-Substituted 7-Methoxy-8-Aminoethylchromones and Flavones—New Brain-Stem Stimulants, 362
Vermeil Medal of the City of Paris awarded to Prof Howard H Aiken, B A 16
Vermiculite Diffusion of Exchangeable Cations in (G F Walker), 1392
Vernadsky Institute, Moscow Current Geochemical work being carried out at the (Prof A P Vinogradov), 1193
Vernon, Dr E V Appointed lecturer in electronics at the University of Southampton, 595
Vernon, K C Soil and Land-Use Surveys of the Regional Research Centre of the British Caribbean, No I, Parish of St Catherine, Jamaica, 27
Vernon Prof Magdalen D Perception, Attention and Consciousness (Presidential Address to Section J (Psychology) of the British Association for the Advancement of Science), B A 45
Vernon Prize for 1960 (National Institute of Industrial Psychology), 1450
Verschuren, Jacques Exploration du Parc National de la Garamba, Mission H de Saeger, Fasc 9, Écologie et Biologie des Grands Mammifères (Primates, Carnivores, Ongulés), 155
Vertebrates Germfree—Present Status (James A Reyniers and 30 other authors), 1541
  Natriferin, a New Hormonal Principle in the Neurohypophysis of certain (J Maetz, F Morel and B Lahlouh), 1236
  Regeneration in (edited by Charles S Thornton), (Developmental Biology Conference Series, 1956, under the auspices of the United States National Academy of Sciences—National Research Council), *review* by Dr D R Neth, 839
Vertebrates (Cold-blooded) Active Principles of the Neurohypophysis of—Chromatographic and Biological Characteristics of Fish and Frog Neurohypophysial Extracts (B T Pickering and Prof H Heller), 1463 , Pharmacological Evidence for the Presence of Arginine Vasotocin and Oxytocin in Neurohypophysial Extracts from Cold-blooded Vertebrates (Wilbur H Sawyer, Robert A Munsick and Prof H B van Dyke), 1464 , Arginine Vasotocin (Panayotis G Katsoyannis and Prof Vincent du Vigneaud), 1465
  Pharmacological Evidence for the Presence of Arginine Vasotocin and Oxytocin in Neurohypophysial Extracts from (Active Principles for the Neurohypophysis of Cold-blooded Vertebrates), (Wilbur H Sawyer, Robert A Munsick and Prof H B van Dyke), 1464
Vertical Intensity (Geomagnetic), around the Magnetic Equator Possible Asymmetry in the Daily Range of the (Dr C A Onwumechilli), 51
Verulam, Lord The Brink of the Unknown (Annual Lecture of the Plastics Institute), 1688
Very Cold World, *review* by Prof J F Allen, 1260
Very High Frequency Radio Signals at Ionospheric Heights Refraction of (S Weisbrod and L Colin), 119
Very High Reynolds Number A Spectrum of Turbulence at (H L Grant, A Moilliet and Prof R W Stewart), 808
Very Low Frequency Phenomena at Godhavn, Greenland Observations of 'Whistlers' and (Eigil Ungstrup), 806
Very Low-Frequency Spectra of Atmospherics propagated through the Ionosphere (Tatsuzo Obayashi), 34
Vesicle (Seminal) Influence of Sexual Stimulation on the Metabolic Activity of Deoxyribonucleic Acid in the (Dr S R Pelc), 1414
Veterinary Association, World Establishment of a, 853
  Election of Prof W I B Beveridge as president of the Permanent Committee, 853
Veterinary College (Ontario) New Medical-Surgical Building of the, 695
Veterinary Congress The International (Dr M A Soltys), 598
Veterinary Education World Meeting on (Food and Agriculture Organization of the United Nations), 943
Veterinary Medical Association (Canadian) Eleventh Annual Convention, 695
Vibration New Techniques in the Analysis of Noise and (Acoustics Group of the Physical Society and the Institute of Physics Symposium on), 415
  Mechanical Impedance Methods in, *review* by Prof R E D Bishop, 1764
Vibrational Relaxation and Dissociation of Carbon Dioxide behind Shock Waves (Dr I R Hurle and Dr A G Gaydon), 1858
Vibrations (Mechanical) Mechanical Impedance Methods for—Colloquium presented at the Annual Meeting of the American Society of Mechanical Engineers, 1958 (edited by R Plunkett), *review* by Prof R E D Bishop, 17[illegible]
Vibrations (Rigid-Body and Internal), of Organic Molecules An X-Ray Study of (Dame Kathleen Lonsdale and Dr H Judith Milledge), 1545
Vibrations (Ultrasonic), at 10,000 Megacycles (Dr E H Jacobsen), *erratum*, 27
Vibrio metchnikovi treated with Antibody and Complement Release of Compounds containing Diaminopimelic Acid from (Dr F Shafa and Dr M R J Salton), 1341
Vicia faba L Glyceric Acid in Broad Bean (R I Morrison and Dr P C Dekock), 819
Vicia villosa Influence of Gibberellic Acid and Photoperiod on the Growth, Flowering, Nodulation and Nitrogen Assimilation of (the late Prof Margaretha G Mes), 2035
Vickers, M D (Thomas, Dr J O , and) Conversion of Ionospheric Virtual Height-Frequency Curves to Electron Density-Height Profiles (Radio Research Board, Special Report No 28), 1024
Vickery, Dr R C Synthesis of Boron Phosphide and Nitride, 268
Victoria, Australia *Sporidesmium bakeri* recorded from (B S Janes), 1327
Victorian Period Free Trade in Land in the (O R McGregor), 1916
Vida, L (Vamos, R , and) Antibacterial Substances of Coniferous Seedlings at Different Stages of their Development, 915
Vida na Lunda Flagrantes da (Introducao de Dr Jose Osorio de Oliveira), (Companhia de Diamantes de Angola, Museu fo Dundo, Publicacoes Culturais No 37), 236
View (Russian), of Space Flight, *review* by D G King-Hele, 836
Vilar, O , and others Histological Localization of Fluorescent Thyroid-stimulating Hormone in Rat Tissues, 1733
Vilim, Otakar, and others Vapour–Liquid Equilibrium (translated by G Standart), *review* by Dr R Sargent, 837
Villanueva, J R Interference by Azide with Diazotization Procedures used in Biological Assay Systems, 549
  Combined Use of Polymyxin and Acetone to obtain Cell-free Enzymes, 1565
Villela, Dr Gilberto G (Bacila, Metry, and) A Rapid and Sensitive Method for the Determination of Xanthine Oxidase Activity using the Oxygen Electrode, 1394
Vince, Dr D Elected honorary secretary of the Photobiology Group, 1362
Vincent, Prof J Distribution of Sodium in Compact Bone, as revealed by Autoradiography of Neutron-activated Sections, 1332
Vines, H M (Wedding, R T , and) Inhibition of Reduced Diphosphopyridine Nucleotide Oxidation by Ammonia, 1226
Vinogradov, Prof A P Current Geochemical Work being carried out at the Vernadsky Institute, Moscow, 1193
Vinyl Polymerizations initiated by γ-Rays A Capacitance Method for following (G J K Acres and F L Dalton), 335
Vioque, E , and others Quantitative Estimation of the Fatty Acids o Olive Oil, 1941
Viral Multiplication and Cellular Hyperplasia (Prof Councilman Morgan), 435
Virology Perspectives in—a Symposium (edited by Morris Pollard), *review* by N W Pirie, 920
Virtual Height-Frequency Curves Conversion of Ionospheric, to Electron Density-Height Profiles (Dr J O Thomas and M D Vickers), (Radio Research Board, Special Report No 28), 1024
Virulent Clones of *Fusarium oxysporum* f *cubense* A Rapid and Simple Pathogenicity Test for Detecting, using Seedlings of *Musa balbisiana* (Dr R H Stover), 1591
Virus Transmission of a, to Strawberry Plants by a Nematode (*Xiphinema* sp), (Asharfi Jha and Dr A F Posnette), 962, *erratum*, 1192
Virus of Foot-and-Mouth Disease Effect of Proflavine on the Formation of the, and its Infective Ribonucleic Acid in Pig Kidney Tissue Culture Monolayers (F Brown and Doreen L Stewart), B A 74
Virus (Arabis Mosaic) Role of a Dagger Nematode (*Xiphinema* sp) in Outbreaks of Plant Diseases caused by (Dr B D Harrison and Dr C H Cadman), 1624
Virus (Canine Distemper), in Tissue Culture An Attenuated Strain of (Prof Gunnar Rockborn), 822
Virus (Ectromelia) Transformations of Myxoma into Vaccinia or, in Tissue Culture (Hidesaburô Hanafusa, Teruko Hanafusa and Juntarô Kamahora), 1152
Virus (Herpes Simplex) Purification of, by Chromatography of Calcium Phosphate (Janice Taverne and Peter Wildy), 1655
Virus (Influenza) Serum Inhibitors of Asian Strains of (Suzanne M James and Paul Fiset), 1656
Virus (New Maize) Needle Transmission of a (Dr I Harpaz), B A 77
Virus (Parotid Tumour) (Polyoma Virus) Antibody Status of Mice and Response of their Litters to (Lloyd W Law, Clyde J Dawe, Wallace P Rowe and Janet W Hartley), 1420
Virus (Plant-) Inhibitor from Rice Chemical Nature of a (W A Jones, M Jacobson and R P Kahn), 1146
Virus (Polio) Ribonucleic Acid Infectivity of, for Embryonated Eggs and Unsusceptible Cell Lines (P De Somer, Dr A Prinzie and E Schonne), 652
Virus (Poliomyelitis) Appearance of Crystalline Needles in Monkey Kidney Cell Cultures infected with, and Incubated at 22°-30° C (Dr Esther Tenenbaum), 1657
Virus (Polyoma) (Parotid Tumour Virus) Antibody Status of Mice and Response of their Litters to (Lloyd W Law, Clyde J Dawe, Wallace P Rowe and Janet W Hartley), 1420
Virus (Rabbit-pox) Antiviral Chemotherapeutic Activity of Isatin β-thiosemicarbazone in Mice infected with (D J Bauer and F W Sheffield), 1496
Virus (Tick-borne Encephalitis) Infectious Ribonucleic Acid from Mouse Brains infected with (F Sokol, H Libikova and J Zemla), 1581
Virus (Tobacco Mosaic) Effect of Nitrous Acid on—Mutation or Selection ? (F C Bawden), B A 27
  Replication of—Kinetics of Virus Protein and Ribonucleic Acid Biosynthesis (Prof Barry Commoner, Dr James A Lippincott and Dr Janey Symington), 1992 , a Re-examination of Theories (Prof Barry Commoner), 1998
  Rotational Friction Coefficients of Models of, and the Size of the Virus Particle (Dr A J Haltner and Dr B H Zimm), 265
Virus (Tobacco Mosaic), inactivated by Antibody Recovery of Infectious Nucleic Acid from (Dr Irving Rappaport) , 1732
Virus (Vaccinia) Effect of Concentrated Urea Solutions on the Infectivity and Haemagglutinin of (Prof J F McCrea and Jean O'Loughlin), 1497

Virus (Vaccinia), Inactivated by Mercury Reactivation of (Colin Kaplan), 1074
Virus (West Nile) Duration of Protective Action of Interferon against Infection with (Dr Alick Isaacs and Marguerite A Westwood), 1232
Virus Disease of *Meloidogyne incognita incognita*, the Southern Root Knot Nematode (J R Loewenberg, T Sullivan and M L Schuster), 1896
Virus Disease (A Suspected), of the Citrus Red Mite (*Panonychus citri* (McG), (Dr Kenneth M Smith, G J Hills, F Munger and J E Gilmore), 70
Virus Growth and Variation—Ninth Symposium of the Society for General Microbiology, London, 1959 (edited by A Isaacs and B W Lacey), *review* by N W Pirie, 920
Virus-infected Plant Tissues Biochemical Mechanism of Lesion Formation in (Dr F Solymosy, Dr G L Farkas and Dr Z Kiraly), 706
Virus Multiplication Isolation of Tobacco Leaf Cells capable of supporting (Prof Milton Zaitlin), 1002
Virus Nucleoprotein Particles (Turnip Yellow Mosaic), with Differing Biological and Physical Properties (R E F Matthews), 530
Virus Particle Rotational Friction Coefficients of Models of Tobacco Mosaic Virus and the Size of the (Dr A J Haltner and Dr B H Zimm), 265
Virus Protein Kinetics of, and Ribonucletic Acid Biosynthesis (Replication of Tobacco Mosaic Virus), (Prof Barry Commoner, Dr James A Lippincott and Dr Janey Symington), 1992
Virus Research Advances in (edited by Dr Kenneth M Smith and Max A Lauffer), Vol 6, *review* by N W Pirie, 920
Viruses Recent Work on the Electron Microscopy of (Dr Kenneth M Smith), 1440
Viruses (Animal) Inactivation of some, by Hydroxylamine and the Structure of Ribonucleic Acid (Dr Richard M Franklin and Dr Eberhard Wecker), 343
Viscoelasticity A Molecular Approach to the Problem of (Prof Alfred H Nissan and H G Higgins), 1477
Viscosity (Effective) Sedimentation and (Prof G J Kynch), 1311
Visible Absorption Spectra of Copper-ethylene-diamine-*bis* (acetylacetone) in the Crystalline State (Animesh Chakravorty and Dr Sadhan Basu), 50
Vision (Spatial Detail) Measurements of Temporal Adaptation to (A, J Seyler and Z L Budrikis), 1215
Vistas in Astronautics—First Annual Air Force Office of Scientific Research Astronautics Symposium (edited by Morton Alperin and Marvin Stern), *review* by D G King-Hele, 663
Visual Cortex of the Unanaesthetized Cat Evoked Potentials in (Gabriel Horn and John Blundell), 173
Visual Illustration of University Lectures (British Universities Film Council Discussion on), 515
Visual Pigments of some Common Laboratory Mammals (Dr C D B Bridges), 1727
Visual Space Possible Role of Higher Proprioceptive Centres in the Perception of, and in the Control of Motor Behaviour (Dr B Gurevitch), 1219
Visual Spatial and Temporal Summation (Dr Ernest Baumgardt), 1951
Visualization of Acid and Alkaline Phosphatase after Starch-Gel Electrophoresis of Seminal Plasma, Serum and Bile (Dr Bengt Estbörn), 1636
Visualization of Magnetic Processes (Prof L F Bates), B A 41
Vitamealo Fellowship of the Animal Health Trust awarded to D B Ross, 771
Vitamin A in Fish Liver Oils Isomers of (Patricia S Brown, William P Blum and Max H Stern), 1377
Vitamin A Storage in the White Rat Effect of 'Amino-Acid Imbalance' on Growth and (M Rechcigl, jun , S Berger, J K Loosli and H H Williams), 1404
Vitamin B_{12} New Antimetabolites from (G H Timmis and Dr S S Epstein), 1383
Vitamin B_{12} Absorption in the Rat Effect of Ethylenediamine Tetraacetate on (Edward G Rice, Dr Samuel M Greenberg, John F Herndon and E J Van Loon), 1948
Vitamin B_{12} Content of Ewes' Milk Effect of Cobaltic Oxide Pellets on the (L I Hart and E D Andrews), 1242
Vitamin C Estimation of, by Agar Diffusion (Alan H Chaiet and Louis Chaiet), 1487
Vitamin D Effect of, on the Respiration of Rat Oral Tissue (L Zar and Prof J T Irving), 1410
Vitamin E Curative Effect of Selenium upon the Incisor Teeth of Rats deficient in (Prof J T Irving), 645
An Effect of Selenium and Cystine on Lipide Peroxidation in Tissues Deficient in (Dr John G Bieri), 1148
Ubiquinone and (Dr Thomas Moore), 607
Vitamin K An Antimetabolic Action of (Prof E Quagliariello, C Saccone, E Rinaldi and M R Alioto), 820
Vitamins (Indian Institute of Science Symposium on), 1367
B Vitamins in Man Effect of Sorbitol on the Urinary Excretion of some (J D Watson and Prof John Yudkin), 911, *errata*, 1362
Vitousek, Dr M J (Mason, Dr R G , and) Some Geomagnetic Phenomena associated with Nuclear Explosions, B A 52
Vivants (Etres) Causes de la Répartition des (Raymond Furon), *review* by Prof Ronald Good, 390
Viviparous Deep-Sea Jellyfish (Dr F S Russell), 1527
Vivipary in *Eleusine indica* (L) Gaertn (H T Clifford), 1888
Vlassov, Dr N Nuclear Forces and the Few-Nucleon Problem (Binding Energies and Elastic Scattering of Light Nuclei at Low Energies), 1114
Vlitos, Dr A J The Central Agricultural Research Station, Carapichaima, Trinidad, 331
Vlitos, Dr A J , and Crosby, Dr D G Isolation of Fatty Alcohols with Plant-Growth Promoting Activity from Maryland Mammoth Tobacco, 462
Vocational Education (Technical and), in the U S S R (M I Movšovič), 504
Vogt, G S (George, II , L A , and) Electron Microscopy of Autoradiographed Radioactive Particles, 1474
Vogt, Dr Marthe Biosynthesis and Secretion of Adrenocortical Steroids, 417
Curare and Curare-like Agents, *review*, 1093
Acetophenetidin, *review*, 1349
Voipio, Dr A Polar Front Survey (Hydrography—Chemistry of the Barents Sea Water), 1181
Voisin, André Grass Productivity (translated from the French by Catherine T M Herriot), *review* by Dr W Davies, 1675
Volatile Compounds on Gas–Liquid Chromatography Columns Unexpected Formation of (C Weurman and J Dhont), 1480
Volatile Fatty Acid Relationship between *p*H and, and Diversion of Saliva from the Actively Fermenting Rumen of Sheep (W R McManus), 1572
Volatile Liquid Partition Chromatography (Dr Roger S Porter and Dr Julian F Johnson), 978
Volatile Methoxides of Aluminium and Zirconium (Dr D C Bradley and Dr M M Faktor), 55
Volcanic Activity on the Moon (N A Kozyrev), 856
Volcanic Rocks (Cenozoic), in New Zealand Palaeomagnetic Studies of (Dr D S Coombs and Dr T Hatherton), 883
Volcanoes on the Moon (Dr Maurice W Windsor), 1556
Volf, Dr V Attempts to Modify the Normal Metabolism of Strontium-90 in Rats, 1401
Volger, Dr H C Awarded a Netherlands Fellowship in Chemistry for 1959-60 by the Ramsay Memorial Fellowships Trustees, B A 16
Voltage (High-) Paper Electrophoresis of Aliphatic Amines and related Compounds (Dr D Gross), 1633
Voltage (High-) Paper Electrophoresis (Two-Dimensional), of Amino- and other Organic Acids (Dr D Gross), 1298
Voltage (Low-) Arcs Emission of Relatively High-Energy Ions from (E R Harrison), 245
Voltmeter A New Multi-range, 'Taylormeter Model 100*A*' (Taylor Electrical Instruments, Ltd), 1026
Volume (Number and), of the Islets of Langerhans in Different Size Classes in Non-diabetic Humans of Varying Ages Actual Distribution of the (Bo Hellman), 1498
Volume (Target) of Enzyme Induction X-Ray Sensitivity and (Dr Helmut Pauly), 1570
von Bertalanffy, Dr Ludwig The Road to Knowledge (Role of Theoretical Biology in Integrative Sciences), B A 7
von Engel, A Thermonuclear Research (Shock Waves in Gases), 1017
von Euw, J , and others 3,4,ω-Trihydroxyacetophenone 3-methyl Ether in Adrenal Extracts, 268
von Karman, Dr Chemistry of Propellants, 779
Basic Problems in Propulsion, 779
von Kaulla, Dr Kuro N Urokinase-Induced Fibrinolysis of Human Standard Clots, 1320
von Magnus, Dr Preben, and others Statement on Biological and Chemical Warfare, 1018
von Mises, Richard Mathematical Theory of Compressible Fluid Flow (completed by Hilda Geiringer and G S S Ludford), *review* by Dr W P Jones, 485

WACKER, Dr W E C , and Vallee, Dr B L Chromium Ribonucleoprotein from Bovine Liver, 1399
Waddington, Dr C J Photography in the International Geophysical Year (Study of the 'Footprints' of Cosmic Ray Particles), 1032
Appointed lecturer in physics at the University of Bristol, 1613
Wadso, I Thermodynamics (Experimental Thermochemistry), 1607
Wagner, W Thermodynamics (Experimental Thermochemistry), 1607
Waid, J S Availability of Plant Nutrients (Probable Parts played by Micro-organisms), 160
Wain, Prof R L Plant Growth Substances, *review*, 925
Wain, Prof R L , and others Plant Growth Regulation (Metabolism of Indole Auxins in Plants), 599
Occurrence of 3-Indolylacetic and 3-Indolecarboxylic Acids in Tomato Crown-Gall Tissue Extracts, 825
Wain, Prof R L (Taylor, H F , and) α-Oxidation of Indoleacetonitrile, 1142
Waismann, F Turning Points in Physics (The Decline and Fall of Casuality), *review* by G R Noakes, 1090
Wakelam, J A , and Jaffe, W P Unidentified Chick Growth Factors, 272
Wakelam, J A and others Unidentified Growth Factors, 271
Wakonig, R , and others Chromosome Complement of Spontaneous Leukaemia in *AKR* Mice, 998
Waksmundzki, Andrzej, and Soczewinski, Edward A Paper-Chromatographic Method for the Determination of Suitable Buffer Systems for Countercurrent Distribution, 977
Wald, Prof George Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures—Discussion, 620
Wald, Prof George, and others Photochemical and Stereochemical Properties of Carotenoids at Low Temperatures—*Cis-trans* Isomerism and Steric Hindrance, 617
Waldhauer, Fred D , and others Transistor Electronics, *review* by J W R Griffiths 838
Waldmann-Meyer, H Paper Electrophoretic Patterns obtained by Paraffin-Oil Fixation, 1567
Wales (England and) Marital Fertility in (Prof E Grebenik), 1035
Ninety-fifth Report (1958) of the Chief Inspector on Alkali, etc , Works in, 940
Statistical Review of, for the Year 1957, Part 2, Tables, Civil (Registrar General), 1107
Walford, Dr Lionel A Living Resources of the Sea, *review* by Dr F S Russell, 129
Walker, Dr Dorothy, and others Urinary Excretion of β-Amino-isobutyric Acid in Mongolism, 1970
Walker, Dr D G , and Bowman, Dr J E Glutathione Stability of the Erythrocytes in Iranians, 1325
Walker, Dr D J Blood Acetylcholinesterase in *Phalaris* Staggers, 1411
Walker, Dr F Appointed senior lecturer in geology at Queen's College, Dundee, 684
Walker, G F Diffusion of Exchangeable Cations in Vermiculite, 1392
Walker, Dr George R , and others Establishment of Parenchymatous Spleno-Pulmonary Venous Anastomosis, 703
Walker, Dr J Nuclear Technology and the Scholarly Tradition, *review*, 1973
Walker, Dr P M B Awarded a grant of £5,900 by the Paul Instrument Fund Committee of the Royal Society, 507
Walker, Prof R Milnes Appointed a member of the Medical Research Council, 772

Walker, Prof T K Obituary of Dr Maurice Copisarow, 315
Walkinshaw W Promoted to Deputy Chief Scientific Officer in the Scientific Civil Service, 859 , work of, 859
Wall, Dr C G Appointed lecturer in chemical engineering at the University of Birmingham, 1915
Wall, E T (Davies, Dr D Roy, and) Separation of Gamma-Irradiation of Two Elements at the Vby Locus in *Trifolium repens*, 1957
Wall, Victor From Man Power to Atomic Power (Christmas Lecture at the Science Museum, London), 1535
  The Story of Flight (Christmas Lecture at the Science Museum, London), 1535
Wall of the Gastro-intestinal Tract of the Infant Rat Passage of Insulin through the (Dr B Mosinger, Z Placer and O Koldovsky), 1245
Wall of Small Blood Vessels in Human Multiform Gliobastoma Electron Microscopical Structure of the (Dr S H M Nystrom), 65
Wallpaintings (English) The Conservation of—being a Report of a Committee set up by the Central Council for the Care of Churches and the Society for the Protection of Ancient Buildings, 1119
Wallace, Dr F J Appointed lecturer in mechanical engineering at the University of Birmingham, 684
  Appointed senior lecturer in mechanical engineering at Queen's University, Belfast, 1613
Wallace, Dr J F Appointed senior Research Fellow in mechanical engineering at the University of Sheffield, 684
Wallace, Dr John H , and others Maintenance of Parathyroid Tissue Fragments on Agar Substrates, 1734
Wallace, W E Thermodynamics (Phase Changes in Condensed Systems), 1609
Waller, Prof R D After Work—Leisure and Learning in Two Towns, 1034
Wallgren, Henrik Sex Difference in Ethanol Tolerance of Rats, 726
Wallis, Dr F S Retirement from the directorship of the Bristol City Museums, 1685 , work of, 1685
Walls of *Bacillus subtilis* Structure of Teichoic Acid from the (Teichoic Acids from Bacterial Walls), (J J Armstrong, Prof J Baddiley and Dr J G Buchanan), 248
Walls (Bacterial) Composition of Teichoic Acids from a Number of (Teichoic Acids from Bacterial Walls), (J J Armstrong, Prof J Baddiley; Dr J G Buchanan, A L Davison, M V Kelemen and F C Neuhaus), 247
  Teichoic Acids from—Composition of Teichoic Acids from a Number of Bacterial Walls (J J Armstrong, Prof J Baddiley, Dr J G Buchanan, A L Davison, M V Kelemen and F C Neuhaus), 247 , Structure of Teichoic Acid from the Walls of *Bacillus subtilis* (J J Armstrong, Prof J Baddiley and Dr J G Buchanan), 248
Walmsley, V G , and others A Revised Classification of the Ludlovian Succession at Ludlow, 1037
Walsh, A At the Second Australian Spectroscopy Conference (Present Status of Emission and Atomic Absorption Spectroscopy), 1197
Walsh, A (Gatehouse, Dr B M , and) At the Second Australian Spectroscopy Conference (Direct Analysis of Metals and Alloys), 1197
Walsh, Dr J R , and others At the Second Australian Spectroscopy Conference (Polarized Visible Spectrum of Single Crystals of Phthalocyanine), 1196
Walsh, Dr J W T First award of the Gold Medal of the Illuminating Engineering Society made to, 1106 , work of, 1106
Walsh, Dr R J (Clark, Peggy, and) Synthesis of Haem by Circulating Blood Cells, 1730
Walsh, Dr T Appointed director of An Foras Taluntais (The Agricultural Institute), Dublin, 29 , work of, 29
Walter, Harry, and others Enzymes and Radioactivity in Erythrocytes of Different Ages, 643
Walter, N M , and others Liquid Crystal Systems from Fibrillar Polysaccharides, 632
Walther, Alwin Awarded a Silver Medal of the City of Paris, B A 16
Walton, G N (edited by) Glove Boxes and Shielded Cells for Handling Radioactive Materials—a Record of the Symposium on Glove Box Design and Operation held in the Cockcroft Hall, A E R E , Harwell, 1957, *review*, 1599
Walton, W H Heating and Ventilation, 1987
Wandless, A M, and Fenton, G W Coal Science (Carbonization—Coking Tests on Coals of 84, 85 and 87 per cent Carbon Content), 413
Wang, Dr Hao Formalization of Constructive Concepts, *review*, 1435
Wang, Shih Yi Ultra-violet Irradiation of 1,3-Dimethylthymine, B A 59
  Photoautomerization of Cytosine Derivatives on Ultra-violet Irradiation, 184
Wansbrough-Jones, Sir Owen Resignation as chief scientist to the Minister of Supply, B A 13 , work of, B A 13
War (World), II , Surgery in, Neurosurgery, Vol I (Colonel John Boyd Coates, editor-in-chief), *review* by J E A O'Connell, 1676
Warburg, Dr E F , and others Excursion Flora of the British Isles, *review* by P Falk, 1093
Warburg's Equation Application of, to Tissue Slices (Dr I S Longmuir and Dr Ann Bourke), 634
Warcup, J H Isolation of Basidiomycetes from the Soil, 506
Ward, Alan G The British Gelatine and Glue Research Association, 862
Ward, A L , and Reddan, M J Ionization Phenomena in Gases (Way in which Space Charge influences the Current Growth to give the observed Voltage-Current Density Characteristics), 1354
Ward, Prof S G Crushing and Grinding, *review*, 1177
  Second Symposium on Coal Preparation, *review*, 1601
Ward, Prof S G (Lawson, G J , and) Coal Science (Chemical Reactions of Coal—Chromatographic Separation of Oxidation Products of Coal), 413
Wardlaw, Prof C W Coconuts, *review*, 1760
Wardrop, A B Cell-Wall Formation in Root Hairs, 996
Wardrop, I D , and others Cause of Wear in Sheeps' Teeth, 1583
Ware, A A Thermonuclear Research, 1015
Ware, Dr G C (Van Horn, Elizabeth, and) Growth of *Bacterium coli* and *Staphylococcus albus* in Heavy Water, 833
Wareing, Prof P F (Longman, Dr K A , and) Early Induction of Flowering in Birch Seedlings, 2037
Warfare (Biological and Chemical) Pugwash International Conference of Scientists—Statement on, 1018
Warhurst Alan Appointed director of the Bristol City Museums, 1686 , work of 1686
Warner Medal of the Textile Institute awarded to Dr Margaret Hannah, 26
Warrell, D W Appointed lecturer in obstetrics and gynaecology at the University of Sheffield, 410

ZAANEN, Prof Adriaan C An Introduction to the Theory of Integration, *review*, 574
Zacharias, B , and others Affinity of Lysozyme to Structural Elements of the Bacterial Cell as studied with Enzyme Labelled with Radioactive Iodine, 1744
Zaher, Dr M A , and Moussa, Dr Moufied A Relationship between Larval and Pupal Periods of some Lepidopterous Insects, 288
Zahn, Dr Rudolf K A Biological Action of Deoxyribonuclease I on the Growth of *Euglena gracilis*, 1324
Zahngewebe des Menschen und der Wirbeltiere im Polarisationsmikroscop Die gesunden und die erkrankten (Prof W J Schmidt und Dr A Keil), *review* by Prof A I Darling, 218
Zahradník, Rudolf An Attempt at Calculating the Taft's-Constants σ*, 1865
Zaitlin, Prof Milton Isolation of Tobacco Leaf Cells capable of Supporting Virus Multiplication, 1002
Zaitsev, Dr G N , *et al* Polar Front Survey (Hydrography—Greenland and Norwegian Seas), 1181
Zakrzewski, J T , and Mehrtens, D H Use of the Silicon Resistor in the d c Stabilization of Transistor Circuits, 811
Zamenhof, Prof Stephen (Ephrati-Elizur, Dr Erela, and) Incorporation of 5-Bromouracil into Transforming Principle of *Bacillus subtilis* and its Biological Effects, 472
Zanandrea, Dr Giuseppe Speciation among Lampreys, 380
Zangwill, Prof O L Perception and Learning, *review*, 1523
Zar, L , and Irving, Prof J T Effect of Vitamin D on the Respiration of Rat Oral Tissue, 1410
Zarek, Dr J M Biomechanics 512
Zawels, Jakob, and others Transistor Electronics, *review* by J W R Griffiths, 838
Zea mays L in Canada Isolation of the Antifungal Substance, 6-Methoxybenzoxazolinone, from Field Corn (N J Whitney and C G Mortimore), 1320
Zebra Fish Variations in Early Cleavage of the (A W Marrable), 1160
Zebu Cattle β-Globulin Alleles in some (G C Ashton), 1135
Zeitlin, Dr R A Blood Group Methods and Techniques, *review*, 130
Zelikoff, M (edited by) The Threshold of Space—the Proceedings of the Conference on Chemical Aeronomy, sponsored by the Geophysics Research Directorate, Air Force Cambridge Research Center, Cambridge, Mass , 1956, *review*, 1011
Zelnicek, Dr E α-Ketoglutaric Acid and Pyruvic Acid in Blood, Cerebrospinal Fluid and Urine, 727
Zemla, J , and others Infectious Ribonucleic Acid from Mouse Brains infected with Tick-borne Encephalitis Virus, 1581
Zenith Reactor at Winfrith Heath (United Kingdom Atomic Energy Authority), 680
Zenneck, Prof J *Obituary* by Dr R L Smith-Rose, 1188
Zero Gradient Synchroton at Argonne National Laboratory, 503
Zijlstra, Dr W G , and others Intravascular and Intracardiac Blood Velocity Patterns recorded by means of *NTC* Resistors, 991
Zimm, Dr B H (Haltner, Dr A J , and) Rotational Friction Coefficients of Models of Tobacco Mosaic Virus and the Size of the Virus Particle, 265
Zimmer, K G Biological Effects of Low Doses of Ionizing Radiations (Review of certain Aspects of Quantitative Radiobiology), 1111
Zimmermann, Prof K At the Conference of the Mammal Society of the British Isles (Rodents collected in China), 30
Zinc Effect of Iron and, on Nucleic Acid and Protein Synthesis in *Mycobacterium smegmatis* (Frank Winder and Joan M Denneny), 742
Zinc Oxide Effect of Gamma-Radiation on the Synthesis of Methanol over (T I Barry and R Roberts), 1061
Zinc Phosphide Particles Absorption of (Dr A S Curry, Dr D E Price and Dr F G Tryhorn), 642
Zinc Single Crystals Fatigue-Induced After-Effect in (A H Meleka and G B Dunn), 896
Zinc and Radiozinc Behaviour of, in Tumour-bearing Rats (Dr D M Taylor), 1649
Zirconium Volatile Methoxides of Aluminium and (Dr D C Bradley and Dr M M Faktor), 55
Zischka, W , and others Production of Serum Albumin and of Globulins by Chick Mesenchymal Tissue and by HeLa Tumour Tissue in Culture, 361, *erratum*, 943
Zlatkis, Prof Albert, and Kaufman, H R Use of Coated Tubing as Columns for Gas Chromatography, 2010
Zone Lenses Deviation of, produced by Polarization (Prof Jurgen R Meyer-Arendt), 811
Zone-Refined Lead Recrystallization of (G F Bolling), 718
Zones (Electrophoretic), in Agar Gel Direct Spectroscopic Examination of (Dr G H Beaven and W B Gratzer), 359
Zoogeography, Phytogeography and Geology Panbiogeography, or an Introductory Synthesis of (Dr Leon Croizat), Vol 1, The New World , Vol 2a, The Old World , Vol 2b, The Old World (continuation), *review* by Prof Ronald Good, 924
Zoological Nomenclature, International Commission on Given accommodation in the British Museum (Natural History), 156
Zoological Society of London Christmas lectures, 1535
Zoological Survey of Madagascar (Dr Renaud Paulian), 1387
Zsifkovits, St , and others Effect of Sexual Maturation and Castration on the Sex Chromatin Pattern in the Male Rat, 1239
Zsoldos, F Quantitative Changes in γ-Aminobutyric Acid induced by Low Temperature in Rice Plants, 280
Zuckerman, Sir Solly Liberty in an Age of Science, 135
  Appointed chairman of the Committee responsible for controlling Government-financed scientific research and development, 684
  Appointed scientific adviser to the Ministry of Defence, 1105 , work of, 1105
Zuelzer, Dr W W , and others Separation of Fast-Moving γ-Globulins by Starch-Gel Electrophoresis, 1800
Zumpt, Dr F Is the Multimammate Rat a Natural Reservoir of *Borrelia duttoni*?, 793
Zurn, L (Kersten, Helga, and) Hydroxylysine in Wool, 1490
Zweig, Gunter, and others A Manual of Paper Chromatography and Paper Electrophoresis, second edition, *review* by Dr R Consden, 1436
Zwell, L , and others X-Ray Diffraction Pattern of Carbide in Low-Carbon Iron-Silicon Alloys, 1862
Zwilling, Dr Edgar Appointed to serve a three-year term on the Embryology and Development Training Committee, administered by the Division of General Medical Sciences of the National Institutes of Health, United States Public Health Service, 1986
Zwilling, Dr Edgar, and others Limb Development in the Absence of Ectodermal Ridge, 1736
Zydowo, Dr M Deaminases of Adenylic Acid and Adenosine in Rat Kidney, 1641
Zygmund Prof A Trigonometric Series, second edition, *review* by Prof T A A Broadbent, 1176
Zygmunt, Irena (Mizgalski, Dr Wizold, and) Effect of Ultrasound on the Protein of Human Serum Denatured with Tannin, 1486
